Bt501 final term current paper

Total Qs=50
MCQs= 40
SQs=10
Dated: 26/8/2019

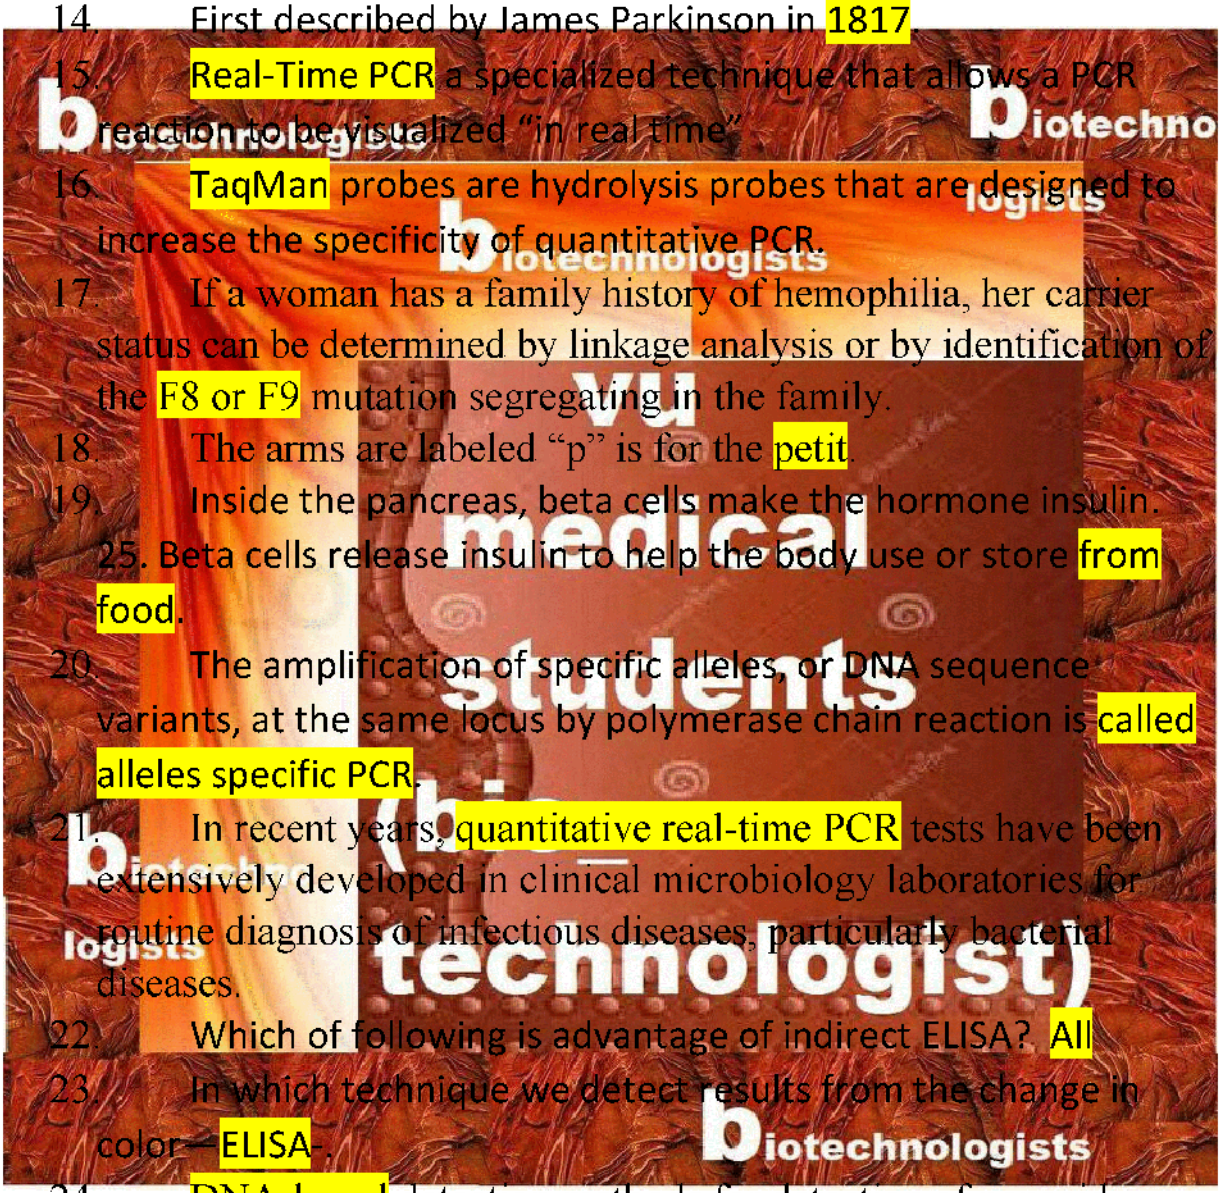

1. Penicillin discovered by Alexander Fleming in 1928
2. In January __2003, __ FDA established halt on rDNA technology products.
3. rDNA technology proposed by___ Paul Berg generated in 1972. Edward Jenner discovered vaccine in 1796 ____
4. Post blastocyte, after 4-5 days of fertilization, cells present ___ consist of 50–150____
5. Celera used ____ shotgun sequencing_____ technique for sequencing
6. **Klinefelter syndrome** patients are tall and thin and have relatively long legs. They appear physically normal until puberty, when signs of hypogonadism become obvious.
7. **Liposome** - creation of an artificial lipid sphere with an aqueous core. This carries the therapeutic DNA, is capable of passing the DNA through the target cell's membrane.
8. Called co-suppression because suppressed expression of both endogenous gene and transgene.
9. A cell that has the ability to continuously divide and differentiate (develop) into various other kind(s) of cells/tissues is called stem cells.
10. **Fetal Stem cells** are derived from aborted fetal tissue.
11. ___Proteins by the immune system to target specific foreign object antigen.
12. Genetic disorders may also be complex, multifactorial, or polygenic, meaning they are likely associated with the effects of multiplegenes in combination with lifestyles and environmental factors.

Bt501 final term current paper

12. , infantile GM2 gangliosidosis, is a panethnic autosomal recessive disorder of ganglioside catabolism that is caused by a deficiency of hexosaminidase.
13. Term Was Coined By Engvall and Pearlmann in 1971.
14. First described by James Parkinson in 1817
15. Real-Time PCR a specialized technique that allows a PCR reaction to be visualized "in real time"
16. TaqMan probes are hydrolysis probes that are designed to increase the specificity of quantitative PCR.
17. If a woman has a family history of hemophilia, her carrier status can be determined by linkage analysis or by identification of the F8 or F9 mutation segregating in the family.
18. The arms are labeled "p" is for the petit.
19. Inside the pancreas, beta cells make the hormone insulin.
25. Beta cells release insulin to help the body use or store from food.
20. The amplification of specific alleles, or DNA sequence variants, at the same locus by polymerase chain reaction is called alleles specific PCR.
21. In recent years, quantitative real-time PCR tests have been extensively developed in clinical microbiology laboratories for routine diagnosis of infectious diseases, particularly bacterial diseases.
22. Which of following is advantage of indirect ELISA? All
23. In which technique we detect results from the change in color –ELISA-.
24. DNA-based detection methods for detection of penaeid shrimp viruses are now used routinely in a number of laboratories around the world.

Bt501 final term current paper

25. Computational methods typically use computer programs to analyze proteins. However, many experimental methods (e.g., mass spectrometry) require of the raw data.

