# Quiz, Assignment & GDB

SE601P – Quiz No. 2 (Date: 25 Nov 2025)

Q.1 Which of the following is NOT a feature of Asana?

A. Time tracking ✅

B. Task assignment

C. File storage ✅

D. Team collaboration

Q.2 How are tasks organized in Asana?

A. By assignee ✅

B. By priority

C. By file size

D. By due date ✅

Q.3 Which of the following is an example of an Integrated Development Environment (IDE)?

A. Microsoft Word

B. Photoshop

C. Adobe Illustrator

D. Visual Studio Code ✅

Q.4 Which of the following is a feature commonly found in Software Documentation Tools?

A. Data visualization tools

B. Code debugging capabilities

C. Code debugging capabilities

D. Version control ✅

03066295623
Exam LMS Handling

Q.5 How can Testing Tools help teams ensure compliance with industry standards and regulations?

A. By providing real-time collaboration features

B. By offering code analysis and static testing capabilities ✅

C. By automating the process of bug tracking

D. By generating comprehensive test reports ✅

Q.6 What is a project in Asana?

A. A communication channel

B. A collection of tasks ✅

C. A team member's role

D. A project template

Q.7 Which aspect of software testing can be automated using Testing Tools?

A. Compatibility testing

B. Documentation testing

C. User interface design testing

D. Performance testing ✅

03166295623
For LMS Handling

Q.8 Which IDE is primarily designed for C# and .NET development?

A. Eclipse

B. IntelliJ

C. NetBeans

D. Visual Studio ✅

Q.9 What is JIRA?

A. A project management tool ✅

B. A data analysis software

C. A programming language

D. An operating system

Q.10 Which IDE is often used for web development and supports languages such as HTML, CSS, and JavaScript?

A. IntelliJ

B. Eclipse

C. Visual Studio Code ✅

D. NetBeans

SE601P – Quiz No. 2 (Date: 06 Nov 2025)

Q.11 Which of the following best represents an example of polymorphism in real-world scenarios?

A. A sports team consisting of players from different sports.

B. A car manufacturing plant producing multiple models.

C. A bank account class inheriting from a general account class.

D. A music player that can play different audio file formats. ✅

Q.12 Which of the following best represents an example of inheritance in real-world scenarios?

A. A university offering different courses within a specific discipline.

B. A child inheriting physical traits from their parents. ✅

03062295623
For LMS Handling

C. A smartphone application allowing users to customize the user interface.

D. A social media platform allowing users to create different types of posts.

Q.13 Which of the following best represents an example of realization in real-world scenarios?

A. A chef experimenting with new ingredients to create a unique dish.

B. A music festival featuring various artists from different genres.

C. A teacher implementing a lesson plan based on the curriculum guidelines. ✅

D. A company acquiring a smaller business to expand its market reach.

Q.14 Which of the following best represents an example of overriding in real-world scenarios?

A. A library organizing books into different genres and sections.

B. A restaurant offering different menu items for breakfast, lunch, and dinner.

C. A company expanding its product line by introducing new variants of existing products.

D. A parent modifying a household rule set by the grandparents. ✅

Q.15 Which of the following best represents an example of generalization in real-world scenarios?

A. A company providing different levels of membership with increasing benefits.

B. A restaurant offering a variety of cuisine options on its menu.

C. An online shopping website categorizing products into different departments.

D. A zoo classifying animals based on their species. ✅

SE601P – Quiz No. 3 (Date: 13 Nov 2025)

Q.16 Which programming language provides built-in support for Generic Programming?

A. Java ✅

B. PHP

C. Python

D. C# ✅

Q.17 What is the purpose of using constants in programming?

A. To make the code more readable and understandable. ✅

B. To eliminate the need for variables in a program.

C. To improve the efficiency of the program's execution.

D. To facilitate interprocess communication.

Q.18 Which of the following is true about constants in programming?

A. Constants are only applicable in object-oriented programming.

B. Constants cannot be modified once they are assigned a value. ✅

C. Constants are variables that store varying values.

D. Constants are used only for arithmetic operations.

03066295623
For LMS Handling

Q.19 What are Distributed Objects in computer science?

A. Objects that are optimized for high-performance computing tasks

B. Objects that are used for file input and output operations

C. Objects that can be shared and accessed across multiple networked machines ✅

D. Objects that are limited to a single machine and cannot be accessed remotely

Q.20 Which of the following is an advantage of using Object Serialization?

