(SQ+Long Eng514)
(Final term) (Page #1)

## Q#1 Formal Speaking? (VU Manu)

Formal Speaking helps language learning in the following ways. It represents a new use of English for most learners and thus requires them to focus on language items that are not as well represented in other uses of the language. Formal Speaking requires Control of Content, awareness of a largely passive audience, and being the focus of attention.

## Q#2 Define Speaking?

Speaking is the one of the four skills. The action of Conveying information or expressing One's feelings in Speech. Speaking is the delivery of language through the mouth. Speaking is the most frequently used language skills.

## #3 Discourse analysis and Conversational analysis?

Both discourse analysis and Conversational analysis have links to Sociolinguistics in that they prefer not to deal with Sample of language in isolation, and Conversation analysis in particular is interested in the relation between interlocutors. Discourse analysis, however, has traditionally tended to Concentrate on longer Sections of language and focused on interrelations between different Sections of text.

Vu Manu

## Q#4 3 aspects of Spontaneous Speech?

- Speaking is fundamentally an interactive process and is defined by interactivity.
- Speaking happens under real-time processing constraints.
- Speaking is more fundamentally linked to the individual who produces it than the written form is.

## #5 Syllable and stressed time language?

Two types of language are stressed-timed or syllable-timed.

**Stressed time language:**

Stresed-timed language is a language where the stressed syllables are said at approximately regular intervals, and unstressed syllables shorten to fit this rhythm.

**Examples:** English and German are examples of stressed-timed.

**Syllable-timed language:**

Syllable-timed which means each syllable has the same-length. Each syllable takes roughly the same amount of time.

**Examples:** French, Spanish, Cantonese, italian, turkish

## Define channels?

Channel is a term used to describe the physical means by which communication take place. In terms of speaking there is the oral channel and in terms of writting visual channel.

discourse can be studied in terms of the effects of channel on the language.

**Q#7 Difference between face validity and Content validity?**

**Face validity:**

Face validity is a very informal judgement. A test in which most people would agree that the test items appear to measure what the test is intended to measure would have strong validity.

**For Examples:**

A mathmatical test consisting of problems in which the test taker has to add and subtract numbers may be considered to have strong face validity.

**Content validity:**

Content validity involves considering whether the content of the test reflects the content of the skill, language or course being tested.

**Example:**

In order to decide if a test of academic listening skill has content validity, we would need to decide what are the components of the academic listening skill and how is this skill used.

## Q#8 Any three Correcting pronunciation mistake?

- The teacher repeats the word Correctly Several times with ordinary stress and intonation until the learner Self-Corrects by Copying the teacher.
- The teacher repeats the word Correctly giving extra stress and length to the part where the learner made the mistake. The teacher Compare the mistake and the correct form: "Not lice but rice."
- The teacher writes the word on blackboard Correctly and underlines the part where the learner made a mistake. The teacher also says the word Correctly.

## #9 One-on-One ? Vimp

Talking One-on-One gives the provider a chance to repeat, extend, and revise what children say. Children have a chance to hear their own ideas reflected back. In addition One-on-One Conversation provide opportunities to either Contextualize the Conversation according to the individual child understanding or tap children understanding of abstract Concepts.

## #10 What are the qualities of a practical test?

practicality Can be looked at from Several aspect?

(1) Economy of time, money and labour
(2) Ease of administration and Scoring
(3) ease of interpretation.

**Q#11 Write a note on Speaking and new technologies?**

A fast moving area in recent year has been the developement of new technologies that blur and alter the traditional boundries between the Spoken and written mode. Technology tools are Seen as ways to help student improve language skills such as speaking skill. Internet, podcast, video Conferencing is the best tool to teach Speaking skills.

**Q#12 Write a note on audio-lingual approaches to language teaching?**

Audio-lingual approach suggests that students be taught phonology, morphology and Syntax of the language; all these patterns Can be learned through Contrastive analysis of the difference between the native tongue and the target language, which helps students to acquire new language easier. In United states, ethnographic approaches which depended on close and Careful security of the oral form where were also influential and these were Superseded by what eventually became known as "Audio-Lingual Method".

**Q#13 Note on KOL test?** Vimp

The KOL test consist of 24 multiple choice questions based on general knowledge of British life and culture. Taking and passing it assumes language knowledge at entery level 3. Those who do not reach this level can continue to retake KOL test until they pass, or can opt to take an ESOL with citizenship materials qualification through an approved body.

