Final Term Mcq Zoo510 M-WASEEM

① ___ Required for bone formation, egg production, and prevention of rickets → Vitamin D

② to prevent encyphalomalacia (brain chicks disease → Vitamin E

③ Deficiency of ___ lofy clotting time of blood → Vitamin K

④ Animals protein good source of → Vit. B12

⑤ Feed Conseversion of broilers → 2:2

⑥ Most Common grain Used in formulating poultry diets → Corn

⑦ Vegetables fats added in limiting amount in feed → 5 to 10%

⑧ Most common plant protein → Soybean

⑨ ___ are used in grower Poultry → Cotteonseed meal

⑩ ___ meal good balance of AAs → Fish meal

⑪ Commercial feeds for poultry as → mash, pellets, crumbles

⑫ Laying hen egg receving diets containg 3.1 Mcal ME/kg DM require 16.5% protein

⑬ ___ is first limiting AAs for egg production → Methionine

⑭ ___ For laying hen should contain not less than 3-4% animal protein supplement → Mash

⑮ Feather are high in → Sulfur amino acid.

⑯ laying birds need large ammount of → Ca

⑰ Bird stored Ca for about days ___ before the egg was laid in marrow of long bone ___ 10-14

(16) Organic P is more available then → Phytate P
(17) Salt require for feeding of Laying hen → 0.5-1%.
(18) Lying hens require higher content of → Vitamin A
(19) Period after ___ age when hen attain mature body weight → 42W
(20) The period ranged from range → 42-72W
(23) Eggs production hen cover period → 15 month
(24) Defect of ___ yellowish green ting in albumin → Vit B2
(25) Fowl pox → Viral disease.
(26) A female calve weight at birth → 40 kg
(27) Calve reache puberty at → 1 year
(28) Oestrous cycle in cow → 21 days at last 18 hour
(29) The gestion period of cow → 283 days (9.5 month)
(30) The milk yeild of cow depend on → bread
(31) a Holstein produce milk per year → 5800 kg
(32) The ideal milking interval → 12 hour
(33) The laction yeild of cow → Holstein, jersey, Ayreshire
(34) The milk of ___ cow has highest Butter and SNF content → jersey cow
(35) Milk contain fat → 1%
(36) The land require for beef farming → 1.5 acres
(37) ___ refer to how well and animal will accept milk → palatability
(38) Monogastric digestion → Pig, Dog, Human
(39) Polygastric digestion → Cow, Sheep, goat
(40) Pseudo ruminants → Horse rabbits, Hamster

(41) The process by which animals eat and use food → Nutrition
(42) Salt, calcium, sulfur → Macronutrient
(43) Cobalt, copper, iodine, iron → Micronutrient
(44) Type of digestive system → Three
(45) — has crop & gizzard → Avian
(46) Chemical and mechnical breakdown of feed → digestion

(47) water makes animal body wieght → 75%
(48) Carbohydrate in animals diet → 75%
(49) Fats has more energy then carbohydrate → 2.25
(50) Essential amino acid → 10

(51) Macro Mineral → Calcium, Phosphorous
(52) Type of vitamins → Two (fat soluble, water soluble)

(53) Fat Soluble Vitmins → A, D, E, K
(54) wate soluble vitmins → C and B
(55) Crops used for silage → Cron, Legumes
(57) Trace Mineral → Cu, Zn, Se
(58) vitamin found in green plant → A
(59) vitamin found in grains → E

(60) ~~vitamin~~ vegetables in fresh, dried or ensiled → Forage
(61) Type of pathogens → Two (mechanical, Biological)
(62) Mosquito belonge to order → Diptera
(63) The phylum arthopoda have distinct group → 4

(64) The largest phylum in animal kindom → Arthopoda

(67) Arthopoda have species — 1 million
(68) class Crustacea include → lobster, crabs
(69) Sipider, mities ticks, ~~scor~~scorpions → class chelicerata

(69) An insect → Two pair of wings, 3 pair of legs
(69) Pood Feeder → Tick
(70) Tick has familes → Two
(71) Microscope made by → Leeuwenhoek, 1700s
(72) infection disease — Koch et al, 1800s
(73) Mities are parasitic on → Mosquitoes
(74) — Consume tick eggs → Fire ants
(75) — has Allegic Reaction → Dust mites
(76) Chigoe flea, Myiasis → Endoparasite
(77) Bees, wasps and Spider → Envenomizatio
(78) ~~use~~ — use kills susceptible pest in population
→ Intensive pesticide
(79) Any Material that kill, attract, repel and regulate the pest → Pesticide
(80) — Control relies on the Pest natural enemies such as birds, inlect fungi → Biological
(81) Cane toad introduced in → Australia, 1935
(81) when chemical accumulates in animal fat →
→ Bioaccumulation
(82) When organism accumulate residues in higher concentration → Bio-magnification
(83) — Contain highest concentration of pesticide residues → Birds

(84) A – any organism that is unwanted by humans
→ pest

(85) ___ is not only one kind of pest → Insect

(86) ___ plague is still present in some rodent population → Bubonic

(87) Life cycle of insect → Egg, Larva, pupa, Adult, Nymph

(88) Ruminants have compartment is stomach → 4

7Q Define vector ? (2)

Something that transmit disease, Rodents, birds insects, shoes

(2) Q Biosecurity ? (2)

Biosecurity is protecting Birds from disease

(3) Q write common disease of poultry ? (3)

① Fowl pox ② Ranikhet, ③ Fowl Coryza
④ Bacillary white Diarrhea, ⑤ Bumble Foot

(4) Q Define Nutrition (2)

The process by which eat and use food.

Q Define Nutrient – (2)

A substance that is necessary for organism to live and grow.

(5) Q What is forage ? (2)

Vegetable matter in fresh, dried or ensile state

(6) Define Pest

A pest is any organism that is unwanted by humans.
