Topic 90: Introduction to the CDS & Social Theory – 1

CDS (Critical Discourse Studies) is liye important hai kyun ke yeh language use ko uske context aur social structures ke sath relate karta hai. CDS sirf language mein interest nahi rakhta, balkay yeh dekhta hai ke kis tarah language ke zariye **power relations** effect hote hain.

Fairclough ke mutabiq, CDS karne ka matlab hai ke hum language ke sath sath social duniya ko bhi samjhein. Social theories ek **framework** deti hain taake hum samajh saken ke social world kaam kaise karta hai – is mein action, order aur change ka taluq hota hai.

CDS mein kai mashhoor scholars jaise ke **Althusser, Bourdieu, Butler, Foucault, Giddens, Gramsci, Habermas** aur **Laclau** ki theories ka istemal hota hai. Har strand in theories ko apne tareeqe se use karta hai.

Do important questions jo CDS mein uthaye jate hain:

1. **Action aur structure ka taluq kya hai?** Kya structure hamesha individuals ko control karta hai ya log azad hote hain?
2. **Discursive aur extra-discursive ka kya relation hai?** Aur concepts jaise critique, emancipation, ideology, power, hegemony kis tarah samjhe jate hain?

CDS ke mukhtalif strands, jaise ke Fairclough, van Dijk, aur Wodak, do major social theories se influenced hain:

- **Marxism / Neo-Marxism**
- **Post-Structuralism (Foucault waghera)**

Van Dijk zyada social psychology ki taraf jhukao rakhta hai jabke Fairclough aur Wodak sociology aur theory pe focus kartay hain.

Topic 91: Introduction to the CDS & Social Theory – 2

1970s mein jab Critical Linguistics (CL) shuru hua, to iska focus tha ke kis tarah language reality aur discrimination ko represent karta hai. Us waqt social structures ko deterministic samjha jata tha, yaani log structures ke zariye control hote hain.

CL ke scholars jaise **Fowler aur Kress (1979)** ne kaha ke kuch language use “dehumanizing” hai, aur is language ko samajhna aur expose karna zaroori hai. Unho ne ideology ko ek **systematic body of ideas** kaha jo kisi khas nazariye se organize hoti hai aur language ke choices mein zahir hoti hai.

Althusser ka concept important hai – usne ideology ko ek material cheez kaha. Uske mutabiq, ideology ek **imaginary relation** hai logon aur unki asal zindagi ke darmiyan. Althusser ka mashhoor concept hai **interpellation**, jisme individuals ko society “subjects” bana deti hai.

Recent developments:

- **Baker (2014)** ne Foucault ka discourse concept adopt kiya.
- **Butler** ke gender concepts use hue.
- **O'Halloran (2012)** ne Deleuze aur Guattari introduce kiye.
- **Macgilchrist (2016)** ne epistemology aur social order pe kaam kiya.
- **Queer Theory** ka bhi interest bada (Thurlow, Milani).
- **Wodak (2009)** ne Goffman ka use kiya European Parliament ke interactions ko analyze karne ke liye.

Topic 92: Marx & (Neo) Marxist Influences

1960s aur 70s ke social turmoil ne CDA/CDS ke scholars ko Marxism ki taraf attract kiya. Yeh scholars capitalism ko criticize karte hain, lekin yeh reductionist approach nahi rakhte – yeh language aur culture ki importance ko bhi samajhte hain.

Fairclough aur Graham (2002) ne kaha:

1. Language capitalism mein aur zyada central ho gaya hai.
2. Marx language aur social life ke darmiyan connection ko samajhte thay.

Unho ne bataya ke Marx ke writings mein ideology aur civil society ke darmiyan **discursive aur material** dimensions ka relation hota hai.

Doosre theories:

- **Anthony Giddens** ka **Theory of Structuration**: Log sirf passive nahi hote, balkay society ko reproduce karte hain aur apne actions ko monitor karte hain.
- **Gramsci** ka concept of **Hegemony**: Jab ruling class logon ki razamandi se dominate karti hai (e.g. church, schools), na ke sirf force se.
- **Frankfurt School** ka critical theory: Culture aur capitalism ka analysis.
- **Habermas** ka concept of **validity claims** (truth, rightness, truthfulness).

Topic 93: Post-Structuralist Influences

Post-structuralism mein **Foucault** sabse important figure hai. Uske mutabiq:

- Discourse power aur knowledge ko connect karta hai.
- Discourse subjects, relationships, aur knowledge systems ko shape karta hai.
- Discourses interdependent hote hain (intertextuality).
- Discourse power ka zariya bhi hai, aur social change ka bhi.
- **Order of Discourse** ka matlab hai ke har social field mein specific genre, discourse aur styles ka combination hota hai.

Van Leeuwen (2008) ne Foucault ke discourse concepts ko legitimation ke sath milaya.

Laclau aur Mouffe ke mutabiq:

- Discourse elements ka relation define karta hai.
- Elements ko meaning extra-discursive sources se nahi milta.
- **Articulation** ka concept: Random elements ko meaningful complex mein badalna.
- **Nodal Points**: Jis concept ke gird meaning center hota hai. Jaise environmentalism mein “protection” ek nodal point ho sakta hai.

Chouliaraki aur Fairclough ne Laclau-Mouffe ke theory ko Marxism aur Gramsci ke concepts ke sath mila kar dekha.

Post-structuralism se feminist theories bhi CDS mein aayi hain.

Topic 94: Conclusion

CDS ko agar strong framework banana hai to social theories ke sath uska link zaroori hai. CDS mein mukhtalif theorists aur strands alag alag theories ka use karte hain, lekin ek flexible **toolkit** banana possible hai.

Lekin, agar theories contradict karen to confusion ho sakta hai. Problem-oriented research mein theoretical concepts ka choice research object par depend karta hai.

Lekin problem yeh hai ke hum problems sirf tab dekhte hain jab hum kisi theoretical universe mein khare hote hain.

Marxist-inspired CDS scholars hidden meanings aur power relations ko samajhne ki koshish karte hain.

Post-structuralists openness aur difference ko important samajhte hain.

Har CDS strand ko yeh clarify karna hoga ke wo “social” ko kaise samajhta hai, kyunke CDS ka future isi clarification pe depend karega.

L22

Topic 95: What is Political Language?

Western political soch ke mutabiq **language aur politics ka gehra taluq** hai. Aristotle ne jab insan ko “political animal” (politikon zoon) kaha, to usi waqt ye bhi kaha ke insan mein **speech** ki khas salahiyat hai.

‘Speech’ vs ‘Voice’:

- Aristotle kehta hai ke “voice” to har janwar mein hoti hai – jisme woh **dard ya khushi** jata sakta hai.
- Magar “speech” sirf insano mein hoti hai, jiska kaam hota hai **batana ke kya sahi hai aur kya ghalat**, kya faida mand hai aur kya nuqsan daih.
- Sirf insan hi “just” aur “unjust” ka perception rakhta hai.

Political language ka basic point ye hai ke **shared values** (milke maane gaye usool) political communities ko define karte hain. Jab log ek jaise nazariye rakhte hain, to woh milkar faislay karte hain.

Aaj kal linguistics ke mutabiq:

- Speech ka ability **genetic hota hai** lekin usay activate karna social interaction se hota hai.
- Political behavior bhi genetics se linked ho sakta hai.
- Language ka culture se nikalna, aur uska political needs ko serve karna important hai.

☞ **Conclusion:** Politics language ke baghair mumkin nahi, kyunke siyasat ka kaam zyada tar **zabaan ke zariye** hota hai.

Topic 96: Political Discourse Analysis

Political Discourse Analysis (PDA) aik aisi field hai jo **political contexts mein hone wali baat cheet** (debates, speeches, hearings) ka analysis karti hai.

Example:

- Roffee (2016) ne Australian hukoomat ke ek action ka analysis kiya. Hukoomat ne Aboriginal communities mein hastily intervene kiya, lekin analysis ne dikhaya ke yeh sirf Indigenous logon ko control karne ki koshish thi, jo political rhetoric ki wajah se samajh nahi aayi.

PDA ka maqsad: Yeh samajhna ke **language ko kis tarah manipulate** kiya jata hai political effects ke liye.

Political discourse ko define karna asaan nahi. Kuch scholars har discourse ko political keh dete hain. 1980s ke baad is mein zyada research hui hai.

Levels of analysis:

- **Lexis:** loaded words, euphemisms
- **Grammar:** ideological structures, pronouns ka use
- **Pragmatics:** implicatures, metaphors, speech acts

☞ Har level pe dekha jata hai ke **language kis tarah ideology ko shape karta hai**.

Topic 97: Approaches of Political Discourse

Political discourse us language ka naam hai jo hum **political tor par pehchante hain**.

Key Points:

1. **Indexicality:** Jab koi shakhs ek khas zubaan ya lehja istemal karta hai, ya ek khas ideology ke alfaz use karta hai, to woh apni **political identity** show karta hai.
2. **Interaction:** Political discourse **interactions mein hota hai** – interruptions, overlaps waghera conflict ya cooperation show karte hain.
3. **Representations:** Log apne **world view** ko dusron se match karne ke liye language ka use karte hain. Yehi polity ka basic point hai.
4. **Recursion:** Political logon ko samajhna padta hai ke unke mukhalif kya soch rahe hain – iske liye unko **theory of mind** aur **language ka deep understanding** chahiye.
5. **Modality:** Language mein words hotay hain jo **certainty, doubt, obligation** waghera show karte hain. Inka use political discourse mein hota hai.
6. **Binary Thinking:** Politics mein log aksar **black and white thinking** karte hain (e.g. right vs wrong, us vs them). Ye group identity banata hai.
7. **Role Players:** Political texts ye batate hain ke **kaun kya kar raha hai, kab aur kahan**, aur kis ne kis pe kya asar dala.
8. **Space and Place:** Political language mein **territory** aur **identity** ka concept important hai (e.g. apni zameen, apna mulk).
9. **Metaphor:** Politics mein metaphors sirf decoration nahi, balkay **sochne ka tareeqa** hain. Jaise "progress" ka metaphor.
10. **Container and Path Metaphors:**
 - Container: Group identity – jaise families, states.
 - Path: Actions aur progress – jaise policies aur national plans.
11. **Emotions:** Political language ka connection hota hai **dil se**, jaise love for homeland, fear of others, belongingness.
12. **Deixis:** Political discourse mein **space, time aur modality** intersect karte hain. Har shakhs ko apna **position** samajhna hota hai.

Topic 98: Political Theory and Nature of Politics

Political theory ka matlab hai state ke bare mein **systematic ilm**. Political ka matlab hai **public concerns** se mutaliq baat.

Key Definitions:

- **David Held:** Political theory ek **network hai concepts aur assumptions ka** jisme government, society aur human capabilities samjhe jate hain.
- **Hacker:** Ye theory **achay state** aur **political reality** dono ko samajhne ki koshish hai.
- **Catlin:** Political theory mein **science + philosophy** dono شامل hain.

☞ Political theory **description, explanation, evaluation** aur **moral analysis** karta hai.

Deliberation (مشاوره بازی):

- Politics mein log **faislay reasoning ke zariye** karte hain.
- Har deliberation consensus par nahi hoti, lekin mukhtalif rai dena zaroori hota hai.

