

Topic: 133:

Bilingualism, Code Mixing and Code Switching.

Code Switching:-

Code switching is a well-recognized phenomenon in the speech of bilingual or multilingual people.

Multilingualism:-

The use of 2 or more languages by a single individual or a community of speakers.

- Engage in Code Switching.
- More than half of world's population is multilingual.
- • The alternation b/w language or varieties in the utterances of individuals.
- The practice of moving back and forth b/w two languages or b/w two dialects.

Code Switching

• Alternation b/w varieties or codes, across sentences or clause boundaries.

Examples

Code mixing

• Alternations b/w languages or varieties within a clause or phrase.

Examples

Why don't we all
go together to New Delhi?
M1 ki shadi ki shopping
bhi ho jaye. ^{clause 2}

language changes after the
clause.

Very soon, I will be a
big star in Bollywood;
main naumeed nehin
hongi.

Kio ke six seven
hours te school

de vich spend karde
ne, they are speakin
English all the time.
(Punjabi/English)

Have agua please
(Have water please)
(Spanish/English)

Topic: 134: Phenomenon of Code Mixing.

What causes Code Mixing?

Code Mixing: It can be intentional or unintentional.

What prompts Code Switching

1. Speakers may engage in codemixing as a neutral and unconscious language act. No apparent reason.

Example:

They are planning to go to Harvard on Monday. I will tell you pucca (hindi/urdu) tomorrow.

2. Representation of cultural elements of a situation.

Example:

She was absolutely free of any obligation from anyone - no one had the time to do sewa for her.

3. Participant relationship:

Example: Who you are talking to.

4. Situational factors:

e.g. If you are in a situation and you have to replace the words which people are not familiar with you use code mixing.

5. Language Attitude,

e.g. ^{May b} A language is looked more favourably in the region where you are. In Pakistan, Urdu has sprinkling of English. ^{milk shake}

6. Message Intrinsic Factors:

• Interjections

• Quotations

^{Qasbi} in Pakistan.

Code Switching and Borrowing

Borrowing functions to provide necessary elements that do not exist in the primary language being used. A bilingual speaker lacks the exact words for the concept he or she wants express.

Phonological and Morphological assimilation of borrowed items.

Examples:

Frappé = frapp

Time = tam

Borrowing: Examples:

- Mery pas time nahin hai ^{waqt}
- Can I have some chutney please? ^{snore}
- I ate a samosa with tea. ^{triangular pastery}

Topic: 135: Pragmatics of Code

Switching I ^{زیر}

Constraints on Code Switching

Free morpheme ^{→ smallest unit of a words} constraint.

Equivalence constraint.

Free morphemes: A morpheme (or word element) that can stand alone as a word. Also called an unbound morpheme or a free-standing morpheme.

Examples: I need to go now.

• Are • Eat • This • Let • Want

Bound Morpheme: A word element that cannot stand alone as a word; including both prefixes and suffixes.

Attaching a bound morpheme to a free morpheme creates a new word or new form a word.

1 Example: re + start = restart

2 Example: re + join = rejoin.

Free Morpheme Constraint:-

An intrasentential switch may be made by any bilingual speaker only if a constituent is not a bound morpheme.

Example:-

1. Idher hm shop main jatay hain to
2. Dilo-Dimagh nature ki khamosh dil awezyon say halkay halky lut-f andoz hon gey.

Counter Example:-

1. Hamaray ball-roomoon aur clubon na ka kya ho ga?
2. Boxon ki ziyadti bta rahe thi keh safr-ki aadat nahin.
3. Singaporean kunning. (Sleeping).
Hokkein: ^{Dialect} kun+ing ^{bound morpheme}
^{free morpheme}

Topic: 136: Pragmatics of Code Switching II

Equivalence Constraint:-

Code switching occurs at a point where the surface structures or grammars of two languages coincide because they have the same word order or constituents. Code switches

are allowed within constituents as long as the word order requirements of both languages are met in the sentence structure.

Switches occur only

At points where the surface structures of the languages coincide, or between sentence elements that are normally ordered in the same way by each individual grammar.

