We offer Project help for ENG525-526 as well.

### SHORT QUESTIONS

---

#### 1. What are the benefits of Self-Assessment?

- Promotes independent learning.
- Helps learners identify strengths and weaknesses.
- Increases motivation and responsibility for learning.

#### 2. Define E-Assessment and mention its forms/types.

E-Assessment is the use of digital technologies to evaluate learners' performance.  
Common forms include diagnostic, formative, and summative assessment.

#### 3. What are three benefits of E-Assessment?

- Quick feedback to learners.
- Easy record keeping and management.
- Greater flexibility in assessment delivery.

#### 4. Discuss two approaches to feedback in E-Assessment.

- Automated Feedback: Generated instantly by the system.
- Teacher Feedback: Personalized comments provided by the instructor.

### **5. What is Blended Learning?**

Blended learning combines face-to-face classroom instruction with online learning activities to enhance the learning experience.

### **6. Mention three characteristics of Blended Learning.**

- Combines online and traditional learning.
- Encourages learner autonomy.
- Provides flexible learning opportunities.

### **7. Mention two motivation factors in Blended Learning.**

- Increased learner control over learning.
- Greater interaction and engagement.

### **8. Explain the Framework of SLA.**

The SLA framework explains how learners acquire a second language through input, interaction, feedback, and language output.

### **9. Mention three considerations of SLA.**

- Learner differences.
- Learning environment.
- Language exposure and interaction.

### **10. Define CMC (Computer-Mediated Communication) and mention its benefits.**

CMC refers to communication through digital devices and networks. It improves interaction, collaboration, and language practice opportunities.

### **11. Name three types of CMC.**

- Synchronous communication.
- Asynchronous communication.
- Social networking communication.

**12. Define Affordance according to Norman.**

According to Norman, affordance refers to the perceived and actual properties of an object that suggest how it can be used.

**13. Mention three perspectives of L2 Reading.**

- Linguistic perspective.
- Cognitive perspective.
- Sociocultural perspective.

**14. What is the purpose of L2 Reading?**

The purpose of L2 reading is to improve language proficiency, vocabulary development, and comprehension skills in a second language.

**15. Mention three considerations in L2 Reading Technologies.**

- Learner needs.
- Ease of use.
- Educational effectiveness.

**16. What considerations should teachers make before integrating technology?**

- Learning objectives.
- Student needs and abilities.
- Availability of resources and support.

**17. Define Curriculum Design.**

Curriculum design is the process of planning, organizing, and developing learning objectives, content, activities, and assessments.

**18. Mention three principles of Multimedia Learning.**

- Multimedia Principle.
- Modality Principle.
- Coherence Principle.

**19. Give an example of Human-Computer Program Language Interaction.**

A chatbot is an example of human-computer program language interaction, where users communicate with a computer system using natural language.

**20. What are three benefits of Digital Books?**

- Easy accessibility anytime and anywhere.
- Interactive features such as audio and hyperlinks.
- Reduced printing and storage costs.

**21. What are the benefits of Self-Developed Courseware?**

- Meets specific learner needs.
- Increases teaching flexibility.
- Supports customized learning experiences.

**22. Mention five benefits of technology use in the classroom.**

- Enhances student engagement.
- Improves access to information.
- Supports collaborative learning.
- Encourages independent learning.
- Provides instant feedback.

**23. What technologies are used in teaching and learning L2 Writing?**

- Google Docs.
- Writing Pal.
- Blogs and Wikis.

**24. What technologies are used in teaching and learning L2 Reading?**

- Digital books.
- Online dictionaries.
- Reading software and websites.

**25. Name three technologies used for reading.**

- E-books.

- Google Books.
- Text-to-Speech tools.

**26. What is the use of Clickers in the classroom?**

Clickers allow students to respond instantly to questions, promoting participation and providing immediate feedback.

**27. What is the function of Dragon Software?**

Dragon Software converts spoken language into written text using speech recognition technology.

**28. Define CAPT and mention its benefits.**

CAPT (Computer-Assisted Pronunciation Training) helps learners improve pronunciation through technology. It provides immediate feedback and supports independent practice.

**29. Who are the intended users of Writing Pal?**

Writing Pal is designed for students who want to improve their writing skills through automated guidance and feedback.

**30. What is the function of Google Books and NGram Viewer?**

Google Books provides access to digitized books, while NGram Viewer analyzes word and phrase usage across time.

