MIDTERM EXAMINATION
CS506- Web Design and Development

Question No: 1 (Marks: 1) - Please choose one
If we remove static from main then program _____
►Program cannot compile
►Program will compile and work properly
►Run time errors
►**Exception throws in main** Click here for Detail

Question No: 2 (Marks: 1) - Please choose one
If we remove String array from main then program_____
►Program cannot compile
►Program will compile and work properly
►**Run time errors** Click here for Detail
►Exception throws in main

Question No: 3 (Marks: 1) - Please choose one
Java developed in _____
►1990
►**1995 (Page 12)**
►1997
►2000

MIDTERM EXAMINATION
CS506- Web Design and Development

Question No: 1 (Marks: 1) - Please choose one
Which of the following methods are invoked by the AWT to support paint and repaint operations?
- ► **paint( )** Click here for Detail
- ► repaint( )
- ► draw( )
- ► redraw( )

Question No: 2 (Marks: 1) - Please choose one
When defining a method you must include a _____ to declare any exception that might be thrown but is not caught in the method.
- ► try block
- ► finally block
- ► catch block
- ► **throws-clause** Click here for Detail

Question No: 3 (Marks: 1) - Please choose one
Aside from the Scanner class, which of the following classes can be used for text-file file input?

- ► ObjectInputStream
- ► **BufferedReader** Click here for detail
- ► StringTokenizer
- ► None of these

Question No: 4 (Marks: 1) - Please choose one
Which of the following statements is true regarding Vectors with no specified base type?
- ► A base type is needed, because Java needs to know how to allocate memory.
- ► **No base type is needed, because Java will use the Object class as a base type.** Click here for detail
- ► If a base type is not specified the code will not compile.
- ► No base type is needed because Vectors default to storing String objects.

Question No: 5 (Marks: 1) - Please choose one
A serializable class must implement the method(s) _____.
- ► readObject and writeObject
- ► Either readObject or writeObject, or both, depending upon the desired behavior
- ► **No need to implement any method** Click here for Detail
- ► None of the given option

Question No: 6 (Marks: 1) - Please choose one
You can ---------to a network using sockets.

- ► Read
- ► Write
- ► **Read/Write (Page 222)**
- ► None of these

Question No: 7 (Marks: 1) - Please choose one
Socket is a ----------communication channel between hosts.

- ► Uni-directional
- ► **Bi-directional (Page 211)**
- ► Multi-directional
- ► None of these

Question No: 8 (Marks: 1) - Please choose one
Which of the following are passed as an argument to the paint ( ) method?

- ► A Canvas object
- ► **A Graphics object** Click here for detail
- ► An Image object
- ► A paint object

Question No: 9 (Marks: 1) - Please choose one
The code below draws a line. What color is the line?
g.setColor(Color.red.green.yellow.red);
g.drawLine(0, 0, 100,100);

- ► Red
- ► Green
- ► Yellow
- ► **Black**

Question No: 10 (Marks: 1) - Please choose one
To create DataBaseMetaData object we write following line of code

- ► **DataBaseMetaData db = con.getMeataData(); (Page 177)**
- ► ResultSetMetaData rsmd = rs.getMetaData();
- ► ResultSetMetaData rsmd = rs.setMetaData();
- ► DataBaseMetaData db = con.setMeataData();

Question No: 11 (Marks: 1) - Please choose one
Event source can have --------- listeners registered on it.

- ► Single
- ► Double
- ► Triple
- ► **Multiple (Page 125)**

Question No: 12 (Marks: 1) - Please choose one
An abstract class ---------- instantiated.

- ► **Can't be (Page 96)**
- ► Can be
- ► Must
- ► None of these

Question No: 13 (Marks: 1) - Please choose one
A _____ defines the way and method of communication between two parties.

- ► Compiler
- ► **Protocol (Page 242)**
- ► Tool
- ► Technique

Question No: 14 (Marks: 1) - Please choose one
What if the static modifier is removed from the signature of the main method?

- ► The program does not compile
- ► The program compiles but does not run
- ► The program compiles and runs properly
- ► **The program throws an exception on compile time** Click here for Detail

Question No: 15 (Marks: 1) - Please choose one
What if the main method is declared as private?

