

EDU406

1. **Reflective Practice (RP):** A process of thinking critically about one's teaching methods and actions to improve and evolve as a teacher.
2. **Critical Thinking:** Analyzing and evaluating ideas or actions logically to understand their effectiveness or validity.
3. **Retrospection:** Thinking back on a situation to analyze its elements and outcomes.
4. **Self-Evaluation:** Critically assessing one's actions, feelings, and outcomes using theoretical perspectives.
5. **Re-Orientation:** Using self-evaluation results to influence future approaches or practices.
6. **Critical Reflection:** A process that integrates critical thinking and self-analysis to address issues and generate solutions.
7. **External Constraints:** Factors in the environment, such as policies or societal norms, that influence reflective practices.
8. **Reflection-in-Action:** Reflecting on one's actions while performing them.
9. **Reflection-on-Action:** Reflecting on one's actions after they have occurred.
10. **Critical Philosophy:** Viewing teaching as a form of social interaction influenced by power, misunderstandings, and social norms.
11. **Hermeneutic Phenomenological Analysis:** Interpreting experiences to understand phenomena beyond previous assumptions.
12. **Ethnomethodology:** Examining routine social behaviors to uncover implicit assumptions.
13. **Discursive Analysis:** Investigating how speech and text construct societal truths.
14. **Cycle of Critical Analysis:** Applying theory to practice and iterating through problems to refine approaches.
15. **Information Needs Cycle:** Identifying questions, mapping solutions, sourcing information, and applying findings in practice.
16. **Mapping:** Identifying conceptual pathways for understanding or resolving an issue.
17. **Socratic Method:** A questioning technique aimed at exploring beliefs, testing assumptions, and uncovering deeper truths.
18. **PAPER CLIP:** A mnemonic for systematic questioning—Precision, Accuracy, Perspective, Equity, Relevance, Complexity, Logic, Importance, Perspicuity.
19. **Socialization (SECI Cycle):** Sharing tacit knowledge through interactions to clarify understanding.
20. **Externalization (SECI Cycle):** Making tacit knowledge explicit through communication.
21. **Combination (SECI Cycle):** Integrating explicit knowledge to form new frameworks or insights.
22. **Internalization (SECI Cycle):** Applying combined knowledge to practice, turning it into tacit understanding.
23. **Practice Episodes:** A reflective cycle involving intentions, actions, and outcomes in teaching.
24. **Antecedents:** Contextual factors like culture and pedagogy influencing practice episodes.

25. **Teacher Growth Model:** A framework emphasizing multi-faceted learning through research, capacity building, and practical experience.
26. **Communities of Practice (CoPs):** Collaborative environments where teachers share knowledge and solve problems collectively.
27. **Best Practice in CoPs:** Sharing effective teaching strategies to standardize excellence.
28. **Knowledge Stewarding:** Managing and organizing knowledge within a community for collective benefit.
29. **Innovation in CoPs:** Developing new ideas and practices collaboratively.
30. **Teacher Professionalism:** Integrating theory, practice, and reflection to improve teaching quality.
31. **Knowledge for Practice:** Foundational knowledge acquired through education and research.
32. **Knowledge in Practice:** Practical teaching knowledge developed through experience.
33. **Knowledge of Practice:** A critical perspective combining theory and experience.
34. **Lifelong Learning:** The continuous process of skill and knowledge development throughout a teacher's career.
35. **Dispositions:** Attitudes and beliefs, such as open-mindedness and cultural awareness, essential for teaching.
36. **Critical Incidents:** Specific events used as focal points for reflection and analysis.
37. **Metacognition:** Reflecting on one's thought processes to enhance learning and teaching effectiveness.
38. **Open-Mindedness:** An attitude that values diversity and recognizes the two-way learning process in teaching.
39. **Responsibility:** Teachers' accountability for their actions and their impact on students.
40. **Engagement (Whole-heartedness):** Curiosity and dedication to improving teaching and learning.
41. **Reflective Wisdom:** Evolving understanding gained through ongoing reflection.
42. **Cultural Awareness:** Recognizing and valuing diversity in educational contexts.
43. **Competency Framework:** A structure guiding professional development in teaching.
44. **Innovation Goals:** Objectives aimed at introducing change and fostering growth.
45. **Scholarly Inquiry:** Researching and exploring trends to inform teaching practices.
46. **Teacher Identity:** A self-concept developed through reflection, knowledge, and interaction with educational contexts.
47. **Critical Emancipatory Reflection:** Addressing and correcting ineffective practices by identifying inconsistencies.
48. **Action Research:** Research conducted by teachers to address practical issues and improve their methods.
49. **Teacher Collaboration:** Working with peers to share experiences and enhance practices.
50. **Dialogical Reflection:** Reflective practices facilitated through dialogue with others.
51. **Knowledge Integration:** Combining theoretical and practical insights for effective teaching.
52. **Technological Integration:** Using modern tools to enhance reflective practice and classroom learning.
53. **Organizational Management:** Strategies for effectively managing classrooms and teaching resources.
54. **Critical Success Factors in CoPs:** Elements like shared knowledge and reduced learning curves that ensure effective collaboration.

