Quiz 1 - CS620 (Q1/20)

Question:

_____ models are not able to analyze most of the complex systems that are encountered in practice

Options:

A. Open-form

B. User-form

C. Closed-form

D. Free-form

Copied: 5/7/2026, 12:13:17 PM

Quiz 2 - CS620 (Q2/20)

Question:

The mechanism for advancing simulation time and guaranteeing that all events occur in correct chronological order is based on the _____

Options:

A. Future event list (FEL)

B. Future Indefinite event list(FIEL)

C. Present event list(PEL)

D. Past event list(PEL)

Copied: 5/7/2026, 12:13:42 PM

Quiz 3 - CS620 (Q3/20)

Question:

While talking about Concepts In Discrete-event Simulation, A duration of time of unspecified indefinite length, which is not known until it ends (e.g., a customer’s delay in a last-in-first-out waiting line which, when it begins,

depends on future arrivals).

Options:

A. Delay

B. Activity

C. Clock

D. Event list

Copied: 5/7/2026, 12:14:23 PM

Quiz 4 - CS620 (Q4/20)

Question:

Circular interactions that systems engage in such that they influence one another

Options:

A. Efficient Transaction

B. Reciprocal Transactions

C. Homeostasis

D. Adaptation

Copied: 5/7/2026, 12:15:01 PM

Quiz 5 - CS620 (Q5/20)

Question:

In _____, it is necessary to decide on the boundary between the system and its environment.

Options:

A. Modeling systems

B. Dynamic system

C. Random system

D. Static system

Copied: 5/7/2026, 12:15:23 PM

Quiz 6 - CS620 (Q6/20)

Question:

_____ questions can be answered. This is particularly useful in the design of new systems

Options:

A. a- “Where When”

B. "What if”

C. “Else if”

D. “Why if”

Copied: 5/7/2026, 12:15:45 PM

Quiz 7 - CS620 (Q7/20)

Question:

A simulation is the imitation of the operation of :

Options:

A. None

B. Real-world process

C. System over time

D. Both

Copied: 5/7/2026, 12:16:07 PM

Quiz 8 - CS620 (Q8/20)

Question:

While talking about Concepts In Discrete-event Simulation, A collection of variables that contain all the information necessary to describe the system at any time.

Options:

A. System state

B. System

C. Event list

D. Event

Copied: 5/7/2026, 12:17:07 PM

Quiz 9 - CS620 (Q9/20)

Question:

An animation shows a system in simulated operation so that the plan can be:

Options:

A. Observed

B. Explained

C. Estimated

D. Visualized

Copied: 5/7/2026, 12:17:26 PM

Quiz 10 - CS620 (Q10/20)

Question:

The state of a system is defined to be that _____ necessary to describe the system at any time, relative to the objectives of the study

Options:

A. Collection of characteristics

B. Collection of variables

C. Collection of allies

D. Collection of parameters

Copied: 5/7/2026, 12:17:42 PM

Quiz 11 - CS620 (Q11/20)

Question:

The sequence of actions that a simulator (or simulation language) must perform to advance the clock and build a new system snapshot is called the _____

Options:

A. Event-scheduling/time-advance algorithm

B. Frequency / times algorithm

C. Time-Scheduling/ advance algorithm

D. Time- managing / Advanced algorithm

Copied: 5/7/2026, 12:18:02 PM

Quiz 12 - CS620 (Q12/20)

Question:

Rate of energy transfer between the system and its environment during the time it is functioning

Options:

A. Efficiency

B. Throughput

C. Frequency

D. None

Copied: 5/7/2026, 12:18:34 PM

Quiz 13 - CS620 (Q13/20)

Question:

A system composed of significant life events that can affect adaptation

Options:

A. Macrosystem

B. Chronosystem

C. Adaptive system

D. Microsystem

Copied: 5/7/2026, 12:19:13 PM

Quiz 14 - CS620 (Q14/20)

Question:

The term _____ is used to describe activities and events occurring within a system, and the term _____ is used to describe activities and events in the environment that affect the system.

Options:

A. Exogenous, Endogenous

B. Endogenous, Exogenous

C. State, Event

D. None

Copied: 5/7/2026, 12:19:36 PM

Quiz 15 - CS620 (Q15/20)

Question:

While talking about Concepts In Discrete-event Simulation and keeping track of activities, delays are managed by placing the associated entity on another list, perhaps representing a waiting line, until when the system conditions permit the processing of the entity.

Options:

A. True

B. False

Copied: 5/7/2026, 12:20:11 PM

Quiz 16 - CS620 (Q16/20)

Question:

A runtime and downtime are examples of activities, and _____ and _____ are primary events.

Options:

A. End of runtime, end of uptime

B. End of runtime, end of the downtime

C. End of compilation, end of uptime

D. End of debugging, end of the downtime

Copied: 5/7/2026, 12:20:35 PM

Quiz 17 - CS620 (Q17/20)

Question:

While talking about Concepts In Discrete-event Simulation, An instantaneous occurrence that changes the state of a system (such as an arrival of a new customer).

Options:

A. Event

B. List

C. Event list

D. Event notice

Copied: 5/7/2026, 12:20:56 PM

Quiz 18 - CS620 (Q18/20)

Question:

A _____ is defined as a group of objects that are joined together in some _____ interaction or interdependence:

Options:

A. System, dynamic

B. Application, irregular

C. System, random

D. System, regular

Copied: 5/7/2026, 12:21:21 PM

Quiz 19 - CS620 (Q19/20)

Question:

While talking about Concepts In Discrete-event Simulation, a _____ typically represents a service time, an interarrival time, or any other processing time whose duration has been characterized and defined by the modeler.

Options:

A. Duration of an Activity

B. Delay

C. Activity

D. Clock

Copied: 5/7/2026, 12:22:10 PM

Quiz 20 - CS620 (Q20/20)

Question:

Hypotheses about _____certain phenomena that occur can be tested for feasibility

Options:

A. What and Where

B. How or Why

C. Which or What

D. None

Copied: 5/7/2026, 12:23:26 PM