- ► The program does not compile…
- ► **The program compiles but does not run** Click here for Detail
- ► The program compiles and runs properly
- ► **The program throws an exception on compile time**

Question No: 16 (Marks: 1) - Please choose one
A member variable or method prefixed by the **protected** access modifier can be accessed:

- ► Within the same class
- ► Within the sub-class
- ► Within the same package
- ► **All of the above** Click here for Detail

MIDTERM EXAMINATION
CS506- Web Design and Development

Question No: 1 (Marks: 1) - Please choose one
In Java a final class must be sub-classed before it.
► True
► **False** Click here for Detail

Question No: 2 (Marks: 1) - Please choose one
A top level class without any modifier is accessible to
► any class
► **any class within the same package** Click here for Detail
► any class within the same file
► any subclass of this class

Question No: 3 (Marks: 1) - Please choose one
A top level class may have only the following access modifier.
► Package
► Private
► Protected
► **Public** Click here for Detail

Question No: 4 (Marks: 1) - Please choose one
In Java an abstract class cannot be sub-classed
► True
► **False** Click here For Detail

Question No: 5 (Marks: 1) - Please choose one
Given a one dimensional array arr, what is the correct way of getting the number of elements in arr
► **arr.length** Click here for Detail
► arr.length – 1
► arr.size – 1
► arr.length()

Question No: 6 (Marks: 1) - Please choose one
When recursive method is called to solve a problem, the method actually is capable of solving only the simpler case(s), or base case(s).
► **True** Click here For Detail
► False

Question No: 7 (Marks: 1) - Please choose one
Which of these are valid declarations for the main method?
► public void main();
► **public static void main(String args[]); (Page 26)**
► static public void main(String);
► public static int main(String args[]);

Question No: 8 (Marks: 1) - Please choose one
Map interface is derived from the Collection interface.
► True
► **False** Click here For Detail

Question No: 9 (Marks: 1) - Please choose one
In Java, which of these classes implement the LayoutManager interface?
► RowLayout
► ColumnLayout
► **GridBagLayout** Click here for Detail
► FlowLayoutManager

Question No: 10 (Marks: 1) - Please choose one
BorderLayout is the default layout manager for a JFrame's content pane
► **True** Click here For Detail
► False

MIDTERM EXAMINATION
CS506- Web Design and Development

Question No: 1 (Marks: 1) - Please choose one
You want a class to have access to members of another class in the same package. Which is the most restrictive access that accomplishes this objective?
► public
► private
► protected
► transient
► **default access** Click here For Detail

Question No: 2 (Marks: 1) - Please choose one
In Java garbage collection is done by_____
► **JVM (Java Virtual Machine) (Page 47)**
► Programmer
► Both JVM (Java Virtual Machine)and Programmer
► OS (Operating System)
► None of given

Question No: 3 (Marks: 1) - Please choose one
Which of following can be thrown using the throw statement?
► Error
► Throwable
► **Exception (Page 72)**
► RuntimeException
► All of Given

Question No: 4 (Marks: 1) - Please choose one
_____is/are the JSP Implicit Object(s).
► session
► application
► config
► **All of Given** Click here For Detail
► None of Given

Question No: 5 (Marks: 1) - Please choose one
JavaBeans are?
► A special Java class file
► Servlets
► Applets
► **A Special form of JSP (Page 367)**
► None of Given

Question No: 6 (Marks: 1) - Please choose one
An expression tag contains a scripting language expression that is evaluated.
► **True** Click here For Detail
► False

Question No: 7 (Marks: 1) - Please choose one
A final class can't be extended.
► **True** Click here For Detail
► **False**

Question No: 8 (Marks: 1) - Please choose one
ServletConfig defines a set of methods that a servlet uses to communicate with its servlet container.
► True
► **False** Click here For Detail

Question No: 9 (Marks: 1) - Please choose one
A method can not be made final until whole class is made final.
► True
► False

Question No: 10 (Marks: 1) - Please choose one
Servlet session and JSP session have different abilities.
► True
► **False** Click here For Detail

CS506- Web Design and Development
Some other MCQ's & quizzes

1 - What if the main method is declared as private?
►The program does not compile
►**The program compiles but does not run** Click here for Detail **rep**
►The program compiles and runs properly
►The program throws an exception on compile time

2 - Java program code is compiled into form called
►Machine code
►native Code
►**Byte Code** **(Page 16)**
►Source Code

3 - A top level class without any modifier is accessible to
►any class
►**any class within the same package** Click here For Detail
►any class within the same file
►any subclass of this class

4 - Overloading is _____ whereas overriding is _____
► Run time binding, compile time binding
► Late binding, compile time binding
► **Compile time binding, run time binding**
► Run time binding, late time binding

5 - Static methods only access ___
► instance variable
► instance method
► **static variables and methods** Click here For Detail
► both static and instance members

6 - Which of the following is modifier is provided by default if no access is written explicitly?

► public
► Private
► Protected
► **Default** Click here For Detail

7 - A top level class may have only the following access modifier.

► Package
► Private
► Protected
► **Public** Click here for Detail **rep**

8 - Which of the following is used for inheritance in java?

►implements
►extends
►**: (colon)** Click here For Detail
► inherit

9 - A collection can store.....

► **Homogenous objects**
► Heterogeneous objects
► Objects as well as primitive values
► At most 100 objects

10 - Which of the following syntax is used to attach an input stream to console?