**Q#14 TOEFL?** Vimp

TOEFL is testing for academic setting. Accepted worldwide by more than 11,500 universities and institutions in over 160 countries, the TOEFL iBT test is the world's premier English language test for study, work and immigration.

6 tasks of TOEFL are designed to test different aspects of teaching. Two independent four others integrated.

**Q#15 Note on Online resources?**

In general, Web pages and documents on the internet that provide useful information. While an online resource is typically data and educational in nature, any support software available online can also be concidered resource.

**Q#16 Do you think brainstorming have a role before starting a talk?**

Good preparation for a talk can involve using group work activities to gather and elaborate the information that will be presented. Brainstorming is effective way of doing this. In this activity learners suggest ideas which are listed uncritically, the main goal to being get as many ideas as possible. Later ideas are organized and evaluated. An advantage of brainstorming is that it can result in a very diverse collection of ideas.

**Q#17. Exploratory talk?** Imp

Exploratory talk allows a reasond exchange of ideas and opinions. This sort of talk is likely to be of great value to the children educationally, because it means that they are using language to think ~~relation~~ rationally, and to concider and evaluate each other ideas in a cooperative way. They can build up shared knowledge and shared understanding as they engage in opportunities to collaborate as equals. Collaborative talk of this kind provides a supportive context of thinking aloud, it also represents the kind of rational, concider debate at the heart of educated activities Science, La and politics.

**Q#18 Qualities of practical test?**

A practical test is short, does not requires lot of paper and equipment, does not require many people to administer it, is easy to understand, is easy to mark, has Scores or results which are easy to interpret, and can be used over and over again without upsetting its validity.

**Q#19 Will learner have accent if he or she starts to speak in L2 before age of Six?**

Usually, There will be little or no accent.

**Q#20 Write note Discover answer activity?** VImp

Discover the answer is another technique to encourage learner to question the Speaker. The teacher ask the learners a question that she is sure that they cannot answer. This is a amusing technique because at last by listening to what the teacher says about the answers the learners are able to give the correct answer to the question although they really did not know the answer before. The techniques help learn the phrases like "more than that" which guide learners toward the answer.

## Q#21 Define Turn-taking or talking?

Turn-taking occurs in a Conversation when one person listens while the other person speaks. As a Conversation progresss, the listener and Speaker roles are exchanged back and forth (a circle of discussion).

## Q#22 Ask and answer activity?

In an ask and answer activity (Simcock, 1993) the learner work in pairs. One learner has a text to study and the other has a set of questions based on the text. The learner may work together on the text. Many variations of this technique are possible, particularly in the relationship of the question to the text and the type of processing required to answer them.

## Q#23 Liberman?

Liberman (1998) When theories of speech meet the real world is an example of what is known as a position paper. This means that the research text in question encapsulates an academic stance on a broad topic and they generally deal with an issue that is open to debate. These can be difficult to write as there is a need to understand the ideas being Critisized Summurize the relevant arguments and present a Coherent alternative to them.

## #24 CLT (Communicating language teaching?

CLT is an approach that aims to achieve Communicative rather than linguistic Competence through learner interaction.
It is an approach to language teaching that emphasis interaction as both the means and ultimate goal of study. The purpose of Communicating language teaching is to prepare students to be Confident Communicators in different - real life contexts through repetitive oral practice and student-student. interac

## 25 Speaking test?

**IELTS Speaking test.**

It is a test with a stronger focus on holistic Communicative skills than on the hierarchy of Separate languages facets underlying the TOEFL test. Each test last ten to 15 minutes and recorded.

**Internet-based teaching english as foreign Language TOEFL Speakin test.**

This is in order to sidestep a number of the issue Concerning bias that can affect face-to-face assessments of Speaking.

## Q#26 phonological Loop? (VImp)

The phonological loop is the brain saying a word or phrase over and over to itself in order to keep it in working memory or to help it move into long term memory. A good example of this is the way we say a telephone number over and over to ourselves in order to keep it in memory while we go about dialing the number. If learner do not have a stable pronunciation for the word, it cannot easily enter long term memory because it cannot be held in the phonological loop.

## Q#27 Difficulties of assessment in Classroom? VImp

The difficulty of direct acess means that any assessment of listening must employ indirect measures, always at some degree removed from the actual psycholinguistic process we wish to describe. The primary means of assessing listening is therefore to observe the various language activities that the learner is engaged and to create qualitative descriptors and quantitative measures that have an acceptable degree of validity. Concept of validity refers to an agreement on what is being assessed, both in broad and narrow terms.