Minority Rights:

- Agar koi group majority ki zubaan se mukhtalif zubaan bolta hai, to **unke language aur culture ka tahafuz** political theory ka issue banta hai.
- **Birch (1993)** kehta hai ke zubaan aur culture khud "rights" ke haqdar nahi hote, lekin individuals ko unki zubaan mein bolne ka haq hota hai.
- **Bilingualism** natural nahi hoti. Kamzor zubaan ko zinda rakhne ke liye **hukoomat ki madad zaroori hoti hai**.

L23

Topic 99: Analysis of Text and Political Genres

Linguistic choices sirf yeh nahi dikhate ke text kaise banaya gaya hai, balki yeh bhi batate hain ke language apni **social functions** kaise poori karti hai (Chouliaraki & Fairclough 1999). Halliday (2004) ke "textual metafunction" ke mutabiq, cohesion aur coherence se hi text ki **texture** banti hai.

CDS ko un textual choices mein dilchaspi hai jo yeh taye karti hain ke **political discourse** se kya social tawaqqo 'aat judi hui hain. Hum yahan descriptive list nahin bana rahe, balke samjha rahe hain ke un choices ka mukhtalif **social contexts** mein kaisa role hai.

Genre ko Chilton & Schaffner (2002) "global linguistic patterns" kehte hain jo ek community ne khaas communicative tasks ke liye develop kiye. Har social domain ka apna "**order of discourse**" hota hai (Fairclough 1989), jisme mukhtalif discursive practices ikatthi hoti hain. Power ki struggle inhi orders ko badal-badal kar **dominant ideology** ko reflect karti hai.

Political genres hamesha **re-define** hote rehte hain. Intertextual relations (misal ke taur par Obama ka "Yes We Can" ka naara gaane ki shakl mein 2008 ke campaign mein, ya Northern Ireland ke murals) dikhate hain ke ek genre doosre ko kaise affect karta hai.

Misaali Political Genres Platforms / Links

Political speeches, debates Parliament, rallies

Misaali Political Genres Platforms / Links

Press releases, statements	Newspapers, TV
Political blogs, vlogs	Websites, YouTube, FB
Social-media posts	Twitter, Insta, TikTok

Topic 100: Analysis of Political Identity

Charaudeau kehta hai ke ek **politician ki image** aksar lambi manifesto se zyada vote dilati hai (2005). Labour Party ka case dekhein: party ki **identity** uske manifesto jitni hi zaroori hai.

1994-2007 ke “new Labour” discourse mein:

- **Labour** ka naam kabhi **role** (party, hukoomat) aur kabhi **value** (kaam, mazdoori) ki tarah aata hai.
- Blair-Brown reforms ne party ko purane “pathological stereotypes” se door dikhaane ke liye **appropriation** (conservative ideas ko apna bana lena) aur **reciprocation** (purani Labour pe tanqeed) dono strategy istemal ki.

Naam bahut maayne rakhta hai: *Labour* noun hai (“vote for Labour”), jabke *Conservative* adjective-se-noun (“the Conservatives”). “Tory/Tories” zyada tar opponents ke muh se sunne ko milta hai—NL discourse mein iska istemal comparison ke liye hota tha.

Branding ki zabaan mein, ek **acha naam** he wo cheez hai jo aapki “product” ko bheer mein ubhar ke dikhata hai (Anholt & Hildreth 2005).

Topic 101: Analysis of Ideological Beliefs

Chilton (2004) ke mutabiq, discourse ka ek bunyadi function **representation** hai—hum zabaan se apni ek tasveer pesh karte hain. Politicians evidence ya authority dikhakar apni nazar ko “objective” banaane ki koshish karte hain, lekin unki soch par aksar **ideology** asar hoti hai (van Dijk 1998).

Representation samajhne ke liye do notions zaroori hain:

1. **Perspective** – jis angle se waqt ki tasveer dikhai jaye; yeh humare **embodied experiences** se linked hoti hai (Hart 2014).
2. **Context** – chaar levels: (a) co-text, (b) intertextual links, (c) situation, (d) broader socio-political context (Benke & Wodak 2003). Sare milkar **common ground** banate hain.

Lexical choices cohesion bhi dete hain aur ek **metaphorical schema** bhi create karte hain. Political discourse aksar beliefs ko **highlight/underplay** karta hai, public opinion ko shape karta hai, aur power ko **legitimate** karta hai (van Dijk 1997).

Topic 102: Analysis of Political Stance

“**Stance**” (Du Bois 2007) ek social act hai jisme bolne wala kisi cheez ko **evaluate** karta hai ya apni **alignment** dikhata hai. Hart (2014) ke mutabiq political stance = evaluation + alignment.

Do core pehlu:

- **Epistemic Modality** – speaker ki commitment ke darje (certainty, doubt). Is se pata chalta hai beliefs kaise spread hote hain (Marin-Arrese 2015).

- **Deontic Modality** – norms ya authority ko dikhana (Fairclough & Fairclough 2012). Political leaders deontic powers se **intersubjective consensus** banane ki koshish karte hain—“hamein yeh karna chahiye”.

Audience ka reaction CDA mein aksar nazar-andaz hota hai, jabke stance analysis batata hai ke discourse **kis hat tak logon ko raji karta hai**.

L24

Topic-103: Introduction to Stance Taking (Stance lena kya hota hai?)

Jab hum alfaaz istemal karte hain, to unka sab se important kaam hota hai **stance lena** – yaani kisi cheez ke bare mein raye dena, usay judge karna, ya us par koi attitude dikhana. Stance ka kaam hota hai:

- Kisi object ko value dena
- Logon ko us object ke muqablay mein kisi position pe rakhna
- Stance lene walon ke darmiyan alignment dikhana
- Aur unki shared socio-cultural values ko express karna

Stance ke components (Biber & Finegan 1989; Du Bois 2007; Barton & Lee 2013):

1. **Stance-taker** – jo raye de raha ho
2. **Stance-object** – jis topic par baat ho rahi ho
3. **Resources** – jaise ke evaluative words, modal verbs (e.g. should, might), punctuation, filters, hashtags, languages
4. **Addressee/s** – jis se baat ki ja rahi ho

Example from social media:

- Instagram post: #sweetpotato #chili #muffins from @jamieoliver
- Viewer comment: "Waves of nostalgia for these cranberries!"
→ Yeh stance lena hai, jis mein log feelings, beliefs aur opinions express karte hain.

Stance lena hota hai ek identity project bhi – log apni self-image dikhate hain likhne ke style, photo filters aur language choices ke zariye.

Topic-104: Kinds of Stance (Stance ke qisam)

Georgalou (2016) ke mutabiq, stance ke teen ahem qisam **hoti hain**:

1. **Epistemic Stance** – knowledge, belief ya certainty express karna
 - Words: definitely, I know, I doubt, possibly, must
 - Source: "According to reports..."
 - Modals: might, may, could
 - Verbs: believe, think, conclude, demonstrate
 - Adjectives: certain, possible, dubious
 - Nouns: fact, assumption, claim
 - ◆ Example: "I would say most people here eat out." → likelihood express ki gayi
2. **Attitudinal / Affective Stance** – feelings or personal perspective dikhana
 - Words: fortunately, ironically
 - Verbs: fear, love

- Adjectives: happy, angry
 - ◆ Example: "I confess, these events upset me."
- 3. **Stylistic Stance** – bolne/likhne ka tareeqa
 - Words: honestly, with all due respect
 - ◆ Example: "Marvel superheroes had more complexity—if I may put it like that."

Du Bois (2007) ke mutabiq do aur pehlu:

- **Evaluation** – kisi cheez ke bare mein opinion
- **Alignment** – stance-taker doosron se kitna agree karta hai

Topic-105: Contextualizing the Stance

Stance ko samajhne ke liye sirf sentence nahi, **utterance ka context** bhi zaroori hai.
Example sentences:

- "The Caribbean is incredible."
- "It was really great."
- "I would love to go."

Yeh sentences clearly **evaluation** dikhate hain. Lekin jab tak context nahi milega (kaun bol raha hai, kis se bol raha hai, kis cheez par bol raha hai), stance ka matlab mukammal nahi hota.

Stance samajhne ke liye 3 sawaal important hain:

1. **Kaun** stance le raha hai? (stance-taker)
2. **Kis cheez** par stance li gayi hai? (stance-object)
3. **Kis stance** ka jawab diya gaya hai? (response stance)

Topic-106: Subjectivity & Positioning

Subjectivity ka matlab hai apne personal feelings ko express karna. Jab speaker apne emotions dikhata hai, to wo automatically apne aap ko **position** bhi karta hai.

Example:

- Noor: "I like this song."
- Manha: "I don't like those."

Yahan "**I**" subject hai jo stance le raha hai, aur "**this song**" object hai jis par stance li gayi hai. Verbs jaise *like*, *don't like*, *love*, *hate* etc. **affective stance** dikhate hain.

Yeh sentences dikhate hain:

- Stance subject = speaker (Noor, Manha)
- Stance object = song
- Stance = evaluation + positioning (subjective + objective element saath)

Topic-107: Alignment

Alignment ka matlab hai conversation mein cooperation dikhana. Har waqt alignment maintain karna padta hai. Alignment ka matlab yeh nahi ke dono log kisi baat se agree karte hain—balki yeh ke dono baat aage barhane mein shaamil hain.

Types:

- **Propositional alignment** – kisi idea pe agreement
- **Activity alignment** – dono milke ek kaam kar rahe hain (e.g., argument banana)

Charles Goodwin ne alignment ko verbal + physical cues (jaise **gaze**) se analyze kiya.

Stivers (2008) ne do terms diye:

- **Alignment** = cooperation in activity
- **Affiliation** = support for emotional stance

E.g., koi banda story sun raha hai, response deta hai (“funny”, “sad”, etc.) – wo aligned ho sakta hai, magar zaroori nahi ke wo **affiliate** kare stance se.

Topic-108: The Stance Triangle

Stance Triangle ek analytic model hai jo stance ke teen major dimensions ko explain karta hai:

1. **Evaluation** – kisi cheez par opinion dena
2. **Positioning** – apni ya doosre ki jagah tay karna
3. **Alignment** – doosre stance-takers se rishte banana

Ye teeno mila kar **Tri-Act** banate hain.

Ek stance act:

- **Evaluate karta hai** ek object ko
- **Position karta hai** ek subject ko (usually khud ko)
- **Align karta hai** doosre subjects ke saath

Triangle ke nodes:

- Subject 1 (speaker)
- Subject 2 (listener)
- Stance object (topic)

Triangle ke sides:

- Evaluation vector (subject 1 → object)
- Positioning vector (subject 2 → object)
- Alignment vector (subject 1 ↔ subject 2)

Yeh triangle help karta hai:

- Kis angle se stance li gayi hai
- Kaun kis se agree/disagree kar raha hai
- Kis cheez par focus hai (subject, object ya relationship)

Agar triangle ka koi hissa missing bhi ho, to baaki do hisson se usay infer kiya ja sakta hai.

