Q 1: MCQ'S BIO-Inter 2

1. The most concentrated external environment is called:
   a. Hypertonic b) Hypotonic c) Isotonic d) Paratonic
2. Mesophytes plant is:
   a. Cacti b) Hydrilla c) Brassica d) Kikar
3. Metabolism of purine and pyrimidine produces:
   a. Creatinine b) Creatine c) Xanthine d) trimethylamine oxide
4. The excretory product that require minimum water for its removal:
   a. Urea b) Uric acid c) Creatinine d) Ammonia
5. The arginine is split by arginase to form urea and precursor:
   a. Ornithine b) Citruline c) Alanine d) Glycine
6. The end product of hemoglobin breakdown is:
   a. Uric acid b) Bilirubin c) Creatinine d) Citric acid
7. Aldosterone plays role in:
   a. Transport of water c) Uptake of sodium in loop of Henle
   b. Transport of K^+ ions into kidney d) Reabsorption of water
8. Bat does not regulate body temperature in narrow range:
   a. Endotherm b) Homeotherm c) Heterotherms d) Poikilotherm
9. Lizard bask in sun to gain:
   a. Heat b) Cold c) Air d) Moisture
10. During infection pyrogens are produced in human body by:
   a. RBC'S b) WBC'S c) Platelets d) Blood plasma
11. A natural process which means "well-nourished or enriched":
   a. Taiga (b) Salinity c) Productivity (d) Eutrophication
12. In temperate deciduous forests, temperature range is:
   a. 4 - 30°C (b) 1 - 10°C (c) 25 - 35°C (d) 35 - 45°C
13. The incidence of uric acid stone is:
   a. 5% b) 10% c) 15% d) 70%
14. Abdomen has peritoneal cavity, lined by a thin epithelium called:
   a. Pericardium b) Scrotal sac c) Peritoneum d) Pleura
15. Grasslands with no woody trees are called:
   a. Savanna (b) Prairies (c) Taiga (d) Desert
16. Which of the biome has been increased in area by human activities?
   a. Savanna (b) grassland (c) Desert (d) Coniferous
17. In desert ecosystem the average rainfall is:
   a. 20-30 cm (b) 20–40 cm (c) 25-50 cm (d) 14-35 cm
18. The essential requirement for life is:
   a. Mineral (b) Water (c) Carbohydrates (d) Proteins
19. In temperate deciduous forest the average rainfall is:
   a. 650-1500 mm (b) 750-1500 mm (c) 800-1600 mm (d) 700-1500 mm
20. In which type of ecosystem is the smallest fraction of nutrients are present in soil?
   a. Savanna (b) Tundra (c) Grassland (d) Desert
21. Layering is the characteristic of:

a)Temperate deciduous forest b. Grass land c. Desert ecosystem d. Tundra ecosystem

22. Which type of plants seems to fit into ecosystem of grass land.
   a. Tree b. Shrub c. Perennial herbs d. Annual weeds
23. **Brachioradialis uplift is caused by :**
   a) radius b) ulna c) both A and B d) Humorous
24. **Joints present in skull which fix teeth into jaws:**
   a) fibrous b) cartilaginous c) hinge d) ball and socket
25. **The ecdysis or molting is controlled by :**
   a) auxins b) cytokinins c) MSH d) ecdysone
26. **The number of bones in our wrist is :**
   a) 5 b) 4 c) 7 d) 8

Scanned with CamScanner

27. **Moulting is divided into .....stages**
a) 4 **b)** 6 **c)** 3 **d)** 7

28. **Vertebral column protects the spinal cord and has_____ curvatures:**
a) 2 **b)** 4 **c)** 3 **d)** 5

29. **Immobility and fusion of vertebral joints is:**
a) spondylosis **b)** genetic **c)** nutritional deficiency **d)** aging

30. **The most complex exoskeleton is found among them :**
a) Arthropods **b)** annelids **c)** mollusks **d)** echinodermated

31. **Patella is a bone present at:**
a) Chest **b)** elbow joint **c)** knee joint **d)** at sternum

32. **Vacuole is bounded by a membrane, called.**
a) Tonoplast b) Protoplast c) Chloroplast d) Leucoplast

33. **The sclerenchyma cells found in seed coast and nut shells are:**
a) Fiber b) Vessels c) Tracheids d) Sclereides

34. **Living cells of cartilage are called:**
a) Osteoblast b) Osteoclast c) Osteocytes d) Chondrocytes

35. **Fibro joint are found in:**
a) Skull b) Pelvis c) Chest d) Pectoral girdle

36. **. Which one following is the earliest form of muscles?**
a) Cardiac muscles b) Smooth muscles c) Skeletal muscles d) Alary muscles

37. **The unit of structure of myofibrils lies between two successive Z-line is known as:**
a) Sarcolemma b) Sarcoplasm c) Sarcomere d) Myeloma