**Q#28 Note On Garden-path technique?** VImp

Tomasello and Herron (1989) Suggest that Some activities should be designed So that learners make errors and then get immidiate feedback to make them aware of the gaps in their knowledge. Their delibrate encouragement of errors through incorred analogy is Called the "garden path" technique. It is important to note that it is not the error which is important in the garden path, but the noticing which Comes from it.

**Q#29 Three Societies other than TESOL, IATEFL?** VImp

(i) American Dialect Society
(ii) Institute of translation and interpreting
(iii) International Clinical phonetics and linguistic assoc.

**Q#30 3 Critical Skills for Speaking?** VImp

(1) Communicate listen and respond when other people are talking.
(2) Understand the meaning of a large number of words and Concepts that they hear and read.
(3) Obtain new information about things they want to learn about.

**Q#31 3 Charachteristics of fluency?** VImp

- message-focused activity
- easy tasks
- performance at a high level.

**Q#32 Importance of talking in mirror with respect to pronunciation?** VImp

When the teacher pronounces a sound, the learner should watch the teacher's mouth carefully. The they can practice using a small mirror so that they can see their own mouth. It is valuable to let the learners experiments with sounds. By changing the position of their tongue they can change the sound. By changing position of lips and teeth the sounds can be changed. Activities like these may help the learners to be able to feel where their tongue is in their mouth.

**Q#33 TBLT?** VImp

This is an approach of language learning based on insights first outlined in the late 1980s by prabhu. Reporting on his work in India, prabhu suggested that learners who were mainly focused on a real world task make as good if not better progress ~~tang~~ than language learners given explicitly language focused interaction. Task-based language teaching, also known as task-based instruction, focuses on the use of authentic language to complete meaningful tasks in the target language. Such task can include visiting a doctor, conducting an interview, or calling customer service for help.

**Q#34 Speaking and neurolinguistic?**

Neurolinguistics differ from psycholinguistic in that the focus of research is on the biological and neurological basis of language processing. As such, research into fundamental aspects of speech can be investigated within neuro-linguistic frameworks. ∀ Strong relationship between this field and speech therapy.

**Q#35 4/3/2 technique in fluency?**

It Combines the feature of focus on the Message, quantity of production, learner control over the topic and language used, repetition and time pressure to reach a high rate of production through the decreasing amount of time available for each delivery.

**Q#36 Dialogic teaching method?** VImp

Dialogic teaching is based on the premise that learning in schools is a Social activity.

- the fostering of a classroom community in which learning dialogues take place.
- The Creation of activities which necessitates learning dialogues.

**37 Write 3 need that learner get rid of mistake?**

- The desire to get rid of the mistake. (V! mp)
- An internal representation of what correct form is like.
- The ability to know that a mistake has been made.

## Q#38 Three Ways of Computer talk? Vimp

- **Disputational talk?**
  This is characterized by disagreement and individualized turn-taking. There are few attempts to share knowledge or to offer suggestions. There are short exchanges wich Consist of assertion and challenges.
- **Cumulative talk:**
  The Speakers build positively but unstrictically, on what the other has said. This Sort of talk is characterized by repetition, Confirmation and elaborations.
- **Exploratory talk:**
  The group engages critically but Constructively with each others ideas, and statements or suggestions are offered for Joint Consideration These may be challanged, but Justification are expected and given Concidration.

## Q#39 Self-Assessment?

- Learner rates Self on given Criteria, Via questions or checklists, during or following listening activities.
- Learner provide holistic assessment of own abilities via Oral or Written Journal entries.

Q#4o Enlist any 3 ways through which information is distributed among learner?

- All learners have the same information.
  (Cooperating arrangement)
- Each learners has different essential info.
  (Split information arrangements)
- One learner has all the information that the other needs.
  (Superior inferior arrangement)

# Long Questions

## Q#1 Process approach?

This means dividing the task into parts such as taking account of goals and the audience, gathring ideas, organizing ideas, making a set of speaking notes, and presenting monitoring the talk. Process approach is effectively encouraging learner to develop a strategy for dealing with formal speaking. Thus, when a teacher take this approach learner should be made aware of the parts of the process and how they can take control of them.