**31. Mention two uses of Google Docs.**

- Collaborative writing and editing.
- Online storage and sharing of documents.

**32. What is the use of Lang-8 in L2 Writing?**

Lang-8 allows language learners to write texts and receive corrections from native speakers.

**33. Write a short note on Text-to-Speech.**

Text-to-Speech technology converts written text into spoken words, helping learners improve listening and pronunciation skills.

**34. Define Prosody.**

Prosody refers to the rhythm, stress, and intonation patterns used in spoken language.

**35. What are the five levels of Virtual Worlds?**

- Perception.
- Representation.
- Interaction.
- Communication.
- Collaboration.

**36. Mention five benefits of an Interactive Whiteboard.**

- Increases student engagement.
- Supports multimedia learning.
- Enhances classroom interaction.
- Improves visual presentation.
- Encourages collaboration.

**37. Mention two forms of E-Assessment.**

- Formative Assessment.
- Summative Assessment.

**38. Define E-Marking and explain its usage.**

E-Marking is the electronic grading of assessments. It improves efficiency, accuracy, and speed in evaluating student work.

**39. Define E-Submission.**

E-Submission is the electronic submission of assignments and assessments through online platforms.

**40. Which university developed the COCA Corpus?**

The Corpus of Contemporary American English (COCA) was developed at Brigham Young University (BYU).

**41. Which university developed the COCS Corpus?**

The Corpus of Contemporary Canadian English (COCS) was developed by Brigham Young University (BYU).

**42. What was the initial function of Turnitin?**

Turnitin was initially developed to detect plagiarism and ensure academic integrity.

**43. What are the functions of Juxta, Wordle, and Walrus?**

- Juxta: Compares texts.
- Wordle: Creates word clouds.
- Walrus: Assists in corpus and text analysis.

**44. What is the gap in SLA?**

The gap in SLA refers to the difference between a learner's current language knowledge and the target language proficiency.

**45. What are three points of SLA in CALL?**

- Language input.
- Interaction opportunities.
- Feedback and output practice.

**46. Mention two benefits of Peer Assessment.**

- Encourages collaborative learning.
- Develops critical thinking skills.

**47. Explain Self-Assessment in E-Learning.**

Self-assessment in e-learning allows learners to evaluate their own progress using online quizzes, checklists, and reflective activities.

**48. Differentiate between Diagnostic and Achievement Assessment.**

Diagnostic assessment identifies learners' strengths and weaknesses before instruction, while achievement assessment measures learning outcomes after instruction.

**49. Write a short note on CMC in Distance Learning.**

CMC supports communication between teachers and learners in online environments, making distance learning more interactive and effective.

**50. How effective is CMC in L2 Reading?**

CMC enhances L2 reading by promoting discussion, collaboration, and access to authentic reading materials.

**51. Name two web-based Course Management Systems used in Higher Education.**

- Moodle.
- Blackboard.

**52. What are the other names of Cognitive Assessment?**

Cognitive assessment is also known as cognitive evaluation or cognitive testing.

**53. Define the Cognitive Construct of L2 Reading Proficiency.**

It refers to the mental processes involved in understanding, interpreting, and analyzing texts in a second language.

**54. Define Cognitive Assessment.**

Cognitive assessment evaluates a learner's thinking, reasoning, problem-solving, and comprehension abilities.

**55. Give three examples/uses of Multimedia.**

- Videos.
- Audio recordings.
- Animations.

**56. Explain the multimedia tools Storybird and Prezi.**

Storybird is used for creating digital stories, while Prezi is used for creating interactive presentations.

**57. Mention three considerations for Self-Developed Courseware.**

- Learner needs.

- Learning objectives.
- Usability and accessibility.

**58. Mention three considerations of ASR (Automatic Speech Recognition).**

- Accuracy of speech recognition.
- Quality of pronunciation feedback.
- Learner proficiency level.

**59. Write a short note on Curriculum while using Technology.**

Technology should support curriculum goals by enhancing learning activities, engagement, and assessment processes.

**60. What are the two learning ways?**

- Individual Learning.
- Collaborative Learning.

**61. Write a short note on Cognitive Science Principles.**

Cognitive science principles explain how people learn, process information, and retain knowledge to improve instructional design.

## LONG QUESTIONS

---

### **1. What considerations should teachers strive for in Blended Learning?**

Teachers should ensure a balance between online and face-to-face learning. They should consider learners' needs, learning objectives, technology availability, and student engagement. Clear instructions and appropriate assessment methods are also important. Effective communication and support help learners succeed in a blended environment.