L25

Topic-109: Introduction (Neoliberalism ka Taaruf)

Neoliberalism aik aisa term hai jo khaaskar **free market economy** ke ideas ko explain karta hai. Yeh concept support karta hai:

- **Free market trade**
- **Financial markets ki deregulation** (yaani sarkari qawaneen ka hata diya jana)
- **Privatization** (sarkari idaron ka private sector ko de dena)
- **Individualization** (fard ki zimmedari ka zyada zor)
- **State welfare se doori**

Neoliberal era 1970s mein start hua aur aaj tak chalta aa raha hai. Yeh aik **modern form hai classic liberalism** ki jo Enlightenment period mein tha. 1980s aur 1990s mein "Free Trade deals" ke zariye globalization shuru hui jo asal mein neoliberalism ka aik naam tha. 1990s mein "anti-globalization protests" bhi isi ke khilaaf hui.

Important Concepts:

- **Privatization:** State ko industries aur services se nikaal kar private sector ko dena. Mana jata hai ke private log zyada efficiently kaam karte hain.
- **Deregulation:** Business pe lagaye gaye qawaneen hata diye jate hain taake market zyada productive ho.
- **Free Markets:** Jab market mein koi rukawat ya regulation na ho. Paisa aur maal freely across borders move kar sakein.
- **Individualization:** Group ya society ki bajaye individual par focus – "Society naam ki koi cheez nahi, sirf individuals hote hain."

Topic-110: The Development of Neoliberal Discourses

World War II ke baad Western countries ne welfare state banai – logon ko health, education, employment diya gaya. Lekin 1970s mein OPEC oil crisis aur recession ne neoliberalism ko ek **crisis solution** ke tor pe introduce kiya.

Neoliberalism ko samajhne ke liye Wacquant (2012) ke mutabiq:

- State ab **market-oriented ban gaya hai**.
- Welfare ki responsibility ab individuals pe daal di gayi hai.
- State ka role sirf **discipline aur regulation** ban gaya hai.

Hayek ne kaha:

- Sirf **free market** hi social management ke liye best hai.
- Government ko planning aur controlling ka kaam nahi karna chahiye.

Brenner, Peck & Theodore (2009):

- Neoliberalism aik **political state project** hai.
- Yeh logon ka democracy pe control kam karta hai.
- Neoliberalization ka matlab hai – **ek incomplete aur contradictory** regulatory change process.

Topic-111: CDA, Neoliberalism aur Globalization

Holborow (2012) ke mutabiq, neoliberalism sirf ek economic idea nahi, **discourse** bhi ban gaya hai – aur discourse hi usay zinda rakhta hai.

Fairclough kehte hain:

- Globalization aur social change hamesha **language ke zariye** hoti hai.
- Is liye CDA ka kaam hai in discourses ko samajhna aur unka counter-banaana.

Jessop (2013) ke mutabiq neoliberalism ko samajhne ke liye 5 approaches hain:

1. **Ideological emergence:** 1940s mein fringe idea tha (Hayek), 1970s mein crisis ke baad mainstream bana.
2. **Political project:** Market-centred, populist, and punishing politics.
3. **Economic framework:** Competition aur market forces ko spread karna.
4. **Capitalist offensive:** Labour ke khilaaf capitalist power ko barhna.
5. **Material practices:** 1970s se globalization, free trade, transnational capital ka aaghaz.

Foucault ka idea – Neoliberalism self-discipline promote karta hai. Har fard apna **entrepreneur** ban jata hai – aur state ki zimmedari kam ho jati hai.

Topic-112: Economic Representations and CDA

Global economic crisis ke baad economists, politicians aur public ne economy ke bare mein alag alag **discourses aur representations** banai hain.

Important Questions:

- Log economy ko kaise samajhte hain?
- Kya unki apni soch, theories aur discussions valid hain?

Ruccio (2008):

- Public economic views ko irrational keh kar reject karna sahi nahi.
- Har shakhs aik **"everyday economist"** ho sakta hai – apni zindagi ke tajurbaat se economy ko samajhta hai.

Chun (2012–2017):

- Media mein log economists aur politicians se mukalma karte hain.
- In discourses ko seriously lena chahiye.

Klamer & Meehan (1999):

- "Everyday economists" society ke hopes, fears aur dreams ko reflect karte hain.

Topic-113: Conclusions

Neoliberalism ka sab se major feature yeh hai ke:

- **Welfare state ki zimmedari ab individuals pe daal di gayi hai.**

Neoliberal governance ka matlab yeh nahi ke government ka role khatam ho gaya – balki:

- Ab government ka role shift ho gaya hai – dusri jagahon par control rakhti hai.
- Market ko freedom milti hai, lekin "**freedom of choice**" sirf naam ki hoti hai – kyun ke choices kis ko milengi aur kaun tay karega, yeh unclear hai.

Ferguson (2010):

Har critic kehta hai:

“Neoliberalism is bad for poor and working people – isliye humein iska muqabla karna chahiye.”

Boltanski & Chiapello (2005), Fraser (2009):

- Neoliberalism ne capitalism ke khilaaf aane wali criticism ko **absorb kar liya** – aur usi se apna naya model banaya.

L26

□ Topic-114: Introduction to Nationalism

- **Nationalism** ko World War II ke baad obsolete samjha ja raha tha, lekin yeh dobara strong hokar samne aaya hai.
- **Nationalist movements** Africa, South America, Middle East, Southern Europe aur former Soviet Union ke naye states mein dekhne ko milte hain.
- Aaj ke globalised world ke bawajood **walls aur borders** zyada ban rahe hain taake apne nation ko protect kiya ja sake.
- Do trends samne aaye hain:
 - **Post-nationalism** (jahan nations se upar global connection ki baat hoti hai)
 - **Return to nation-state**, jo cultural aur ethnic identity par based hota hai.

✓ Definitions:

- **Gellner**: Nationalism ek political principle hai jahan political aur national unit ka ek hona zaroori hai. High culture impose ki jati hai low culture par.
- Isme bureaucracy, language standardisation aur political legitimacy important aspects hain.
- **Anderson**: Nation ko "imagined community" kaha – log ek dusre ko nahi jaante lekin ek imagined connection hota hai.
- **Wodak**: Critic karti hain ke Anderson ka idea homogenous communities ko presume karta hai, jo aaj ke multicultural states mein fit nahi hota.
- **Transnationalism**: Borders se upar jaane wale social, political, aur cultural ties ko kehte hain.
 - **Castells** ke mutabiq transnational communities traditional nation-state identity ko challenge karti hain.
 - Online aur virtual communities bhi identity aur belonging mein role play karti hain.

□ Topic-115: The Construction of National Identities

- **Identity** ek process hai, jo continuously change hoti rehti hai (Triandafyllidou & Wodak).
- **Billig (1995)** ka concept "banal nationalism":
 - Rozmarra ki cheezon jaise flags, songs, currency, sports, etc. se national identity subtly promote hoti hai.
 - "We", "Our", jaise pronouns logon ko nation se jorna hai.

✓ Wodak et al. (2009) ke according:

- Nation ek **mental construct** hai jo logon ki imagination mein hota hai.
- Identity banane ke 5 content-related areas:
 1. Homo Austriacus ka construction
 2. Shared political past
 3. Shared culture
 4. Shared political present & future
 5. National body ka discourse

✓ Key Concepts:

- Identity **discursively** construct hoti hai (through language and communication).
- **National habitus** – internalised norms jo socialisation ke through develop hoti hain (Bourdieu).
- **Discourses of sameness & difference:**
 - Sameness: Apni nation ki uniqueness ko highlight karna.
 - Difference: Doosri nations se fark dikhana.

✓ New Dimensions:

- **Citizenship, language competence, naturalisation** identity mein key role play karte hain.
- **Religion aur language** bhi national identity ke elements hain.
- **Online platforms** jaise Facebook, Twitter, etc. bhi identity discourse ka hissa hain.

□ Topic-116: Nationalism and Border Politics

- Borders ab **ethnicity, language, aur culture** ke basis par define kiye ja rahe hain.
- Yeh ek **closed, homogenous nation-state** ka concept dubara la raha hai.
- **Mother tongue** ko national identity ke symbol ke tor par promote kiya ja raha hai.

✓ Example: Hungarian Jobbik Party Poster (2010)

- Poster mein mosquito ko parasite dikhaya gaya tha jisko hatana zaroori bataya gaya – yeh metaphor tha unwanted minorities ke liye (Roma aur Jews).
- "**Parasitism**" – ek metaphorical aur discriminatory term thi.
- Yeh **calculated ambivalence** ka case tha – racist message indirectly diya gaya.

✓ Important Concept:

- Right-wing populist parties ke liye **nation** ek pure aur sovereign community hai jo blood aur ancestry se define hoti hai.
- **Heritage-based identity** ko promote kiya jata hai (in-group vs. out-group).
- Lekin, zaroori nahi ke **nationalism hamesha racist ho**, ya **racism hamesha nationalist ho**.

□ Topic-117: Rewriting National Pasts

- Nations apni identity **historical narratives** se banati hain jo origins, traditions, aur timelessness ko highlight karti hain.
- **Sicurella (2015)** ke mutabiq 4 key elements:
 1. **Myths of origins** – heroic ancestors, founding stories
 2. **Teleological mission** – nation ka ek divine purpose

3. **Pure and homogenous people** – ancestral homeland ka concept
4. **Golden ages & heroes** – glorified past

✓ **Use of History:**

- History ka use **national culture aur identity** ko justify aur reproduce karne ke liye hota hai.
- **Right-wing populists** apni history ko rewrite karte hain taake apni ideology justify kar sakein.
- Example: **Jörg Haider (Austrian FPÖ)** ne Nazi Waffen-SS ke members ko “decent victims” kehkar unki yaad mein speech di – ek problematic rewriting of past.
- **History ko narrative tool** ke tor par use karke nation ko ek pure, strong aur unique entity banaya jata hai.

L27

□ **Topic-118: Politics, Media aur Terrorism ka Taluk**

- Aaj kal **politics aur media** mil kar kaam karte hain – politicians ab media stars ban gaye hain.
- Is wajah se **political language/discourse** par logon ne zyada research karna shuru kiya.
- **9/11 ke baad**, terrorism, war aur violence ke topics pe zyada focus hone laga.
- “**Terrorism**” ka matlab har jagah ek jaisa nahi hota – har mulk isay apne hisaab se samajhta hai.
- Kabhi kabhi hukoomat logon ko dushman dikhane ke liye “**terrorism**” ka lafz use karti hai – yeh lafz propaganda ban gaya hai.
- War ya violence ke liye logon ko pehle “**dushman**” banana parta hai – yeh sab language se hota hai.

□ **Topic-119: CDA aur Illusion Wali Language**

- **Critical Discourse Analysis (CDA)** ka kaam hai language ke zariye **power aur ideology** samajhna.
- CDA multi-method use karta hai – sirf grammar ya words nahi dekhta, balkay social problems bhi analyse karta hai.
- **Bhatia** ne kaha ke kabhi kabhi reality ko distort karke ek “**illusion**” create ki jati hai – yaani jhoot ya ghumrah kun soch.
- Yeh illusion language, media aur old experiences se banta hai.
- Metaphor, emotional language, and history ka use karke logon ke zehan par asar dala jata hai.