A. It improves the performance of multithreaded programs.

B. It enables objects to be transferred over a network. ✅

C. It reduces the size of the object in memory.

D. It allows objects to be converted into a human-readable format.

SE601P – Quiz No. 3 (Date: 01 Dec 2025)

Q.21 What is the role of configuration management tools in devops?

A. Analyzing user behavior on a website

B. Automating infrastructure provisioning and configuration ✅

C. Optimizing database performance

D. Managing customer relationship data

Q.22 Which of the following is an example of a good class design guideline?

A. Having large classes with hundreds of lines of code

B. Avoiding code documentation and comments

C. Using composition over inheritance when appropriate ✅

D. Avoiding encapsulation and exposing class internals directly

03066295623 For LMS Handling

Q.23 Which of the following is a good practice for handling dynamic memory allocation in C++?

A. Using raw pointers without explicit memory deallocation

B. Utilizing smart pointers or RAII techniques ✅

C. Relying on the operating system to automatically deallocate memory

D. Ignoring exception handling during memory allocation

Q.24 What is the purpose of continuous integration (ci) in devops?

A. Ensuring that code changes integrate smoothly and are regularly tested ✅

B. Automating software deployments

C. Managing infrastructure resources

D. Monitoring and logging application performance

Q.25 What is a potential issue with a class having too many dependencies?

A. It increases code reusability and modularity

B. It enhances code readability and reduces complexity

C. It leads to high coupling and reduces testability ✅

D. It improves code maintainability and flexibility

Q.26 Why is loose coupling considered a good design guideline for classes?

A. It reduces code readability and maintainability

B. It decreases the ease of testing and debugging

C. It increases the chances of code conflicts and errors

D. It enhances code reusability and modularity ✅

03066295623
For LMS Handling

Q.27 Which of the following is a bad practice for class design?

A. Overusing global variables within a class ✅

B. Following the open-closed principle for class extension

C. Using appropriate access modifiers for class members

D. Having a class with only a single responsibility

Q.28 What is the potential risk associated with dynamic memory allocation?

A. Deterministic behavior

B. Resource exhaustion and memory leaks ✅

C. Improved code safety and reliability

D. Increased program efficiency

Q.29 What is the purpose of the final keyword in the following Java code snippet?

```
public class Calculator {
  public static final double PI = 3.14159;
  ...
}
```

A. It ensures that the Calculator class cannot be extended.

B. It indicates that the PI variable cannot be changed. ✅

C. It specifies that the calculateCircleArea method cannot be overridden.

D. It prevents the area variable from being modified within the main method.

Q.30 Which keyword is used in C++ to mark a function or destructor as non-throwing?

A. noexcept ✅

B. nothrow

C. noexception

D. nonthrowing

03066295623
For LMS Handling

SE601P – Quiz No. 3 (Date: 13 Nov 2025 – Repeated Set)

Q.31 Which programming language provides built-in support for Generic Programming?

A. C# ✅

B. Python

C. Java ✅

D. PHP

Q.32 In the context of programming, what is Generic Programming?

A. A programming language that supports dynamic typing

B. A programming paradigm focused on designing reusable code ✅

C. A technique for parallelizing computations

D. A method for optimizing memory usage in programs

Q.33 Which of the following is true about constants in programming?

A. Constants are only applicable in object-oriented programming.

B. Constants are used only for arithmetic operations.

C. Constants are variables that store varying values.

D. Constants cannot be modified once they are assigned a value. ✅

Q.34 What is the purpose of using constants in programming?

A. To eliminate the need for variables in a program.

B. To improve the efficiency of the program's execution.

C. To make the code more readable and understandable. ✅

D. To facilitate interprocess communication.

Q.35 What are Distributed Objects in computer science?

03006295623
For LMS Handling

A. Objects that can be shared and accessed across multiple networked machines ✅

B. Objects that are optimized for high-performance computing tasks

C. Objects that are used for file input and output operations

D. Objects that are limited to a single machine and cannot be accessed remotely

**SE601P – Quiz No. 5 (Date: 27 Nov 2025 – Set 1)**

Q.36 Which IDE is often used for web development and supports languages such as HTML, CSS, and JavaScript?

A. NetBeans

B. Visual Studio Code ✅

C. Eclipse

D. IntelliJ

Q.37 Which IDE is known for its extensive plugin ecosystem and support for multiple programming languages?

A. Eclipse ✅

B. IntelliJ

C. Visual Studio

D. Xcode

03066295623
For LMS Handling

Q.38 Which IDE cannot be used for Java development?

