

SUBJECTIVE PAPER

ENG523

01: Write Types of Speech Acts.

Types of Speech Acts

There are various kinds of speech acts, yet the following, classified by John Searle, have received particular attention:

Representatives

Commit a speaker to the truth of an expressed proposition.

Paradigm cases: asserting, stating, concluding, boasting, describing, suggesting.

- I am a great singer.
- Bill was an accountant.

Commissive

Commit a speaker to some future action.

Paradigm cases: promising, pledging, threatening, vowing, offering.

- I am going to leave you.
- I'll call you tonight.

Directives

Are used by a speaker who attempts to get the addressee to carry out an action.

Paradigm cases: requesting, advising, commanding, challenging, inviting, daring, and entreating.

- You'd better tidy up that mess.
- Sit down.

Declarations

Affect an immediate change of affairs.

Paradigm cases: declaring, baptizing, resigning, firing from employment, hiring, arresting.

- We find the defendant guilty.
- I resign.

Expressive

Express some sort of psychological state.

Paradigm cases: greeting, thanking, apologizing, complaining, congratulating.

- This beer is disgusting.
- I'm sorry to hear that.

02: What is Exchange Context?

An exchange is a sequence of **discourse** moves by at least two speakers that forms a topical (or sub topical unit). A minimal **exchange** comprises an initiating move plus a contribution by another speaker. There are **two classes** of exchanges; boundary exchanges and teaching exchanges (Sinclair and Coulthard, 1992, pg.25). Boundary exchanges contain two moves, **framing and focusing moves**. The only three principals of teaching exchanges described by Sinclair and Coulthard are **informing, directing, and eliciting exchanges**.

03: What is Eliciting Exchange?

The **most common** exchange in the classroom is an eliciting exchange (Willis, 1992, pg.113). These exchanges begin with the teacher asking a question (usually one they already know the answer to). An answer is then given by the student, and finally a **follow-up evaluation** by the teacher. (Hellermann, 2003, pg.80). Here is an example from the study done by Sinclair and Coulthard.

04: Differentiate between language ideologies and attitudes.

Language ideologies and language attitudes are **conceptual tools** used to understand speakers' feelings and ideas about languages and linguistic forms. Both concepts recognize the importance of linguistic subjectivity in understanding language change, identity, and socioeconomic context. They share similarities in focusing on speakers' feelings and beliefs about language structure and use. However, they differ in their historical development, methodological approaches, and fields of concern.

Language attitudes typically involve **quantitative measurement** of speakers' reactions, while language ideologies employ **qualitative methods** like ethnography, conversational analysis, and discourse analysis. Language ideologies emphasize how speakers' beliefs

and feelings are shaped by their social experiences and political economic systems, and how their awareness of language forms and functions is crucial.

Despite these differences, both concepts aim to understand speakers' perspectives on language and its role in shaping identity and society. By recognizing the complementary strengths of both approaches, researchers can gain a more comprehensive understanding of language and its complex role in human communication.

05: what is Illocutionary act?

It is performed as an act of saying something or as **an act of opposed to saying something**. The illocutionary utterance has a certain force of it. It well well-versed with certain tones, attitudes, feelings, or emotions. There will be an intention of the speaker or others in illocutionary utterance. It is often used as a tone of warning in day today life.

06: what is Spoken discourse?

Language's use in face-to-face interactions such as conversations, meetings, and discussions. Spoken discourse refers to the study and analysis of spoken language and communication in real-time contexts. It encompasses various forms of verbal interactions, such as conversations, dialogues, interviews, and speeches.

07: What is Discourse community?

A group of people who share a common language, values, and practices, often with a shared goal or interest, and who use language to construct and maintain their identity and relationships.

08: What is Conversation Analysis?

A methodology for studying social interactions, particularly conversations, to understand how people use language to create social order and meaning. Conversation analysis (CA) is an approach to the study of social interaction that emerged in the **1960s**. Conversation analysis works with recordings of spoken data and carries out careful and fine-grained analyses of this data. Conversation analysis is an approach to the analysis of spoken discourse that looks at the way in which people manage their everyday conversational interactions. It examines how spoken discourse is organized and develops as speakers carry out these interactions.

09: What are the main features of talk as transaction?

- ❖ It has a primarily information focus.
- ❖ The main focus is on the message and not the participants.
- ❖ Participants employ communication strategies to make them understood.

- ❖ There may be frequent questions, repetitions, and comprehension checks, as in the Example from the preceding classroom lesson.
- ❖ There may be negotiation and digression.
- ❖ Linguistic accuracy is not always important.

10: What are the skills involved in using talk for transactions?

- ❖ Explaining a need or intention
- ❖ Describing something
- ❖ Asking questions
- ❖ Asking for clarification
- ❖ Confirming information
- ❖ Justifying an opinion
- ❖ Making suggestions
- ❖ Clarifying understanding
- ❖ Making comparisons
- ❖ Agreeing and disagreeing

11: What is an Adjacency pair?

An adjacency pair is a unit of conversation that contains an exchange of one turn each by two speakers. The turns are functionally related to each other in such a fashion that the first turn requires a certain type or range of types of second turn. Pairs of utterances such as **greeting-greeting and apology-acceptance** are called adjacency pairs.

12: What is race?

“Races are defined as Races are groups of people with different gene patterns, but they can still share and mix genes with each other, usually depending on where they live.” Race is considered as a biological, genetically determined concept. The continued use of the term ‘race’ intensifies the **problems of racism**. Social constructs used to categorize people into groups based on physical characteristics, often leading to discrimination, prejudice, and inequality.

