15. In linguistics, prosody is concerned with the properties of **syllables** and larger units of speech
16. "The horse is reading the newspaper". This sentence is an example of **semantic oddness**.
17. According to research in developing morphology the acquisition of the plural marker is called **overgeneralization**.

18. **Anaphora** can be defined as subsequent reference to an already introduced entity.
19. Semantic development in a child's use of words is usually a process of **overextension**.
20. Emotional reaction or affect. **All of the Given**
21. Vocabulary lists and sets of grammar rules are used. **Grammar Translation Method**
22. Sihia is the language of **Japan**.

Malik Science Academy

23. Young, Lichun and Jun (2001) analyzed contents of **four Chinese** journals of Applied Linguistics.
24. For lexicographers indispensable resources. **Dictionaries**
25. In syntax, connotative meaning is also called **associative** meaning.
26. In semantics, **propositional** meaning is the type of meaning that comes from the context within which the sentence is used.

27. A sentence has a noun and a **verb** phrase.

28. Specific aspects of language ability can be accorded **localization**.

29. **Psycholinguistic** is the study of the psychological and neurobiological factors that enable humans to acquire, use, comprehend and produce language.

30. **Social-cultural context** still includes factors such as illiteracy rate, population geographic distribution, educational level and the populations' ethnic composition.

31. In the quantitative research we use: **Static**

32. Oung and Jun: **Chinese**

33. The sources of lexicographers are **secondary** fieldwork

34. The first component is **grammatical competence**, which involves the accurate use of words and structures.

35. According to grim law p of Latin has been change into f in **English**.

35. Verb phrase cannot consist: **D+N**

36. The deep structure is an abstract level of **structural organization** in which all the elements determining structural interpretation are represented.

37. If an agent uses another entity in order to perform an action, that other entity fills the role of **instrument**.

38. Word sense: **Disambiguator**.

39. The sentence 'John believed that Cathy knew that Mary helped George' is tediously **recursive**.

Malik Science Academy

128. The gradual development of ability in a language by using it naturally in communicative situations with the people having the knowledge of that language is known as **acquisition**.

129. In the sentence 'the girl saw a dog', 'saw' is a **verb** phrase.

130. The key to the concept ("everything fitting together well") is called **coherence**.

131. What is neurolinguistics?

Answer: **The study of the relationship between language and the brain is called neurolinguistics. The field of study dates back to the 19th century when the location of language in the brain was an early challenge.**

132. Name any three standard varieties of English in the world? 2 Marks

Answer: **There are different standard varieties of English in the world:**

British English

North American English

Australian English

Indian English

133. What do you know about the functions of language?

There are five functions of language:

Language is Expressive

Language is Powerful

Language as a Means of Control

134. Explain briefly what is an electronic dictionary and its forms? 2 Marks

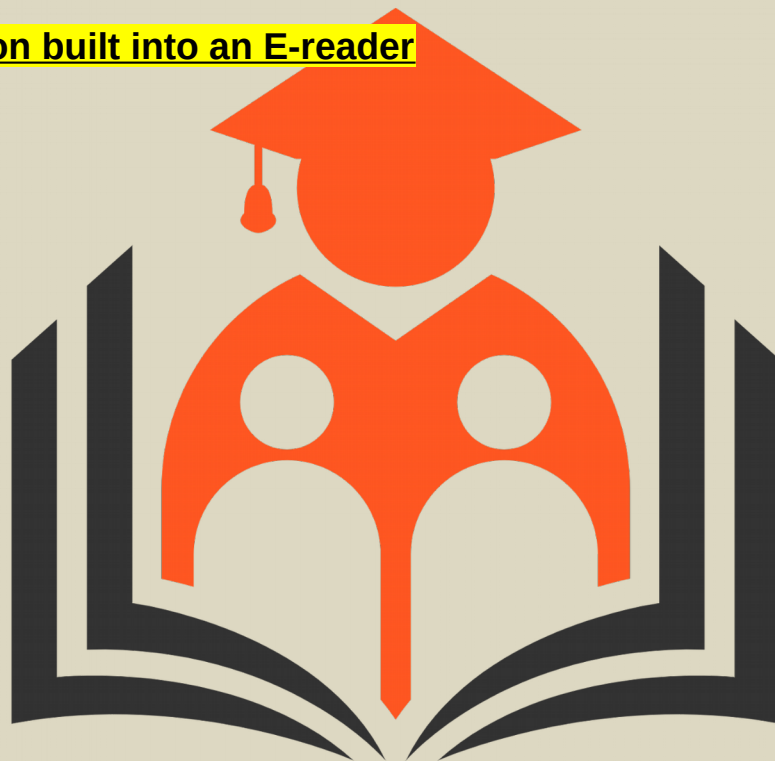

An electronic dictionary is a dictionary whose data exists in digital form and can be accessed through a number of different media.

Electronic dictionaries can be found in several forms, including

As dedicated handheld devices

As apps on smart phones and tablets, computers or computer software

As a function built into an E-reader

141. How child is taught to speak?

Answer: The linguistic repertoire of the child increases with the passage of time. The question arises whether the child is being taught or not. The idea is that a child is not really supported by what the child actually does. In the vast majority of children; no one provides any instruction about how to speak the language nor should we picture a little empty head gradually being filled with words and

phrases. A more accurate view highlighted the children actively construct from what is said to them, possible ways of using the language.

142. Describe very briefly, what is Wernick's Area? 2 Marks

Answer: **A region of the brain concerned with the comprehension of language, located in the cortex of the dominant temporal lobe. Damage in this area causes Wernicke's aphasia, characterized by superficially fluent, grammatical speech but an inability to use or understand more than the most basic nouns and verbs. This finding confirmed the left hemisphere location of language ability and led to the view that Wernicke's area is part of brain crucially involved in the understanding of speech.**

143. Define contrastive linguistics? 2 Marks

Answer: It is a practice oriented linguistic approach that seeks to describe the differences and similarities between a pair of languages.

144. Describe briefly 'Constancy under Negation Test' with at least one example. 2 Marks

Answer: One of the tests used to check for the presuppositions underlying sentences involves negating a sentence with a particular presuppositions and checking if the presuppositions remains true.

My car is a wreck. (or the negative version)

My car is not a wreck.

145. What do you mean by coherence? 2 Marks

Answer: Coherence is the key to the concept 'everything is fitting together well'. It is beyond the text that exists in people, not in words or structures. It is people who make sense of what they read to hear. Coherence is the own understanding of something based on personal experiences.

148. Explain Prosody.

Answer: Prosody is the study of the tune and rhythm of speech, and the way these features contribute to meaning. Prosody features apply to a level above that of the individual phoneme and very often to sequences of words. Speech contains various levels of information that can be described as; Linguistic- direct expression of meaning

Paralinguistic- may indicate attitude or membership of a speech community
Non-linguistic- may indicate something about a speaker's vocal physiology, state of health or emotional state.

149. Enlist the names of any three Maxim?

Answer:

Quantity Maxim

Quality Maxim

Maxim of manner

150. **Stages of Child language learning:**

The stages of language production by the children focusing primarily on the unfolding of lexical and syntactic knowledge are mentioned as follows:

<u>Stage</u>	<u>Typical Age</u>	<u>Description Age</u>
---------------------	---------------------------	-------------------------------

<u>Babbling</u>	6-8 Months	Repetitive CV patterns
<u>One-word Stage</u>	9-18 Months	Single open class words or word stems
<u>Two-word Stage</u>	18-24 Months	Mini sentences with simple semantic relations
<u>Telegraphic Stage or Early multiword Stage</u>	24-30 Months	Telegraphic sentence structures of lexical rather than functional or grammatical morphemes.
<u>Later Multiword Stage</u>	30+ Months	Grammatical or functional structure emerge.
