ECE 204 MIDTERM FILE Solution

ECE 204 MID and Final TERM FILE

ZB

OBJECTIVE

1. Read daily to your child and **provide opportunities** for your child to practice these skills is important as they develop and grow.
2. Learning how to make certain that projects add value to the **organization**
3. It's very important to know about the **self-conception** of middle childhood. To what extent they stable about their own ideas and performance.
4. This phenomenon exemplifies the manner in middle childhood build on each other as children become more and more accomplished and sophisticated in their **self-control efforts**.
5. There should be a sustained disconnect between these external rewards and your **self-assessed** performance. That is the real performance of individuals.
6. Prioritizing is a **self-management** skill that can be applied to nearly every aspect. In this way, we perform tasks from simple to complex based on prioritizing the work.
7. Divide work in such a way so that you can **efficiently** complete the task on time.
8. We should coordinate ourselves with our **potential/abilities, motivation**, and task commitment.
9. **Mutual work** requires two-way respect. We should also give respect, feel respect and show cooperation in performing a task.
10. Proactive **planning** minimizes the likelihood of procrastination and last-minute rushes.
11. Effective self-management **streamlines workflows**, reducing interruptions and obstacles.
12. Setting and achieving personal goals **fuels motivation**, driving you to pursue further enhancements in your skills and efficiency.
13. It's **self-assessment** and the process of evaluating your own organization against a model for continuous improvement.
14. People are highly transferable, since you have your **attitude, personality**, and work. Their style automatically follows you to any and every company you work for.
15. **Verbal communication** involves the spoken word. Things like tone, diction, and pacing are all important when you're a speaker.

ECE 204 MID and Final TERM FILE

ZB

16. **Nonverbal communication** involves body language. Things like posture, eye contact, gestures, handshakes, and facial expressions are all part of nonverbal communication.
17. **Interpersonal Skills** are qualities or attributes we possess that enhance our interactions with others. They can be related to our attitude, personality, emotions, habits, communication style, and social manners.
18. The art of giving and taking. It is how your **child settles** differences with others through compromise and agreement.
19. How a child stands up for himself and gets **his point across** in an honest, clear, and appropriate manner.
20. Human **skill development** is a gradual process that takes many years to fully complete
21. The abilities for adaptive and positive behavior that enable individuals to deal effectively with the challenges of everyday life.
22. **Organizing** your space is going to impact on your kid's ability to practice being independent.
23. School-life balance is important for **optimal academic** functioning. Students often prioritize academics at the expense of personal factors, including relationships and exercise.
24. **Critical thinking** is focused, careful analysis of something to better understand, it includes: Analyzing is breaking something down into its parts.
25. **Writing** involves encoding messages into words, sentences, and paragraphs for the purpose of communicating with a person.
26. **Money Management** is to have experience in independently handling money, balancing a check book, using an ATM.
27. **Adequate sleep** and a healthy diet can improve mood, athletic and classroom performance and coping strategies for stress.
28. **Teamwork & Collaboration** in the Workplace is a vital part to keeping the organization or company running smoothly.
29. **Patience** is to learn tolerance to track their goals.
30. **Humor/Social/ Persuasive** is to be socially available to their friends and family.
31. **Developmental** differences between those children who have what they need for healthy brains and bodies and those who do not can show up as early as nine months old.
32. Elementary-age children can be **impulsive**. Their brains are still growing and developing at a rapid rate.

ECE 204 MID and Final TERM FILE

ZB

33. **Self-management** skills help students not only at home and in everyday life but also improve academic performance and even resilience.
34. **Motivating** the child to perform well and taking pride in the child's work.
35. **Health and hygiene** are the other areas of self-management skills. It includes regular shower and bath times, making sure children brush their teeth, and eating healthy regular meals.
36. It is normal for these people to feel **overwhelmed** when trying to divide a task into smaller and more manageable parts.
37. Having good **organizational skills** also makes it easier to collaborate with others and helps increase productivity and efficiency.
38. Children should know about the **procrastination** organizing skill which means we avoid performing a task and plan it for later.
39. In **organizing things**, a person should be self-motivated and resourceful. Completing the task is not possible without motivation and self-realization.
40. **Managing Persistence** is associated with faster growth in reading up to third grade, faster growth in both reading and math from fifth grade and less anxiety.
41. It accurately **tracks and assesses** one's knowledge, skills, & progress.
42. **Self-monitoring** facilitates communication between students and their parents.
43. **Self-control** is leading us towards setting goals based on the knowledge, need assessment, and potential of a person.
44. Adults should explain expectations for each new setting and help children adjust their **self-control strategies** accordingly.
45. Children **can avoid** making silly mistakes by giving numbers to their task, solving questions from easy to complex.
46. **Social Skills** are related to interacting with others, playing games and understanding the feelings of another person how they are talking about, how they are interacting, and what they want to do.

ECE 204 MID and Final TERM FILE

ZB

SUBJECTIVE

Question 1: Why is it important to know about Development?

By the time a child reaches five years old, 90% of their brain has already developed – which means the progression from birth to school is the most important time of their lives.

Children from poorer and marginalized homes who are unable to access support are put at a distinct disadvantage. If they start school at five without early years' support, they will have a limited vocabulary and ability to learn.

Question 2: What is Self-Management?

Self-management is the ability to manage ourselves emotionally and in the pursuit of tasks and goals. It is how well we manage stress and our impulses. Elementary-age children can be impulsive. Their brains are still growing and developing at a rapid rate. But learning about self-management is crucial because these are skills that will determine in large part whether someone experiences a successful life.

Question 3: How to Build Self-Management Skills?

Time management is the first and foremost core skill. Time management relates to the event, tasks, and the duration of these. You should involve the children by tracking time for different tasks with them. Then you can begin to estimate how long they think a task will take.

Health and hygiene are the other areas of self-management skills. It includes regular shower and bath times, making sure children brush their teeth, and eating healthy regular meals. Daily exercise also improves physical well-being. Children learn how to manage their stress is creating an environment that is peaceful. Breathing exercises and journaling (making a to-do-list of your

ECE 204 MID and Final TERM FILE

ZB

assigned tasks) also improves physical wellbeing. Plan a daily routine so that the brain development also carried out gradually.