55. **Modeling and Concept Mapping:** Tools for organizing and understanding knowledge relationships.
56. **Statistical Analysis in RP:** Using data-driven approaches to evaluate teaching practices.
57. **Design as Knowledge Generation:** Developing educational artifacts to embed and apply knowledge.
58. **Mutual Relationships:** Beneficial interactions that nurture professional growth.
59. **Contextually Aware Relationships:** Understanding the influence of context on teacher-student interactions.
60. **Knowledge Communication:** Using effective verbal and written methods to share and develop teaching insights.
61. **Critical Enquiry:** Investigating teaching practices through reflective and critical analysis.
62. **Reflection with Action:** Analyzing how immediate teaching actions affect outcomes in real time.
63. **Cognitive Links:** Connections formed between theoretical knowledge and practical applications.
64. **Improvement Proposals:** Suggestions to address identified issues in reflective practice.
65. **Bias Awareness:** Recognizing personal and contextual biases that influence teaching and reflection.
66. **Learning Situations:** Framing challenges as opportunities for professional growth and learning.
67. **Hypothesis Testing:** Experimenting with ideas to validate or refine teaching strategies.
68. **Socratic Attitude:** Adopting an open, questioning mindset to explore and challenge ideas.
69. **Constructive Reflection:** Replacing flawed thinking with logical and evidence-based reasoning.
70. **Social Discussion in RP:** Engaging in collaborative dialogue to enhance reflective insights.
71. **Interpersonal Skills:** The ability to build meaningful and productive relationships with students and colleagues.
72. **Peer Collaboration:** Sharing expertise and feedback within a group to refine teaching practices.
73. **Best-Practice Sharing:** Disseminating effective methods to raise overall teaching standards.
74. **Learning from Practice:** Using day-to-day teaching experiences as a foundation for professional growth.
75. **Knowledge Acquisition:** Collecting information to enhance subject knowledge and pedagogical skills.
76. **Professional Identity:** Developing a sense of self as a teacher through continuous learning and reflection.
77. **Antecedent Factors:** Cultural, social, and institutional elements that influence teaching practices.
78. **Reflective Journals:** Tools for documenting and analyzing teaching experiences for personal growth.
79. **Conceptual Innovation:** Developing new theories or models to improve teaching strategies.
80. **Reflective Dialogue:** Using discussions to refine and challenge personal teaching practices.
81. **Dynamic Practice Episodes:** Flexible teaching cycles shaped by actions, outcomes, and context.
82. **Systematic Inquiry:** A structured approach to investigating and improving teaching methods.

83. **Tacit Knowledge:** Unarticulated, experience-based knowledge that informs teaching.
84. **Explicit Knowledge:** Clearly defined and communicated knowledge used in educational practices.
85. **Knowledge Building:** Creating new insights and methods through reflective processes.
86. **Reflective Questions:** Probing inquiries designed to challenge and deepen understanding of teaching practices.
87. **Collaborative Knowledge Sharing:** Pooling expertise and experiences for mutual professional benefit.
88. **Educational Ecosystem:** Viewing the school as an interconnected system supporting learning and innovation.
89. **Critical Creative Thinking:** Combining creativity with critical analysis to address teaching challenges.
90. **Reflective Feedback:** Using constructive feedback to refine teaching methods.
91. **Learning Goals:** Objectives set to enhance both teacher and student outcomes.
92. **Innovative Strategies:** Creative approaches to solve problems or improve teaching methods.
93. **Metacognitive Reflection:** Thinking about one's thinking to improve teaching decisions.
94. **Evidence-Based Practice:** Using research and data to guide teaching improvements.
95. **Cultural Context in RP:** Understanding how cultural norms influence teaching and learning.
96. **Reflective Wisdom Development:** Evolving one's understanding and practices through lifelong reflection.
97. **Critical Practice Models:** Frameworks for analyzing and improving reflective teaching practices.
98. **Teaching Quality Assessment:** Evaluating teaching effectiveness based on reflective insights.
99. **Motivation in RP:** The drive to continually improve through reflective practice.
100. **Teacher as Researcher:** Conducting action research to explore and address classroom challenges.
