Note:

All work will be done with great attention & Handouts will be at much lower price than Campus/Market.

- Some other important treatments of language learning strategies are to be found in **Cohen (1998)** and **Wenden & Rubin (1987)**.
- Gardner and various colleagues proposed the **socio-educational** model of language learning which presents two kinds of motivation: integrative and instrumental.
- **Integrative** motivated students are more successful language learners than the others.
- Clement et al. (1994) identified **five** orientations of foreign language learners.
- **Dec and Ryan's (1985)** model distinguishes between intrinsic and extrinsic motivation. Within the area of expectancy, **two** key theories stand out: **wiener's (1986)** attribution theory, and **Bandar's (1997)** self-efficacy theory.
- According to **Eccles (1984)** and **Wig field (1994)** motivation is based on how much students expect to succeed at a task; and how much they value that success.
- The '**process model**' of motivation holds teachers responsible for student motivation however; it does not let students off the hook.
- Canadian researchers **Jim Cummins 1981** formally defined the two aspects as basic interpersonal for the sake of simplicity.
- Children learn SL quickly and easily as their brains are more **flexible**.

- Communication skills (**BICS**) and cognitive academic language proficiency (**CALP**)
- **Primary** function of communication is to maintain good human relationships.
- Their passiveness is interpreted as a sign of respect within the **Japanese frame** and as a sign of indifference within the **western frame**.
- Students need to learn both the linguistic and cultural **norms**.
- ❖ **The performance domain raises the consciousness of the learners to gear them toward better (performance).**
 - This (**domain**) is expected to reduce chances of fossilization
 - It simplifies the task and ensures (**focus on**) goal.
 - According to (**Hawkin**), assigning a role to L1 in L2 learning provides the learners with the opportunity to view language objectively as a (**phenomenon**).
 - How languages operate in a (**society**) and allow them to know what they can do with language.
 - The development of sensitivity and is a (**step**) toward understanding the functioning of languages across cultures.
 - The debate about L1's role continues though in (**cognitive**) rather than behaviorist terms.
 - The use of L1 in L2 (**classrooms**) has been appraised as too complex for learners, Requiring them to operate in (**two**) different ways.
 - It has been argued that frequent resource to L1 would (**lead to**) slower L2 learning However, stopping the flow of L1 (**information**) and thoughts is **not possible**,
 - It is argued that focus on form and (**consciousness-raising**) could lead to cognitive development and better L2 performance.
 - It has been observed that the (**learners**) have a very strong association with their native culture even after spending decades in another country.
 - Ignoring this cultural bond can only add problems for (**L2 learners**.)
 - (**Bilingual medium**) oriented strategies must be not only allowed.
 - Actively encouraged to ensure real (**communicative**) competence.
 - (**Inter- relationship**) between L1 and L2 lies at a much deeper level than surface or even near surface categories.
 - (**Learners**) must not be deprived of the opportunity to use their language.

- They should be encouraged to (**exploit**) the richness of bilingualism by developing Connections.
- ❖ **Cultural association, and cross-Linguistic (reference) for knowledge building.**
 - It has (**analyzed**) the issue from dual theoretical perspectives.
 - (**Sociocultural**) theory and language awareness pedagogical theory.
 - It argues that L1 can be positively utilized to play a (**significant**) role in L2 learning.
 - The use must be pre-planned; its effective role is acknowledged by the sociocultural and (**LA theorists**).
 - It is said to be related to affective, cognitive, social, power, and performance (**domain**).
 - The issue must be (**discussed**) at length in teacher education programmers.
 - Teacher to move beyond Mere (**methodological**) and procedural knowledge.
 - Teachers also need to identify with the struggle and strengths of their learners for (**meaningful**) relationships and enhanced L2 learning outcomes.
 - Some students learn (**a new language**) more quickly and easily than others.
 - The factors (**influencing**) their success are categorized as internal and external.
 - It is their complex (**interplay**) that determines their learning speed and facility.
 - The internal factors include age, personality, motivation (**intrinsic**), experiences, cognition, and L2's similarity to their native language.
 - Use learning style research with personality and cognitive styles to (**determine ability**) predict performance.
 - The terms learning style, cognitive style, personality type, sensory preference and (**modality**) etc.
 - In recent years, the influence of personality variables on learning styles has (**increased**) greatly.
 - Recently preferred models include (**Multiple**) Intelligences Model.
 - (**4-MAT Model**), Kolb's Jung-based Model, and Stenberg's Mental Self-government Model
 - **Ehrman and Leaver (2001-2003)** have reorganized the scales for cognitive styles like random sequential.
 - Eherman-defined field (in) dependence/field sensitive styles under the (**new comprehensive**) construct.
 - (**An actinic**) learner wants or needs conscious control over learning process. A **synoptic learner** leaves more to preconscious or (**unconscious**) processing.
 - Learning styles and strategies are often interrelated. Styles are made manifest by strategies; strategy is neither good nor bad. It is essentially neutral.
A strategy is useful under these **three** conditions.

-
- In **language-learning field**, definitions of strategies (**imply**) conscious movement toward a language goal.

Best of Luck to all students 😊
Remember our whole staff in your prayers 💙