How to set and achieve goals is another core skill of self-management. We can encourage children to ask questions and help them choose their goals. We can help them break those goals into smaller steps. But let them do by themselves to choose their own goals, help them to set priorities only at the initial stage.

Six essential self-management skills are:

1. Planning
2. Organization
3. Persistence
4. Progress monitoring
5. Setting Goals
6. Attention to detail

Question 4: Describe the importance of planning as a fundamental cognitive skill in self-management.

Planning is a crucial cognitive skill that enables individuals to mentally anticipate and prepare for tasks or goals. It involves choosing the necessary actions, deciding the right order, assigning tasks to cognitive resources, and establishing a plan of action. Effective planning helps individuals achieve their goals, prioritize tasks, and manage time efficiently. In self-management, planning plays a vital role in enabling individuals to stay focused, avoid distractions, and overcome obstacles. By developing planning skills, individuals can improve their productivity, reduce stress, and achieve their objectives.

Question 5: Discuss the symptoms and characteristics of individuals with poor planning skills.

Individuals with poor planning skills often exhibit specific symptoms and characteristics, including difficulty making decisions, anticipating consequences, and prioritizing tasks. They may struggle to calculate time requirements, leading to poor time management and reduced productivity. Additionally, they may be easily distracted, forgetful, and prone to procrastination. Poor planning skills can also lead to difficulties with multitasking, surprises, and unexpected problems. These individuals may take longer to transition between activities and experience increased stress levels.

Question 6: Explain the three-step process for teaching students organizational skills.

ECE 204 MID and Final TERM FILE

ZB

The three-step process for teaching students organizational skills involves: (1) getting organized, (2) staying focused, and (3) finishing up. In the first step, students prepare for the task by gathering necessary materials and resources. The second step involves working through the task while maintaining focus and avoiding distractions. The final step requires students to complete the task to the best of their ability. By following this process, students can develop essential organizational skills, including prioritizing, time management, and self-motivation.

Question 7: Discuss the importance of persistence as a self-management skill in achieving goals.

Persistence is a vital self-management skill that enables individuals to maintain concentration and effort on a task or goal despite distractions and setbacks. Children who exhibit persistence can stay focused, overcome obstacles, and achieve their objectives. Persistence is associated with faster growth in reading and math, reduced anxiety, and improved problem-solving skills. By developing persistence, individuals can build resilience, confidence, and a growth mindset, ultimately leading to greater success in academics and personal endeavors.

Question 8: Describe strategies for managing persistence among children.

Managing persistence among children involves providing opportunities for them to complete challenging tasks, encouraging practice, and offering clear verbal strategies to deal with obstacles. Additionally, role models who cope with failure and persevere can inspire children to develop persistence. By gradually increasing task complexity and providing support, children can build confidence and develop the ability to overcome setbacks. Encouraging motivational self-talk and celebrating small successes can also help children develop persistence and achieve their goals.

Question 9: Describe the process of self-management work, including goal setting and performance evaluation.

The self-management process involves setting personal goals and performance objectives, identifying concrete and measurable steps to achieve these goals, and making a commitment to follow through. Individuals evaluate their performance, comparing it to previous performances and established criteria. They reward themselves for high performance, focusing on internal satisfaction

ECE 204 MID and Final TERM FILE

ZB

rather than external rewards. This process enables individuals to take ownership of their actions, build self-awareness, and develop a growth mindset.

Question 10: Discuss the importance of identifying strengths and weaknesses in the self-management process.

Identifying strengths and weaknesses is a crucial aspect of self-management. By recognizing individual strengths, children can maximize their abilities and develop confidence. Conversely, acknowledging weaknesses allows children to work on areas for improvement. This process enables children to set realistic goals, prioritize tasks, and develop strategies for overcoming challenges. Effective self-management involves leveraging strengths and addressing weaknesses to achieve personal and academic success.

Question 11: Explain the key elements of the self-management process, including staying organized, prioritizing, and maintaining a healthy lifestyle.

The self-management process involves several key elements, including staying organized, prioritizing tasks, and maintaining a healthy lifestyle. Staying organized enables individuals to manage time effectively, prioritize tasks, and reduce stress. Prioritizing tasks allows individuals to focus on important goals and objectives. Maintaining a healthy lifestyle, including regular exercise, healthy eating, and good hygiene habits, supports overall well-being and enhances productivity. Evaluation is also a critical element, as individuals assess their progress and adjust their strategies to achieve success.

Question 12: Discuss the consequences of self-management for functional groups, including health skills, academic skills, and social-emotional learning.

Self-management has significant consequences for various functional groups, including health skills, academic skills, and social-emotional learning. Health skills, such as personal responsibility, healthy

ECE 204 MID and Final TERM FILE

ZB

eating, and personal hygiene, support overall well-being. Academic skills, including self-monitoring, self-evaluation, and goal setting, enable students to take ownership of their learning. Social-emotional learning, including promoting a growth mindset, perseverance, and emotion regulation, fosters resilience and motivation. By developing these skills, individuals can achieve greater success and well-being in various aspects of life.

Question 13: Explain the principles of self-organization, including planning, taking responsibility, and being creative.

The principles of self-organization include planning, taking responsibility, and being creative. Planning involves dividing work into manageable tasks and coordinating efforts to achieve goals. Taking responsibility involves acknowledging mistakes and using them as opportunities for growth. Being creative enables individuals to generate innovative solutions and approach challenges with a fresh perspective. By applying these principles, individuals can develop effective self-organization skills, leading to greater productivity, efficiency, and success in personal and professional endeavors.

Question 14: Describe the concept of personal skills and their importance in social interaction.

Personal skills, also known as soft skills, refer to a person's attributes or traits that relate to social interaction. These skills are essential for effective communication, building relationships, and achieving personal and professional success. Personal skills are highly transferable and include attributes such as dependability, adaptability, motivation, problem-solving, and analytical skills. Developing strong personal skills enables individuals to interact positively with others, build strong relationships, and achieve their goals.

Question 15: Explain the different types of personal skills, including communication, interpersonal skills, collaboration, and problem-solving.

