

CS615 FinalTerm Solved MCQs By Umair Sid

(VISIT VURANK FOR MORE)

Which of the items listed below is not one of the software engineering layers?

? Process ? **Manufacturing** ? Methods ? Tools

The software quality assurance activity which is performed to check errors in logic, function, or implementation for any representation of the software is called :

? Inspection ? **Formal technical review(s)** ? Walkthrough ? Auditing

The nature of software applications can be characterized by their information

? complexity ? content ? determinacy ? content and determinacy

Extent to which the program can be used in more than one program or system is called ---

? Portability ? **Reusability** ? Interoperability ? Configurability

Cost, effort, risks, and resources are the factors included in-----

? **Estimation** ? Testing ? Development ? Maintenance

A node on a network schedule is that point in time at which an activity -----.

Begins **Begins or Ends** Ends None of given

REF: A node on a network schedule is that point in time at which an activity either begins or ends.

A _____ is defined as "the work breakdown that covers the acquisition of a specific defense material item and is related to contractual effort."

Program WBS Contract WBS Contract Program WBS None of given

REF: A Program WBS is defined as "the work breakdown that covers the acquisition of a specific defense materiel item and is related to contractual effort."

Using PERT and CPM, _____, helps you complete a project on time. By using these techniques, you can determine the latest time by when an activity should start to be

completed on time.

Individually Combination **Individual and Combine** None of given

REF: Using PERT and CPM, individually or in combination, helps you complete a project on time. By using these techniques, you can determine the latest time by when an activity should start to be completed on time.

Predecessor activities need to — before the next can begin. After a predecessor activity is completed, the successor activity becomes the predecessor for another activity.

Both start and end **End** Start None of given

A _____ extends the Program WBS to a lower level in order to provide management and cost information to the Government
Select correct option:

Program WBS **Contract WBS** Contract Program WBS None of given

REF: A Contract WBS extends the Program WBS to a lower level in order to provide management and cost information to the Government.

Which of the following tools and techniques shows the impacts of one decision over another as well as the probability and cost of each risk along a logical path?

Simulation **Decision tree** Probability / impact risk matrix Sensitivity analysis

To _____ risks from occurring, the project team prepares the risk plan before the commencement of the project.

Avoid Deal None of given Manage

REF: To avoid risks from occurring, the project team prepares the risk plan before the commencement of the project.

..... theory when the deliverables of a project are more important than its phases. This normally happens when the deliverables are decided before the project begins.

Project life-cycle-based Scheduled None of given **Deliverable-based**

REF: You use the deliverable-based theory when the deliverables of a project are more important than its phases. This normally happens when the deliverables are decided before the project begins.

Risk analysis and management are a series of steps that help a software team to understand and manage _____.

Uncertainty Crises None of given Problem

REF: Risk analysis and management are a series of steps that help a software team to understand and manage uncertainty.

There are _____ types of Work Breakdown Structures.

None of given **Two** Three Four

Which of the following tools and techniques shows the impacts of one decision over another as well as the probability and cost of each risk along a logical path?

Simulation **Decision tree** Probability / impact risk matrix Sensitivity analysis

Which of the following is displayed as an S-curve?

Gantt **Cost baseline** Critical path PERT

REF: The cost baseline is graphically displayed as an S-curve.

Over the course of the project, a comparison of the due date and the date delivered provides a metric for how well deliverable dates are by the project team.

Met Scheduled None of given Changed

REF: Over the course of the project, a comparison of the due date and the date delivered provides a metric for how well deliverable dates are met by the project team.

Each can be subdivided into sub tasks.

None of given Program **Task** Project

REF: Each task can be subdivided into sub tasks.

Which of the following tools and techniques shows the impacts of one decision over another as well as the probability and cost of each risk along a logical path?

Simulation **Decision tree** Probability / impact risk matrix Sensitivity analysis

A _____ is defined as "the work breakdown that covers the acquisition of a specific defense material item and is related to contractual effort."

Program WBS

Contract WBS

Contract Program WBS

None of given

Which of the following is displayed as an S-curve?

Gantt

Cost baseline

REF: The cost baseline is graphically displayed as an S-curve.

