Question No:1 **(Marks:1)** **Vu-Topper RM**

System development life cycle is a (an) _____ technique that divides complex projects into smaller, more easily managed segments or phases.

A. Design
B. Analysis
C. Cognitive
D. Project management **Page 68**

Which of the following is a form of automation where computers communicate work instructions directly to the manufacturing machinery?

A. Enterprise Resource Planning
B. Accounting information system
C. Materials Requirement Planning
D. Computer Aided Manufacturing **Page 53**

Which of the following is the overall process of developing information systems through amulti-step process from investigation of initial requirements through analysis, design, implementation and maintenance?

A. System Design
B. System Analysis
C. Garbage Can Model
D. System Development Life Cycle **Page 68**

In _____ decision making models, decisions are the result of competition and bargaining among the organization's interest groups and key leaders.

A. Political
B. Garbage Can
C. Muddling through
D. Rational Man

Which of the following is NOT Rational Individual Models of Decision Making?
A. Successive Comparison
B. Garbage Can
C. Psychological
D. Rational Man

_____ is the start up phase of IT Planning.
A. Orientation
B. Strategic Plan
C. Tactical Plan
D. Assessment

_____ information is available in manufacturing information system.
A. Sales
B. Stock **Page 55**
C. Product
D. Purchase

In _____ model, software is constructed step by step in the same way a building is constructed.
A. Waterfall
B. Incremental **Page 71**
C. Classic Lifecycle
D. Iterative

_____ is an information system which deals with the planning, development and maintenance of production facilities.
A. Marketing Information Systems
B. Financial Information System
C. Manufacturing Information Systems **Page 46**

D. Human Resource Information System

Discovering _____ and _____ contained within the business activity & history and predict future behavior is the purpose of data mining.

A. structures, patterns
B. structures, possibilities
C. patterns, relationships **Page 37**
D. relationships, possibilities

_____ phase involves converting design specifications into executable programs.

A. Testing
B. Prototyping
C. Configuration
D. Development **Page 82**

In _____ model, basic assumption is that organizations are not rational.

A. Rational Man
B. Garbage Can
C. Irrational Man
D.Muddling through

Spoken and written description of an entity represent _____ model of DSS.

A. Mathematical Models
B. Graphic Models
C. Physical Models
D. Narrative Models **Page 37**

Semi structured is a gray area which lies _____ the structured and unstructured range.

A. Inside
B. Within
C. Across
D. Between Page 59

_____is a type of computer software that facilitates group decision-making within an organization.

A. Electronic Group System
B. Electronic Meeting System Page 39
C. Electronic Monitoring System
D. Electronic Management System

_____ is a project management technique which divides complex projects into smaller and more easily managed segments.

A. SDLC Page 71
B. Software testing
C. Software configuration
D. System programming

The purpose of _____ is to obtain a commitment to change and evaluate whether cost effective solutions are available to address the problem that has been identified.

A. Testing
B. Planning
C. Usage scenarios
D. Feasibility study Page 72

_____ system simulates the judgment and behavior of a human or an organization.

A. Open-loop
B. Knowledgeable
C. Expert **Page 40**
D. Proficient

Business communications are _____ models.

A. Graphic
B. Physical
C. Narrative **Page 38**
D. Mathematical

_____ provides a structured means of addressing the impact of technologies on an organization.

A. IT planning **Page 66**
B. Business planning
C. Requirements planning
D. Configuration planning

Change over can be undertaken in following ways except _____.

A. Phased change over
B. Pointed change over **Page 82**
C. Abrupt change over
D. Parallel change over

Which of the following model can lead to scope creep due to user feedback after each phase?

A. Waterfall
B. Incremental
C. Classic Lifecycle
D. Iterative

All of these are the data mining procedure steps except:
A. Deployment
B. Exploration Page 37
C. Model building and validation
D. Maintenance

Apart from the value to cost ratio, modules are also selected on the basis of _____ requirements and needs.
A. Designer
B. Customer Page 84
C. Programmer
D. system analyst

_____ is a form of automation where computers communicate work instructions directly to the manufacturing machinery.
A. Design Flow Diagram
B. Quality Control System
C. Computer Aided Design
D. Computer Aided Manufacturing Page 53

_____ states that inventory is manufactured or acquired only as the need for it arises.
A. JIT
B. JTI
C. JET
D. TQM

In _____ model, phases are in a cascading manner linking the output of one to the input of next phase.
A. Extreme programming
B. Waterfall
C. Rapid prototyping
D. Spiral

_____ are created for just one department.
A. Narrative data models
B. Data marts
C. Data driven DSS
D. Graphical data models

_____ engine is the database management system (DBMS) of the expert system.
A. Database
B. Inference
C. Query
D. Development

We get a final increment after the _____ development phase in Incremental Model.
A. validate increment
B. developing increment
C. integrate increment
D. validate system

_____ is an organized approach of making choices in complex decision situations through identifying and evaluating creative options.
A. Structured decision making approach
B. Psychological decision making approach
C. Unstructured decision making approach
D. Semi structured decision making approach