ECE 204 MID and Final TERM FILE

ZB

Personal skills encompass various types, including communication, interpersonal skills, collaboration, and problem-solving. Communication skills involve verbal, nonverbal, and written communication, enabling individuals to convey their thoughts and ideas effectively. Interpersonal skills, such as attitude, personality, and social manners, enhance interactions with others. Collaboration skills involve working effectively in teams, while problem-solving skills enable individuals to resolve challenges and make informed decisions. Other essential personal skills include listening, negotiation, decision-making, and assertiveness.

Question 16: Discuss the importance of self-help skills in child development and provide examples of self-help skills.

Self-help skills are essential for child development, enabling children to become independent and confident individuals. These skills include attending to personal cleanliness, grooming, clothing, and managing daily routines. Examples of self-help skills include washing hands, using the toilet, covering the mouth when coughing, using utensils to eat, and cleaning up after oneself. As children develop self-help skills, they become more confident and self-assured, preparing them for future independence.

Question 17: Explain the concept of self-help skills for young learners and their significance in promoting independence.

Self-help skills for young learners refer to the abilities that enable children to carry out daily tasks independently. These skills promote confidence, self-awareness, and independence, allowing children to develop physically, cognitively, and emotionally. Self-help skills are essential for young learners, as they lay the foundation for future independence, mental well-being, and positive social relationships. By developing self-help skills, children can make healthy decisions, solve problems, and navigate everyday challenges effectively.

ECE 204 MID and Final TERM FILE

ZB

Question 18: Discuss the importance of achieving a balance between work, play, and rest, and provide strategies for managing time and stress.

Achieving a balance between work, play, and rest is crucial for optimal functioning and overall well-being. Students often struggle to balance academic responsibilities with personal relationships and other activities. Effective time management and stress management strategies can help individuals achieve this balance. Strategies include planning schedules, prioritizing tasks, breaking down large tasks into smaller components, setting goals and deadlines, and avoiding perfectionism. Additionally, stress management techniques such as regular exercise, healthy eating, and spending time with friends and family can help individuals cope with stress and maintain a healthy work-life balance.

Question 19: Describe the basic learning skills necessary for academic and professional success, including critical thinking and creative thinking.

Basic learning skills are essential for academic and professional success. Critical thinking involves careful analysis, breaking down complex information, arguing logically, classifying, comparing, and contrasting. Creative thinking, on the other hand, involves generating new ideas, brainstorming, designing, imagining, improvising, and innovating. Developing these skills enables individuals to approach problems in a logical and innovative way, leading to effective problem-solving and decision-making.

Question 20: Explain the importance of communication skills, including listening, speaking, reading, and writing, in academic and professional settings.

Communication skills are vital in academic and professional settings. Effective communication involves analyzing situations, evaluating messages, listening actively, and conveying ideas through speaking, reading, and writing. Developing strong communication skills enables individuals to convey their ideas clearly, work collaboratively, and build strong relationships with others. By mastering these skills, individuals can achieve greater success in their academic and professional pursuits.

ECE 204 MID and Final TERM FILE

ZB

Question 21: Discuss the skills necessary for success in school and higher education, including time management, stress management, and study skills.

Success in school and higher education requires developing essential skills such as time management, stress management, and study skills. Effective time management involves prioritizing tasks, creating schedules, and balancing academic responsibilities with other activities. Stress management techniques, such as regular exercise, adequate rest, and good nutrition, help individuals cope with academic pressure. Study skills, including reading textbooks, taking notes, and using library resources, enable individuals to learn effectively and achieve academic success.

Question 22: Explain the skills necessary for success in the workplace, including critical thinking, teamwork, and professionalism.

Success in the workplace requires developing essential skills such as critical thinking, teamwork, and professionalism. Critical thinking enables employees to analyze evidence, question assumptions, and solve problems effectively. Teamwork and collaboration involve working effectively with others to achieve common goals. Professionalism and strong work ethic involve being punctual, having a positive attitude, and demonstrating a commitment to one's work. Developing these skills enables individuals to excel in their careers and contribute to the success of their organizations.

Question 23: Discuss the importance of developing skills in the home, including self-awareness, integrity, and conflict resolution.

Developing skills in the home is essential for personal growth and relationships. Self-awareness enables individuals to understand their thoughts, feelings, and actions. Integrity involves making value-based decisions and behaving in a way that is consistent with one's values. Conflict resolution skills enable individuals to manage disagreements and challenges effectively. By developing these

ECE 204 MID and Final TERM FILE

ZB

skills, individuals can build stronger relationships, achieve greater personal growth, and navigate challenges with confidence and resilience.

Question 24: Interpersonal or Social Skills

The following are different types of interpersonal or social skills.

1. **Non Verbal Communication** refers to gestures, sign language, facial expressions and body language.
2. **Teamwork** is participation in group activities and coordination among them to reach their objective/goal.
3. **Creative Thinking** is to excel original thinking to be successful at every level.
4. Interpersonal skills are the ability to interact with people through effective listening and communication. **Listening** is a student who needs to pay proper attention to the teacher in the class by active listening.
5. **Verbal Communication** is to learn to speak/talk with teachers to express itself.
6. **Helping Others**/Empathy/Sympathy is to be understanding of other feelings bet it their teachers, parents, classmates and friends.
7. **Humor**/Social/ Persuasive is to be socially available to their friends and family.
8. **Patience** is to learn tolerance to track their goals.

Question 25: Why Interpersonal or Social Skills? / Importance of Interpersonal or Social Skills

1. It helps them ask their questions from teachers and learn better.
2. Help in building good relationships with their peer group, teachers, family members and society.
3. Boost their confidence and personality development.
4. Helps them express their thoughts/ideas and feelings to their parents, teachers or classmates to get help/support.
5. Improves their social status as they interact and entertain their friends and acquaintances.
6. It helps them value diversity, individual respect and different customs in society.
7. With better soft skills, a person is considered more ethical and gets respect in society.

Question 26: Defining Goal Setting

ECE 204 MID and Final TERM FILE

ZB

Goal setting is a powerful motivator, the value of which has been recognized in an abundance of clinical and real-world settings. It's a process that starts with careful consideration of what you want to achieve and ends with a lot of hard work to do it.

