1. Rowlett Act 1919:

The Rowlett Act of 1919, officially known as the “An Act to Make Certain Transmissions of Intelligence Unlawful,” was a piece of legislation passed by the United States Congress. It authorized the U.S. government to intercept and decrypt certain telegraphic communications. The Act marked one of the first instances of the U.S. government engaging in cryptographic surveillance, which later evolved into modern signals intelligence operations.

2. Article 19:

Article 19 is a fundamental human rights provision that is part of the Universal Declaration of Human Rights. It states that “Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive, and impart information and ideas through any media and regardless of frontiers.” This article underscores the importance of freedom of expression and information dissemination in fostering democratic societies.

3. 2 Uses of Computers in World War 2:

- a. Code Breaking: Computers were used to aid in code-breaking efforts, such as the famous British project at Bletchley Park that successfully decrypted German Enigma machine-encoded messages.
- b. Ballistic Calculations: Computers were used to perform complex ballistic calculations, aiding in the trajectory predictions for artillery and missile systems.

3. Television’s Role in World War 2:

Television played a limited role during World War 2 due to its relatively nascent state at the time. Newsreels and propaganda films were produced for screening in movie theaters, but live television broadcasts of the war were not common. Television technology and infrastructure were not yet advanced enough to provide widespread coverage of the war.

4. Current Affairs on Radio:

Radio stations often broadcast current affairs programs that provide updates on national and international news, politics, economics, and social issues. These programs serve as a means for people to stay informed about important events and developments.

5. Why Producers Stopped Giving Advertisements in Newspapers:

Producers may have reduced their advertising in newspapers due to the changing media landscape. As digital platforms, social media, and online advertising became more prevalent, advertisers shifted their focus to reach a wider and more tech-savvy audience. Newspapers faced declining readership and revenue, prompting advertisers to explore more effective and modern advertising channels.

6. How Globalization Has Affected Our Culture:

Globalization has significantly impacted culture by facilitating the exchange of ideas, information, and cultural practices across borders. This has led to greater cultural diversity, exposure to different perspectives, and the fusion of various traditions. However, it has also raised concerns about cultural homogenization and the potential loss of local traditions in the face of global influences.

7. Modern World Wars Fought with Military and Media:

Modern world wars are characterized by the intersection of military actions and media coverage. The media plays a crucial role in shaping public opinion, disseminating information, and influencing international perceptions of conflicts. For example, the Vietnam War saw extensive media coverage that brought the harsh realities of the conflict to the forefront, influencing public sentiment and political decisions. The media's portrayal of the war had a significant impact on public opinion and contributed to anti-war movements.