► **FileReader fr = new FileReader(' input.txt ') ; (Page 77)**
► FileReader fr = new FileReader(FileDescriptor.in);
► FileReader fr = new FileReader(FileDescriptor);
► FileReader fr = new FileReader(console);

11 - Window frame and dialog use _____ as their default layout.

► **Border layout** Click here For Detail
► Flow layout
► GridBag layout
► Grid layout

12 - There are _____ types of exceptions in Java

► **2 (Page 72)**
► 3
► 4
► 5

13 - Which of the following belongs to a category of checked exception?

► Null Pointer exception
► **IOException** Click here For Detail
► Array index out of bounds
► NumberFormatException

14 - Which of the following exception belongs to a category of un-checked exception?

► IOException
► **Null Pointer exception** Click here For Detail
► AWTException
► ClassNotFoundException

15 - All the exceptions and errors in java are inherited from _____ class.

► Exception
► Error
► **Throwable** Click here For Detail
► IOException

16 - Exceptions must be handled while handling files otherwise it may lead to _____

► Logical error
► Syntax error
► **Run-time error** **(Page 70)**
► No error

17 - Which of the following package needs to be import while handling files?

► java.util
► **java.io** Click here For Detail
► java.awt
► javax.swing

18 - When defining a method you must include a/an ..... to declare any exception that might be thrown but is not caught in the method:

► try block
► finally block
► catch block
► **throws clause** Click here For Detail

19 - The classes which contain the word _____ are byte oriented streams.

► Reader
► Writer
► **Stream (Page 87)**
► Byte

20 - Which of the following stream read/write data in the form of bytes?

► FileReader
► FileWriter
► PrintWriter
► **FileInputStream (Page 87)**

21 - An instance of abstract class cannot be created.
► **TRUE** Click here For Detail
► FALSE

22 – An abstract class ----------instantiated.

► **Cannot be** Click here For Detail
► Can be
► Must
► None of these

23 - The relationship between class and interface is called _____
► **' Is a ' relationship (Page 98)**
► ' Has a ' relationship
► ' Responds to ' relationship
► None of the given options

24 - Which of the following is called ' pure abstract class ' ?
► Concrete class
► Wrapper class
► **Interface (Page 98)**
► Abstract class with no abstract method

25 - Which of the following is called ' pure abstract class ' ?
► Concrete class
► Wrapper class
► **Interface (Page 98) rep**
► Abstract class with no abstract method

26 - Which of the following is true about abstract class?

► An abstract class must have all methods declared as abstract methods.
► A class must have at least one abstract method to be an abstract class.
► **A class without any abstract method can be declared as abstract class.** Click here for detail
► An instance of abstract class can be created.

27 - Which of the following stream is a filter stream?

► FileWriter
► FileReader
► **BufferedReader (Page 91)**
► All of given options

28 - JPanel and Applet use _____ as their default layout.

► **Flow layout** Click here for detail
► Border layout
► Grid layout
► GridBag layout

29 - Which of the following is true about AWT and SWING components?

► **AWT components create a process whereas SWING component creates a thread.**
► AWT components create a thread whereas SWING component creates a process.
► Both AWT and SWING component creates a process.
► Both AWT and SWING component creates a thread.

30 - BorderLayout is the default layout manager for a JFrame content pane

► **TRUE** Click here For Detail
► FALSE

31 - Which of the following is a general purpose container?

► JFrame
► Dialog
► JPanel Click Here For Detail
► JApplet

32 - Border layout divides the area into _____ regions

► 3
► 4
► **5 (Page 113)**
► 6

33 - Which of the following function will be used to register event handler with events generator (button)?

► addAction()
► **addActionListener()** **(Page 123)**
► addListener()
► registerListener()

34 - Event source can have --------- listeners registered on it.

► Single
► Double
► Triple
► **Multiple** **(Page 125)**

35 - If a class needs to handle events generated by button then which of the following interface a class needs to implement?

► ComponentListener
► KeyListener
► MouseListener
► **ActionListener** **(Page 122)**

36 - Which of the following function is declared in MouseMotionListener interface?

► public void mousePressed (MouseEvent me);
► **public void mouseDragged (MouseEvent me);** **(Page 130)**
► public void mouseClicked (MouseEvent me);
► public void mouseEntered (MouseEvent me);

37 - Window Listener interface contains _____ methods.
► Four
► Six
► **Seven** **(Page 133)**
► Eight

38 - Mouse events can be trapped for _____ GUI component.
► JPanel
► JFrame
► JButton
► **All of given** **(Page 130)**

39 - Adapter classes have been defined for listener interfaces except _____ interface.

► MouseListener
► KeyListener
► WindowListener
► **ActionListener** Click here For Detail

40 - Which of the following package needs to import while interacting with relational database?