Participation in goal setting encourages a search for new strategies to aid success and finding novel ways to utilize our skills and push our abilities increases task-relevant knowledge while enhancing self-efficacy and self-confidence. It involves planning for the future.

The capacity to plan positively impacts our perceived control over goal outcomes and our future. Goal setting and achievement can promote the development of an internal locus of control.

Question 27: How to plan to attain goals

The main point of setting goals is to help students take realistic steps to achieve them. Many educators find that using the SMART format goals that are specific, measurable, attainable, relevant, and timely is practical and reasonable, and keeps students on track. There are some tricks for writing goals. These tricks are:

1. Write them down.
2. Don't just daydream about your goals.
3. Make your goals visible.
4. Goals are often long-term and abstract by nature, making them more digestible by breaking them down.
5. Develop a plan.

Question 28: Defining Emotion

It's a complex experience of consciousness, bodily sensations, and behavior that reflects the personal significance of a thing or an event. It's a pronounced physical accompaniment, such as a facial expression, or it may be invisible to observers' faces.

Types of basic emotions

1. **Happiness** is often associated with feelings of joy, contentment, and satisfaction. It occurs when people feel safe, successful, or connected to others, and it promotes well-being and social bonds. Happiness often encourages positive interactions and a sense of fulfillment in life.
2. **Sadness** is an emotional response to loss, disappointment, or difficult situations. It can range from mild disappointment to intense grief. Although sadness can feel unpleasant, it also allows

ECE 204 MID and Final TERM FILE

ZB

people to process challenging experiences and seek support from others, fostering connection and resilience.

3. **Fear** is a response to perceived danger or threat. It triggers the body's fight-or-flight response, preparing a person to face or avoid the threat. Fear is a protective emotion, as it helps individuals recognize and react to potential harm, ensuring survival.
4. **Disgust** is a feeling of revulsion or strong disapproval, often related to something considered unclean or unpleasant. This emotion helps people avoid harmful substances, behaviours, or environments, which contributes to both physical and moral boundaries in society.
5. **Anger** arises in response to perceived injustice, frustration, or threats. It can motivate people to act, stand up for themselves, or address wrongs. While anger can lead to aggressive behaviour if unchecked, it also plays a role in asserting boundaries and driving change.
6. **Surprise** is an emotional reaction to something unexpected. It can be either positive or negative, depending on the nature of the surprise. Surprise triggers a heightened state of awareness, allowing people to quickly adjust and assess new situations.

Question 29: Emotional management skills

Self-awareness is a skill that allows us to predict how a situation or person might be affected by understanding own emotional state.

Reflecting is to discover why there is a certain emotional reaction to a situation or person.

Accepting one's own emotions, one can often recover from an emotional reaction more easily.

A **sense of perspective** can help to manage our emotions by placing them into context.

Empathy is the ability to relate to how other people feel in a situation using their own experience.

Question 30: Concept Management of Emotions

Different theories explain the concept of emotion which are given below:

Evolutionary theory of emotion

Feelings of love and affection lead people to seek mates and reproduce. Feelings of fear compel people to either fight or flee the source of danger. Emotions motivate people to respond quickly to stimuli. Emotions improve the chances of success.

The James-Lange Theory of Emotion

It's Physiological theory of emotion. Seeing external stimulus leads to a physiological reaction.

Emotional reaction is dependent upon how it is being interpreted those physical reactions.

ECE 204 MID and Final TERM FILE

ZB

Question 31: Manage strong emotions

There are different strategies for managing strong emotions given below:

1. Feel upset or miserable about how they overwhelm their emotions.
2. Feel very strong emotions that are out of proportion to the problem or situation.
3. Still feel strong emotions for a long time after whatever sparked the emotions.
4. Often go from being calm to feeling an intense emotion like anger very quickly.
5. Express emotions inappropriately, for example, laughing in response to bad news.
6. Go very quietly, hide or push people away when they're overwhelmed.

Question 32: Manage emotions in young children

Here are some ways to help your child learn to control her emotions:

1. **Teach your child positive self-talk about the event.** Teach your child a few simple phrases to remember, to control, and put the situation.
2. **Identify typical situations** which cause emotional outbursts and use them as springboards to teach problem solving.
3. **Help your child be aware of the stages in the build-up of tension** on the signs of an emotional outburst and encourage child to express feelings.
4. Use **time out** for inappropriate emotional angry outbursts.
5. **Teach** child appropriate ways to express negative feelings.
6. **Praise** the child's effort to control emotions.

Question 33: Self-concept: What about it?

Self-concept is how we perceive our behaviors, abilities, and unique characteristics. Self-perception is important because it affects our motivation, attitudes and behaviors. It also impacts how we feel about the person we think we are, including whether we are competent or if we have self-worth.

Self-concept is a collection of beliefs one holds about oneself and the responses of others. It embodies the answer to the question: Who am I? Physically, emotionally, socially, spiritually, and in terms of any other aspects.

Question 34: Health and Hygiene: What is it?

ECE 204 MID and Final TERM FILE

ZB

Health refers to a person's physical, emotional and psychological well-being. Hygiene refers to good practices that prevent disease and lead to good health, especially cleanliness, proper disposal of wastewater and drinking water supply. Health care refers to A healthy lifestyle, physical, mental and emotional health. Look after health by watching what to eat, being physically active, having an active social life, getting plenty of rest. Reduce your risk of disease, making sure of immunizations and handling your food safely. Cover up from the sun in peak hours during summer to help protect against skin issues. Visit doctor for regular health checks and see healthcare professionals when first notice symptoms.

Question 35: Nutritional awareness

Nutritional awareness is very important. We will be very careful regarding food intake items. Here are some recommendation are discussed below:

1. A frequent intake of sugar and sugary foods and drinks between meals causes tooth decay.
2. Too much salt is linked with high blood pressure later in life and may encourage a preference for salty food, which is difficult to change.
3. Do not add salt to food either in cooking or at the table, as babies' kidneys are not fully developed. Children have smaller stomachs than adults, so it is important to consider portion size when plating food.
4. Children should be encouraged to drink adequate amounts of fluids
5. Whole nuts are unsuitable for children under the age of five years because of the risk of choking.
6. It is recommended that grapes and cherry tomatoes are sliced or halved lengthways or prevent choking.