□ **Topic-120: Terrorism ka Image Bush ne kaise Banaya**

- **Bush** ne apni speeches mein 9/11 ke baad terrorism ko “**evil**” (**bohat bura**) aur “**barbaric**” dikhaya.
- Usne kaha ke yeh sirf America ke khilaf nahi, balkay “**civilization vs barbarism**” ka jung hai.
- Bush ne logon ke jazbaat ko samet kar **revenge ko “justice”** bana kar pesh kiya.
- Osama Bin Laden ko “evil” ka image de kar pure group ko terrorist bana diya gaya.
- Logon ko emotionally convince kiya gaya ke war zaroori hai.

□ **Topic-121: War ka Bahana – WMD ka Khauf**

- Jab revenge justify nahi ho raha tha, to “**Weapons of Mass Destruction**” (**WMD**) ka bahana bana.
- Bush ne kaha ke Iraq aur terrorists mil kar WMD bana rahe hain – is se dunya khatrey mein hai.
- Words jaise “catastrophic”, “danger”, “threat” use kiye gaye taake log dar jayein aur war support karein.
- Isay kehte hain “**topos of threat**” – yaani khauf paida kar ke action lena.

□ **Topic-122: War ka Justification – Democracy ka Naam**

- Jab WMD nahi mile, to war ko “**democracy failaane**” ka naam de diya gaya.

- Terrorism ko dictatorship, tyranny, aur fanaticism se jor diya gaya.
- Bush ne kaha ke war ka goal hai “freedom aur justice” – lekin asal mein wo apna agenda promote kar raha tha.
- Democracy vs Terrorism ka contrast bana ke war ko achi cheez dikhaya gaya.

□ Topic-123: Conclusion – Language aur Reality ka Taluk

- Terrorism ka matlab har waqt change hota raha – kabhi evil, kabhi WMD, kabhi tyranny.
- Language ke zariye logon ka **zehni tasur** (mental image) banaya gaya.
- Har group apni soch aur culture ke mutabiq duniya ko dekh kar language use karta hai.
- Yeh sab “**discourse of illusion**” ka part hota hai – yaani duniya ko waise dikhana jaisa aap chahte hain.
- Ek method se sab kuch analyse karna mushkil hai – kyunke social world complex hai.

L28

Topic-124: Race vs Ethnicity – Farq Kya Hai?

- **Race** ka matlab hota hai **physical cheezein**, jaise skin ka rang, aankhon ka color, ya haddi ki banawat.
- **Ethnicity** ka taluk hota hai **culture aur society** se, jaise language, nationality, ya kisi qoum ka riwayati lifestyle.
- Misal: Aik banda **kaala rang ka** ho sakta hai (race), lekin uski **ethnicity Nigerian ya Afro-American** ho sakti hai.
- Aaj kal research mein “**race**” ka lafz kam use hota hai, aur “ethnicity” ko zyada tarjeeh di jati hai.
- CDA (Critical Discourse Analysis) mein race aur ethnicity dono ka use hota hai, lekin focus ab **ethnic relations aur discrimination expose karne** par hai.

□ Topic-125: Elite aur Rozmarrah Ka Racism

- **Elite racism**: Jab politics, media, ya schools jaise powerful institutions racism ko language ke zariye barqarar rakhte hain.
 - Misal: Immigrants ko media mein negative dikhana, unhein “threat” banana.
- **Everyday racism**: Rozmarrah zindagi mein aam log **storytelling ya baat cheet** mein racism ke ideas ko repeat karte hain.
- CDA scholars ne dikhaya ke kaise elite log aur aam log **apne tareeqay se racism ko normal bana dete hain**.
- Van Dijk ne bataya ke log racism se **distance create karne ke liye disclaimers** use karte hain jaise: “Main racist nahi hoon, lekin...”.

□ Topic-126: Overt vs Covert Racism

- **Overt racism**: Seedha aur khula racism (jaise galiyaan dena, insult karna) – yeh ab West mein mana hai.
- **Covert racism**: **Chhupa hua racism**, jaise inclusive lafzon ka use karna (multiculturalism, diversity) lekin andar se same biased ideas promote karna.
- Ab log **race ki jagah language ya accent par prejudice dikhate hain** – jise “linguistic monitoring” kehte hain.
- **Racialization**: Jab specific groups ko negative cheezon ke sath jor diya jata hai – jaise “Muslim = terrorist” ya “Black = uneducated”.
- Scholars kehte hain ke **race ek ideology ka natija hai, asal mein koi scientific category nahi**.

□ Topic-127: Integration Discourse in EU Immigration

- **Guillem (2018)** ne bataya ke EU mein immigration policies mein covert racism hota hai.

- **Racialization aur whiteness** ke concepts use hote hain taake immigrant groups ko control kiya ja sake.
- EU ne kuch immigrants ko “welcome” kaha (mostly white) aur kuch ko “threat” banakar reject kiya.
- Immigration ko **economic problem** ke naam par ban karna bhi ek excuse tha – asal mein cultural fear tha.
- Integration ki policies mein contradictions hain: “Two-way” keh kar bhi **zimedari immigrants par daal di jati hai**.

□ Topic-128: Integration aur Control ka Taluq

- EU policies **integration** ko do-tarfa process batati hain (immigrants + host country), lekin asal mein **power imbalance** hota hai.
- Immigrants se **culture adapt karne ka pressure hota hai**, lekin host society ki zimmedari vague hoti hai – sirf “involvement” ka lafz use hota hai.
- Documents immigrants ki **economic rights ko unki cultural obedience se link** karte hain.
- Isay **control ka tool** banaya gaya hai jahan immigrants ko marginalize kiya ja sakay agar wo “fit in” na karein.

□ Topic-129: Conclusion – Discourse aur Racism ka Analysis

- Language ke zariye **racism aur social inequality** barqarar rehti hai – chahe wo institutions mein ho ya rozmarrah zindagi mein.
- Studies dikhati hain kaise log “**us vs them**” narrative banate hain.
- Covert racism zyada khatarnaak hota hai kyunke wo **notice nahi hota, lekin deeply affect karta hai**.
- CDA ka kaam hai:
 1. Important keywords identify karna
 2. Unka function samajhna
 3. Batana ke wo ideologies ko kaise promote karte hain
 4. Aur solutions propose karna

L29

□ Topic-130: Feminist Critical Discourse Analysis (FCDA) ka Taaruf

- **CDA** (Critical Discourse Analysis) ka maqsad yeh hai ke wo **society ke unfair systems**, jaise **discrimination, power imbalance** ko samjhay aur expose kare.
- **Feminist CDA (FCDA)** ka focus **gender-based inequality** par hota hai – yaani mardon aur aurton ke darmiyan jo power ka farq hota hai.
- FCDA yeh dekhti hai ke kaise **gender ideologies (yaani mard/aurat ke bare mein soch)** language ke zariye **normal bana di jati hain**.
- FCDA ka goal yeh hai ke **aise discourses (baatein, texts, media etc.) ko samjha jaye aur badla jaye** jo gender ko unequal banate hain.
- FCDA gender ko **fixed ya universal** nahi maanta – balkay yeh kehti hai ke **har context mein gender ka matlab badal sakta hai**.
- Yeh feminist theories jaise **post-structuralism, intersectionality, queer theory** se bhi influenced hai.

□ Topic-131: Principles (Usool) of FCDA

FCDA ke 5 basic principles hain:

1. **Gender as Ideology:**
 - Gender ek **sochi samjhi ideology** hai, jo society mardon ko powerful aur aurton ko neechे dikhata hai.

- Gender koi simple ya fixed concept nahi – balkay har society mein iska experience aur structure alag hota hai.
- 2. **Focus on Power:**
 - Power yaani taqat ka analysis FCDA ka center hai.
 - **Patriarchy** ek aisi system hai jo mardon ko zyada power deta hai.
 - Foucault kehte hain power har jagah hoti hai, chhupi hui bhi hoti hai (discipline, norms, behavior).
 - FCDA dono types ke power ko samajhne ki koshish karta hai.
- 3. **Discourse Shapes Society:**
 - Log jab gender par baat karte hain to wo **gender identities create karte hain** – yaani “aurat kaise honi chahiye”, “mard kaisa hota hai”.
 - FCDA language ko sirf reflect nahi, balkay **society banane wala factor** manta hai.
- 4. **Critical Reflexivity:**
 - FCDA yeh chahata hai ke log khud critical banain aur gender inequality ko samjhein.
 - Jaise: sexist baaton ka jawab dena, inclusive policies banana, ya gender ke haq mein kaam karna.
- 5. **Analytical Activism:**
 - FCDA sirf theory nahi, balkay **action** bhi hai.
 - Research ke zariye society ko better banana, aur gender-based injustice ko khatam karna iska goal hai.

□ Topic-132: Gendered Dichotomization (Public vs Private Role)

- Research ne yeh dikhaya ke society mardon ko **public roles** (office, politics) aur aurton ko **private roles** (ghar, bacha paalna) mein fit karti hai.

Makoni (2013) ka study – Zimbabwean couples in UK:

- Zimbabwe ke mard jab UK migrate hue to unko **domestic kaam (bacha sambhalna, cooking)** karna pada.
- In kaam ko “auraton ke kaam” samajha gaya, jisse unka **mardana identity** challenge hua.
- Kuch mardon ne apni power lose hone ka ehsas kia aur aurton ko neecha samjha.
- Kuch aurton ne yeh inequality accept kar li, jabke kuch ne **resistance** ki aur gender roles ko challenge kia.

Nguyen (2011) ka study – Vietnam:

- Vietnam mein aurton ko public field mein aane ki ijazat mili, lekin **ghar ka kaam ab bhi unka zimma** samjha jata hai.
- Government aur media ne aurton ke public role ko “**national development**” ka part banaya, lekin unki **self-choice** ko recognize nahi kia.
- **Confucian ideology** ne aurton ko submissive banakar mardon ki authority ko barqarar rakha.

□ Topic-133: Androcentricism in Organizations (Mardon ko Markaz banana)

- Kai organizations mein aurtein kaam karti hain, lekin unki **progress aur recognition mein rukaawat hoti hai**.

Wodak (2005) ka study – EU Gender Mainstreaming:

- EU mein aurton ke liye jobs zyada open hui, aur kuch flexible roles bhi mile.
- Lekin still, aurtein **higher positions mein kam nazar aati hain**, aur jinhein promotions milti bhi hain unhein **apni capability baar baar prove karni padti hai**.

Martin-Rojo & Esteban (2005) ka study – Spain:

- Jab women leaders **masculine style** adopt karti hain to log kehte hain: “yeh aggressive hain.”
- Jab wo **soft aur alag style** adopt karti hain to log kehte hain: “yeh confident nahi hain.”
- Aurton ko leadership mein **ek balance banana padta hai**, jisse unki authority bhi chali jati hai aur unki image bhi weak hoti hai.

L30

□ Topic-134: Violence Against Women – Media aur Kanooni Discourses

- **Media blame game:** Clark (1992) ne UK tabloids (1980s) ko dekh kar bataya ke akhbar aksar **victim par hi zimmedari dal dete** hain (“usne khud mauqa diya”).
 - “Respectable” aur “non-respectable” aurton ki categories banai jati hain (shaadi-shuda = “genuine”, divorcee/blonde = “non-genuine”).
 - **Maqsad:** mardon ki galti ko kam dikhana.
- **Courtroom bias:** Ehrlich (2001) ne Canadian case study dikhai jahan **lawyers ne complainant aurton ki credibility** pe sawaal uthaye (“zor se resist kyon nahi kiya?”).
 - “Kam resist” = “shayad consent tha” – is logic se **aadmi ki zimmedari kam** ho gayi.
 - Courts ne **gendered power dynamics** ko ignore kiya.