► java.io
► **java.sql (Page 149)**
► javax.swing
► java.awt

41 - DSN stands for _____

► Data System Name
► Domain system Name
► **Data Source Name** Click here For Detail
► Database System Name

42 - Which of the following method is used to execute SELECT SQL statements?

► executeUpdate(sql);
► ExecuteUpdate(sql);
► **executeQuery(sql); (Page 154)**
► ExecuteQuery(sql);

43 - CREATE, ALTER, DROP are _____ SQL statements.

► DML
► **DDL (Page 156)**
► DCL
► None of given

44 - Which of the following method is used to execute INSERT, UPDATE and Delete SQL statements?

► executeQuery(sql);
► ExecuteQuery(sql);
► **executeUpdate(sql); (Page 153)**
► ExecuteUpdate(sql);

45 - Which of the following statement object is used to execute stored procedures?

► Statement
► PreparedStatement
► **CallableStatement (Page 159)**
► None of given options

46 - HahMap takes key as a/an _____

► **Object (Page 62)**
► Array
► Primitive value
► Function

47 - To create DataBaseMetaData object we write following line of code
► **DataBaseMetaData db = con.getMeataData(); (Page 177)**
► ResultSetMetaData rsmd = rs.getMetaData();
► ResultSetMetaData rsmd = rs.setMetaData();
► DataBaseMetaData db = con.setMeataData();

48 - A .....defines the way and method of communication between two parties

► Compiler
► **Protocol (Page 242)**
► Tool
► Technique

49 - Which of the following are passed as an argument to the paint () method:

► A Canvas object-
► **A Graphics object-** Click here for detail
► An Image object-
► A paint object-

50 - The code below draws a line. What color is the line?
g.setColor(Color.red.green.yellow.red);g.drawLine(0, 0, 100,100);
► Red
► Green
► Yellow
► **Black**

51 - Which of the following methods are invoked by the AWT to support paint and repaint operations?

► **paint( )** Click here For Detail
► repaint( )
► draw( )
► redraw( )

52 - If a super class method is protected then overriding method _____

► must be protected
► **must be public** Click here For Detail
► must be private
► may be either protected or public

53 - Socket is a ----------communication channel between hosts.

► Uni-directional
► **Bi-directional (Page 211)**
► Multi-directional
► None of these

54 - Aside from the Scanner class, which of the following class/es can be used for text file file input

► ObjectInputStream
► **BufferedReader** Click here for detail
► StringTokenizer
► None of these

55 - You can ---------to a network using sockets.

► Read
► Write
► **Read/Write (Page 222)**
► None of these

56 - A serializable class must implement the method(s).....

► readObject and writeObject
► Either readObject or writeObject, or both, depending upon the desired behavior
► **No need to implement any method:** Click here For Detail
► None of the given option

CS506- Web Design and Development
Some other MCQ 's & quizzes

Question # 1 of 10
Which of the following feature provide facility for multiple inheritances:-

► Adapter Classes
► Wrapper Classes
► **Interface** Click here For Detail
► Collection

Question # 2 of 10
The relationship between class and interface is called _____

► **'Is a' relationship (Page 98) rep**
► 'Has a' relationship
► '**Responds to' relationship**
► None of the given options

Question # 3 of 10
Which of the following function will be used to register event handler with events generator (button)?

► addAction()
► addListener()
► **addActionListener() (Page 123) rep**
► Register eventhandeler()

Question # 4 of 10
The collections API are defined in _____ package?

► Java.io
► Java.util
► **Java.sql (Page 180)**
► Java.awt

Question # 5 of 10
Which of the following is true about abstract class?

► An abstract class must have all methods declared as abstract methods.
► **A class must have at least one abstract method to be an abstract class.**
► **A class without any abstract method can be declared as abstract class**. Click here for detail **rep**
► An instance of abstract class can be created.

Question # 6 of 10
Exceptions must be handled while handling files otherwise it may lead to____?

► Logical error
► Syntax error
► No error
► **Run time error (Page 70) rep**

Question # 7 of 10
Which of the following stream is a filter stream?

► **BufferedReader (Page 91) rep**
► FileWriter
► FileReader
► All of given options

Question # 8 of 10
CREATE, ALTER, DROP are _____ SQL statements.

- DML
- **DDL (Page 156) rep**
- DCL
- None of above

Question # 9 of 10
Which of the following statement object is used to execute stored procedures?

- Statement
- PreparedStatement
- **CallableStatement (Page 159) rep**
- None of given options

Question # 10 of 10
Based on functionality, the streams can be categorized as_____

- Byte oriented streams and Node Streams
- Filter stream and Character oriented stream
- **Node stream and Filter stream** Click here for detail
- Byte oriented stream and Character oriented stream