Question 36: Physical fitness

Any activity that involves moving your body. It includes everyday activities, physically active play, and organized sports and exercise. Physical activity is vital for children's health, well-being and development, now and in the future. Strengthens children's bones, muscles, hearts and lungs. Here are some recommendations that are discussed below:

1. It improves children's coordination, balance, posture and flexibility.
2. Help children stay at a healthy weight.
3. Reduces children's risk of getting heart disease, cancer and type-2 diabetes later in life.

ECE 204 MID and Final TERM FILE

ZB

4. Boosts children's well-being.
5. I relaxed and slept well.

Question 37: Signs of stress

Particularly younger kids are not able to fully articulate their feelings of upsets.

If there have been any major changes in a child's life, parents should pay particular attention and look for possible signs of childhood stress.

It may include Stomach pains

- Headaches
- Changes in behavior
- Mood swings
- Sleep problems
- Difficulty concentrating at school
- Irritability
- Disruptions in relationships
- Decreased academic performance
- Low motivation.

Question 38: Coping of stress

There are many strategies which help to cope with stress. These are:

1. **Acknowledge your child's feelings.** When children seem sad or scared, for example, tell them you notice they are sad or scared.
 2. **Develop trust,** and let your child know that mistakes are learning experiences.
 3. Be supportive and listen to your child's concerns.
 4. **Show love,** warmth, and care. Hug your child often.
 5. **Have clear expectations** without being too strict.
 6. **Don't over-schedule your child** with too many activities.
 7. **Be aware** of what your child wants not just what you want.
 8. **Provide a good example.** Keep calm and express your anger in appropriate ways.
 9. **Teach them about the consequences.** Children need to learn about the consequences—good and bad of their actions.
 10. **Encourage them to eat healthy foods** and emphasize the importance of a healthy lifestyle.
-

ECE 204 MID and Final TERM FILE

ZB

ECE 204 Final TERM FILE Solution

OBJECTIVE

1. **Healthy food** for preschoolers includes a wide variety of fresh foods from the five healthy food groups.
2. **Hygiene** is the practice through which people maintain or promote good health.
3. **Human potential** management is an integrative and ongoing process of developing human talents and capacities.
4. **Emotional energy** requires students to view each day an opportunity to better the world around them.
5. **Mental energy** is a dimension that directly connects to a student's ability to stay focused, retain information, and be productive in the moment
6. **Spiritual energy** is having the ability to be mindful and thankful for all that one has accomplished throughout the day.
7. The term 'gifted' or 'high learning potential' most often refers to an ability to understand information well, make quick analyses and use memory capacity to learn quickly for advanced cognitive abilities.
8. **Good behaviors** to create safe, supportive learning environments that promote social, emotional, and academic growth.

ECE 204 MID and Final TERM FILE

ZB

9. **Teaching** resilience is the process of becoming, which children understand once they develop a firm belief about their place in the world.
10. **Resilience is** often considered a characteristic of people who are professionally successful or have things 'all figured out. It's the ability to bounce back from adversity.
11. An **optimistic** and **positive** outlook can enable children to see good things in life in the hardest times.
12. Be aware of foods that children can **choke on**, such as lollies, apples, meat and nuts.
13. Teachers should provide **first aid** as required. Record all details required by Regulation, including treatment given, in the incident, injury, trauma and illness record.
14. Cooperating means **working together** to achieve a common goal. Kids who cooperate are respectful when others make requests, contribute, participate, and help.
15. **Communication** skills are the key to developing and keeping friendships
16. Conversation is **a two-way** street don't talk too little, or too much. Disclose some personal information, such as your weekend activities, favorite hobbies or interest.
17. When grouping students together, keep in mind each child's **unique personalities** and **characteristics**.
18. Receptive language is the "**input**" of language, the ability to understand and comprehend spoken language that you hear or read.
19. Successful students have a basic handle on **time management and planning**: They use a planner, set small goals and learn to pay attention to a watch or clock.
20. Children make friends they can study with: Just select one. **Successful students** have morning and evening routines:
21. Children often struggle to **pay attention**, but when they are given a task, they view it as challenging or hard. They are even more likely to give up before truly trying.
22. Getting frustrated is one of the first signs of a **child struggling** in school. Sometimes it's clear that things aren't going well — kids may lose their temper or walk away from a difficult task.
23. **Anger** is a normal, healthy emotion when expressed appropriately.
24. Distraction is a **simple strategy** that's good for situations where behavior might be a problem.
25. Conflict is a challenge to the way a person thinks or behaves. It can be an uncomfortable process for young children, causing one, both, or all children **involved uneasiness**, fear, or a range of other strong emotions.

ECE 204 MID and Final TERM FILE

ZB

26. **Use good and powerful words** for their personalities like you are wise and leader.
27. Teachers have a greater role to play in such **circumstances**, because he/she should act as a role model and help to resolve the issues
28. **Fairness** is central when interacting with a single child or a group and in the activities of the rest of the work community.
29. The early childhood education teacher is a **pedagogical leader** in their work community.
30. Childcare **practitioners work** with one of society's most vulnerable groups-young children.
31. The quality of the relations among young children and their caregivers has a **substantial**, long-term influence on children's lives.
32. **Appreciate** childhood as a unique and valuable stage of the human life cycle.
33. **Teachers must model strong character** traits, including perseverance, honesty, respect, lawfulness, fairness, patience, confidentiality and unity.
34. Facilitate the development of the whole child. **Moral and legal responsibility** to report suspected cases of child abuse.
35. The code of ethics is like a code of conduct in that it **establishes behavior** expectations that an organization.
36. **Respect and compassion** mean that you cannot disregard bad actions and must be addressed without impeding the course of learning.
37. Young children also start to understand that they have a choice between **"right" and "wrong"** in a tempting situation.
38. We can **encourage** moral development in children by offering opportunities to care for pets, babysitting, etc.
39. Providing children **trust their parents**, they can learn better the trust concept.
40. Children's **self-ethical** reasoning raised up with empathetic ally feelings for others.
41. Animals are not treated as **human beings** are. Both have similarities in living conditions.
42. Children are **worried** about the animals living in open space and are not being provided with proper nesting facility.
43. Children are **prone to** take care of their pets and other animals in the environment like putting some water in bowls for birds in summer.
44. Children are **recognized** about animal treatment with moral treatment in an open environment.