A. Eclipse

B. IntelliJ

C. Android Studio

D. Visual Studio ✅

Q.39 Which of the following is an example of an Integrated Development Environment (IDE)?

A. Visual Studio Code ✅

B. Photoshop

C. Adobe Illustrator

D. Microsoft Word

Q.40 Which IDE is primarily designed for C# and .NET development?

A. IntelliJ

B. Visual Studio ✅

C. Eclipse

D. NetBeans

**SE601P – Quiz No. 5 (Date: 27 Nov 2025 – Set 2)**

Q.41 Which of the following is an example of an Integrated Development Environment (IDE)?

A. Photoshop

B. Microsoft Word

C. Adobe Illustrator

D. Visual Studio Code ✅

03066295623
For LMS Handling

Q.42 Which IDE is primarily designed for C# and .NET development?

A. NetBeans

B. IntelliJ

C. Eclipse

D. Visual Studio ✅

Q.43 Which IDE is known for its extensive plugin ecosystem and support for multiple programming languages?

A. Eclipse ✅

B. Xcode

C. Visual Studio

D. IntelliJ

Q.44 Which IDE is often used for web development and supports languages such as HTML, CSS, and JavaScript?

A. IntelliJ

B. Visual Studio Code ✅

C. Eclipse

D. NetBeans

Q.45 Which IDE cannot be used for Java development?

A. Visual Studio ✅

B. Eclipse

C. Android Studio

D. IntelliJ

03066295623
For LMS Handling

SE601P – Quiz No. 6 (Date: 04 Dec 2025 – Set 1)

Q.46 What is one benefit of using Testing Tools in software development?

A. Increased development speed

B. Improved collaboration between developers and testers ✅

C. Enhanced data security

D. Streamlined project management

Q.47 How do Software Documentation Tools improve communication within development teams?

A. By integrating project management tools

B. By providing real-time collaboration features ✅

C. By automating software testing processes

D. By generating automated code documentation ✅

Q.48 Which aspect of software testing can be automated using Testing Tools?

A. Performance testing ✅

B. User interface design testing

C. Compatibility testing

D. Documentation testing

Q.49 How can Testing Tools help teams ensure compliance with industry standards and regulations?

A. By providing real-time collaboration features

B. By offering code analysis and static testing capabilities ✅

C. By generating comprehensive test reports ✅

D. By automating the process of bug tracking

03066295623
For LMS Handling

Q.50 What is one benefit of using Software Documentation Tools?

A. Increased software development speed ✅

B. Streamlined project management

C. Improved data security

D. Enhanced user interface design ✅

SE601P – Quiz No. 6 (Date: 04 Dec 2025 – Set 2)

Q.51 How do Software Documentation Tools improve communication within development teams?

A. By integrating project management tools

B. By providing real-time collaboration features ✅

C. By automating software testing processes

D. By generating automated code documentation ✅

Q.52 Which aspect of software testing can be automated using Testing Tools?

A. Performance testing ✅

B. User interface design testing

C. Compatibility testing

D. Documentation testing

Q.53 What is one benefit of using Testing Tools in software development?

A. Enhanced data security

B. Improved collaboration between developers and testers ✅

C. Increased development speed

D. Streamlined project management

03066295623
For LMS Handling

Q.54 How can Testing Tools help teams ensure compliance with industry standards and regulations?

A. By automating the process of bug tracking

B. By generating comprehensive test reports ✅

C. By providing real-time collaboration features

D. By offering code analysis and static testing capabilities

Q.55 Which of the following is a feature commonly found in Software Documentation Tools?

A. Version control ✅

B. Code debugging capabilities

C. Code debugging capabilities

D. Data visualization tools

SE601P – Quiz No. 3 (Date: 01 Dec 2025 – Additional Set)

Q.56 What is the primary goal of devops?

A. Speed up software development

B. Enhance customer support

C. Improve team collaboration and software delivery ✅

D. Reduce server costs

03066295623
For LMS Handling

Q.57 Which tool is commonly used for version control in devops?

A. Git ✅

B. Jenkins

C. Docker

D. Kubernetes

Q.58 What will be the output of the following code?

```
#include <iostream>
#include <vector>
void modifyVector(std::vector<int>& vec) { vec.push_back(10); }
int main() {
  std::vector<int> numbers;
  modifyVector(numbers);
  std::cout << numbers.size() << std::endl;
  return 0;
}
```

A. 10

B. 1 ✅

C. Compilation error

D. 0

Q.59 Why is loose coupling considered a good design guideline for classes?

