

Sta,630 important past paper questions

Different between population and target population?

Explain three important parts of experiment?

Why pilot testing is important?

Questionnaire survey ?

Duties of field research?

Why you analyze from Solomon group design explain?

If u are researches and get the organization data 29 percentage from finances and other departments?

Identification which type of sampling type us used here?

Systematic random sampling?

Type of non probability sampling?

What are central tendency and it's three method?

What is sampling?

Steps in field research?

What does field researchers do?

Why researcher take sample instead of whole population?

Disadvantage of content analysis?

Guidelines for questionier?

The role of interviewer?

Some tip for interviewing?

Types of probability sampling?

Proportions and disproportion?

Why it is necessary to defocus our mind before field research?

Researches ask manager that is your staff members give full input and behave good with coworkers what problem with this question?

Cluster sampling design?

Do explain interferences from non reactive data by using secondary data?

Research process once collect a data how u would perform theoretical activity?

Would you explain spontaneity and confession by using secondary data with examples?

What do you know about numbr and duration of FSD?

Write the note on non reactive?

Observation?

What is sampling frame and sampling frame error?

How researcher locate the evidence in the hc research?

How you can differ between frequency and bivariate distribution table?

Being a researcher how would you criticize the use of secondary research?

What are the functions of recorders?

Components of bivariate table?

How history effect different form mechanical loss in research?

Explain editing?

Explain important measurements and coding in non research helo of example?

Ethical dilemma face the interviewer?

What are different types of qusi experimental design?

While construct a code book two basic rules follow mutually exclusive and exhausted what do you know about these term?

A researcher observe the customer purchase behavior in shopping mall without intercing with them which type of observation?

What is quota sampling and transformation?

Explain instrument effect examples?

Why pilot testing used in experimental research?

Give two limitations of trivariate table?

Importance of sample in research?

Why self administration questionnaire used personally?

Cover letter contain which things?

Internal and external variables?

Field and lab experiment?

5 principal of interview?

What is bracketing regard to historical comparative research?

Treatment of independent variables