SUBJECTIVE

QUESTION 1: Health and healthy food

Healthy food for preschoolers includes a wide variety of fresh foods from the five healthy food groups. Vegetables and fruit give child energy, vitamins, antioxidants, fiber and water. These nutrients help to protect your child from diseases later in life, including diseases like heart disease, stroke and some cancers. Grain foods include bread, pasta, noodles, breakfast cereals, couscous, rice, corn, quinoa, polenta, oats and barley. These foods give your child the energy they need to grow, develop and learn. Grain foods with a low glycemic index, like wholegrain pasta and breads, will give your child longer-lasting energy.

Question 2. How can you improve your eating habits?

Answer: To improve eating habits, create a list of eating and drinking habits, keep a food and beverage diary for a few days, write down everything to eat and drink, highlight unhealthy habits, identify habits to improve, replace unhealthy habits with new healthy ones, minimize distractions while eating, eat slowly, eat only when hungry, plan meals ahead, and reinforce new habits.

Question 3. What is hygiene and why is it important?

ECE 204 MID and Final TERM FILE

ZB

Answer: Hygiene is the practice through which people maintain or promote good health by making themselves and their surroundings clean. It involves cleaning and disinfecting surfaces, hands, and items of personal use to break the chain of infection.

Question 4. What are the different types of energy and how can they be managed?

Answer: Different types of energy include physical energy, emotional energy, mental energy, and spiritual energy. Energy management involves maximizing these energies through practices like self-awareness, self-analysis, reflection, and intervention. Physical energy can be managed through sleep, nutrition, and exercise, while emotional energy requires building enthusiasm and motivation.

Question 5. Definitions of Energy ?

1. **Mental energy** is a dimension that directly connects to a student's ability to stay focused, retain information, and be productive in the moment
2. **Spiritual energy** is having the ability to be mindful and thankful for all that one has accomplished throughout the day. As students find that it is important that they are reflective of the day's activities.

Tools for success such as gratitude journals, self-talk, listing three positive things.

Happened during the day, meditation, and praying all assist in the documentation, communication, and application of increased spiritual energy.

Question 6. Definitions of potential

The concept of what it means to be intelligent varies across different contexts and cultures. The term 'gifted' or 'high learning potential' most often refers to an ability to understand information well, make quick analyses and use memory capacity to learn quickly for advanced cognitive abilities. Cognitive ability, IQ or general ability in theories of intelligence is made up of different types of ability. High academic achievement rather than cognitive ability as measured by a standardized test.

ECE 204 MID and Final TERM FILE

ZB

Question 7: What is Resilience?

Resilience is often considered a characteristic of people who are professionally successful or have things 'all figured out. It's the ability to bounce back from adversity. It's a necessary skill for coping with life's inevitable obstacles and one of the key ingredients to success.

Resilient people are comfortable in talking about and expressing a range of emotions. Between school, co-curricular activities, work and their social life, teens face lots of new experiences and challenges. Being resilient gives them the ability to tackle these head-on, bounce back from any setbacks and have the best chance at succeeding.

Question 8: Why is Resilience?

Schools and classrooms, especially, are demanding energy of these kinds, partly because not every student chooses to be there. Partly because successful teaching and learning requires cognitive, social and emotional investment by both teachers and students.

Resilience is not a quality that is innate. It's a construction that is relative, developmental and dynamic. Resilient qualities can be learned or acquired and can be achieved through providing relevant and practical protective factors, such as caring and attentive educational settings.

Question 9: What are social skills

Social skills are the skills we use every day to interact and communicate with others. They include verbal and non-verbal communication, such as speech, gesture, facial expression and body language. A willingness to share a snack or share a toy can go a long way to helping kids make and keep friends. Cooperating means working together to achieve a common goal. Kids who cooperate are respectful when others make requests, contribute, participate, and help. Listening isn't just about staying quiet, it means really absorbing what someone else is saying. It's also a critical component of healthy communication.

ECE 204 MID and Final TERM FILE

ZB

Question 10: What is Frustration in Classroom

Getting frustrated is one of the first signs of a child struggling in school. Sometimes it's clear that things aren't going well — kids may lose their temper or walk away from a difficult task. But frustration over school can show up in ways that aren't always obvious. A child's world will always be full of emotional ups and downs. We should understand their Triggers, model a constructive response, validate big feelings, Build from Your child's strengths, and Building resilience into adulthood.

Question 11: What is Anger in Classroom

Anger is a normal, healthy emotion when expressed appropriately. But some kids are frequently angry and struggle to enjoy life. They get into fights when they play games and argue when they're doing something fun. Their inability to cope with their emotions affects their quality of life. They may be using aggression to meet their needs. There are some tricks to understand anger in classroom:

1. **Create an Anger Thermometer:** Draw scale of level of aggression on paper.
2. **Cultivate Anger Management Skills:** deep breath, change place or situation, take water.
3. **Avoid violent media:** Fighting games etc.
4. **Follow Through with Consequences:** Child breaks the rules, follow through with a consequence each time.

Question 12: What are Ethics in ECC

The quality of the relations among young children and their caregivers has a substantial, long-term influence on children's lives. The nature of the relationship requires to abide by the highest standards of ethical practice. The prime responsibility of early childhood caregivers is to provide a safe and healthy environment. The prime responsibility of early childhood educators is to provide nurturing and responsive settings for children. Committed to support children's development, respect their individual differences. Help children learn to live and work cooperatively, promote good self-image and encourage self-awareness, competence, confidence, and resiliency.

ECE 204 MID and Final TERM FILE

ZB

Question 13: Why are Ethics in Early Childhood

There are many reasons to develop ethics in early childhood.

1. **Builds their character:** Knowing good moral values such as kindness, humility, courage, and compassion.
2. **Help them tell right from wrong:** Acceptable and not acceptable actions in society.
3. **Changes their perception of the world:** A child who has a strong moral compass will not just stand idly by when an injustice is happening.
4. **Determines their adult behavior:** The values you teach your children today will determine how they will behave when they become adults.