_____ is a reasoning process that can be rational or irrational, and can be based on explicit or tacit assumptions.
A. Design
B. Planning
C. Decision Making **Page 59**
D. Product development

Which of the following is not one of the phases of "Decision Making"?
A. Intelligence
B. Maintenance
C. Design
D. Choice

In _____ model, customer feedback is taken at each phase and project is modified accordingly.
A. Waterfall
B. Iterative
C. Linear Sequential
D. Incremental

Prototypes are used in _____.
A. Iterative models **Page 68**
B. Waterfall models
C. Incremental models
D. Linear Sequential Models

The set of processes developed in an organization to create, gather, store, maintain and apply the firm's knowledge is called _____
A. Knowledge base
B. Inference engine
C. Development engine
D. Knowledge management **Page 39**

In which of the following model, working functionality (basic module) is produced earlier.
A. Linear Sequential Model
B. Incremental Model
C. Waterfall Model
D. Iterative Model

_____ is a system that enables drawings to be constructed on a computer screen and subsequently stored, manipulated and updated electronically.

A. Computer Aided Design Page 53
B. Decision Support System
C. Intrusion Detection System
D. Order Processing Subsystem

Bar graph is an example of _____ model of Decision Support System.
A. Mathematical
B. Physical
C. Narrative
D. Graphic

In which of the following models, the development approach is based on producing deliverables frequently/ repetitively.
A. Linear Sequential
B. Incremental
C. Iterative
D. Waterfall

_____ is the mental process of knowing, including aspects such as awareness, perception, reasoning and judgement.

A. Design Process
B. Planning process
C. Cognitive process Page 59
D. Product development process

SDLC starts with _____ stage.
A. Maintenance
B. Implementation
C. Planning

D. Design

Pie Chart is an example of _____ model.
A. Physical Models
B. Mathematical Models
C. Narrative Models
D. Graphic Models

_____ highlights the system infrastructure and flow of system processes.
A. User manual
B. Testing manual
C. Technical manual
D. Procedural manual **Page 82**

Which of the following subsystem gives a snapshot of statuses of various orders placed, at any given time?
A. Concurrent processing subsystem
B. Order processing subsystem
C. Controlled processing subsystem
D. Quality assurance subsystem

Increments made at different intervals of time refer to the _____ development model.
A. Prototyping
B. Waterfall
C. Incremental
D. Extreme programming

_____ represent computational relationships between two or more factors related to each other in a defined manner for instance _____.
A. Narrative Models, Formulae

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

B. Mathematical Models, Equations **Page 37**
C. Physical Models, Charts
D. Graphic Models, Graphs

Data mining is also known as _____.
A. knowledge Transfer in Databases
B. knowledge Processing in Databases
C. Knowledge Discovery in Databases **Page 37**
D. knowledge Management in Databases

Waterfall Model is also called _____.
A. Linear Sequential Model **Page 83**
B. Prototyping
C. Incremental Model
D. Iterative Model

TQM stands for:
A. Team Quality Monitoring
B. Team Quality Management
C. Total Quality Management **Page 51**
D. Temporary Quality Measurement

All of the following are types of Problems except:
A. Structured
B. Tri-Structured **Page 60**
C. Unstructured
D. Semi-Structured

_____ models are three dimensional representation of an entity or object.
A. Physical **Page 38**
B. Graphical
C. Narrative

D. Mathematical

Which of the following is a set of management and control activities which focus on quality assurance?

A. Total Quality Management **Page 51**
B. Marketing Information Systems
C. Materials Requirement Planning
D. Computer Integrated Manufacturing

SDLC stands for:

A. System Data Life Cycle
B. System Design Life Cycle
C. Software Design Life Cycle
D. System Development Life Cycle **Page 67**

Well structured problems are constrained problems with _____ solutions that engage the application of a limited number of rules and principles within well defined parameters.

A. Different
B. Disparate
C. Divergent
D. Convergent **Page 69**

_____ helps in keeping track for new positions or vacancies in an organization.

A. Quality Subsystem for Employees
B. Human Resource Information System **Page 56**
C. Order Processing Sub System
D. Requirement Planning System

Prior to the final release into production use, _____phase identifies errors and deficiencies in the system.

A. Implementation

B. QA
C. Review
D. Testing

Decision making is the cognitive process of selecting a course of action from _____ alternatives.

A. Triple
B. Single
C. Double
D. Multiple **Page 59**

Architecture is the _____ that provides the conceptual foundation for building information infrastructure and specific applications.

A. Manager
B. Blueprint **Page 29**
C. Accountant
D. Coordinator

An information system that automatically generates reports on a regular basis and is not used to monitor input or activities is called _____.

A. Closed end system
B. Open loop system **Page 20**
C. Closed loop system
D. Regular ended system

With _____decision environment, there is the possibility of having very quick and very accurate feedback on the decision process.