A. It increases the chances of code conflicts and errors

B. It enhances code reusability and modularity ✅

C. It reduces code readability and maintainability

D. It decreases the ease of testing and debugging

Q.60 According to the MISRA C++ coding standard, why is it recommended to avoid dynamic memory allocation whenever possible?

A. Dynamic memory allocation improves code readability.

B. Dynamic memory allocation simplifies resource management.

C. Dynamic memory allocation can lead to memory leaks and unpredictable behavior. ✅

D. Dynamic memory allocation is more efficient than stack-based allocation.

Q.61 Which of the following is a good practice for handling dynamic memory allocation in C++?

A. Using raw pointers without explicit memory deallocation

B. Ignoring exception handling during memory allocation

C. Utilizing smart pointers or RAII techniques ✅

D. Relying on the operating system to automatically deallocate memory

Q.62 What does the noexcept keyword signify in C++?

A. The function will throw an exception.

B. The function will ignore exception handling.

C. The function will not throw any exceptions. ✅

D. The function will handle exceptions internally.

Q.63 Which of the following is a good guideline for class design?

A. Using long and descriptive class names

B. Having a class with multiple responsibilities

C. Creating classes that adhere to the Single Responsibility Principle (SRP) ✅

D. Making all class members public by default

03066205623
For LMS Handling

Q.64 Which of the following is a bad practice for class design?

A. Following the open-closed principle for class extension

B. Having a class with only a single responsibility

C. Using appropriate access modifiers for class members

D. Overusing global variables within a class ✅

Q.65 Which of the following is an example of a good class design guideline?

A. Avoiding code documentation and comments

B. Using composition over inheritance when appropriate ✅

C. Avoiding encapsulation and exposing class internals directly

D. Having large classes with hundreds of lines of code

SE601 – Quiz No. 1 (Date: 12 Nov 2025)

Q.66 _____ has a tendency to be over budget

A. Iterative Process Model

B. Waterfall ✅

C. Rational Unified Process ✅

D. Agile Model

Q.67 Following are the major activities in software construction except_____.

A. Project Planning ✅

B. Debugging

C. Code Testing

D. Coding

03066295623
For LMS Handling

Q.68 Software _____ is an activity of software development started after requirement engineering, architecture and detailed design.

A. Scheduling

B. Construction ✅

C. Defining

D. Planning

Q.69 Xtreme programming (XP) has characteristics of _____ documentation.

A. Medium

B. Heavy

C. Large

D. Light ✅

Q.70 Software development _____ provides a road map to software development.

A. Process ✅

B. Method

C. Tool

D. Technique

Q.71 We use agile for project development when frequent_____ are required.

A. Version

B. Updates

C. Product

D. Changes ✅

03066295623
For LMS Handling

Q.72 The work of _____ something is called construction.

A. Defining

B. Scheduling

C. Planning

D. Building ✅

Q.73 There are _____ types of software development processes.

A. Four

B. Three

C. Two ✅

D. Five ✅

Q.74 _____ has short development cycle.

A. RUP

B. Spiral

C. Water fall

D. Scrum ✅

Q.75 Every _____ of the Iterative Model finishes in an exact and fixed period that is called iteration.

A. Stage

B. Release

C. Phase ✅

D. Step

03066295623
For LMS Handling

Q.76 The development cycle in Scrum is called Sprint which lasts for approximately 30 _____.

A. Months

B. Days ✅

C. Hours

D. Weeks

Q.77 _____ has short development cycle.

A. Water fall

B. RUP

C. Scrum ✅

D. Spiral

Q.78 We use agile for project development when frequent_____ are required.

A. Product

B. Version

C. Changes ✅

D. Updates

Q.79 In software engineering, a software _____ process is a process of dividing software development work into smaller, parallel, or sequential steps or sub-processes to improve design and/or product management.

A. Construction

B. Planning

C. Development ✅

D. Maintenance

03066295623
For LMS Handling

Q.80 Xtreme programming (XP) has _____ software bugs rates.

A. Medium

B. Higher

C. Zero

D. Lower ✅

Q.81 Software development _____ provides a road map to software development.

A. Tool

B. Method

C. Technique

D. Process ✅

Q.82 _____ has a tendency to be over budget

A. Iterative Process Model

B. Rational Unified Process

C. Waterfall ✅

D. Agile Model

Q.83 Software _____ is an activity of software development started after requirement engineering, architecture and detailed design.

A. Defining

B. Planning

C. Scheduling

D. Construction ✅

03066295623
For LMS Handling

Q.84 _____ activities focuses on coding and debugging.