Question 14: Why Moral Development in Early Years

Moral values are important in whatever stage of life. But most of the values we have as adults were instilled in us during our childhood. Knowing good moral values such as kindness, courage, and compassion at an early age builds a child's character. It forms the very core of their being and becomes a foundation of their moral beliefs. Young children's behavior is the determinant of early childhood moral values growth. They got enriched in empathy to handle sympathetic situations. Child got confident about the self-abilities.

Question 15: Strategies for the development of Resilience

- Develop skills of empathy and listening to others.
- In-person or through phone, video, chats, and texts.
- Take a break to allow children to be creative.
- This may make more time to eat properly, exercise, and get sufficient sleep.
- Develop a routine for schoolwork and play.
- Make sure your child has time to have fun and participate in activities they enjoy.
- Engage your child in age-appropriate volunteer work.
- Break down large assignments into small, acknowledge accomplishments on the way to larger goals.
- Help your child learn to trust themselves to solve problems.

ECE 204 MID and Final TERM FILE

ZB

Question 16: Awareness of good/bad touch

- Let your child know that their body is very special, and they are to take care of it.
- They are not embarrassed and if they are touched inappropriately, they can accurately explain it to others.
- Help your child identify good touches e.g., hand holding, hugging, shaking hand.
- If they make them feel uncomfortable in any way, then they are not okay.
- Teach your child about touches that might not feel okay, but are still good for the body e.g., shots, cleaning a cut and doctor.
- Tell your child that it is not okay for grown-ups or older kids to look at or touch their private parts.

Question 17: Avoiding Situations and Objects causing Harm

Some basics to avoid injuries:

There are some strategies which can be followed regarding avoiding injuries.

- Electric sockets are properly covered.
- Furniture is secure and not prone to tipping.
- Furniture has rounded edges.
- No nails, staples, or sharp objects are hidden in carpets.
- Rugs are secure and aren't prone to slipping.
- Floors are clear of splinters and cracks.
- Low windows are guarded by a safety fence or window guards.
- Ceiling tiles are secure and won't fall.
- Curtain ties are cut or securely tied out of reach.
- Poisonous cleaning products, medicines, and classroom supplies are stored in a locked and out-of-reach cupboard.

ECE 204 MID and Final TERM FILE

ZB

Question 18: General Safety Rules

Here is some general safety rules discussed:

- **Never share personal information online:** avoid giving out any personal information to an individual on the internet. No inviting friends over without the consent of parents or guardians.
- **No accessing certain rooms unsupervised:** These rooms include the kitchen and laundry rooms.
- **Never to take anything given to them by people they don't know:** Never accept any gifts that are offered to them by people they don't know.
- **Teach the children to stay away from dangerous products:** Ensure that they don't access medicine cabinets or drawers where knives are kept.

Question 19: Teachers' role in minor incidents, injury and trauma

Teachers should provide first aid as required. Record all details required by Regulation, including treatment given, in the incident, injury, trauma and illness record. Notify the parent/guardian, either immediately after the accident, or when they collect their child from the service. Provide first aid as required and comfort to affected/injured children. Call emergency services if necessary and manage the safety and well-being of other children. Ensure that, when an ambulance is required, a suitable staff member accompanies the child in the ambulance.

Question 20: Communication for social skills

Communication skills are the key to developing and keeping friendships. Nonverbal Communication is Say to people with eyes or body language is just as powerful as what you say with words. Tone of voice does communicate powerful messages to others about, Emotional state e.g., impatience, fear. We see Attitude towards the listener (e.g., submissiveness, contempt). Here are some points for good communication skills.

- Nonverbal behavior you may want to pay attention to.
- Posture e.g., head up and alert, leaning forward.
- Movement and gestures e.g., keeping arms uncrossed.
- Physical distance e.g., standing closer when talking to others.
- Eye contact e.g., when talking.
- Facial expression e.g., smiling warmly.

ECE 204 MID and Final TERM FILE

ZB

Question 21: Controlling behavior for social skills

Positive behavior management focuses on positive reinforcement. It's more about support and prevention. Catch them being good: Give attention to positive behavior like saying you are good boy or girl. Know your children: What makes their eyes light up and gets them excited. Reward charts: Change the emphasis to 'look at how amazing you are. Use the language of empathy: Deliver with perceived wish-fulfillment and humor, this helps children to know that you're on their side. Create a quiet 'thinking space: to retreat to when they feel overwhelmed.

Question 22: Promoting Tolerance in Children

Here are some strategies for enhancing tolerance in children.

1. **Make her feel special, safe, and loved:** Don't spare words of praise or affection. A loved child learns to love others.
2. **Teach about new places, people, and cultures:** Expose to different perspectives through books, music, food, and cultural events. Intervene when you hear or see intolerant behavior and encourage healthier ways he can interact with others. **Use positive comments to shape and reinforce behavior:** Instead of saying "No," offer helpful alternatives, such as "Be gentle,".
3. **Model tolerance and respect:** Child learn how to interact with others by watching how you discuss, relate to, and value people.

Question 23: Tips for Making Friends

Here are some tips for making friends.

1. Children play with others; they build skills that help them with friendships now and in the future.
2. These are skills like sharing, taking turns, cooperating, listening to others, managing disagreements, and seeing other people's points of view.
3. Child might need to negotiate when playing with a sibling and deciding what to play or who gets to use a particular toy.
4. Showing interest in what others are saying and asking questions.
5. Family meals can be a great time to role-model these skills and give your child a chance to practice them.
6. Winning and losing graciously: is another skill you can model.
7. Give your child and their friends different options for playing: Praise the children when they decide on something together.

ECE 204 MID and Final TERM FILE

ZB

Question 24: Social rules for social skills

Here there are different social rules for social skills.