### **2. Discuss the benefits of the Corpus of Contemporary American English (COCA).**

COCA is a large and widely used corpus that provides authentic language examples. It helps learners and researchers study vocabulary, grammar, and language usage patterns. It supports language teaching, material development, and linguistic research. Users can analyze how words and phrases are used in different contexts and time periods.

### **3. Explain Schmidt's Interaction Hypothesis.**

Schmidt's Interaction Hypothesis states that language learning improves through meaningful interaction. Learners notice gaps between their language use and the target language during communication. Feedback from others helps them recognize errors and improve accuracy. Interaction promotes language awareness and supports language acquisition.

### **4. Explain Sociocultural Theory in L2 Learning with neurobiological and social dimensions.**

Sociocultural Theory, proposed by Vygotsky, emphasizes that learning occurs through social interaction. Language development is influenced by cultural and social experiences. The neurobiological dimension involves cognitive processes in the brain, while the social dimension focuses on collaboration and guidance from others. Both dimensions work together to support L2 learning.

### **5. Differentiate between Traditional Assessment and E-Assessment.**

Traditional assessment is paper-based and usually conducted in classrooms, while E-Assessment uses digital technologies. E-Assessment provides quicker feedback and

easier data management. Traditional assessment may require more time for grading and record keeping. E-Assessment offers flexibility, accessibility, and automated evaluation features.

**6. Discuss five benefits of E-Assessment over Traditional Assessment.**

- Provides immediate feedback.
- Reduces administrative workload.
- Improves accuracy in marking.
- Allows flexible access and submission.
- Stores and manages assessment data efficiently.

These advantages make assessment faster, more convenient, and learner-friendly.

**7. Explain the approaches to feedback in E-Assessment.**

Feedback in E-Assessment can be automated or instructor-based. Automated feedback provides instant responses generated by the system. Instructor feedback offers personalized comments and suggestions. Peer feedback may also be used, allowing learners to evaluate each other's work. Effective feedback helps improve learning outcomes.

**8. Discuss five considerations before adopting a Blended Learning approach.**

- Learning objectives and outcomes.
- Availability of technology and resources.
- Learner readiness and digital skills.
- Teacher training and support.
- Assessment and communication strategies.

These factors ensure successful implementation of blended learning.

**9. Discuss the main categories of technology used in learning L2 Writing.**

Technology for L2 writing generally falls into two categories: writing support tools and communication tools. Writing support tools include grammar checkers, Writing Pal, and word processors. Communication tools include blogs, wikis, and collaborative platforms like Google Docs. These technologies enhance writing skills and collaboration.

**10. Explain the goals of using technology before integrating it into teaching.**

Before integrating technology, teachers should identify clear educational goals. Technology should improve learning outcomes, increase student engagement, and support instructional objectives. It should address learner needs and enhance classroom activities. Effective integration occurs when technology serves pedagogical purposes rather than being used for its own sake.

**11. Explain the contribution/theory of Plass and Jones.**

Plass and Jones proposed a multimedia approach to language learning. They argued that learners understand and retain information better when verbal and visual materials are combined. Their theory highlights the importance of multimedia resources in supporting comprehension, vocabulary learning, and language acquisition.

**12. Explain the views of Cardenas-Claros and Gruba (2013) regarding feedback and technology.**

Cardenas-Claros and Gruba emphasized the role of technology in providing effective feedback for language learners. They suggested that digital tools enhance learner autonomy and improve the quality of feedback. Technology enables timely responses and supports continuous learning and improvement.

**13. Explain Focus on Form in L2 Learning.**

Focus on Form is an approach that draws learners' attention to language structures while they are engaged in meaningful communication. Instead of teaching grammar in isolation, language forms are addressed within communicative activities. This approach improves both fluency and accuracy in language learning.

**14. Discuss Incidental Learning through Multimedia.**

Incidental learning occurs when learners acquire knowledge without direct intention to learn. Multimedia resources such as videos, animations, and interactive content expose learners to language naturally. This exposure improves vocabulary, comprehension, and language skills while learners focus on meaningful activities.

**15. Explain Schmidt's observations regarding L2 learners and their language gaps.**

Schmidt observed that learners often become aware of differences between their own language use and the target language during interaction. This awareness, known as "noticing," helps learners identify language gaps. Recognizing these gaps encourages improvement and plays a crucial role in second language acquisition.