A. Scheduling

B. Planning

C. Designing

D. Construction ✅

Q.85 Software _____ objective is to map detailed design on to correct and manageable code.

A. Planning

B. Scheduling

C. Construction ✅

D. Defining

SE601 – Quiz No. 2 (Date: 25 Nov 2025)

Q.86 In _____ presentation it is easier to see exceptional data values.

A. Analogue

B. Static

C. Dynamic ✅

D. Digital ✅

Q.87 The Model View Controller approach is a way of supporting _____ presentations of data

A. Single

B. Multiple ✅

C. Parallel

D. Horizontal

Q.88 In_____Users make a selection from a list of possibilities presented to them by the system.

03066295623
For LMS Handling

A. Form fill-in

B. Menu systems ✅

C. Command language

D. Natural language

Q.89 A _____ perspective usability is described in terms of the interaction of the user with the product.

A. Performance-oriented

B. User-oriented ✅

C. Product-oriented

D. Context-oriented

Q.90 Pie chart displays _____ information.

A. Dynamic

B. Static

C. Relative ✅

D. Parallel

03066295623
For LMS Handling

Q.91 In_____User learning time is relatively short.

A. Direct manipulation ✅

B. Command language

C. Form fill-in

D. Menu selection

Q.92 _____easy to process using compiler techniques.

A. Menu systems

B. Command interfaces ✅

C. Natural language

D. Form fill-in

Q.93 _____information does not change during the session

A. Negative

B. Dynamic

C. Static ✅

D. Parallel

Q.94 In_____Users get immediate feedback on their actions so mistakes can be quickly detected and corrected.

A. Menu selection

B. Direct manipulation ✅

C. Form fill-in

D. Command language

Q.95 Information can be displayed in _____ or graphical from.

A. Diagram

B. String

C. Number

D. Text ✅

03066295623
For LMS Handling

Q.96 Pie chart displays _____ information.

A. Parallel

B. Dynamic

C. Relative ✅

D. Static

Q.97 Data _____ is a technique for displaying large amounts of information

A. Digital

B. Analouge

C. Transparent

D. Visualisation ✅

Q.98 _____ is a dialog between the customer and the designer.

A. User Partial Design

B. User Right Design

C. User Centered Design ✅

D. User Slow Design

Q.99 In_____User learning time is relatively short.

A. Direct manipulation ✅

B. Menu selection

C. Form fill-in

D. Command language

03066295623
For LMS Handling

Q.100 Information can be displayed in _____ or graphical from.

A. String

B. Diagram

C. Number

D. Text ✅

Q.101 In_____Commands of arbitrary complexity can be created by command combination.

A. Natural language

B. Command interfaces ✅

C. Form fill-in

D. Menu systems

Q.102 _____information does not change during the session

A. Static ✅

B. Parallel

C. Dynamic

D. Negative

Q.103 The Model View Controller approach is a way of supporting _____ presentations of data

A. Single

B. Parallel

C. Horizontal

D. Multiple ✅

03066295623
For LMS Handling

Q.104 In_____Users make a selection from a list of possibilities presented to them by the system.

A. Form fill-in

B. Natural language

C. Menu systems ✅

D. Command language

Q.105 In _____ presentation it is easier to see exceptional data values.

A. Dynamic

B. Analogue ✅

C. Static

D. Digital ✅

SE601 – Quiz No. 3 (Date: 01 Dec 2025 – Multiple Sets)

Q.106 The smartphone should follow the well-known _____, allowing the user to do things in a familiar, standard and consistent way.

A. Conventions ✅

B. Ideas

C. Steps

D. Methods

Q.107 _____ category deals with the interaction between the user and smartphone.

A. User's Cognitive features

B. Information Presentation features

C. User's Control and Support

D. Interaction features ✅

Q.108 Which of the following is not a smartphone feature with associated usability limitations?

03066295623
For LMS Handling

A. inspection of smartphone ✅

B. Screen Resolution

C. Data input/output

D. Screen Size

Q.109 _____ category contains features associated with the smartphone presentation and information.

A. Information Presentation features ✅

B. Interaction features

C. User's Cognitive features

D. User's Control and Support

Q.110 In a usability evaluation process, which approach involves real users performing actual tasks on a defined application to empirically measure usability factors such as effectiveness, efficiency, and user satisfaction?

A. Summative Evaluation ✅

B. Diagnostic Evaluation

C. Formative Evaluation

D. Predictive Evaluation

03066295623
For LMS Handling

Q.111 _____ is an approach for evaluating usability.

