Quiz 1 - CS606 (Q1/10)

Question:

What does the notation refer to in YACC?

Options:

A. The symbol on the right-hand side of the production

B. The symbol on the down-hand side of the production

C. The symbol on the up-hand side of the production

D. The symbol on the left-hand side of the production

Copied: 1/8/2026, 11:09:00 PM

Quiz 2 - CS606 (Q2/10)

Question:

In syntax-directed translation, every time the parser encounters an identifier, it stores it in the _____.

Options:

A. Parsing Stack

B. Symbol table

C. Priority Queue

D. Linear Array

Copied: 1/8/2026, 11:09:18 PM

Quiz 3 - CS606 (Q3/10)

Question:

What purpose does the topological sort serve in the dynamic method of attribute grammar evaluation?

Options:

A. It constructs the parse tree.

B. It defines the order of attribute evaluation.

C. It builds the dependence graph.

D. It ensures the absence of circular dependencies.

Copied: 1/8/2026, 11:09:33 PM

Quiz 4 - CS606 (Q4/10)

Question:

What does LALR(1) stand for?

Options:

A. Look Ahead RR(1)

B. Look Ahead LR(1)

C. Look Ahead RL(1)

D. Look Ahead LL(1)

Copied: 1/8/2026, 11:09:47 PM

Quiz 5 - CS606 (Q5/10)

Question:

In YACC, what does the notation $2 refer to?

Options:

A. The first symbol on the right-hand side of a production

B. The second symbol on the right-hand side of a production

C. The second symbol on the left-hand side of a production

D. The first symbol on the left-hand side of a production

Copied: 1/8/2026, 11:10:07 PM

Quiz 6 - CS606 (Q6/10)

Question:

In attribute grammars, each symbol in the derivation has a set of values or attributes.

Options:

A. True

B. False

Copied: 1/8/2026, 11:10:28 PM

Quiz 7 - CS606 (Q7/10)

Question:

In attribute grammars, an attribute (e.g., val) of a symbol (e.g., B) can be written as _____.

Options:

A. val.B

B. B@val

C. B.val

D. val@B

Copied: 1/8/2026, 11:10:40 PM

Quiz 8 - CS606 (Q8/10)

Question:

In stack-machine code, how are operands typically accessed for operations?

Options:

A. Through memory loads and stores

B. By pushing them onto a stack

C. By using index-based addressing

D. Through explicit register allocations

Copied: 1/8/2026, 11:10:52 PM

Quiz 9 - CS606 (Q9/10)

Question:

Compared to LR(1), LALR(1) parsing tables typically have:

Options:

A. More states

B. No states

C. Same states

D. Less states

Copied: 1/8/2026, 11:11:16 PM

Quiz 10 - CS606 (Q10/10)

Question:

What consideration might influence the choice of the attribute evaluation order in the oblivious methodology?

Options:

A. Optimization goals

B. Attribute propagation rules

C. Dynamic attribute dependencies

D. Syntax tree generation algorithms

Copied: 1/8/2026, 11:11:29 PM