Example: 1 Casa blanca - Spanish

N

A

white house (phrase)

nouns precede adjectives

2 White house - English

A

N

3 Blanca house not possible in E.

Casa white not possible in S

4 I like you porque eres simpático

I like you because you are nice.

Counter Example: (Constraints on Code Switching)

Jamil gave a pen ek Parakii ko

Jamil gave a pen to a girl.

Topic: 137: Code Switching as a Communicative Strategy I

Communicative functions:

Quotations tend to occur in the

Language that the original speaker used.

Addressee specification directs the message to one of several possible addressees.

Interjections the numerous and frequently used particles which occur no matter which lang. is dominant.

Reiteration clarifies amplifies or emphasizes of part of a message.

Personalization versus objectivization indicates the degree of speaker involvement or distance from a message.

Textualization cue gives hints to the listeners about the interpretation of the upcoming discourse.

move
formality
+ take
people
- serious

Topic: 138: Code Switching as a Communicative Strategy II

Pragmatic functions: (obj + short)

Speakers make choices from different codes that will serve the following need:

- Politeness
- Face-saving
- Increasing or decreasing distance from interlocutors.

Consideration in Code Selection (Short)

- Colourfulness
- Expressiveness
- Economy

Expressiveness:-

Two languages exploited in popular media such as newspaper, songs and films.

Example: 😊 ♥

• Pepsi: "Yeh dil mange more."

• Doctors ki number one choice → Colgate

• Shampoo: Three months mein long, no waiting Saab a Saal.

Colourfulness:- (Songs) + music + attraction.

• What is mobile number, kerunkya dial number.

• Lovely ho gaiyan naam tera

• Pretty woman dekho dekho na pretty woman.

Economy:- (Save time + educational context)

Replacing a longer English phrase with its equivalent in the local language.

(Dictionary + simultaneous manipulation)

Topic: 139: Language Planning and Policy and Spread of English:

Language Planning: (obj)

"Deliberate efforts to influence the behaviour of others with respect to the acquisition, structure, or functional allocation of their lang. codes." Cooper cited in Brutt-Griffler, 2002.

Top Down language Policy: (political + inform in authority) (sh)

Formulated by authorities (govt. commissions etc.) and imposed on speech communities. Language policy is conceived as a unidirectional process. Instruments of social control. Tools for the achievements of ideological objectives.

Theory of Linguistic imperialism

Takes for granted that the colonizing nation possesses the power to impose its will on the subjugated population (the importance that can be allocated to the lang. of the region). (will subjugate)

Bottom up language policy:

Speech communities as active contributors

to the shaping of the language policy. Codetermine the context. Seize the initiative from the institutional planners. Not a unilateral process. Policy is an outcome of interplay b/w conflicting aims.

Global Spread of English and Lang. policy:--

Conventional notions of language policy and planning lack any critical perspective. Global spread of English is attributed to the West and its imperialistic policies.

Topic: 140: Colonial language Policy I

Lasting effects of Colonization:

Subjugation of the colonized people to the ideological control of the colonizers even after freedom. Power rests with those exercising imperial power.

Colonial Language policy:

Role of speech communities in language planning during the height of modern colonialism. Exclusion of the aspect of indigenous self determination by

top down models of language policy Role of the indigenous population in the development of world Englishes.

English and Anti-colonialism:

Imperial language policy was not unidirectional. Was a response to the actions of the local populations who made demands on the colonial administration. English as part of the anticolonial struggle. Spread of English as a result of struggle against imperialism. Containment policy—a response to the inclusion of English to the anticolonial struggle.

Topic: 141: Colonial language Policy II

Obj+Sh) Aim of Colonial language Policy:--

- To maintain British rule
- Fulfill the economic purpose of the colonies.
- Avoidance of disruption to the empire.

Anticolonial Movements:--

Emergence of large-scale anticolonial

movements. Well organized, popular and aggressive. Educational Language policy as a means of stopping the anticolonial movement. Language policy and the maintenance of empire became linked.

English: a language of anticolonial movements.