A. Open-loop
B. Absolutely No
C. Closed-loop **Page 26**
D. Fully Open-loop

_____ is a defined set of instructions aimed at describing how to proceed in achieving a pre-defined milestone/target.

A. System
B. Method
C. Process
D. Procedure **Page 18**

_____ is the set of interconnected structural elements that provide the framwork for supporting the entire structure

A. Infrastructure **Page 29**
B. Management System
C. Decision Support System
D. Transaction processing system

_____ is a record of an enterprise's past transactional and operational information.

A. Database
B. Data mining
C. Data structure
D. Data warehouse **Page 35**

_____ is/are the result(s) given by the system after the process has been performed on the data being input to the system.

A. Process
B. Input elements
C. Control systems
D. Output elements **Page 23**

_____ provides information on monitoring and controlling the business.

A. Artificial Intelligence
B. Office Automation System
C. Transaction Processing System

D. Management Information System **Page 34**

Information is the processed form of _____ being verified and substantiated from various sources.

A. Data **Page 18**
B. Business
C. Sequence
D. Transaction

A system that is connected to its environment by means of resource flows is called _____.

A. Open System **Page 21**
B. Closed System
C. Open End System
D. Closed End System

(CBIS) stands for ----------

A. Control basic information system
B. Computer Based Information System **Page 19**
C. Concurrency based information system
D. Coordination based information System

_____ is a way of mapping information requirements and resources.

A. Structure
B. Architecture **Page 29**
C. Infra-structure
D. Organizational type

In _____, part of the output is fed back to the system to initiate control to changeeither the activities of the system or input of the system.

A. open system

B. closed system
C. open loop system
D. closed loop system **Page 25**

_____is being used to overcome the business issues like Marketing, Brand of the product, Quality of the product, Cost control, Organizational internal and external issues.

A. Corporate culture
B. Bank Interest Rate
C. Business Environment
D. Information technology **Page 16**

We find the value of the inputs necessary to achieve a desired level of output in _____ analysis

A. Lexical
B. What-If
C. Business
D. Goal Seek **Page 35**

Which of the following is the specific collection of values and norms that are shared by people and groups in an organization and that controls the way they interact with each other and with stakeholders outside the Organization?

A. Management Style
B. Decision Making Style
C. Organizational culture **Page 11**
D. Organizational Structure

In _____ management style, manager allows the employees to take part in decision-making, therefore everything is agreed by the majority.

A. Private
B. Authoritative
C. Participative **Page 12**

D. Commanding

Closed System depends on _____ and data for decision making.

A. External culture
B. External resources
C. Internal resources Page 24
D. External environment

Continuous change in work force is _____ for an organization.

A. Ideal
B. Harmful Page 16
C. Beneficial
D. Recommended

The _____ management style approach is a combination of both authoritative and participative style.

A. Flat
B. Mixed Page 12
C. Pyramid
D. Complex

Factors of ---------- are basic elements of reducing manufacturing cost.

A. Cost
B. Brand
C. Quality
D. Production Page 16

A system that is not connected with its environment is called _____.

A. Open system
B. Closed system Page 21
C. Open loop system

Criteria for designing models and systems to support management decisions include all of following except _____.

A. Delicate
B. Simplicity
C. Robustness
D. Completeness of relevant detail

Which of the following is included in the organizational perspective of information?

A. Time
B. Form
C. Flow
D. process

Human being is the example of _____.

A. open loop system
B. closed system
C. closed loop system
D. open system

Which of the following is not a characteristic of Flat organizational structure?

A. Greater number of management levels
B. Short of chain of command
C. Decentralizes authority to low level managers
D. High number of subordinates per supervisor

Information technology is making convenient business enterprises to be _____ and flexible.

A. flat, centralized
B. unstructured, centralized
C. structured, centralized
D. flat, decentralized

Data represents _____.
A. input-output
B. raw facts
C. specific facts
D. processed facts

Culture of the organization is the set of fundamental assumptions that exist and grow _____.
A. With the organization
B. With the society
C. With the management
D. With the stakeholders

Which of the following is an example of internal source of information?
A. Staff Meetings
B. Purchasing Agreements
C. Distribution Contracts
D. Advertisement

In Transaction Processing System the transformation of data into information is known as _____.
A. Data storage
B. Data identification
C. Document Preparation
D. Data manipulation

An information system in which information from the system is not used for control purpose is called _____.
A. Open loop system
B. Open end system
C. Closed loop system
D. Closed end system

Telecom organizations lie in the category of _____ Sector.
A. Manufacturing
B. Service
C. Trading
D. Both manufacturing and trading

Which of the following is NOT true about Decision Support System?
A. DSS processing does not involve the update of data.
B. DSS helps in routine decision making.
C. DSS is defined as a system used to support managerial decisions.
D. DSS is directly used by middle level managers.

An organization should not implement the computer based information system if its not meeting organization's _____.
A. business requirements
B. information requirements
C. management requirements
D. staff requirements

The practice of checking the impact of a change in the assumptions on the proposed solution is carried out in _____ analysis.
A. What-If
B. Goal Seek
C. Lexical
D. Business

In _____ organizational structure, workers are directly involved in the decision making process.
A. Pyramid
B. Flat
C. Hierarchical
D. Tall