□ Topic-135: Post-Feminist ya “Commodity Feminism” ki Nayi Soch

- **Commodity Feminism:** Feminist slogans ko **marketing** bana kar becha jata hai (Goldman 1992).
 - **NRA (USA) ka “Refuse to be a Victim”** campaign: guns = women empowerment!
 - Talbot (2005) ke mutabiq NRA ne aurton ke genuine fears ka faida uthaya taake **gun sales** badhaye.
- **Lazar (2006, 2009) – Singapore ads:**
 - Ads aurton ko “confident, empowered, self-indulgent” dikhati hain – lekin asal mein **traditional beauty norms** ko hi reinforce karti hain.
 - Yani feminism ka naya “glossy” version, jo sirf **privileged** women ko suit karta hai.

□ Topic-136: FCDA Case Study – “Delhi Rape” (2012)

- **Victim blaming:** Statements jaise “decent girl 9 baje raat ko nahi ghoomti” – yeh **culture-based respectability rules** hain.
 - Late night + male friend = “khud bulaya” narrative.
- **Perpetrator mitigation:** Rapists ke actions ko “tragedy”, “accident” keh kar **crime ko soft** kiya gaya.
 - Rape ko “sexual act” jaisa frame karke power dimension chhupaya gaya.
- **FCDA angle:** Victim blaming + perpetrator ko maaf karna = **transcultural pattern**; sirf India ka masla nahi, duniya bhar mein hota hai.

□ Topic-137: Key Lessons (FCDA ke liye)

1. **Transnational lens zaroori:** Gendered violence ke discourses alag mulkon mein milte-julhe patterns dikhte hain; global comparison se hi poori picture samajh aata hai.
2. **Power ki multiple layers:** “Delhi rape” ne ek taraf purane patriarchal norms ko dubara kuat kiya, doosri taraf **massive protests** ne naya feminist jazba bhi paida kiya.
 - FCDA ko **oppressive + transformative** dono tarah ke power relations ko study karna chahiye.

L31

Topic 138: Class-Related Discourse aur CDA

- **Radical CDA** sirf language ka analysis nahi karti, balkay **power structures** ko samajhne ki koshish karti hai jo discourse ke zariye banaye aur chalay jaate hain.
- **Focus ideology par hota hai**, sirf persuasion ya manipulation par nahi.
- **Discourse = social struggle ka site** hota hai — class struggle bhi is mein شامل hai.
- Zotzmann aur O'Regan kehte hain ke CDA koi fix framework nahi, balkeh **har research apna context-specific method banati hai**.
- Fairclough ke mutabiq CDA **semiosis** (meaning-making process) ka analysis hai — discourse sirf language nahi, balkay **symbols, visuals, body language** bhi include karta hai.
- CDA ka maksad: **logon ko conscious banana** ke kaise language un par dominance establish karti hai.

□ Topic 139: Class aur Socio-Economic Resources

- **BBC's Great British Class Survey (2011)** ne 7 naye class types define kiye:
 - *Elite, Established Middle Class, Technical Middle Class, New Affluent Workers, Traditional Working Class, Emergent Service Workers, Precariat.*
- **Pierre Bourdieu ke ideas** use hue — jaise **fields, capital (economic, cultural, social)** aur **habitus**.
- **Class** ko 5 categories mein samjha gaya:
 1. **Economic Resources:** land, salary, savings, material goods.
 2. **Socio-Cultural Resources:** occupation, education, technology skills, social networks.
 3. **Behavior:** brands, lifestyle, khana ka tareeqa, hobbies.
 4. **Life Conditions:** politics, health, neighbourhood quality.
 5. **Spatial Conditions:** ghar ka size, office, mobility level, jagah ki layout.
- Har society mein class **race, gender, religion** waghera ke sath **intersect** karti hai.

□ Topic 140: Class aur CDA Research

- **CDA ne pehle class ko itna focus nahi kiya** jitna race ya gender ko.
- **Lekin ab naye studies** class ko analyze kar rahe hain through public policy, media, aur politicians ke speeches.
- **Turgeon et al. (2014)** – USA mein “welfare-to-work” discourse ne **poor logon ko blame kiya** (lazy, dependent), lekin system ki faults chhupa li.
- **Eriksson (2015)** – Sweden ke show *Ullared* ne **working class logon ka mazak udaaya**, unko “**low-value**” bodies banaya.
 - **Skeggs** kehte hain “inscription” ka matlab hai – kis tarah body par value likhi jaati hai.
 - **Lyle** kehte hain middle class gaze ka matlab hai – working class ko **niche samajhna** aur stereotypical kaam ke laayak kehna.

□ Topic 141: Class Struggles aur Public Discourse

- **Class struggle sirf paisay tak mehdood nahi**, media aur politics mein bhi hoti hai.
- **Spain (2013):** Conservative party vs. **PAH** (mortgage victims).
 - PAH ne protests, information sessions, aur eviction resistance ka nizaam banaya.
 - Inka slogan tha: “*humara housing right chheen liya gaya banks aur hukumat ke zariye.*”
- Yeh ek “**discursive class warfare**” ka example hai — discourse ke zariye ek taraf elite class aur doosri taraf general public ka conflict.

□ Topic 142: Conclusions – Zarurat Class-based CDA ki

- CDA ko **class-focused banana chahiye**, taake **material-based inequality** samajh aayen.
- **Fairclough** ka radical view adopt karna hoga jo political economy ko include kare.
- **CDA + Ethnography** ka fusion propose kiya gaya (Krzyżanowski & Monica Heller) – jahan **context + lived experience** dono study kiya ja sake.

- **Self-reliance ka discourse** often governments use karti hain taake responsibility shift ho jaye — jabke asal problem **structural** hoti hai.
- **Policy discourse ka analysis** zaroori hai kyunke usi mein meanings banaye jaate hain jo public policies ko justify karte hain.

L32

□ Topic-143: CDA aur Educational Discourse ka Taaruf

Critical Discourse Analysis (CDA) ka use ab education mein bohat ziada ho raha hai. Pehle 1983 se 2005 tak sirf 46 articles chhapy, lekin 2014 tak yeh number barh kar **257** ho gaya. Educational researchers ab CDA ko use karte hain taake woh samajh sakein ke **school, classroom, textbooks, media** aur **policy** ka language system kis tarah **power** aur **identity** banata hai.

★ Key Points:

- CDA ka use ab **global level par ho raha hai**: Australia, Europe, Latin America etc.
- Researchers **formal (school) aur informal (daily) classroom interactions** ka analysis karte hain.
- CDA frameworks mostly used:
 - **Gee (2005)** – discourse aur identity ka connection.
 - **Fairclough (1995)** – power through institutional language.
 - **Van Dijk (1993)** – knowledge, memory, ideology ka role in discourse.
- **Rogers (2018)** ke mutabiq*: Recent CDA in education zyada **teachers aur learners ke perspectives** par focus karta hai, na ke sirf oppressors.
- CDA helps in understanding **racism/anti-racism practices** in classrooms too.

□ Topic-144: Deconstructive aur Reconstructive CDA Inquiry

Zyada tar CDA ka focus hamesha **oppression aur dominance** par raha hai, lekin kuch scholars ne suggest kiya ke CDA sirf burai ko nahi, balkhe **achai (hope aur empowerment)** ko bhi study kare. Isliye ek **new orientation** develop hui jise kehte hain **Positive Discourse Analysis (PDA)**.

★ Key Points:

- **Deconstructive CDA**:
 - Power ko **analyze aur criticize** karta hai.
 - Focus: injustice, media bias, racism, inequality.
 - Scholars: **Van Dijk, Fairclough**.
- **Reconstructive CDA ya Positive Discourse Analysis (PDA)**:
 - Power ko **positive aur productive cheez** ke tor par bhi dekhta hai.
 - Focus: log kaise **empower** hote hain, **community banate hain**, aur **change laate hain**.
 - Scholar: **Martin (2004)** ne PDA ka idea diya.
- **Foucault (1980)**: Power har jagah hoti hai — yeh sirf control ka zariya nahi, yeh **knowledge aur pleasure** bhi create karti hai.
- **Luke (1995)**: CDA ko sirf power ka analysis nahi, **empowerment ka zariya bhi hona chahiye** — classrooms aur policies mein bhi.

□ Topic-145: CDA in Educational Research

Rogers aur unki team ne 2004–2012 tak CDA-based educational research ka review kiya. Is review mein unhon ne dekha ke education mein CDA ka use **deconstructive aur reconstructive dono directions mein** ho raha hai.

★ Key Findings:

- 66% studies mein **transformative ya reconstructive approach** use hui.
- 34% studies ne **oppression aur inequalities** ka analysis kiya (deconstructive).

□ Example Studies:

- **Young (2009):**
 - Children's magazine ka CDA kiya.
 - Race, class, aur politics ke historical narratives highlight kiye.
 - **Counter-narratives** (positive stories) bhi show kiye jo racial pride aur cultural development ko promote karte hain.
- **Ayers (2005):**
 - USA ki ek community college ka study kiya.
 - College system kis tarah **class inequality reproduce** karta hai, uska analysis kiya.
- **Van Dijk (1993):**
 - CDA help karta hai yeh samajhne mein ke log race ya class ko kaise samajhte hain, aur kis tarah unke ideas aur language **dominance aur white privilege** produce karte hain.

L33

□ Topic-146: CDA aur School Textbooks

Seedhi baat:

School textbooks sirf padhai ka material nahin, balki **aane wali nasl ki soch, qeemat-e-nazar (values) aur identity** ko shape karte hain. Textbook banane ke peeche **kaee idaron aur logon** ki bargaining hoti hai, is liye ye hammesha ek **political aur cultural product** hote hain.

🔑 Points:

- Textbooks dikhate hain **kis ka ilm "qeenmti" mana ja raha hai** (Apple, Provenzo et al.).
- **Critical discourse analysis (CDA)** textbooks ko "culture + politics" ki nazar se dekhta hai.
- Research aesthetic of "**small-slow**": lafzon, sentences, images par detail mein dekhna.
- Topics jaise **racism, nationalism, immigration** ko CDA ke zariye expose kiya ja sakta hai.
- Textbook ka **design** khud teaching/learning ko aasan ya mushkil bana sakta hai.

□ Topic-147: Textbooks mein Exclusion aur Marginalization

Seedhi baat:

Duniya bhar ki studies dikhati hain ke textbooks aksar **minority ya kam-زور groups ko ignore ya stereotype** karte hain, jis se **dominant group** ki power barqarar rehti hai.

🔑 Misalain:

- **Gender bias** – Kenya ke English books (Barton & Sakwa 2012).
- **Consumerism** – Iranian ESL books (Taki 2008).
- **Nationalism** – US history books indigenious ko passive dikhate (Rogers & Stanton 2014).
- **Ethnic stereotyping** – China mein Han group ki dominance (Chu 2015); Spain mein Muslims = immigrants (Arqué et al. 2012).
- **Environmentalism** – China ke English books "surface-level green talk" (Xiong 2014).
- Common nateeja: Textbooks **status quo** ko support karte hain aur students ko usi nazar se duniya dekhna sikhaate hain.