English from a means of indigenous populations by learning English to oppose the empire. English as an instrument of liberation. Social acquisition of English.

Imperial language policy:-

A language policy to safeguard the British political and economic agenda. A safety measure to prevent liberation movements from using the lang. as a weapon in the anticolonial struggle. No initiative but reactive. Result of the appropriation of English by the indigenous populations.

Topic: 142: Colonial Language Policy in Africa.

Language Policy and Economic Structure:

The history of British colonization in Africa and Asian colonies demonstrates how language policy served the economic ends of empire.

The connection b/w lang. policy & economic and class structure of the British empire. Promotion of the socioeconomic stratification of the population.

Lang. Policy and Economic Concerns:

South African mines provided the economic mainstay of British Southern Africa. It determined colonial policy throughout Africa. Economic concerns controlled the educational philosophy of the colonial administrators of Southern Africa. The goal of the imperial functionaries was to ensure secure labor for the mines. Education was kept highly restricted.

Aim of Colonial Language Policy:-

Aim of the education policy was to confine the subjects to their current environments, keeping the rural

population on the land in Asian colonies and in 'local reserves' in Africa.

Colonial administrators have been quoted as saying:

- "book learning... lowered [Africans] usefulness for work," and made them "uppish" and "conceited".
- The education of all Africans in South Africa "would mean ruin to South Africa."

Two fold purposes of education

- 1- To make them more useful to their white masters.
- 2- To limit their chances of leaving their environment.

Elementary Industrial Education restrict their chances of moving
Served the Purpose: to limit their chances of leaving their environment.

Topic: 143: Colonial language Policy in Asia

Imperial language Policy:

Agriculture constituted the dominant factor in the economy in Asian colonies. The principal Goal of the education policy of the British Asia was

~~the maintenance of the~~
agricultural basis of production.

Imperial language Policy in Asia:

Primary education included the instruction of the masses through the vernacular. Instruction not to include any opportunities of leading up to the university level. (Restricted to the land where they work as labourers).

"Nothing is taught which will tend to drive Malays from their agricultural pursuits." ^{basic education only}
^(about Malaya)

Co., Brunei cited in Brutt-Griffioen

In India; Sanskrit, Persian and Arabic were taught to Indians as well as the British Civil Servants who were supposed to rule them.

^{India}
In 1835, English was given the status of the language of higher administration, judiciary and education. English, being a vehicle of Western ideas, would Anglicise the Indian elite which would be loyal to the British. ~~this~~

The socioeconomic purposes assigned to education dedicated educational

Motto:-

Language policy: To prepare a class who will serve the British Empire

The colonial service and commercial enterprise required officials and clerks well-versed in English. The plantation in British Asia had no need for English-speaking workers. English education served as a means to better-paying govt. employment; therefore, a strong demand for English emerged among the speakers.

Asians and Africans knew the economic value of learning the language. Made efforts to learn it despite the restrictions.

Topic: 144: Learning of English and Anti Colonial Struggle.

Role of Language policy in the creation of exploitative socioeconomic structure. Attempt to resist colonial rule through obtaining access to education and language of the colonizers.

Language Policy and resistance to Colonial Power

Learning English as a conscious strategy

to resist colonial rule rather than Western ideological hegemony. Resistance to the colonial rule shaping the lang. policy environment.

Emergence of English as the lang. of the anticolonial struggle. English education resulted in African and Asian's refusal to manual labour serving purely imperial economic interests.

Resistance to prescribed socioeconomic roles threatened the foundations of colonial rule. Connection b/w the demand for ~~labour~~ and spread of English and the emergent liberation movements in Africa and Asia.

Active role played by the English educated segment of the population in the anticolonial movement.

Availability of English education considered a big threat to colonial powers. The English educated, unemployed natives became discontented and turned to opposition movements.

Topic: 145 :-

English in Lang. Policy Discourse

Language Policy :-

The place of a lang. in lang. policy is determined by:

- Population • Prestige • Status national / official / second
- Functionality • Nationalism

Lang. Policy in Inner Circle Countries :-

We see all these factors in action

- English is the lang. of majority.
- The issues is the role to be given to minority languages.
- Status Planning involves different dialects of English.