## Q#2 5 Factors effect pronunciation?

- the age of the learner
- the learner's first language
- learner's current stage of proficiency development.
- The experience and attitude of learner
- the condition for teaching and learning.

## Q#3 Define paradigm?

A paradigm is a framework for idea which includes definitions of key terms and the relationship between them. Different disciplines work within different paradigm and even within the same academic department several paradigm can compete with one another.

**Examples:**

Scientific method and theory of evolution

Q#4 Define transformational grammar movement and Communicative movement?

The 1960s with the influence of the work of noam chomsky, and the 1970s and 1980s with the growth of Communicative approaches, marked two distinct sea changes in the field of language teaching both of which did much to underpin present attitudes to the Spoken form.

**Transformational grammar movement:**

It internalized and made abstract language system to such an extent that actual speech become something of an irrelevance.

**Communicative Movement:**

It held that language was acquired by meaningful and interesting Communication in Context which mimicked real Communicative Settings as closely as possible.

**Key word procedure?** (VImp)

Key word procedure can be broken into 3 Steps:

- Look at the 2nd language word and think of a first language word that sounds like it or sounds like its begining.
- Think of the meaning of the 2nd language word and ~~1st the me~~ the meaning of the 1st language word joined together in some way. This is where imagination is needed (Ellis and Beaton, 1993)
- Make a mental picture of these 2 meaning joined together.

**Q#6 5 Caregiver talk?** (Vimp)

- extended, Contextualized Conversation with individual children.
- reading books with interesting and rich Concepts
- engaging children in discussions and questions about the book
- modeling Speaking in Complete Sentences in questions, responses, and statements
- providing opportunity for children to talk about things and events that are not in the here and now. past, present and Imaginary.

**Q#7 State any 5 Roles of negotiating plays in assisting language devdopement?** (Vimp)

- Makes input understandable without Simplifying it So that learnable language features are retained.
- Breaks the input into smaller digestable pieces.
- raises awareness of formal features of input
- gives learner opportunities for direct learning of new forms
- provides a "Scaffold" within which learner Can produce increasingly Complex utterances.

**Q#8 Quantitative approaches?** (Vimp)

Quantitative approaches tend to analyze data in terms of pre-existing Categories and the researcher then Seeks to investigate the nature of these items in the data. For Something as dynamic and Socially grounded as Spoken discourse, this use of

pre-determind Categories Can be unhelpful. The strengths of Qualitative paradigm is that its works from the inside of instances of talk towards patterns and regularties and is able to uncover aspects that the investigator may not have imagined existed.

**Q#9 State and explain any two approaches to fluency?** (VImp)

- First approach of fluency relies primarily on repetition and Could be Called "The well-beaten path approach." ~~to~~ This involves gaining repeated practice on the Same materials so that it Can be performed fluently.
- The Second approach to fluency relies on making many Connections and association with a Known item. This Could be Called "Richness approach". This involves using the Known item in wide variety of Content and Situation.
- The third approach to fluency is aim and result of the previous two approaches. This Could be "well-ordered system" approach. Fluency occur ~~when~~ because the learner is in Control of the System of languages and Can use a Variety of efficient, well-Connected, and well-practiced paths to the wanted items.

## Q#10 Qualitative approaches?

A widely used method among the qualitative approaches to researching Speaking in CA. This method puts high value on the careful analysis of examples of real (non-elicited) talk to understand how Speakers Create meaning and organize their discourse as Social action. It is the Systematic inquiry into Social phenomena in natural setting. These phenomena Can Include how people experience aspects of their lives, how individuals or groups behave, and how interactions Shape relationship.

## Q#11 What are Vocabulary Cards? How to use it?

For adult beginners, It is useful to have a rapid expansion of Vocabulary through direct Vocabulary learning. An effective way of doing this for older learner is to make use of Vocabulary Card. These are Small Cards (about 4cm × 3cm) with the 2nd language word on one side and the 1st language translation on the other.

**Uses:** The Use of Such Cards Should be Combined with mnemonic techniques Such as keywords techniques. It Simply Created mental picture of the word where it is used. Learners use these Cards in their own time, looking at them frequently for a Short time.

**Q#12 Five Corpora of Speech data on Web discussed in your Course?**

- London Lund Corpus
- Lancastor / IBM Spoken english Corpus (SEC)
- Corpus of London teenage Language (COLT)
- Wellington Spoken Corpus (new Zealand)
- International Corpus of English.