□ Topic-148: Textbooks, Knowledge aur Language (SFL Approach)

Seedhi baat:

Systemic Functional Linguistics (SFL) aur multimodal analysis dikhate hain ke textbooks **ilm ko kis tarz se “natural” aur unquestionable** bana dete hain.

🔑 Points:

- **Nominalization & passive voice** history ko “bas ho gaya” style mein dikhate hain (Achugar & Schleppegrell).
- **“-isms” (colonialism, socialism)** ko define karte waqt values chipka dete hain (Martin et al. 2010).
- **Moss (2010)** – Colombian history textbook deterministic view deta, jisme insani badlaav ki gunjaish kam.
- **Oteiza & Pinto (2008)** – Chile textbooks Pinochet coup ko “zaroori” solution jaisa frame karte.
- Maqsad: Yeh dikhana ke **language choice** students ko ek **“sahi” tareeqa-e-fikr** sikhaati hai.

□ Topic-149: Ethnographic Discourse Analysis (EDA)

Seedhi baat:

Ethnography + CDA = “Ethnographic Discourse Analysis” — yani researcher field mein ja kar **real-time interactions** observe karta hai, taake discourse ke peeche ke **context, emotions & power** samajh sake.

🔑 Points:

- Macgilchrist ne **18 mah ke fieldwork** mein textbook author meetings, interviews, observation ki.
- 200+ hours ki recorded baat-cheet se pata chala ke **ideology kaise draft se final book** tak ghuss jaati hai.
- EDA “microscope” deta hai jisse hum **hegemonic formations** (jo power ko normal dikhayein) trace kar sakte hain.

□ Topic-150: Germany ka Textbook Production Process (Case Study)

Seedhi baat:

Germany mein textbooks banana ek **multi-step, tightly controlled** process hai jahan curriculum, politics, aur corporate economy sab mil kar final content tay karte hain.

🔑 Steps:

1. **Curriculum alignment** – 16 federal states, har ek ka apna syllabus = content pe pehli constraint.
2. **State approval** – Anonymous teacher reviews + Education Ministry ki final OK.
3. **Reuse policy** – Naye edition ka **≈70 %** purane book se, sirf 30 % naya.
4. **Outsourced editors** – Freelance editor fixed fee per book → cost-cutting.
5. **Author meetings** – Chapters divide, draft feedback, aur **political views reconcile** karna (liberal vs conservative).
6. Result: Authors ko kuch freedom hai, par **curriculum, budget, aur politics** unki boundaries set karte hain.

L34

Topic-151: CDA aur Media Studies ka Taluq

Seedhi baat:

CDA (Critical Discourse Analysis) formally 1980s–1990s mein popular hui, lekin media scholars us se pehle bhi media language aur power ka critical analysis kar rahe thay. Media studies mein CDA ka use political, cultural aur economic systems ke influence ko samajhne ke liye kiya jata hai.

🔑 Key Points:

- CDA aur media studies ka milaap mass communication ya communication studies ke zariye hota hai.
- Media ko samajhne ke liye humein **discursive aur structural** dono aspects ka analysis zaroori hai.
- Phelan ne 4 hison mein media aur CDA ke beech ka relation explain kiya:
 1. CDA ka ubhar
 2. CDA ka media research mein istemal
 3. Future research ke possibilities
 4. Media discourse ka ek empirical example (neoliberalism)

☐ Topic-152: CDA ka Media Studies mein Tareekh Safar

Seedhi baat:

CDA aur cultural studies dono critical approaches hain, lekin inka academic background alag hai. CDA zyada tar linguistics se aayi hai jabke cultural studies social theory se. Dono ke beech theoretical tension bhi raha hai.

🔑 Key Points:

- CDA linguistics departments se nikli, aur linguistics ke academic standards ko satisfy karti rahi.
- Cultural studies mein discourse already important concept tha, lekin CDA ko political economy scholars ko convince karna para.
- Fairclough ne **“cultural political economy”** jese terms use kiye taake Marxism aur poststructuralism dono ko joda ja sake.
- Richardson (2007) ne CDA ko political economy ke nazdeek laya by focusing on **material aspects of media discourse**.
- CDA ki popularity ka sabab: woh ek structured “toolkit” thi research methodology ke liye.

☐ Topic-153: Media Texts mein CDA ka Amal

Seedhi baat:

CDA media mein mukhtalif levels par use hoti hai: grammar aur semantics se le kar ideology, identity aur social belonging tak. Ismein textual aur contextual analysis dono shamil hote hain.

🔑 Key Points:

1. **Structural analysis** – headlines, grammar, media genres jaise editorials/reportage (Teo 2000).
2. **Representation analysis** – kis narrative ko normalize kiya jata hai, kisko voice multi hai aur kis discourse ko ignore kiya jata hai (Craig 2013).
3. **Sociological focus** – CDA se racism, neoliberalism, feminism, climate change jaise themes ko samjha jata hai (Mendes 2012).
4. **Multimodal analysis** – audio, visuals, branding, human/non-human actors ka role (Machin, Eriksson).
5. Internet media ne CDA ko broaden kiya, jahan **audience bhi content producer ban gaya**.
6. Critics: CDA sirf texts tak limited na ho; media text ka **material production** aur **circulation** bhi analyse kiya jaye.

☐ Topic-154: CDA aur Media Research ka Mustaqbil

Seedhi baat:

Media discourse studies ka future yeh hona chahiye ke woh sirf text analysis na kare balki **production, representation, distribution aur reception** — chaaro tiers ka critical analysis karein.

🔑 Key Points:

- Audience-based CDA zaroori hai: jahan text se zyada audience ke **reaction aur transformation** ko samjha jaye.
- Digital media ke zamane mein audience **producers, sharers aur consumers** sab kuch hai.
- CDA ko qualitative vs quantitative ki jung se nikal kar ek **hybrid aur flexible tool** banana hoga.
- Power aur ideology ke analysis ko **central focus** banaya jaye — sirf grammatical structures tak limited na rahe.
- “Critical” ko dobara define karna hoga: media ka natural bana kar dikhana asal mein ek ideologically loaded process hai.
- Researchers ko “ideology critique” dobara embrace karna hoga (Phelan 2016; van Dijk 2015).

L35

Topic-155: Media(ted) Discourse aur Society

Seedhi baat:

Media discourse aur journalism ka analysis kaafi develop hua hai, lekin kuch important aspects abhi bhi research mein kam hain—jaise waqt ka role (time plane), social actors ki strategies, aur media ke discourse ke extra-textual effects. Journalism sirf text ka issue nahi, balka woh social context ke saath mil kar kaam karta hai.

🔑 Key Points:

- **Teen areas** under-researched hain:
 1. Time plane – discourse kis tarah waqt ke saath badalta hai.
 2. Discursive strategies – social actors media mein kis tarah apna narrative banate hain.
 3. Extra/supra-textual effects – texts ka society aur institutions par long-term asar.
- CDA media discourse ko sirf content nahi samajhta, balke **social practice** ke tor par dekhta hai.
- CDA ka maqsad yeh samajhna hai ke media texts kis tarah **reality ko construct karte hain**.

□ Topic-156: Revisiting Critical Discourse Analysis

Seedhi baat:

CDA media discourse ke analysis ka sabse strong approach samjha jata hai. Ismein Fairclough, van Dijk aur Wodak jaise scholars ne contribute kiya hai. CDA language ko sirf grammar nahi, balke **power, ideology aur society** ke saath relate karta hai.

🔑 Key Points:

- CDA ke roots **Western Marxism** aur **Critical Social Theory** mein hain.
- **Discourse = Social Practice**, jo society ko banata bhi hai aur usse banaya bhi jata hai.
- Critics ne CDA par:
 - **Ideological bias** ka ilzam lagaya (Tyrwhitt-Drake).
 - **Interpretation vs analysis** ka issue uthaya (Widdowson).
- Fairclough kehte hain ke interpretation bhi **explanation** hoti hai, subjective nahi.
- Philo (2007) ne kaha ke CDA ko **production–circulation–reception** ke full cycle ko cover karna chahiye.

□ Topic-157: Time Plane in Journalistic Discourse

Seedhi baat:

Media texts waqt ke saath evolve karte hain, lekin zyada tar CDA studies time ke factor ko ignore karti hain. Time ka analysis karne se samajh aata hai ke kis tarah aik narrative develop hota hai.

🔑 Key Points:

- **Intertextuality** (Fairclough) kaafi useful hai, lekin yeh time ko poori tarah capture nahi karta.
- **Wodak ka Discourse-Historical Approach** time-based analysis karta hai.
- **Diachronic analysis**: text ka historical flow samajhna.
- **Synchronic analysis**: ek waqt mein mutaliq discourses ka comparison.
- Dono approaches important hain taake **issue ka evolution** samajh aae.

□ Topic-158: Discursive Strategies of Social Actors

Seedhi baat:

Media sirf khud se narratives nahi banata, balke woh **social actors** ke discourses par depend karta hai. Journalists un logon ke zariye reality construct karte hain jo information provide karte hain.

🔑 Key Points:

- Journalists zyada tar events ko **direct witness** nahi karte – woh doosre logon ki discourse se reality construct karte hain.
- Media discourse do levels par banta hai:
 1. **Social actors** ki discursive strategy.
 2. **Journalists** ki discursive intervention.
- War jaise situations mein dono sides ke discourses ko analyze karna zaroori hai.
- **Fairclough** aur **van Dijk** ne intertextuality aur journalist cognition ka zikar kiya, lekin **social actors ke pehle se maujood discourse** ka analysis missing hai.

□ Topic-159: Extra- and Supra-Textual Effects of Discourse

Seedhi baat:

Media discourse ke asraat sirf text tak mehdood nahi hote — woh **institutions, laws**, aur **societal norms** ko bhi badal dete hain. Yeh asraat kai dafa **text ke beyond** hote hain.

🔑 Key Points:

- **Discursive effects** (Carvalho, 2008): woh asraat jo text se linked hain, lekin text ke bahar hote hain.
- Teen major discursive effects:
 1. **Discourse Structuration** – ek discourse dominant ban jata hai (e.g. post-9/11 terrorism narrative).
 2. **Discourse Institutionalization** – discourse policies aur laws mein badal jata hai (e.g. US Patriot Act).
 3. **Closure** – jab controversy ya debate close ho jati hai (e.g. climate change denial ending).
- Media discourse **reality ko shape** karta hai in invisible aur visible forms.

L36

□ Topic-160: Media Discourse ke liye Analytical Framework Develop Karna

Seedhi baat:

Chouliaraki aur Fairclough kehte hain ke CDA kisi social problem se shuru hoti hai, jaise war ya GMO resistance. Sabse pehle relevant media texts ka **corpus** banana hota hai, phir unka open-ended analysis hota hai jismein critical thinking aur skepticism zaroori hoti hai. Important texts ko **sampling** process ke zariye choose kiya jata hai, phir unko analyze kiya jata hai, especially un **critical discourse moments** ko jo status quo ko challenge karte hain.

🔑 Key Points:

- **Problem identification** se CDA ka process shuru hota hai.