38. **This type of wood is more resistant to decay and insect attack:**
a) Callus **b) Cork** c) Sap wood d) Heart wood

39. **The growing tip of young stem moves in zigzag fashion of the apex:**
a) Hyponasty **b)** Epinasty c) Nutation d) Haptonasty

40. **Which one of following is not a bone of axial skeleton?**
a) Ribs b) Sternum c) Pelvic d) Cranium

41. **A bone which connect scapula with sternum:**
a) Humerus b) Ischium c) Pubis d) Clavicle

42. **Bone to bone attachment is by:**
a) Tendon b) Nerves c) Muscles d) Ligament

43. **In living things the behaviour activities occurs at regular intervals are called :**
(a) diurnal rhythms ***(b)*** circannual ***(c)*** biorhythms ***(d)*** circadian

44. **How many types of receptors in skin :**
(a) three ***(b)*** six ***(c)*** five ***(d)*** two

45. **CNS is composed of :**
(a) sensory neuron ***(b)*** associative neuron ***(c)*** motor neuron ***(d)*** dendrites

46. **Which neurons have long axon?**
(a) sensory ***(b)*** motor ***(c)*** associative ***(d)*** cell body

47. **The structures which respond by the impulse coming from the motor neuron are called:**
(a) receptors ***(b)*** sensory neuron ***(c)*** motor neuron ***(d)*** effectors

Scanned with CamScanner

48. **Which hormone continues to promote protein synthesis even after cease in growth?**
(a) ADH *(b)* STH *(c)* TSH *(d)* ACTH

49. ***Which of following promotes leaf and fruit growth?***
(a) gibberellins *(b)* ethane *(c)* auxins *(d)* Abscisic acid

50. **Taxes is the type of behviour:**
(a) innate *(b)* learning *(c)* instinct *(d)* none

51. **Addison's disease is due to :**
(a) destruction of the adrenal cortex *(b)* excess secretion of MSH
(c) both a and b *(d)* none

52. **Metamorphosis in amphibians is under control of :**
(a) sex hormones *(b)* pituitary hormone
c) thyroid hormone *(d)* parathyroid hormone

53. **The normal speed of nerve impulse in human :**
(a) 120 m/sec *(b)* 130 m/sec *(c)* 100 m/sec *(d)* 110m/sec

54. **An endocrine structure that secrete progesterone in pregnancy during menstrual cycle, is formed after secretion of:**
(a) LH *(b)* FSH *(c)* progesterone *(d)* estrogen

55. **Where fertilized egg is conceived and undergoes further development :**
(a) ovary *(b)* uterus *(c)* vagina *(d)* female reproduct track

56. **Which is essential for gametes production and secondary sexual character, between seminiferous tubules:**
(a) progesterone *(b)* estrogen *(c)* FSH *(d)* testosterone

57. **In sexually reproducing organisms which prevent chromosome doubling in next generation :**
(a) meiosis *(b)* mitosis *(c)* variation *(d)* fertilization

58. **Which play a major role in development of more complex form of life:**
(a) sexual reproduction *(b)* meiosis *(c)* genetic variation *(d)* B and C

59. **Which process is less common in animal than plants:**
(a) sexual reproduction *(b)* asexual reproduction *(c)* meiosis *(d)* reproduction

60. **During which period of interphase DNA is synthesized?**
(a) G0 *(b)* G2 phase *(c)* G1 phase *(d)* S phase

61. **Cytokinesis is a division of:**
(a) Chromosomes (b) cytoplasm (c) nucleolus (d) nucleus

62. **Synapsis occur during:**
(a) leptotene (b) diplotene (c) zygotene (d) pachyetene

63. **Most critical phase of mitosis:**
(a) Metaphase (b) prophase (c) telophase (d) anaphase

64. **At the beginning of prophase the chromosomes appear as thin threads of.....in length:**
(a) 50 um (b) 0.25um – 50um (c) 2 5um-50um (d) 2 25um-50um

65. **In case of human average cell cycle is about**
(a) 28 hours (b) 24 hours (c) 26 hours (d) 25 hours

66. **Mitotic apparatus appear during.**

Scanned with CamScanner

(a) Prophase (b) anaphase (c) telophase (d) metaphase

67. **Unequal separation of chromosomes is called:**
(a) disjunction (b) synapsis (c) non-disjunction (d) metastasis

68. **Patau & Edward syndromes show trisomy in-------- &------ :**
(a) 13 , 18 (b) 18 , 13 (c) 31 , 28 (d) at any chromosome

69. **Reshuffling of genetic materials occur during:**
(a) Lepotene (b) Pachytene (c) zygotene (d) Diplotene

70. **Cell suicide due to absence of trophic signals is called:**
(a) Apoptosis (b) Necrosis (c) teratogenesis (d) Morphogenesis

71. **Klinefelte's syndrome usually occur in:**
(a) Female (b) Male (c) Both a & b (d) None