**Q#13 5 Rules of Exploratory talk/test?**

- everyone in the group is encourage to Contribute
- Contributions are treated with respect
- Reasons are asked for
- Everyone is prepare to accept challanges
- all relevant information is Shared.
- Alternatives are discussed before a dicision is taken.
- the group Seeks to reach agreement.

**Q#14 High Stake testing Explain?**

"High stake testing" is a term used to descibe any test that has a major influence on the life of the test taker. While it could be argued that any test has an effect on the person taking it: Significant barriers are placed before those who fail Some tests, and are raised for those who pass them Examples of these kinds of tests outside language learning would be passing a Certificate to practice law or medicine at an earlier Stage a test in a School Context that permits Student to progress to higher examinations.

## Q#15 Notes on words detectives? (VImp)

Word detectives involve a learner reporting on a word that was learned out of class recently. The reporting can follow a pattern involving saying where the word was met, what it means, how it is used, and how it can easily be remembered. The activities at the begining and intermediate levels should focus on the essential general service vocabulary of english of approximately 2000 words.

## Q#16 Practicing intonation?

- The learner can copy the teacher.
- The learner can make gestures to go with changes in intonation. The rise at the end of Yes/No questions can go with the speaker raising her eybrows.
- The learner say the last word of the sentence by itself with the correct intonation, raising or falling.
- The learner can be shown drawings of intonation patterns to help them understand what they should try to do.

## Q#17 5 traditional library sources?

(1) Annual Review of Applied Linguistics
(2) Applied linguistics
(3) Discourse and Communication
(4) Discourse studies
(5) Interaction Studies

## Q#18 Talk Diary? (Vimp)

The role of Considering and recording their own talk Can be provided by Completing a 'talk diary'. This Can build up a picture of children's talking and listening activities over a finite length of time in a way that is straightforward for both teachers and child to use and interpret. Content of talk diary should be Simple and frequent. A Comprehensive talk diary Can fulfil Several purposes. it Can:

- provide an overview of the range of opportunities for Speaking and listening which the child has experienced.
- record the child strength and weakness
- Build up a picture over time of Speaking and listening activities.
- focused the child's attention on the value of Speaking and listening
- provide evidence for informal ongoing assessment
- Contribute to planning of activities

## Q#19 Name 5 listening test?

- Dictation
- Text with questions
- Partial dictation
- Responding to Statements
- Three choice true false
- Recorded close

## Q#20 Levels of analysis?

One of the difficulties in researching Speech is the fact that, unlike written texts, the notion of freestanding genre or clearly delimited Sample to be investigated does not readily lend itself to Speech. Level of analysis is used in the Social Sciences to to point to the location, Size, or Scale of a research target. Levels of analysis not necessarily mutually exclusive.

## Q#21 Explain Linguistic Corpus?

Linguistic Corpus encompasses the Compilation and analysis of Collections of Spoken and written texts as the Source of evidence for describing the nature structure and use of languages.

Analysis of Corpus provide linked data on a number of factors at one time - gaze - gestures, prosody, Syntax and lexis should provide a model that goes beyond the literate.

## Q# 22 test / retest

One way of checking is called test / retest. In this procedure the same test is given to the Same people twice, usually with a gap of week or So between the first test and retest. A reliable test should give very Similar results on the two occasions. Reliable test not necessarily a valid test, but an unreliable test Cannot be valid.

## Q#23 According to aspects of Spontaneous Speech does the Speaking is interative process or isolation?

The basic aspects of Spontaneous Speech that language learners need to be aware of and which language teachers may find helpful to reflect on with their students are:

- Speaking is fundamentally an interactive process and is defined by interactivity
- Speaking happens under real-time processing Constraint
- Speaking is more fundamentally linked to the individual who produces it than the written form is.

## Q#24 Note on Pyramid?

The pyramid procedure involves a changing audience which can provide opportunities for repetition with the speaker using an increasingly reduced form of notes each time. Due to their structured nature, they give the speaker a systematic route to follow and allow the audience to predict what will come. presenting and monitoring the talk, like all the other parts of the formal speaking process, can be planned for and practiced. Repeated opportunities to present is important here. pyramid is a three dimentional structure encompassing a polygone as its base. pyramid comes from Greek word pyramins which meant "Wheat Cake".

**Q#25 Explain Statement "find difference in activity).**

In this activity a pair of learners have a similar picture each, but they have to find the differences by describing and not showing their pictures to each other. In this activity Support Comes from the Common features of the two pictures. Support may also involve Some kinds of Support during the task Such as notes, pictures with annotations, and objects. In this procedure teacher Simply rely on group Cooperation to produce Constructions.