13: Oral Language functions.

In oral language some common functions may include:

- Giving instructions
- Making requests
- Defending an argument

In academic writing we use a range of specific functions in order to communicate ideas clearly. These include:

- Describing processes
- Comparing or contrasting things or ideas
- Classifying objects or ideas

14: Five features write about religious by John Du Bois?

John Du Bois (1996) identified some of the features of Religious language:

- ❖ Use of rituals
- ❖ Archaic elements
- ❖ Euphemism and metaphor
- ❖ Semantic opacity
- ❖ Unusual fluency
- ❖ Magic words

15: Discourse and language choice and how it influences the communication in a social context?

Discourse and language choice is a variation of language when we interact with the other communities as explained by Holmes (2001) that the choice of language is being used in such as, with family, among friends, and in religious, educational and employment settings. Social factors such as who we are speaking to, the social context of the interaction, the topic, function and goal of the interaction, social distance between speakers, the formality of the setting or type of interaction and the status of each of the speakers are also important for accounting for the language choice that a person makes in these kinds of settings.

16: How Language form deals with?

A **language function** refers to what students do with language as they engage with content and interact with others. Functions represent the active **use of language** for a specific purpose. Language **forms** deal with the internal grammatical structure of words and phrases as well as the word them. Students use language functions in order to express ideas, communicate with others, and show understanding of content in an academic setting.

17: Discourse markers and their functions?

Discourse markers are words or phrases that serve as linguistic signals to indicate the organization, structure, and coherence of discourse. They help speakers and listeners

navigate the flow of conversation, understand relationships between ideas, and interpret the speaker's intentions.

- to **initiate discourse**
- to **mark a boundary** in discourse (shift/partial shift in topic)
- to preface a response or a reaction
- to serve as a filler or **delaying tactic**
- to aid the speaker in holding the floor
- to affect an interaction or sharing between speaker and hearer
- to bracket the discourse either cataphorically or anaphorically
- To mark either foregrounded or backgrounded information."

18: What is Coherent discourse?

Coherent discourse refers to communication that is logically organized, well-structured, and easy to follow. In coherent discourse, ideas are connected in a clear and logical manner, making it possible for the listener or reader to understand the intended message without confusion.

19: primary focus of Discourse Analysis.

Discourse analysis primarily focuses on the study of language in use, particularly in social contexts. It examines how language is used to construct meaning, identities, and power relations in various forms of communication, such as conversations, interviews, texts, and media. Discourse analysis often explores how language shapes and reflects social practices, ideologies, and cultural norms. Researchers in this field analyze the structure, content, and context of discourse to uncover underlying patterns, implicit meanings, and social implications. They may employ various theoretical frameworks and methodological approaches to interpret and critique discourse, aiming to understand how language influences social interactions and shapes our understanding of the world.

20: What is Prejudice?

Allport's definition of prejudice as "an antipathy based upon a faulty and inflexible generalization". Prejudice is defined as a form of social cognition shared by the members of dominant in-groups. This interdisciplinary problem is discussed against the background of recent developments in cognitive psychology, social psychology and micro sociology about the nature of social information processing and the cognitive representation of groups, intergroup episodes and social conflict.

21: What are three aspects that explore linguistic context?

Three aspects that explore linguistic context

- **Deictic**

- **Co-text**
- **Collocation**

22: What is Notion of text?

The notion of text type is an abstract category designed to characterize the main structure of a particular text or one of its parts according to its dominant properties. It is intended to integrate common features of historically varying genres (novella, novel, short story, etc.) and therefore to reduce the complexity of the many overlapping kinds of texts to distinct textual phenomena.

23: Explain Grice's cooperative principle.

Grice's cooperative principle is a set of norms that are expected in conversations. It consists of **four maxims**; we have to follow in order to be cooperative and understood:

Maxim of quality:

As speaker we have to tell the truth or something that is provable **by adequate evidence.**

Maxim of quantity:

We have to be as informative as required, we should not say **more or less.**

Maxim of relation:

Our response has to be relevant **to the topic of discussion.**

Maxim of manner:

We have to avoid ambiguity or obscurity; we should be **direct and straightforward.**

24: what is written discourse?

Written discourse refers to any form of communication that is produced and transmitted in written form. It encompasses a wide range of texts, from simple notes and emails to complex academic papers and literary works. Written discourse is characterized by its permanence and the absence of immediate feedback, unlike spoken discourse where interactions are often more dynamic and ephemeral. Examples of written discourse include novels, essays, research papers, letters, memos, reports, advertisements, websites, and social media posts.

25: Write Austin division speech act into three different categories.

They are,

1. Elocutionary act:

This is the **act of saying something**. It has a meaning and it creates an understandable utterance to convey or express.

2. Illocutionary act:

It is performed as an act of saying something or as an **act of opposed to saying something**. The illocutionary utterance has a certain force of it. It is well-versed with certain tones, attitudes, feelings, or emotions. There will be an intention of the speaker or others in illocutionary utterance. It is often used as a tone of warning in day-to-day life.

3. Perlocutionary act:

It normally creates a sense of **consequential effects on the audiences**. The effects may be in the form of thoughts, imaginations, feelings or emotions. The effect upon the addressee is the main characteristic of perlocutionary utterances.

26: What is Speech community?

Speech community is a term in sociolinguistics and linguistic anthropology used to describe a group of people who share the same language, speech characteristics, and ways of interpreting communication. The concept of speech community plays a role in a number of social sciences, namely sociology, anthropology, linguistics, even psychology.