Lang. Policy in Outer Circle Countries :-

only through education

Only a minority of population is proficient in English. Despite being a minority language, English is powerful. It is used by the elite.

Lang. policy revolves around the role of English. The functionality of English is recognized and accepted.

Language Policy in Expanding-Circle Countries :-

English lacks a strong population

base. No official status. Enjoys a great deal of prestige. It has instrumental value. It is used and learned as a foreign language. Acceleration in use due to globalization. Features prominently in lang. policy discourse.

Topic: 146: Choice & Hegemony of English

medium among people who have different lang.
Dominance of English in Lang. Policy

Reasons for the dominance of English in the lang. policy:

- Useful and functional
- Access to knowledge and technological advancement.
- The lang. of globalization.

Question of Choice of English.

Factors that make English inevitable

- A long history of contact with English.
- Being the only link lang. in a multilingual country.
- Being the lang. of trade, industry, and higher education.

Individual's choice of English

A want or a need?

For several jobs English is a requirement not an advantage. Better job prospects. It is ^{upward} social mobility.

Constraints on choice of English

Struggle b/w change & continuity

Several post-colonial countries perpetuate the colonial lang. policy. In many countries colonized by Britain, English remains an official or co-official lang. Attempts to promote other lang. have ended in failure.

Economic Power of Language

Prospect of a good job or social advancement. Usefulness of for international business relations and communication. The hope of expected economic prospects and rewards. Policy decisions are taken by government bodies. Implementation regulations are framed by bureaucrats. Decision-makers ~~can~~ are from the

elite with vested interest in maintaining the role and status of English.

Role of bureaucracy in Lang. Policy Common people, little knowledge of English were left with no choice at all.

The elite make policies oriented toward English. These policies further the hegemony of English.

Topic: 14.7: Effects of Hegemony of English.

Beneficial :-

Communicative and instrumental functions. English function as Lingua franca a common lang. among people who don't share a lang. and facilitates communication among them. Similarly, English also facilitate Global research.

Detrimental :-

Social stratification, Exclusion, Problems associated with education and literacy and status of lang other than English.

English causing exclusion

Inability to use the official lang., lack of proficiency in English; Effect on the viability and stability of other languages. lack of opportunity for formal education lack of opportunity for attending an English medium school. In multilingual contexts, students lagging behind due to English as medium of instruction.

Topic: 148: Hegemony of English. Implications for lang. Policy and Planning.

Extending the Scope of English:-

Need for a policy to make English:

- Inclusive
- Equitable
- Vehicle for the promotion of cultural and economic development of a country.

A policy without English's negative effects:-

Following measures can eliminate the negative effects of language policy:-

1. Take into consideration social, economic and political factors while designing the policy.
2. Cater to the whole population and not just the elite by designing a multilingual policy.
3. Minimize exclusion.
4. Ensure that it contributes to the overall cultural, human, and socio-economic development of a country.

Topic: 149: Language Policy and Planning in Pakistan I

Pre-Partition language policies:

Colonial lang policies were imperialistic. They were dominant, they imposed their lang. on the native people. Colonists imposed their lang. on the nations they ruled. This created a native elite to serve their needs for low level functionaries. The British displayed some tolerance to the indigenous languages.

The tolerance was a part of political policies.

Appeasement Policy:--

Warren Hastings, Governor of India from 1774 to 1785, used indigenization as a means of governance. Supported the cultivation of Indian classical languages as a strategy to appease the established indigenous elites.

Political Motives:--

Encouraged the learning of Indian vernaculars by the British to control the ~~British~~ 'natives' more efficiently. Madrassas and colleges were established all over India.

Introduction of English:--

The suggestion to teach English was made in 1792 by one of the directors of the East India Company.

Reservations about English:--

Fear that India's learning English will lead to the learning of British political values. Desire

for "English liberty and the English form of government."