A. Inquiry

B. Formative

C. Testing

D. Inspection ✅

Q.112 Smartphone should provide layout of the UI _____ with enough margins, located at some recognizable places and fit to use.

A. Buttons

B. Functionality

C. Controls ✅

D. Apps

Q.113 _____ category associated with the user's mental model/perception to perform any specific task.

A. Interaction features

B. User's Control and Support

C. User's Cognitive features ✅

D. Information Presentation features

Q.114 Smart phone usability can be evaluated by _____ approach.

A. Inspection ✅

B. Summative

C. Inquiry ✅

D. Formative

Q.115 Which process examines user interaction with a system through methods such as testing, inspection, and inquiry to assess its ease of use?

A. Software Verification

B. System Testing

C. Usability Evaluation ✅

D. Performance Analysis

03066295623

Q.116 In a usability evaluation process, which approach involves real users performing actual tasks on a defined application to empirically measure usability factors such as effectiveness, efficiency, and user satisfaction?

A. Formative Evaluation

B. Diagnostic Evaluation

C. Summative Evaluation ✅

D. Predictive Evaluation

Q.117 _____ category associated with the user's mental model/perception to perform any specific task.

A. Interaction features

B. User's Control and Support

C. Information Presentation features

D. User's Cognitive features ✅

Q.118 _____ category contains features associated with the smartphone presentation and information.

A. Interaction features

B. User's Cognitive features

C. User's Control and Support

D. Information Presentation features ✅

03066295623
For LMS Handling

Q.119 Which process examines user interaction with a system through methods such as testing, inspection, and inquiry to assess its ease of use?

A. Performance Analysis

B. System Testing

C. Software Verification

D. Usability Evaluation ✅

Q.120 Smartphone should provide layout of the UI _____ with enough margins, located at some recognizable places and fit to use.

A. Functionality

B. Controls ✅

C. Buttons

D. Apps

Q.121 Smart phone usability can be evaluated by _____ approach.

A. Inquiry ✅

B. Summative

C. Inspection ✅

D. Formative

Q.122 _____ category deals with the interaction between the user and smartphone.

A. Information Presentation features

B. User's Control and Support

C. User's Cognitive features

D. Interaction features ✅

03066295623
For LMS Handling

Q.123 _____ for Interface is an inspection-based usability evaluation method.

A. Heuristics ✅

B. Factual

C. Empiric

D. Inquisitive

Q.124 The smartphone should follow the well-known _____, allowing the user to do things in a familiar, standard and consistent way.

A. Ideas

B. Methods

C. Conventions ✅

D. Steps

Q.125 _____ is an approach for evaluating usability.

A. Inquiry

B. Testing

C. Inspection ✅

D. Formative

03066295623 For LMS Handing

SE601P – Quiz No. 1 (Date: 12 Nov 2025 – Multiple Sets)

Q.126 Which of the following best describes encapsulation in object-oriented programming?

A. It refers to the process of hiding data and implementation details within a class. ✅

B. It represents the ability of objects to inherit properties and behaviors from other objects.

C. It allows objects to communicate with each other by sending messages.

D. It refers to the process of creating multiple instances of a class.

Q.127 What are Distributed Objects in computer science?

A. Objects that can be shared and accessed across multiple networked machines ✅

B. Objects that are limited to a single machine and cannot be accessed remotely

C. Objects that are used for file input and output operations

D. Objects that are optimized for high-performance computing tasks

Q.128 Which programming language provides built-in support for Generic Programming?

A. C# ✅

B. Java ✅

C. Python

D. PHP

Q.129 What is an abstract class in Java?

A. It is a class that cannot be instantiated and acts as a base for other classes. ✅

B. It is a class that can be directly instantiated without creating objects of its subclasses.

C. It is a class that defines a set of methods that must be implemented by its subclasses.

D. It is a class that contains only static methods and cannot be inherited.

03066295623
For LMS Handling

Q.130 What is polymorphism in object-oriented programming?

A. It refers to the process of hiding data and implementation details within a class.

B. It allows objects of different classes to be treated as objects of the same class. ✅

C. It allows objects to communicate with each other by sending messages.

D. It is a mechanism to encapsulate related data and functions together.

Q.131 In the context of programming, what is Generic Programming?

A. A method for optimizing memory usage in programs

B. A technique for parallelizing computations

C. A programming language that supports dynamic typing

D. A programming paradigm focused on designing reusable code ✅

Q.132 What is the difference between an instance variable and a class variable?

A. Instance variables are defined using the 'static' keyword, while class variables are not.

B. Instance variables are shared among all instances of a class, while class variables are specific to a particular instance.