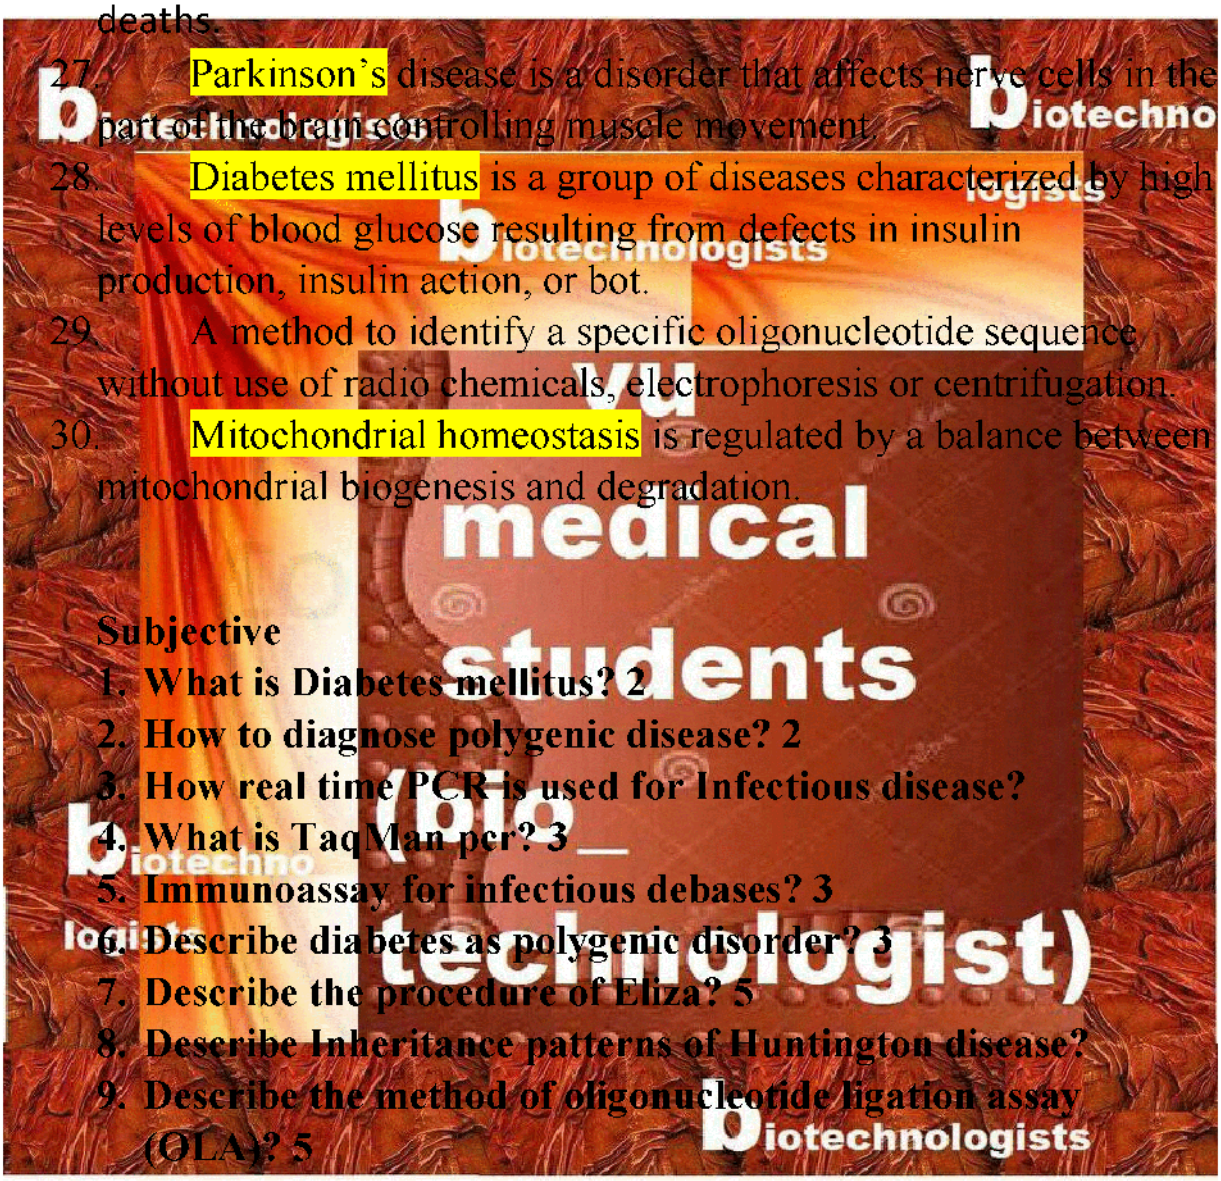

26. In 2005 CVD accounted for approximately 38 percent of all deaths.

27. Parkinson`s disease is a disorder that affects nerve cells in the part of the brain controlling muscle movement.

28. Diabetes mellitus is a group of diseases characterized by high levels of blood glucose resulting from defects in insulin production, insulin action, or bot.

29. A method to identify a specific oligonucleotide sequence without use of radio chemicals, electrophoresis or centrifugation.

30. Mitochondrial homeostasis is regulated by a balance between mitochondrial biogenesis and degradation.

Subjective

1. **What is Diabetes mellitus? 2**
2. **How to diagnose polygenic disease? 2**
3. **How real time PCR is used for Infectious disease?**
4. **What is TaqMan pcr? 3 _**
5. **Immunoassay for infectious debases? 3**
6. **Describe diabetes as polygenic disorder? 3**
7. **Describe the procedure of Eliza? 5**
8. **Describe Inheritance patterns of Huntington disease?**
9. **Describe the method of oligonucleotide ligation assay (OLA)? 5**
10. **Write a note on Parkinson's disease? 10**

Remember us in prayers
