

BIO504T - Biochemistry I

Quiz 3

Created by Alif

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 1 of 10 (**Start time: 02:53:30 PM, 01 July 2024**)

The hydrogen bonding in DNA strand occurs between:

Select the correct option

- | | |
|----------------------------------|---------------------------------------|
| ☐ | Sugar groups on opposite strands |
| ☐ | Nitrogenous bases in same strand |
| ☐ | Sugar groups on each strand |
| ☒ | Nitrogenous bases on opposite strands |

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 2 of 10 (**Start time: 02:54:22 PM, 01 July 2024**)

Nucleotide which have structure most similar to uracil is:

Select the correct option

☐	Guanine
☒	Thymine
☐	Cytosine
☐	Adenine

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 3 of 10 (**Start time: 02:54:44 PM, 01 July 2024**)

In the same DNA strand, nucleotides are attached to each other through:

Select the correct option

☐	Glycosidic bond
☐	Hydrogen bond
☐	Sulphate bond
☒	Phosphodiester bond

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 4 of 10 (**Start time: 02:55:04 PM, 01 July 2024**)

Two nucleotides on two complementary strands are joined each other through:

Select the correct option

- | | |
|----------------------------------|------------------------|
| ☒ | Hydrogen bonding |
| ☐ | Phosphodiester bonding |
| ☐ | Glycosidic linkage |
| ☐ | Sulphate bridges |

Se

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 5 of 10 (**Start time: 02:55:32 PM, 01 July 2024**)

Which one of the following is not an example of nucleic acid?

Select the correct option

☒	Glycoproteins
☐	tRNA
☐	DNA
☐	mRNA

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 6 of 10 (Start time: 02:55:46 PM, 01 July 2024)

Nucleoside tri- phosphates such as -----are the principal donors and acceptors of phosphoryl group in metabolism.

Select the correct option

- | | |
|----------------------------------|-----|
| ☐ | ALP |
| ☒ | ATP |
| ☐ | KTP |
| ☐ | CPP |

Search

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 7 of 10 (**Start time: 02:56:09 PM, 01 July 2024**)

Process of translation leading to protein synthesis takes place in:

Select the correct option

- | | |
|----------------------------------|----------------------|
| ☐ | Nucleus |
| ☒ | Cytoplasm |
| ☐ | Extracellular spaces |
| ☐ | Golgi bodies |

Search

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 8 of 10 (**Start time: 02:56:25 PM, 01 July 2024**)

Nucleic acid is an example of:

Select the correct option

- | | |
|----------------------------------|--------------------|
| ☐ | Micromolecule |
| ☐ | None of the option |
| ☒ | Macromolecule |
| ☐ | Nanomolecule |

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 9 of 10 (**Start time: 02:56:36 PM, 01 July 2024**)

Which one of the following nucleotide is a double ring structure?

Select the correct option

☐	Cytosine
☐	Thymine
☐	Uracil
☒	Adenine

BIO504T - Biochemistry I (Theory) (Quiz 03)

Question # 10 of 10 (**Start time: 02:56:51 PM, 01 July 2024**)

One main difference between DNA and mRNA is:

Select the correct option

- | | |
|----------------------------------|--|
| ☐ | DNA contains Adenine while mRNA does not |
| ☒ | DNA is double stranded while mRNA is single stranded |
| ☐ | DNA contains nucleotides while mRNA does not |
| ☐ | DNA contains Guanine while mRNA does not |