C. Instance variables hold values that are specific to an instance of a class, while class variables hold values that are shared among all instances. ✅

D. Instance variables are declared within a method, while class variables are declared within a class.

Q.133 What is the purpose of the 'super' keyword in Java?

A. It refers to the current instance of the class.

B. It is used to create an instance of a class.

C. It is used to override a method in the superclass.

D. It is used to call a method from the superclass. ✅

Q.134 Which of the following is an advantage of using Object Serialization?

A. It enables objects to be transferred over a network. ✅

B. It improves the performance of multithreaded programs.

C. It allows objects to be converted into a human-readable format.

D. It reduces the size of the object in memory.

Q.135 Which of the following is not a part of exception handling in Java?

A. finally

B. try

C. throws ✅

D. catch

Q.136 Which of the following is true about constants in programming?

A. Constants cannot be modified once they are assigned a value. ✅

B. Constants are only applicable in object-oriented programming.

C. Constants are used only for arithmetic operations.

D. Constants are variables that store varying values.

Q.137 In the context of programming, what is Generic Programming?

A. A programming language that supports dynamic typing

B. A method for optimizing memory usage in programs

C. A technique for parallelizing computations

D. A programming paradigm focused on designing reusable code ✅

Q.138 What is the term used to describe the ability of an object to take on many forms?

A. Inheritance

B. Encapsulation

C. Abstraction

D. Polymorphism ✅

Q.139 Which of the following is not a part of exception handling in Java?

A. try

B. finally

C. catch

D. throws ✅ (same logic as Q.135)

Q.140 What are Distributed Objects in computer science?

A. Objects that can be shared and accessed across multiple networked machines ✅

B. Objects that are used for file input and output operations

C. Objects that are limited to a single machine and cannot be accessed remotely

D. Objects that are optimized for high-performance computing tasks

Q.141 Which of the following best represents an example of polymorphism in real-world scenarios?

A. A sports team consisting of players from different sports.

B. A car manufacturing plant producing multiple models.

C. A bank account class inheriting from a general account class.

D. A music player that can play different audio file formats. ✅

Q.142 In object-oriented programming, what is inheritance?

A. It is a technique used to define methods and properties within a class.

B. It is a way to create multiple instances of a class.

For LMS Handling

C. It is a mechanism to hide the internal details of an object and only expose necessary information.

D. It is a process of defining a new class based on an existing class. ✅

Q.143 What is the most common type of exception in Java?

A. ArithmeticException

B. IOException

C. ArrayIndexOutOfBoundsException

D. NullPointerException ✅

Q.144 What is the purpose of the 'super' keyword in Java?

A. It is used to create an instance of a class.

B. It is used to override a method in the superclass.

C. It refers to the current instance of the class.

D. It is used to call a method from the superclass. ✅

Q.145 What is the purpose of using constants in programming?

A. To make the code more readable and understandable. ✅

B. To facilitate interprocess communication.

C. To improve the efficiency of the program's execution.

D. To eliminate the need for variables in a program.

SE601P – Quiz No. 2 (Date: 25 Nov 2025 – Final Set)

Q.146 What is the purpose of a JIRA workflow?

A. To track project progress ✅

B. To automate project testing

C. To store project documentation

D. To manage software releases

Q.147 What is Asana?

A. A project management tool ✅

B. A video conferencing software

C. An email client

D. A file sharing platform

Q.148 Which of the following is a feature commonly found in Software Documentation Tools?

A. Version control ✅

B. Data visualization tools

C. Code debugging capabilities

D. Code debugging capabilities

Q.149 What is one benefit of using Testing Tools in software development?

A. Streamlined project management

B. Enhanced data security

C. Increased development speed ✅

D. Improved collaboration between developers and testers ✅

Q.150 How are tasks organized in Asana?

A. By due date ✅

B. By priority

C. By file size

D. By assignee

Q.151 Which of the following is NOT a JIRA issue type?

A. Bug

B. Task

C. Story

D. Server ✅

Q.152 Which IDE is often used for web development and supports languages such as HTML, CSS, and JavaScript?

A. NetBeans

B. Visual Studio Code ✅

C. IntelliJ

D. Eclipse

Q.153 Which IDE is known for its extensive plugin ecosystem and support for multiple programming languages?

A. Visual Studio

B. Xcode

C. Eclipse ✅

D. IntelliJ

Q.154 How do Software Documentation Tools improve communication within development teams?