- Hope to make them anglicized as English literature undetermened their beliefs. However Demand for instilling "the ideas and feelings of civilized Europe" increased.

Learning of English by Indians:-

Realization among Indians that traditional ways of exercising power and obtaining wealth would change. (Power could be obtained by becoming junior partners of the British and for this English was a great advantage.)

(Rahman, 1993)

In 1832, recommendations were made about employing Indians in the civil service and teaching them English. Initially confirmed only to the Bengali Hindus. Introducing of modernity and the new forms of power distribution.

The Indian middle class considered English to be directly related to social and economic prestige. They demanded an English lang. education. English became the lang. of the elite, press, and administration.

Common people recieved education in their own language. The elite preferred an English education.

Topic: 150:

Language Policy and Planning in Pakistan.

Post-Partition lang. Policy:-

The 1973 constitution includes the following two clauses:

1. The English lang. may be used for official purposes until arrangements are made for its replacement by Urdu.

2. (A provincial assembly may by law prescribe measures for the teaching, promotion and use of a provincial lang. in addition to the national lang.) (Rahman, 2003)

Language Policy for Urdu:-

Urdu, the national lang. is the mother tongue of only 7.57 per cent of the population. English is Pakistan's official language. Urdu was made the lang. of instruction for the primary level.

Rationale for privileging of Urdu:-

Widely spread and is almost like the first lang. of all Pakistanis. Most jobs available through Urdu. A symbol of unity. Serves the political purpose of resisting ethnicity.

The Policy for English

Civil Service of Pakistan (CSP) and Army were two Anglicized bodies. Continuation of English favoured this elite. English medium of instruction was also maintained in elite and cadet schools and College.

Privileging of the Elite:-

The armed forces created cadet colleges on the lines of

British elitist schools. The schools were subsidized by the state. These schools were believed to produce suitable candidates for filling elitist positions in the military and civil services.

Consequences of the privileging Policy:-

~~Promp~~ Promotes the hegemony of English as it:

Weakness the local languages and lowers their status; eliminates linguistic and cultural diversity.

Increase poverty by favouring English-using elite.

Continuation of two parallel systems in education was a reflection of the British policies before partition. Created two media of instruction resulting in two classes: common and the elite. Discrimination in job opportunities.

General Zia's Urduization Policy:-

Implementation of Urdu as the medium of instruction in all govt.

Schools from class one Political influence led to the continuation of the elite English medium schools.

General Musharraf's Policy:

English language was made compulsory from class one onwards. Introduction of English as medium of instruction for science, Mathematics, Computer Sciences and other selected subjects.

The policy faced a deadlock due to the unavailability of English teachers.

Dichotomies:-

- The choice of lang. in education in our country is a result of political expediency rather than of educational effectiveness.
- Ambivalence towards English.

Topic 151: American English

American English and World Englishes:

- Inner circle English
- A reference accent
- First colonial variety of British English.

Stable and influential because of longer association with sociopolitical developments. A history of immigration shows effects of language contact.

Topic: 152:- American English:

Settlement History

Settlement History:- (obj + Sh + long)

★ Unique mixtures of settlers

★ First English-speaking permanent settlers came from the South of England. It maintained strong ties with their mother country. The accents of New England and the South share prominent linguistic features with Southern British English.

Examples:

1. Dropping of a post vocalic /r/, which is not pronounced in words like car, card, four, and fourth.

2. The retention of /j/ in tune or new.

★ Aristocratic plantation culture in the coastal South and Georgia.

★ Immigrants in the 17th century from the northern and western

England, Scotland and Ireland.

- ★ Less affluent origins.

- ★ A mixture of the working-class speech constituted a type of American English.

- ★ 18th century immigrants selected Appalachian mountains.

- ★ Rooted their culture and linguistic features.

- ★ In the 19th century immigrants from Europe and Britain spread to the west.

- ★ Transcontinental movement advanced by the building of transcontinental railway. The immigration and movement led to a process of mixing and blending of accents people.

Koineization:-

Dialect contact resulted in koineization.

Koineization:-

The emergence of a new variety or dialect of a language from the mixing, leveling, and simplifying of different dialects of mutually

intelligible languages.

