Quiz 1 - CS606 (Q1/10)

Question:

What is the main characteristic of linear IRs?

Options:

A. They represent the program as a graph.

B. They allow for complex program structures and sophisticated analyses.

C. They represent the program as a linear sequence of instructions or statements.

D. They combine elements of graphical and linear representations.

Copied: 1/8/2026, 9:36:21 PM

Quiz 2 - CS606 (Q2/10)

Question:

What is the size, in bytes, typically allocated for addresses in three-address code?

Options:

A. 4 bytes

B. 1 byte

C. 2 bytes

D. 8 bytes

Copied: 1/8/2026, 9:36:36 PM

Quiz 3 - CS606 (Q3/10)

Question:

Which of the following attributes flows from parent nodes to child nodes in an attributed tree?

Options:

A. Synthesized attributes

B. Semantic attributes

C. Structural attributes

D. Inherited attributes

Copied: 1/8/2026, 9:36:50 PM

Quiz 4 - CS606 (Q4/10)

Question:

Which file extension is commonly used for YACC specification file?

Options:

A. .bnf

B. .lex

C. .bin

D. .y

Copied: 1/8/2026, 9:37:13 PM

Quiz 5 - CS606 (Q5/10)

Question:

In attribute grammars, an attribute (e.g., val) of a symbol (e.g., B) can be written as _____.

Options:

A. val@B

B. B.val

C. B@val

D. val.B

Copied: 1/8/2026, 9:37:40 PM

Quiz 6 - CS606 (Q6/10)

Question:

What is the purpose of analyzing attribute rules in the rule-based methodology of attribute grammar evaluation?

Options:

A. To establish a fixed ordering of attribute evaluation

B. To generate the parse tree

C. To optimize the attribute computation process

D. To determine the syntax of the source code

Copied: 1/8/2026, 9:38:07 PM

Quiz 7 - CS606 (Q7/10)

Question:

Which of the following is NOT a typical use of attributed trees in compiler design?

Options:

A. Error handling

B. Syntax analysis

C. Type checking

D. Optimization

Copied: 1/8/2026, 9:38:27 PM

Quiz 8 - CS606 (Q8/10)

Question:

Stack-machine code is also called _____ code.

Options:

A. Two-address

B. Three-address

C. Zero-address

D. One-address

Copied: 1/8/2026, 9:39:29 PM

Quiz 9 - CS606 (Q9/10)

Question:

How are the nodes in the dependency graph evaluated in the rule-based methodology of attribute grammar evaluation?

Options:

A. In a random order

B. In an order specified by the attribute rules

C. In a topological order

D. In a bottom-up order

Copied: 1/8/2026, 9:39:47 PM

Quiz 10 - CS606 (Q10/10)

Question:

Different compilers always use the same intermediate representation (IR) during the compilation process.

Options:

A. False

B. True

Copied: 1/8/2026, 9:40:06 PM