- Texts ko **open-ended reading** ke zariye study kiya jata hai — bina kisi pehle se tay hypotheses ke.
- Questions: kya cheezain kahi gayi hain? kya nahi kahi gayi? kis tone mein kaha gaya?
- **Multi-stage sampling** se texts select kiye jaate hain.
- Focus on **critical discourse moments** — jaise koi political ya scientific event jo dominant discourse ko change kare.
- **Textual + contextual** analysis dono levels par kaam hota hai.

□ Topic-161: Textual Analysis – I

Seedhi baat:

Textual analysis mein sabse pehle **layout**, **objects** aur **actors** ka analysis hota hai. Layout, headline, visuals aur article ka structure batata hai ke news outlet kisi issue ko kitni importance de raha hai. “Objects” woh topics hain jo media discourse construct karta hai. “Actors” woh log ya institutions hain jo quote hote hain ya jinke baare mein baat hoti hai.

🔑 Key Points:

- **Layout elements** jaise headline, lead, visuals audience perception ko influence karte hain.
- **Objects** = woh topics jo discourse create karta hai (e.g., climate change → agriculture).
- **Actors** = individuals/institutions jinhein text mein mention ya quote kiya gaya hota hai.
- Actors ke pass **framing power** hoti hai — woh media ke zariye apna view samne laate hain.
- Actor ko subject (doer) aur object (discussed) dono tor par dekha jata hai.

□ Topic-162: Textual Analysis – II

Seedhi baat:

Textual analysis ka agla hissa **language**, **grammar**, **rhetoric**, **discursive strategies**, aur **ideology** ka hota hai. Words ka istemal, tone, metaphors, aur framing ye sab text ke meaning ko shape karte hain. Journalists aur social actors dono ka discourse yahan analyze hota hai.

🔑 Key Points:

Language, Grammar, Rhetoric:

- Lexical choices (verbs, adjectives, adverbs) meaning ko shape karte hain.
- Sentence structure (e.g. passive vs active) ideology ko reflect karta hai.
- Metaphors aur emotional appeals rhetorical effects create karte hain.

Discursive Strategies:

1. **Framing** – kis angle se issue present kiya gaya.
2. **Positioning** – kisi actor ko kis role mein dikhaya gaya.
3. **Legitimation** – koi action ya power ko justify karna.
4. **Politicization** – kisi non-political issue ko political banana.

Ideological Standpoints:

- Ideology har text ke selection aur representation mein embedded hoti hai.
- Author ki ideology hamesha explicit nahi hoti — usay infer karna part hota hai.
- Ideology often **status quo ko support ya challenge** karti hai.

□ Topic-163: Contextual Analysis

Seedhi baat:

Text ke beyond analysis karna — yani wider social context ko samajhna — contextual analysis ka core hai. Yeh do angles se kiya jata hai: **comparative-synchronic** (same time par mukhtalif texts ka comparison) aur **historical-diachronic** (issue ke time-based evolution ka analysis).

🔑 Key Points:

1. Comparative-Synchronic Analysis:

- Ek issue par ek waqt mein likhe gaye texts ka comparison.
- Mukhtalif media outlets aur authors ke views ko compare karke **media bias aur framing** ko samjha jata hai.
- Cross-reference se more accurate image milti hai.

2. Historical-Diachronic Analysis:

- Issue ke **historical background** aur evolution ka study.
- Political science, sociology, psychology jaise disciplines ka input helpful hota hai (e.g., Islamophobia discourse).
- Media discourse ka **temporal shift** samajhna — kis tarah se narratives time ke sath badalte hain.
- "Discursive effects" identify karne mein help karta hai.

L37

□ Topic-164: Social Media as a Communicative Paradigm

Seedhi baat:

KhosraviNik ke mutabiq, Social Media ka discourse power dynamic **fluid aur constantly changing** hota hai. Yeh traditional media se mukhtalif hai, kyunki yahaan users sirf consumers nahi, balke **content ke co-producers** bhi hote hain. Social media ek aise communication model ko represent karta hai jahan log simultaneously **interpersonal aur mass communication** kar sakte hain.

🔑 Key Points:

- Social media = **participatory web**: user-generated aur interactive dialogue ka zariya.
- Users:
 - (a) mil kar content banate hain,
 - (b) mass + personal communication karte hain,
 - (c) institutional aur personal content access aur respond karte hain.
- **SNSs**: Facebook, Instagram, Twitter, WhatsApp, Telegram etc.
- Traditional mass media ka one-way flow ab **many-to-many dynamic** mein badal gaya hai.
- Youth ka political discourse mein dobara interest lena — social media power ka saboot hai.
- Is new paradigm ne **SM-CDS (Social Media Critical Discourse Studies)** ka field create kiya.

□ Topic-165: Social Media and Critique

Seedhi baat:

Web 2.0 ne Internet ko static pages se **dynamic user-generated content** ki taraf le gaya. Is mein ordinary users bhi active contributors ban gaye, lekin Marxist critique kehta hai ke yeh unpaid labour ka exploitation hai. Users content

produce karte hain, time spend karte hain, aur corporations us se profit kamaati hain — yeh sab capitalist model ka hissa hai.

🔑 Key Points:

- Web 2.0 = internet ka 2nd phase: dynamic content, user engagement, social media growth.
- **Critique:**
 - Users ka unpaid content = corporations ka **profit**.
 - **Prosumers:** producers + consumers — kaam karte hain bina paisay ke (called **playbour**).
- Advertisers ko target karne ke liye:
 - Users ki **personal info collect** ki jaati hai.
 - **Engagement** ko barhaya jaata hai (likes, shares, time spent).
- **Anti-capitalist aur non-profit movements** bhi social media par space banate hain.
- Lekin zyada tar platforms still **old corporate models** ko follow karte hain.
- Personalized advertising = targeted capitalism ka modern face.

☐ Topic-166: Social Media Critical Discourse Studies (SM-CDS)

Seedhi baat:

Pehle Computer Mediated Communication (CMC) jaise emails aur chats ko mass media research mein ignore kiya gaya, lekin linguists ne inko study karna start kiya. Ab ek naya trend hai jisme social media ke discourses ka **interactional aur societal context** ke hawale se analysis hota hai — jise hum kehte hain **SM-CDS**.

🔑 Key Points:

- CMC (emails, messaging) ka pehle zyada analysis nahi hota tha.
- **Linguistic methods** jaise Conversation Analysis use ki gayi CMC study ke liye.
- SM-CDS mein focus hota hai:
 - Discursive practices (kis tarah log texts aur tools se social roles adopt karte hain).
 - Social membership aur identity enactment.
- Barton & Lee: sirf texts nahi, **users ki beliefs aur practices** bhi observe karni chahiye.
- Emphasis on: **society over technology**.
- Affordances jaise online public spheres, digital communities — society ke structure ko reflect karte hain.

☐ Topic-167: SM-CDS Demarcations

Seedhi baat:

SM-CDS ka focus discourse par hota hai, **technology par nahi**. Yeh ek socially committed aur problem-oriented field hai. Yeh online aur offline discourses ke darmiyan interconnections ko samajhta hai. Discourse sirf ek media outlet tak limited nahi hota — woh **wider social context** mein stretch karta hai.

🔑 Key Points:

- SM-CDS = socially committed, **text-based critical analysis** of communication.
- **Online-offline boundaries** clear nahi hain — dono ke discourses ek dosray se juday hote hain.
- Audience studies (focus groups, interviews) ka use kiya ja sakta hai, lekin sirf jab zarurat ho.
- **Multimodal analysis** bhi important hai:
 - Likes, shares, hashtags, tagging, etc.
 - Yeh sab non-verbal communication ka hissa hain.
- Bottom-up language: kis tarah discourse se logon ko influence kiya jata hai.
- One-way mass media flow vs **participatory model** — is contrast ka analysis bhi SM-CDS ka part hai.
- Topics: nationalism, identity, racism, right-wing populism — ab bhi relevant hain.

□ Topic-168: Introduction to Reality Television

Seedhi baat:

Reality TV sabse zyada "noticed" TV programming hai (Turner, 2010). Isko media critics ne kaafi criticize kiya hai — keh kar ke yeh **low culture**, cheap entertainment, aur logon ki **privacy expose** karta hai. Magar phir bhi, yeh bohot zyada **popular** hai aur log ise enjoy karte hain. Iska sabse khas feature yeh hai ke yeh **ordinary logon** ko dikhata hai bina script ke, unki real life aur emotions ko expose karta hai. Yeh emotions insani identity aur doosron ke sath comparison ke process ka hissa hote hain. Reality TV insani behaviour, values aur social practices ko legitimize ya delegitimize karke **ideological work** karta hai. Lischinsky ke MCDA method se analyze kiya ja sakta hai ke kis tarah music, editing, camera angles, etc. ideology ko create karte hain.

🔑 Key Points:

- Reality TV ko “morally degrading” aur humiliating kaha gaya hai.
- Yeh mostly **ordinary logon** ko bina scripted role ke dikhata hai.
- Emotions important hain — logon ko unki identity ka ehsaas dilate hain.
- Social practices ko **legitimize ya delegitimize** karna = ideological effect.
- MCDA (Multimodal CDA) use hota hai: talk, audio, graphics, editing sab analyze hotay hain.

□ Topic-169: The Approaches to Reality Television

Seedhi baat:

Reality TV par bohot si directions mein research hui hai: business model, audience perception, surveillance, race, gender etc. Do critical perspectives bohot important hain. Pehla Foucault ka "governmentality" jisme reality TV ko ek aise cultural tool ke tor par dekha jata hai jo logon ko "accha citizen" banane ki training deta hai — yani self-improvement, cooperation, discipline. Doosra post-Marxist view hai jo kehta hai reality TV logon ke darmiyan **class differences ko justify** karta hai — yani elite class ko superior dikhakar middle ya lower class ko exclude karta hai.

🔑 Key Points:

- Commercial aur business aspect: new strategies aur profits (Raphael, Magder).
- **Audience truth perception:** kya sach hai aur kya acting?
- **Surveillance critique:** Reality TV = exploitative (Andrejevic).
- **Foucault-based approach:** Citizens ko train karta hai neoliberal norms mein.
- **Post-Marxist approach:** Class differences ko justify karta hai.

□ Topic-170: CDA of Reality TV

Seedhi baat:

Lischinsky ne MCDA ko use karte hue Reality TV ko analyze karne ka tareeqa bataya. Ye **social actor analysis** hoti hai jisme dekha jata hai ke logon aur unke actions ko kis tarah dikhaya gaya. Van Leeuwen (2008) ke mutabiq, jab kisi practice ko TV par dikhaya jata hai to usme **kayi transformations** hoti hain — kuch cheezein add hoti hain, kuch delete, kuch ka order change hota hai. Isse ek naya “script” banta hai jo bataata hai ke society mein kaunse acts acceptable hain. Is analysis mein multimodal elements jaise music, voice-over, camera movement, editing — sab include hote hain.

🔑 Key Points:

- MCDA = social actor analysis: kis tarah logon ko represent kiya gaya.
- Recontextualization:

- **Substitution:** kuch cheezein replace hoti hain.
- **Deletion:** kuch cheezein hatai jati hain.
- **Addition:** naye elements add kiye jaate hain.
- **Rearrangement:** order badla jata hai.
- **Reactions/Purposes:** logon ke reactions aur intentions ko highlight kiya jata hai.
- Multimodal elements: Audio, visual, editing, graphics etc.

