Question No: 41 (M - 10)

Compare and contrast the advantages and disadvantages of Gantt chart and PERT analysis.

A PERT network flowchart kind of system which represents the sequence of activities needed to complete project .

It also keep track of costs linked with that activity

A Gantt chart is special bar type charts which show the present progress of the project. It shows major activity compare to target completion date.

Project activities shown on the left side of the chart. Time shown on bottom or top of the chart

Advantages of Gantt chart

1. **It shows how much of the plan has been completed**
2. **Many people prefer this plan**

Disadvantages

1. **Estimated values must be given before the chart can be drawn.**
2. **It can not show critical path**
3. **Different type of scheduling cannot be shown**
4. **several scheduling possibilities cannot be shown**

Advantages of PERT

Use can dermine critical path

You can update project performance

You can expect project completion time

Activity start and end dates

Disadvantages

So many activities

Network charts might become long and hard to understand for someone