..... theory when the deliverables of a project are more important than its phases.
This normally happens when the deliverables are decided before the project begins.

Project life-cycle-based

Scheduled

None of given

Deliverable-based

Using PERT and CPM, _____, helps you complete a project on time. By using these techniques, you can determine the latest time by when an activity should start to be completed on time.

individually

Combination

Individual and Combine

None of given

REF: To avoid risks from occurring, the project team prepares the risk plan before the commencement of the project.

..... theory when the deliverables of a project are more important than its phases.
This normally happens when the deliverables are decided before the project begins.

Project life-cycle-based

Scheduled

None of given

Deliverable-based

REF: You use the deliverable-based theory when the deliverables of a project are more important than its phases. This normally happens when the deliverables are decided before the project begins.

Risk analysis and management are a series of steps that help a software team to understand and manage _____.

Uncertainty

Crises

None of given

Problem

REF: Risk analysis and management are a series of steps that help a software team to understand and manage uncertainty.

There are _____ types of Work Breakdown Structures.

None of given

Two

Three

Four

To aid planning, scheduling, and monitoring a project, you can use tools_____

PERT and CPM Timeline
given

charts and Gantt charts

Both of given

None of

REF: To aid planning, scheduling, and monitoring a project, you can use tools such as:

- Program Evaluation and Review Techniques (PERT)
- Critical Path Method (CPM)
- Timeline charts
- Gantt charts

CSOM stands for_____

Computer system operator's manual

Computer system offered manual Computer

software operator's manual

Computer system obvious manual

REF: Computer system operator's manual CSOM

The DIDs (Data Item Description) includes a section called _____

Formal Documentation

Preparation Instruction

Associated Documentation

Effective Resolution

_____ is identifying the specific activities that must be performed to produce the various project deliverables

Scope Planning Scope

Definition Activity

Definition Activity

Duration Estimating

Activity

Definition

REF: Activity Definition—identifying the specific activities that must be performed to produce the various project deliverables.

Effective project managers_____

Lead by example Are visionary

Are good motivators, communicators, supports team members and stand up to upper management where necessary?

All of given

_____ identifying and documenting interactivity dependencies

Select correct option:

Activity Definition Activity

Sequencing Activity

Duration Estimating

Resource Planning

REF: Activity Sequencing—identifying and documenting interactivity

Dependencies. To expand or contract project scope, to modify cost, or schedule estimates are examples of _____

Work results **Change request** Change schedule Change scope

_____ is based on soft skills and relies more on human factors, such as collecting information during group discussions

Source lines of Code (SLOC) Function Point (FP) Constructive Cost Model (COCOMO) **Delphi technique**

REF: Delphi Technique: This technique is based on soft skills and relies more on human factors, such as collecting information during group discussions.

The Data Item Descriptions define the formal documentation standards for all required documents generated during the development of software according to standard

2276 **2167** 1267 2267

REF: The Data Item Descriptions define the formal documentation standards for all required documents generated during the development of software according to standard 2167.

There are _____ Planning Process Tasks

Ten Thirteen **Fifteen** Seventeen

Lessons learned are important to document because an organization can use them to improve future projects and the Project Management process. Therefore, in project closing procedures, it is helpful to review the

Checklists for risk identification WBS Original contract **All of given**

_____ technique used to integrate the project's scope, schedule, and resources and to measure and report project performance from initiation to closeout

PMIS **EVM** Stakeholder skills and knowledge PV

REF: Earned value management (EVM). A technique used to integrate the project's scope, schedule, and resources and to measure and report project performance from initiation to closeout.

In _____ the planner develops estimates of the information domain.

Function point sizing Standard component sizing Change sizing All of given

Which of the following is not true?

It is important to select the best people for jobs and then instruct them in the best methods

The team leader need not assess the training needs of his team members

It is good to improve productivity by encouraging reuse of existing software components

It would be good if the employees consider work as natural as rest or play and they like it

Effective project managers_____

Are good motivators, communicators, supports team members and stand up to upper management where necessary?

All of given Lead by example Are visionary

To expand or contract project scope, to modify cost, or schedule estimates are examples of _____

Work results **Change request** Change schedule Change scope