American English perceived to be fairly homogeneous. It involves continuity. Speakers do not need to abandon their own linguistic varieties. American English perceived to be fairly homogeneous.

Topic: 153:-- Varieties of American English I

Regional Dialects:--

Regional dialect differences are based on different pronunciation patterns and lexical choices.

The inland northern region comes closest to an "unmarked" accent globally perceived as "typically American".

The midlands are a transition region. A small number of features of their own and an increasing number of northern or southern features. ~~A small number~~ Regional differences in pronunciation and lexis.

Examples:

1. Some dialects are characterized by the lack of a postvocalic /r/
2. Lengthening & Breaking of vowels:
[iə] in bit.

Lexis:

- i. mosquito hawk = dragonfly
- ii. granny woman = midwife
- iii. Jack leg = ~~un~~ unprofessional,
Dishonest.

Topic: 154: Varieties of American English II

Social Dialect:

Variations based on location,
variations based on social status,
Acceptability of the use of regional words and regional accents.

Unacceptability of non-standard grammatical use (like multiple negation, the use of ain't).

Ethnic varieties:

A result of immigration. Produced by lang. contact. Involves lang. shift on by a minority group from an ethnic lang. to English.

It involved modification of the dominant lang.
Example: African American English (AAE)

Homogeneity and variability:
perceived as homogeneous, a strong degree of mixing, mutual accommodation, and koineization. Dialect studies show a great deal of phonetic, lexical, and grammatical variability. No nationally uniform standard accent of American English. Diversity has replaced homogeneity.

Topic: 155:- Canadian English I
Colonization & immigration:

Large scale colonization started in the second half of the 18th century. An influx of British immigrants during and after the American revolution. Has retained strong cultural and political ties with Britain. A large proportion of Canada's settlers has come

from the USA.

Canadian English is traditionally described as a mix of British and American features.

Influences on Canadian English

The influence of British or American English varies by:

1. Region
2. Generation (an ongoing Americanization of the youth).
3. Language level.

Pronunciation shows American base vocabulary items and some spellings show a tendency towards British English.

The growth of a distinct Canadian identity after WWI/II reflected in uniquely Canadian features. These include:

- ★ the word chesterfield 'couch'
- ★ the particle eh (inviting approval)

The most noticeable features of Canadian English: Canadian Raising i.e., the pronunciation of /e/ and /ə/ with a raised, central onset before voiceless consonants, so that:

- out sounds like cold [aʊ]
- bite sound like bait [eɪ]

Topic: 156: Canadian English II

Outer circle countries use British as the norm except the Philippines and Liberia. Impact on all varieties particularly on lexical choices and certain pronunciation. Growing exposure to and prestige of American English. The dominant role of US in global politics and economics. Sense of ambivalence about American English.

Linguistic levels of impact:-

Lexis: Most pronounced in vocabulary.

Examples:

• Gas • Guy(s) • Hi • Movie • Truck
• Santa • Claus

Lexis:-

Adolescent slang and fashion terms like:

1. Man as a form of address
2. Cool meaning 'very good'
3. figure them out.

4. He's like ('he says')

• Older words and phrases include
lobb, commute, fan, star, know-how,
break even, ore let's face it

Pronunciation:

For certain words American pronunciations are getting popular

* Research stressed on the first and primarily on the second syllable

* Schedule with /sk-/

* lieutenant with /lu:-/

Spelling:

American	British
Center	Centre
Program	Programme
Color	Colour

Inclination towards American English in Outer Circle:

(Short X-)

• Despite British orientation American people are attracted to American English.

• A predominantly British pronunciation basis with American features

interspersed.

• Use of American pronunciation variants.

★ Covert prestige attached to American English despite British English being the "official" target norm in education.

Topic: 151:- English in Australia and New Zealand: Origin and Development I

Similarities:-

- ★ Geographical proximity
- ★ Frequent migration and travel b/w Australia and New Zealand.
- ★ Similar stages of Development.
- ★ Colonial varieties
- ★ Related to different varieties of English used by settlers from all over Britain.
- ★ Influence of Australian English on New Zealand English.