72. **Full cycle in yeast cells is only:**
(a) 15 mint (b) 30 mint (c) 60 mint (d) 90 mint

73. **In which before acquiring adult form an organism under goes progressive changes**
(a): growth (b): Maturatin (c) development (d): Differentiation

74. **In which abnormality the upper lip folded and individual have harelip.**
(a): kline felter syndrome (b): disc slip (c): **Cleft palate** (d)Microcephaly

75. **The individual born are malformed due to....**
(a)Mutation (b) Metabolic defects (c)Environmental factor(d)Chromosomal abnormalities

76. **Neoblasts cell are present in.**
(a)Jelly fish (b): Salamanders (c): Hydra (d)Planaria

77. **Healing of fracture and repair of a skin wound are some examples of.....**
(a): Aging (b)Abnormal development (c)Regenration (d)none

78. **Loss of cells and degeneration of tissues is due to.....**
(a): Regeneration (b): Spontaneous mutation (c): point mutation (d)Aging

79. **The present goal of.....is not necessarily to increase life span but to increase health span.**
(a)Growth (b)Embryology (c): Gerontology (d)Teratology

80. **Which one of following is the last event in Animals development?**
(a)Fertilization (b)Growth (c)Cleavage (d)Organogensis

81. The number of chromosomes in sugarcane is:
a) 80 b) 40 c) 20 d) 10

82. Sucessive Amino acid bearing tRNA will bind at
a) E Site b) P Site c) A site d) None

83. Chromosomal theory of inheritance was formulated by:
a) Carl correns b) Beadle& Tatum c) T H Morgan d) W S sutton

Scanned with CamScanner

84. A role in DNA repair is played by:

a) DNA polymerase-I b) DNA polymerase-II c) DNA polymerase-IIId) DNA polymerase-IV

85. All the 64 codes were tested by.

a) Marshal Nirenberg b) Phillip Leader c) Gobind Khorana d) All of above

86. The number of nucleotides in a genetic code is

(a) One (b) two (c) two or three (d) three

87. They do not code for amino acid so called stop or non-sense codon.

(a)UAA only b) UAG only c) UGA only d) UAA, UAG,UGA

88. When sigma subunit is detached from other subunits of RNA polymerase then the enzyme is called-------

(a) promotor enzyme (b) activating enzyme (c) enzyme complex (d) core enzyme.

89. In phenylketonaria, phenylalanine is not degraded because of defective enzyme.

(a) phenylalanine hydroxylase (b) phenylalanine oxidase(c) phenylalanine hydrogenase(d) all

90. All genes or alleles found in a breeding population at a given area are collectively called:

(a) gene pool *(b)* genotype *(c)* phenotype *(d)* multiple alleles

91. The physiological effect of an alleles over its partner allele on the same gene locus is called:

(a) dominance *(b)* epistansis *(c)* pleiotropy *(d)* Bombay phenotype

92. Which blood group lacks both anti-A and anti-B antibodies:

(a) A *(b)* B *(c)* AB *(d)* O

93. Hypophosphatemic rickets is ---------- disease:

(a) dietary *(b)* metabolic *(c)* hereditary *(d)* accidental

94. Position of a gene within a DNA molecule is.

(a) Locus (b) Amplicon (c) Origin (d) Filial

95. X-linked recessive trait is

(a) Hypophosphataemia (b) Haemophilia (c) Diabete mellitus (d) Vitamin D resistant rickets

96. The number of pairs of autosomes in humans is.

(a) 23 (b) 21 (c) 24 (d) 22

97. ABO blood system is an example of.

(a) Polygenes (b) multiple alleles (c) Multiple genes (d) multiple mutation

98. **First restriction enzyme was discovered by:**

(a) J. Craig Venter *(b)* Kary Mulls *(c)* Hamilton O. Smith *(d)* F. Sanger

99. **Restriction endonucleases are the natural enzymes of:**

(a) Bacteria *(b)* fungi *(c)* viruses *(d)* protozoa

100. **Salt tolerant crops are expected to be produced by:**

(a) Introducing a gene for channel proteins *(b)* introducing Na^+ in the cells

(c) Inserting a gene for salt excretion *(d)* inserting a gene for Ca^+ pump

101. **The DNA of bacterial viruses for example lambda phage can also be used as a:**

(a) Vector *(b)* molecular scissor *(c)* expresser *(d)* a and b

102. Papers on inheritance was published by.

(a) Cuvier (b) Lyell (c) Malthus (d)Mendel

103. Darwin came back to Great Britain in:

Scanned with CamScanner

(a)1932 (b) 1934 (c) 1936 (d) 1939

104. In allelic frequency P+Q=
(a) 0.2 (b) 0.8 (c) 1.0 (d)2.0

105. Phosphate is present in:
(a) Soap (b) Food waste (c) Detergents (d) Sewage

Scanned with CamScanner
