Bt102 quiz 3 solved

By VU Experts Zoologists

Regards. MeRRy

1) Microbial communities that live in or on humans or animals is known as. **Microbiome**
2) The period of time of disease when patient returns to normalcy is called.....**Convalescent period**
3) ..... are normal microbiota that can cause Disease in stress conditions **opportunistic pathogen**
4) Location of algae in ocean depends upon the availability of the..... **All**
5) Virus attach to..... **Host cell membrane.**
6) Incidence of a disease is called.....**Morbidity**
7) A living ..... is a pathogen infected individual who does not show any Signs or symptoms of the disease. **Carrier**
8) Transmission of infection in which medium is involved is called .....**Vehicle Transmission**
9) The extent of pathogenicity.....**Virulence**
10) The disease which is consistently present but with low incidence is called..... **Endemic**
11) Deaths from a disease..... **Mortality**
12) Toga virus gets enter into host cell by..... **pinocytosis**
13) .....number of new cases in a given time period in a population **Incidence**
14) Ability to cause Disease. ..... **pathogenicity**

15) time b/w infection and diseases is called..... **Incubation period**

16) : The disease which is present in an area, unusually high incidence of a disease is called..... **Epidemic**

17) In relation of organisms in which both get benefit from each other is called..... **Mutualism**

18) A method of epidemiology in which Hypothesis of a disease is tested is called..... **Experimental epidemiology**

19) The mechanism of establishment of disease is called..... **Pathogenies**

20) .....present for several days, weeks or months and then disappears. **Transient microbiota**

21) A method of epidemiology use To determine the cause of disease is called..... **Analytical epidemiology**

22) : invasion of the body by the microbes is called. **Infection**

23) The prevalence of disease World wide is known as..... **Pandemic**

24) Viroid only infects..... **Plants**

25) Plaques formation is method of Virus .....**Enumeration**

26) Which of the following methods are use in epidemiological studies ..... **all**

27) When the virus is Outside of a cell, in the extracellular state, a virus is called **a .....virion.**

28) A method of epidemiology use To deal recording the data about disease is called..... **Descriptive**

29) Living of organisms together **is .....symbiosis**

30) Number of deaths from a disease in relation to the population in a given Time. **Mortality rate**

31) permanent residence but do not cause diseases under normal Conditions. **Normal microbiota**

32) a relation in which One is benefited, other is unharmed is called. **Commensalism**

33) a relation in which one is harmed.....**Parasitism**

34) The period of time in which Disease symptoms subside is called. **Decline period**

35) It is a competitive exclusion Compete for nutrients By chemicals. .....**Microbial antagonism**

36) Infectious viral particle, composed of nucleic acid, surrounded By a .....coat called capsid. **Protein**

37) Health care workers report specified disease to local, state, and national Offices is called. ..... **Case report**

38) The branch of biological science deals with the study of disease..... **Pathology**

39) Number of people affected in relation to the total population in a given Time period. ..... **Morbidity rate:**

40) Virusoid are also known as..... **satellite RNA**

41) Reverse transcriptase is an enzyme that transcribe from. **RNA to DNA**

42) ....: Sites where organisms of infections remain viable act as source of infection. **Reservoir**

43) There are ..... Epidemiology methods to study the occurrence and transmission of disease in a population.....**three**

44) Capsomeres are composed of..... **Proteins**