**Q#26 Sociolinguistics project?**

- Listener perspective, the notion that our Cultural background provides Certain schematic overlays that influence how we Comprehend events and how we internally structure and report those events.
- Listener participation, the way in which Conversational encounters are Co-Created with listener.
- Listener response, the options the listener chooses from during a listening events and how these response shape the event, give meaning to it.
- Listener in Cross-Cultural interactions, an exploration of ways in wich L1-L1 interactions parallel and differ from L1-L2 and L2-L2 interaction.

**Q#27 Intermediate student's Vocabulary learning techniques use.**

An important focus at the intermediate level is expanding the uses that can be made of known words. This means drawing attention to the underlying meaning of a word by seeing its use in a variety of contexts. word parts should be used remember the meanings of new words. The keyword strategy link the form of an unknown word to its meaning by using a keyword usually taken from the 1st language.

**Q#28 Influence of discourse analytic approach?**

The influence of 1980s UK discourse analysis can be seen in the categorization of stretches of Conversation (1st Speaker PLAN, 2nd Speaker Reservation, 1st Speaker: Counter-Argument.

**Q#29 Teacher Controlling technique?**

In the teacher Controlling techniques learners gain control of the listening material. when the learners have this Control, listening excersise can become learning exercise.

• Understand students • Engage with students

Teachers tell the learnes that any time during the reading of the text they can ask him to stop, read more slowly, repeat, go back to the beginning, Spell a word, explain the meaning of the word, or read more quick

## Q#30 Factors Affecting the Amount and type of Negotiation?

Several factorss effect the amount and type of negotiation:

- pair work usually produces more negotiations on the same task than work in a group of four.
- Cooperating tasks produce more negotiations of the meaning of vocabulary than information gaps task.
- Information gaps task produce a lot of negotiation but not all of it is negotiation of word meaning or indeed language features.
- The signal learners make affect ther adjutments of outputs during a task. In a study of output in activities involving native speakers working with non-native speakers.
- Pica, Holliday, Lewis and morgenthaler (1989) found that the most important factors determining when their partner asked for clarification

## Q#30 Conciousness raising Activity? (Vimp)

Conciousness raising activities develop explicit understanding of how a grammatical Construction works. The goal of Conciousness raising activities is to help learners notice language items when they appear in meaning-focused input and thus increase the chances that they will be learned. It have limited delayed aims.

- Having to underline or note examples of an item in a text.
- being given examples and having to Construct Rule
- having to classify examples into Categories such as Countable/uncountable or active/passive.
- performing rule based error Corrections
- Using a rule to Construct a Sentence
- Recognizing instances of a rule in operation.

Q#31 Vocabulary learning Beginning level?

There are various possibilities for conveying the meaning of new vocabulary. Both brief preteaching before meeting the woods in context and explanation in the context of listening to a story have a substantial effect on learning compared to incidental learning without directly focused attention. This means that before listening activities, it is worth drawing learners's attention to some of the vocabulary that will occur and that it is worth learning.

Q#30 Developing fluency techniques?

It is depend upon the ability to decode the text (including phonemic awareness, phonics and vocabulary abbilities. Fluent readers work with meaningful units such as phrases and clauses as they read.

- The activity is meaning focused.
- The learner take part in activities where all the language items are within their previous experience. These kind of activities called experience task.
- There is support and encouragment for the learner to perform at a higher than normal level. In this activity learner should be comprehending faster, hesitating less and using planned chunks. It provides some deliberate push to the higher level of performance often by using time pressure.

Vu Manu

Q#32 5 Rules push the learner to produce output?

when planning for a variety of Speaking tasks to push learners output are several factors.

- Covering range of topics
- a range of text types
- range of performance condition.

Topic, Text type, performace condition, planning, and amount of support push the learner to produce output.

(Vimp)

3 Write Note on IELTS Speaking test? Relate to SQ#25

In Contrast to the IBT TOEFL Speaking test, the IELTS test is conducted with a face-to-face examiner/interlocutor. In 2001, the revised Version of IELTS Speaking test was launched on the basis of work began around 1998. The International English language testing system (IELTS) is designed to help you work, study or migrate to a Country Where english is the native language.

These includes Countries: Australia, Canada, new zealand.