Periods of Development:-

Australian settlement and development (1788-1820).

Colonized as a penal colony in 1788. Demonstrated powerful founder effect."

Australian Settlement and Development (1788-1820)

Influence of Southeast England variety. Settlers from the Southeast of England in majority. Relative prestige of Southeast variety.

Topic: 158 English in Australia and New Zealand: Origin and Development II Imp (obj + Short)

Expansion and Establishment of new colonies (1820-1850).

1820: Stabilization of the Sydney Colony.

1831: Founding of Port Philip (Melbourne) colony. Movement of settlers from Sydney to Port Philip.

1840: Establishment of New Zealand colony. Comprised several multiple settlements including a mix of varieties. Influence of the Australian English on early NZE.

Gold rushes & New Migration (1850-1900)

Increase in migration caused by

- * Gold rushes
- * British policies resulting in increased migration.

De facto independence (1900-1960)

Establishment of de facto nations. Considering (RP) standard of England as the norm to compare the local Englishes. Rising of national and linguistic identity.

Awareness about National Standards (1960-present)

Awareness about the two Englishes being national varieties. Need for having their own standards. Serious scholarly work conducted.

The development of dictionaries (the Macquarie Dictionary in Australia).

Codification of the local varieties as standards. Expansion of the linguistic diversity due to migration from all over the world.

Topic: 159: English In Australia and New Zealand: Linguistic Features

Distinguishing features: Pronunciation

The pronunciation of vowels:

* The vowel /i/ as in bit

In Australia /i/ has been raised and fronted. It now appears to the front of /i/

Sit = Seat

* The New Zealand /i/ has gone in the opposite direction, centralizing to /ɪ/

Sit = sut

The merger of the vowels /eə/ and /ɪə/ in NZE

ear = air

“““ There are a lot of similarities but there are similarly key differences and the one I am gonna highlight for you today is a key the vowel shift it is almost the exact opposite in Australian key vowels; now quiet but

that what's we would call the short a in American or a little i versus e an e sound. It's a long e so for example that the word 'big' in Australia I say ^{beeeg} 'big' it's not quiet big it is not that long but it is not sure vowel but pre much of same shape so I say big and If I wana put something in my hair it would be amm or so with it it would be a pin and if I am going to beg ^{beeg} for something it would be beg and I would write with a pen so I wrote with a pen and I put a pin in my hair.

In New Zealand accent so lots pretend ^{Aaa} 'a' its not really Aaa so its m trying whether assure I was gonna say a pin it's not pun it's not pen it's somewhere blw it.

I put a pen in my hair and I write ~~at~~ with pin.

I want to spell it like pn but there is i in it the air space. ""

Distinguishing Features:

Use of Hypocoristics in AUSE:

★ Tendency to use a diminutive form a name.

★ Tendency to generally modify names and other terms.

1. Barry = Bazza or Bazz

2. afternoon = arvo

3. Thank you = no worries

4. bach = a holiday home

5. Egg = mild insult (fool)

6. Waka = any means of Transport

7. Barbie = shortened version of barbecue

Lexicon
in
NZE

Distinguishing Features: Discourse

★ In Australia, the service provider will name the total due followed by thanks:

That'll be two dollars, thanks

★ In most other Englishes thanks is postponed until the customer offers the money and/or change is given.

Topic: 160: English in Australia and New Zealand: Sociolinguistic variations

Sociolinguistic variations in NZE and AusE

Social Class: ★

Lower classes tend to use the distinguishing features. Upper classes tend to use the RP standard.

Age: ★

Younger speakers demonstrate more distinguishing features than old speakers.

Gender: ★

Women use more new variants in changes from below. Women will use more of the distinguishing properties than men of similar ages and classes.

Variation in AusE:

• Broad • General • Cultivated

General: The most common type of English spoken in Australia.

Broad: Associated with more

working-class speech. ~~Can~~

Cultivated:

Prestige Variety. Closer to
the British Received Pronunciation