A. By automating software testing processes

B. By generating automated code documentation

C. By integrating project management tools

D. By providing real-time collaboration features ✅

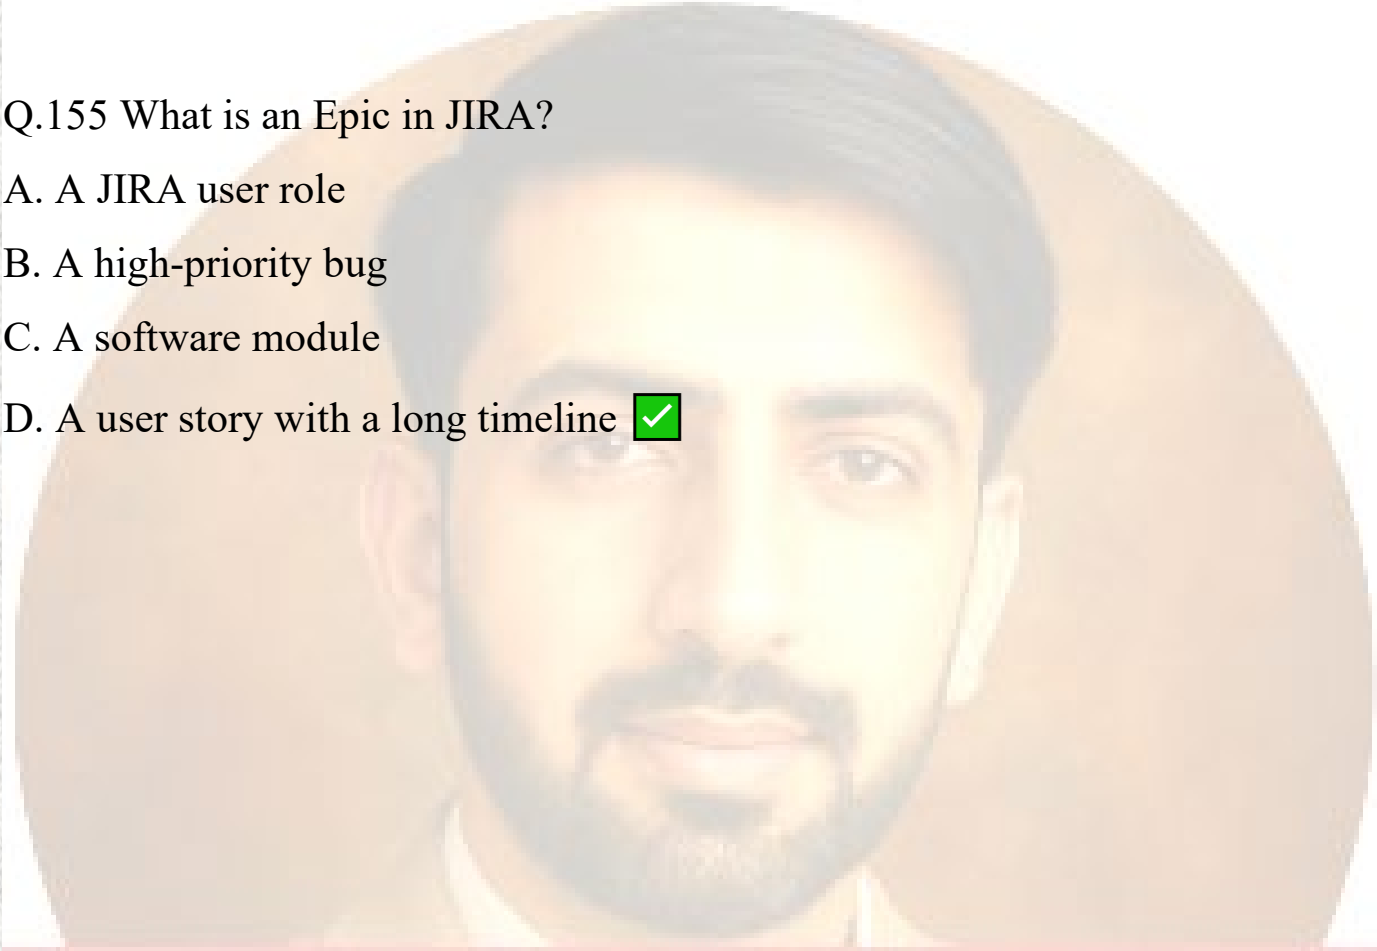

Q.155 What is an Epic in JIRA?

A. A JIRA user role

B. A high-priority bug

C. A software module

D. A user story with a long timeline ✅
