Quiz 1 - CS603 (Q1/10)

Question:

To avoid the problem of _____, simply create a new interface.

Options:

A. ISP violation principle

B. ASI violation principle

C. LSP violation principle

D. ASP violation principle

Copied: 5/18/2026, 11:29:17 AM

Quiz 2 - CS603 (Q2/10)

Question:

A _____ will manage essential complexities inherent in the problem without adding to accidental complexities consequential to the solution.

Options:

A. Good design

B. Corrupt design

C. Ambiguous design

D. Bad design

Copied: 5/18/2026, 11:29:33 AM

Quiz 3 - CS603 (Q3/10)

Question:

_____ and _____ are used in pattern designing.

Options:

A. Inheritance, Composition

B. Composition, Aggregation

C. Inheritance, Polymorphism

D. Polymorphism, Aggregation

Copied: 5/18/2026, 11:29:45 AM

Quiz 4 - CS603 (Q4/10)

Question:

New features can be easily added to a system without changing an existing implementation.

Options:

A. Single responsibility principle

B. Open-Close principle

C. Dependency Inversion principle

D. Liskov Substitution principle

Copied: 5/18/2026, 11:30:00 AM

Quiz 5 - CS603 (Q5/10)

Question:

Association can be achieved by using _____.

Options:

A. Variables

B. Pointers

C. Loops

D. Integer

Copied: 5/18/2026, 11:30:14 AM

Quiz 6 - CS603 (Q6/10)

Question:

Higher cohesion makes sure that changes made to the design of a system should be _____ in effect.

Options:

A. Modular

B. Global

C. Local

D. General

Copied: 5/18/2026, 11:30:27 AM

Quiz 7 - CS603 (Q7/10)

Question:

Wherever a polymorphic call is made, compiler inserts code to first look for _____.

Options:

A. vcode_firstlook

B. vfirst_look

C. vtable

D. vptr

Copied: 5/18/2026, 11:30:39 AM

Quiz 8 - CS603 (Q8/10)

Question:

In an open/close principle, system should be open to _____, but close to _____.

Options:

A. Modification, extension

B. Extension, open

C. Modification, close

D. Extension, modification

Copied: 5/18/2026, 11:30:51 AM

Quiz 9 - CS603 (Q9/10)

Question:

_____ is a table of functions pointers.

Options:

A. vpointer_table

B. vtable

C. vptr

D. vfunctions_pointers

Copied: 5/18/2026, 11:31:05 AM

Quiz 10 - CS603 (Q10/10)

Question:

_____ is a creational design pattern which solves the problem of creating product objects without specifying their concrete classes.

Options:

A. Template method

B. Factory method

C. State pattern

D. Strategy pattern