□ Topic-171: CDA of Films

Seedhi baat:

Wodak aur Meyer kehte hain ke CDA sirf verbal text tak limited nahi — **films, gestures, images** bhi analyze kiye ja sakte hain. Films mein language ke alawa visuals, audio, acting sab kuch ek **ideological message** de sakta hai. Films mein code-switching, ethnicity, class, aur gender representation ko critically study kiya jata hai. Documentaries particularly interesting hain kyunki wo truth-claims karti hain — lekin editing aur visuals ke through wo reality ko twist kar sakti hain. Film CDA mein qualitative aur quantitative methods dono apply kiye jaate hain, aur yeh traditional CDA ke sath visual analysis ko merge karta hai.

🔑 Key Points:

- CDA ab **non-verbal communication** ko bhi analyze karta hai (images, visuals, film).
- Film mein spoken + written language bhi ideology ka part hoti hai.
- Code-switching, cultural diversity, race/gender/class — sab analyze kiye jaate hain.
- **Documentaries:** truth claim karti hain, lekin visuals se manipulate bhi kar sakti hain.
- Visual CDA = power, ideology aur representation ko samajhne ka tareeqa.
- CDA + Film Studies = powerful tool for ideological analysis.

L39

□ Topic-172: Power and Media — CDA of Pro-Government vs. Independent Press in Pakistan

Yeh study explore karti hai ke kis tarah powerful log aur institutions media discourse ko control karte hain. Research ne **March 2009 mein Chief Justice ki bahali** ke news event ko do akhbaron — **Daily Times (pro-government)** aur **The News (independent)** — ke content ke zariye analyze kiya. Tools jaise framing, transitivity, referential strategies ka use hua. Natija yeh mila ke **Daily Times ne biased reporting** ki — government ke favor mein framing ki, aur important opposition groups jaise lawyers aur awaam ka role kam dikhaya. Jabke The News ne comparatively balanced coverage di. International newspapers (The Guardian, NY Times) ne bhi The News ki representation ko support kiya. Yeh study media aur politics ke darmiyan nexus ko highlight karti hai, aur yeh batati hai ke biased media reporting logon ke jazbaat aur perception ko manipulate kar sakti hai — especially developing countries mein.

🔑 Bullet Points:

- **Daily Times** ne pro-government biased reporting ki.
- **The News** ne balanced aur factual coverage di.
- Tools used: framing, transitivity, referential strategy.
- Politics aur media discourse ka nexus expose hua.
- Critical media literacy developing countries mein zaroori hai.

□ Topic-173: Persuasion & Political Discourse — CDA of Imran Khan's 2013 Speech

Is research mein **Imran Khan ki 2013 election speech** ko analyze kiya gaya jo unhon ne **hospital bed se deliver** ki thi. Purpose yeh tha dekhna ke kis tarah ek political leader **language ke zariye apni ideology promote** karta hai.

Fairclough ka CDA model use kiya gaya — tools jaise **referential strategy, repetition, word choice**, aur **positive self / negative other representation** analyze kiye gaye. Findings yeh batati hain ke political discourse deliberately design kiya jata hai taake public opinion ko change kiya ja sake. Khan ne “**change**” aur “**naya Pakistan**” jaise emotionally loaded terms use kiye taake logon ko inspire kar sakein aur apne political narrative mein shaamil kar sakein.

🔑 Bullet Points:

- Speech delivered from **hospital** pre-election.
- Focus on “**change**” and **positive self-presentation**.
- Tools used: repetition, word choice, binary representation.
- CDA reveals hidden ideology behind political discourse.
- Language se public perception aur political direction influence hoti hai.

☐ Topic-174: Screen Image of Muslim Women in Post-9/11 War on Terror Films

Yeh study 4 American films ka **CDA aur deconstruction** karti hai jisme post-9/11 Muslim societies dikhayi gayi hain — **American Sniper, Jarhead 2, Zero Dark Thirty, Body of Lies**. Muslim aurat ko zyada tar **victim, helpless, ignorant** tarike se represent kiya gaya hai. Jabke Western white women ko empowered aur independent dikhaya gaya hai. Lekin kuch films mein educated, professional Muslim women bhi dikhayi gayi hain jo misogynist systems ke khilaf resist karti hain. Study ka maksad yeh hai ke dekha jaaye ke kis tarah **visual aur audio discursive tools** se ek stereotypical image create hoti hai jo public ke perception ko influence karti hai.

🔑 Bullet Points:

- Post-9/11 films mein Muslim women mostly **helpless victim** dikhayi gayi hain.
- Western women = **empowered**, Muslim women = **marginalized**.
- Focus on **discursive construction** using visuals, sound, graphics, etc.
- Films recycle same stereotypes = perception formation ka powerful tool.
- Study reveals hidden **professional resistance** of some Muslim women.

☐ Topic-175: CDA of Quaid-e-Azam's 11 August 1947 Speech

Is study ne **Quaid-e-Azam Muhammad Ali Jinnah** ki pehli Constituent Assembly wali speech ko analyze kiya using **Fairclough's model + content analysis**. Speech mein Jinnah ne Pakistan ko **liberal, just, aur democratic** riyasat banane ka vision diya. Unhon ne corruption, nepotism, black marketing jaise issues ko strongly criticize kiya. Grammatical aur lexical analysis se pata chalta hai ke Jinnah ki language clear, purposeful aur direct thi. Yeh speech unki ideological stance ko reflect karti hai — justice, equality, aur secular governance. Unka tone ambiguous nahi tha, balke unki language se leadership aur honesty ka ehsaas hota hai.

🔑 Bullet Points:

- Speech analysis: justice, equality, secularism.
- Jinnah ne corruption, jobbery ko strongly condemn kiya.
- Lexical tools: rewording, hyponymy, direct agency.
- Speech coherent and contextually structured.
- Highlights **Quaid's vision** for inclusive, fair Pakistan.

☐ Topic-176: CDA of Dawn & NYT Editorials on APS Attack — “Us vs Them” Ideology

Yeh study **Army Public School Peshawar attack** ke agle din ke editorials ka CDA karti hai — **Dawn (Pakistan)** aur **New York Times (USA)**. Study ne lexical aur syntactic features analyze kiye to dekha ke kaise dono

newspapers ne attackers aur victims ko represent kiya. Van Dijk ka “**Us vs. Them**” model use hua. Findings ke mutabiq, NYT ne Taliban ko openly mention kiya aur clear ideological divide dikhaya. Jabke **Dawn ne “militants” ka lafz** use karke attackers ka naam avoid kiya. Dawn mein “us” yani Pakistani victims ki sympathy zyada clear thi, lekin “them” ko kam explicit banaya gaya.

🔑 Bullet Points:

- CDA of APS attack editorials (Dawn vs NYT).
- Van Dijk’s **Us vs Them** model applied.
- NYT: Taliban mentioned directly, balanced view.
- Dawn: attackers termed as “militants”, indirect blame.
- Language impacts perception of violence and accountability.

L40

□ Topic-177: Textual & Rhetorical Analysis of Urdu vs English Newspaper Headlines (2016)

Seedhi baat:

Study ne 2016 ke Urdu aur English akhbaron ke headlines compare kiye. Fairclough-Wodak (1997) aur van Dijk (1995) models use karke dekhha gaya ke ek hi event ko alag headlines kis tarah **ideology, power, aur entertainment value** ke liye twist karte hain. Result: linguistic & discursive markers mein kaafi farq tha; headlines readers ko sympathy, embarrassment, ya amusement feel karwane ke liye design hoti hain.

🔑 Bullet Points:

- **Exploratory design:** Jan–Aug 2016 headlines sample.
- Significant **linguistic differences** Urdu vs English papers.
- Headlines event ki **news-worthiness** ko badha / kam karte hain.
- Power, hegemony, ideology ke markers vary karte hain.
- Goal: reader emotions trigger karna (sympathy, humor, shock).

□ Topic-178: CDA of Pakistani vs Indian Budget Speeches (2009-2013)

Seedhi baat:

Corpus-driven CDA ki gayi: Pakistani Budget Speeches (PBS) vs Indian Budget Speeches (IBS). POS tagging (nouns, verbs, adjectives, pronouns) se frequency patterns nikale gaye. Findings ne dikhaya ke **budget discourse** mein shared themes hain lekin hidden political meanings bhi hote hain: self-praise, promises, blame shifting. Budget ko “multiple meanings” ka tool banaya jata hai— har mulk apni socio-economic narrative push karta hai.

🔑 Bullet Points:

- **Corpora size:** PBS ≈30 k tokens, IBS ≈46 k tokens.
- Tools: CLAWS tagger, AntConc concordance.
- Frequent use: **modal verbs** (promises), **collective pronouns** (“we”, “our”).
- Similarities: growth, welfare, subsidy keywords.
- Differences: India zyada “inclusive”, Pakistan zyada “austerity” talk.
- Hidden agenda: persuasion & political legitimacy.

□ Topic-179: Ideology in Pakistani TV News Headlines & Viewer Impact

Seedhi baat:

Three prime Pakistani news channels ke bulletin headlines CDA (Fairclough) se analyze kiye. Intertextual + sociocultural study ke saath audience survey bhi hua. Headlines entertainment-oriented aur exaggerated nikli; viewers ne inhe unfair aur “dramay-baaz” kaha. Ideological construction powerful hai — channel-wise political bias clear tha.

🔑 Bullet Points:

- TV = **false consciousness** create kar sakta hai.
- Headlines filled with varying **power relations & ideology**.
- Viewer survey: dislike towards hype & sensationalism.
- Fairclough 3-D model applied (text–discursive–societal).
- Conclusion: critical media literacy ki zaroorat.

☐ **Topic-180: Language & Power Nexus — PM Yousuf Raza Gillani’s 2011 Speech**

Seedhi baat:

Gillani ki 9 May 2011 parliament speech ko Fairclough 3-D model se analyze kiya. Pronouns “we/our” se collective responsibility shift ki, “I” se authority project ki. In-group vs out-group categories banayi gayi; blame external factors par, solidarity masses ke sath. Speech ne mystification use ki — uncomfortable facts ko cover ya divert kiya.

🔑 Bullet Points:

- Qualitative CDA; focus on **pronoun strategy**.
- “We/our” = blame externalize; “I” = assert power.
- In-group (masses) vs out-group (critics/allies) framing.
- Mystification = truth ko blur karna.
- Speech aimed at **confidence-building & image repair**.

☐ **Topic-181: Rhetorical Devices in Pakistani Beauty Ads (Print Media)**

Seedhi baat:

April–June 2018 ke Dawn & Mag magazines se beauty product ads collect ki. Rhetorical Structure Theory (Mann & Thompson) + CDA apply ki. **Hyperbole** sabse zyada use hua (“24 ghante mein gora pan!”). Alliteration & analogy bhi common. Gender representation — celebrities (mostly women) product ko trustworthy banate hain. Persuasion mein **Elaboration/Explanation** (subject matter) aur **Motivation/Evidence** (presentational) relations dominate.

🔑 Bullet Points:

- Data: 3 × Dawn Mag + 3 × Mag (3 mo).
- Devices freq: **Hyperbole > Alliteration > Analogy**.
- Gendered visuals = tactical persuasion.
- Celebrity endorsement = credibility & desire.
- RST relations: Elaboration, Explanation, Motivation, Evidence.