- Meet and greet politely: Say greetings, introductions, and goodbyes
- Politely offer and receive compliments
- Take turns talking: Listen when others are speaking and look them in the eye
- Don't interrupt
- Respond appropriately and at the right time
- Pay attention to others: Stop what you're doing so you can listen
- Read people's emotions through their body language
- Change your behavior to match what other people are doing
- Think about others before acting: Don't touch without asking
- Don't cut in line, Wait your turn
- Cooperate with others: Follow directions when you're asked to
- Ask for help when you need it
- Apologize when necessary
- Be flexible and open to new ideas.

Question 25: Classroom behavior

Its stimulus-driven responses that occur specifically within the classroom or how students are acting in the classroom in response to what is going on or present around them. Classroom behavior falls into two categories.

1. Positive behavior includes following directions, completing assignments and remaining attentive while teacher speaks.
2. Negative behavior includes being physically aggressive or threatening others, talking out of turn and playing spiteful pranks.

Teachers usually associate poor classroom behavior with poor academic achievement.

For this reason, classroom management in classrooms usually revolves around behavior modification.

Question 26: Work habits in Classroom

Successful students have a basic handle on time management and planning. They use a planner, set small goals and learn to pay attention to a watch or clock. They don't just get organized,

ECE 204 MID and Final TERM FILE

ZB

they stay organized. Set up a homework routine at a consistent time each day. Get everything ready in the backpack the night before. They distribute their practice: Tasks and time distribution. They know how to take notes in class: In the form of short key words. They study using active recall. Write down the term, concept, or problem to solve. They approach their mistakes correctly. They have a habit of reviewing.

Question 27: Seeking Attention in Classroom

Here are some directions that might help kids to seek their attention in the classroom.

- Help students understand and let students know right away exactly why you need them immediately responsively.
- Clap once, clap twice:
- Use a timer:
- Stand in a designated spot:
- Count backwards from 4:
- Thank students that are already quiet individually.
- Use a notable name: Use a key word or phrase that grab's attention—or even have a monthly theme.
- Use a stop light: it's perfect, Green they can talk, yellow they're becoming quiet, red they're silent.
- Use an app.
- Have they stand.

Question 28: Learning an internal dialog to cool oneself down and reflect upon the best course of action

Learning an Internal Dialog to Cool oneself down. Negative self-talk will prevent you from living a positive life. The conversations you have with yourself often turn into self-fulfilling prophecy.

Imagine someone who thinks, "I'm socially awkward and no one wants to talk to me. Many of your thoughts are automatic. They just pop into your head without any conscious effort.

So, it's important to take a second to evaluate your thoughts, so you can recognize thoughts that are unrealistic, unproductive or irrational.

Question 29: Using words instead of physical contact in conflicts

ECE 204 MID and Final TERM FILE

ZB

There are different ways for resolving conflict with others:

1. **Help them verbalize their feelings:** Show children pictures of faces with different expressions and ask them to explain what they think the person depicted is feeling.
2. **Practice conflict scenarios:** Come up with an example scenario for two children to act out in front of the class.
3. **Good behavior:** When you find yourself in conflict with a student be sure to handle it calmly and rationally to provide a good model of problem solving for your students. Go to a quiet area, practice listening without interrupting, and other good solving skills.

Question 30: Code of ethics: What about it

The code of ethics is like a code of conduct in that it establishes behavior expectations that an organization. A code of ethics dives deeper into the principles that should guide their actions and touches upon issues such as safety, and conflicts of interest. The purpose of a code of ethics is to inform those acting on behalf of the organization how they should conduct themselves. A code of ethics reiterates the organization's values and morals so that employees and third parties understand the standards they are accountable to uphold.

Question 31: Teaching Ethics in the Classroom

The core of teaching consists of four basic values: dignity, truthfulness, fairness and responsibility & freedom. All teaching is founded on ethics whether it be the teacher-student relationship, pluralism or a teacher's relationship with their teaching. Everyone in the classroom practice respect and wellbeing as a central motivation for learning. As a teacher, you are the orchestrator. Respect and compassion mean that you cannot disregard bad actions and must be addressed without impeding the course of learning.

Question 32: Principles of Teaching Ethics

Here are the different principles of teaching ethics discussed.

1. Allow everyone to be notified for participation in class.
2. Mention students' good behavior and successful completion of assignments.
3. Sit or listen when a student is making an important point.
4. Write good ideas on the board for later consideration.

ECE 204 MID and Final TERM FILE

ZB

5. Teach the art of piggybacking ideas in class discussion so that students learn to connect what they are saying to the ideas of the person who spoke before them.
6. Remember that your own physical presence in the room models your mission.

Passing criteria for a course

ECE 204 MID and Final TERM FILE

ZB

Letter Grade	Grade Points	Equivalent Percentage
A+	4.00	90-100
A	4.00	85-89
A-	3.66 - 3.99	80-84
B+	3.33 - 3.65	75-79
B	3.00 - 3.32	71-74
B-	2.66 - 2.99	68-70
C	2.00 - 2.65	61-67
D	1.00 - 1.99	50-60
F	0.00	00-49

Passing Criteria for a Course:

The passing criteria is defined in such a way that it ensures the student shall be consistent in his studies throughout the semester.

Therefore, for passing a course/subject, student shall fulfill the following:

- a) Secure minimum **20%** score in Formative Assessments/Mid terms
- b) Secure minimum **20%** score in Final Term Examinations.
- c) Secure at least **40%** marks in aggregate while fulfilling the above requirements

Course Selection and Credit Hours

Q: How do I select courses when the course selection is open?

A: Follow these steps:

1. Check the credit hours allowed by your university (e.g., 21, 18, or 15 credit hours).

ECE 204 MID and Final TERM FILE

ZB

2. Each subject typically has 3 credit hours.

3. Divide the total allowed credit hours by 3 to determine how many subjects you can select.

Examples:

21 credit hours = 7 subjects

18 credit hours = 6 subjects

15 credit hours = 5 subjects

Remember, the university may allow different credit hours for each student, so check your specific allowance.

By following these steps, you can make informed decisions during course selection and manage your credit hours effectively.

.....**My Family**.....

"Just Relax and focus! Exams are not difficult. Put in your 100% effort and trust in Allah.

..**AL-Quran**.....

"And indeed, with hardship comes ease." (Quran 94:5)

Remember, I'm here to support you! Stay brave and strong!"

May Allah bless you
