Q.1 In _____, the instantaneous change in the carrier frequency is proportional to the derivative of the amplitude of the modulating signal.

A. Phase modulation

B. Frequency modulation

C. Amplitude modulation

D. Quadrature modulation

Q.2 _____ is the heart of block coding.

A. Substitution

B. Division

C. Multiplication

D. Coding

Q.3 We quantize the sampling output into certain levels based on range of _____ and required accuracy.

A. Latency

B. Frequency

C. Time Period

D. Amplitude

Q.4 In amplitude shift keying ,the amplitude of the carrier signal is varied to create _____.

A. Modules

B. Signal rate

C. Frequency

D. Signal elements

Q.5 BFSK stands for _____.

A. Barrier Frequency Shift Key

B. Baud Frequency Shift Key

C. Binary Frequency Shift Key

D. Bridge Frequency shift Key

Q.6 _____ technique does not follows analog to analog conversion.

A. AM

B. FM

C. PM

D. QAM

Q.7 FSK stands for _____.

A. Frequency Swift king

B. Fake Shift Keying

C. Frequency Shift Keying

D. Foreign shift keying

Q.8 In statistical time division multiplexing, number of slots in frame are less than _____.

A. Input lines

B. Input frequency

C. Multiplexed T lines

D. Output data rate

Q.9 Wiring used for transmission modes depends upon _____.

A. Data Stream

B. Data Sniffing

C. Latency

D. Packet Tracing

Q.10 Which multiplexing technique involves signals composed of light beams?

A. PDM

B. WDM

C. FDM

D. TDM

VU TOOLKIT
