VU Medical Zone

Answer:

Plaque is an area where the virus infection has lysed the cells.

Effort By Amaan Khan

VU Medical Zone

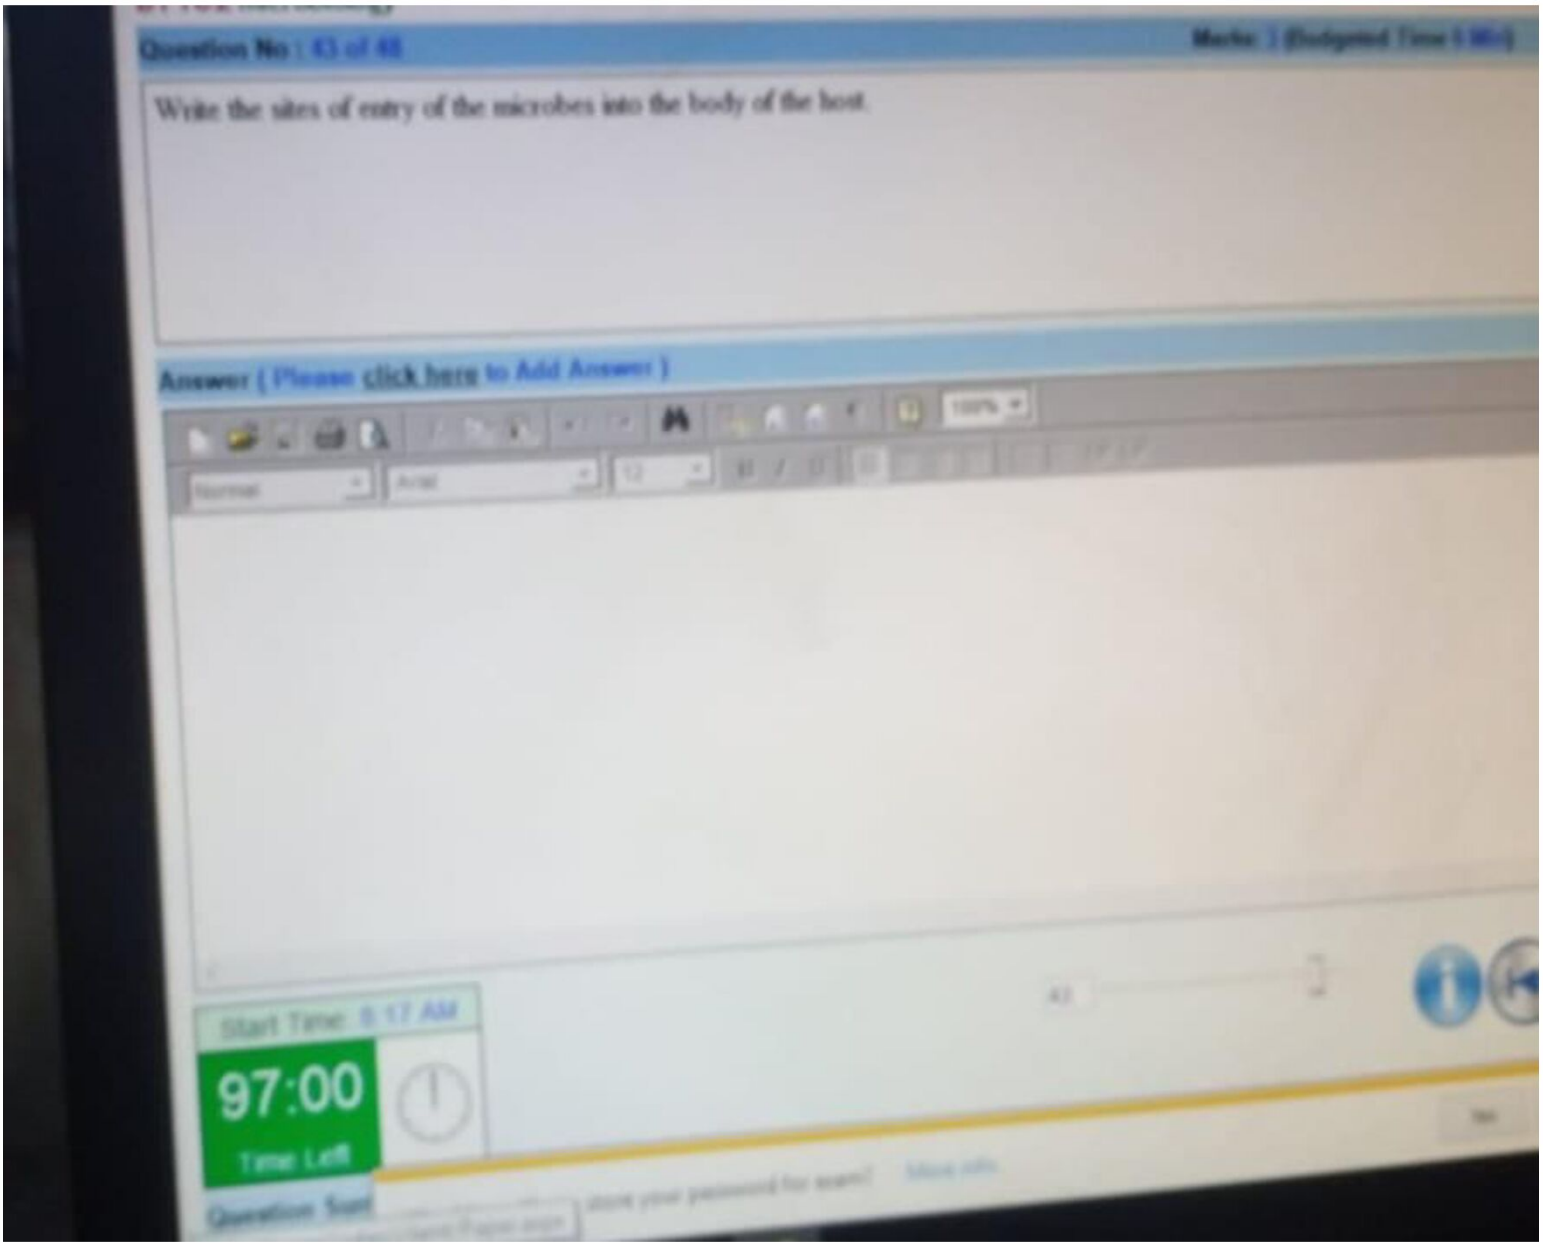

Answer:

- **Standardized inoculum spread on agar plate**
- **Filter paper disks soaked with antibacterials.**

Effort By Amaan Khan

- **Zone of inhibition is recorded**
- **Zone compared to a standard Table**

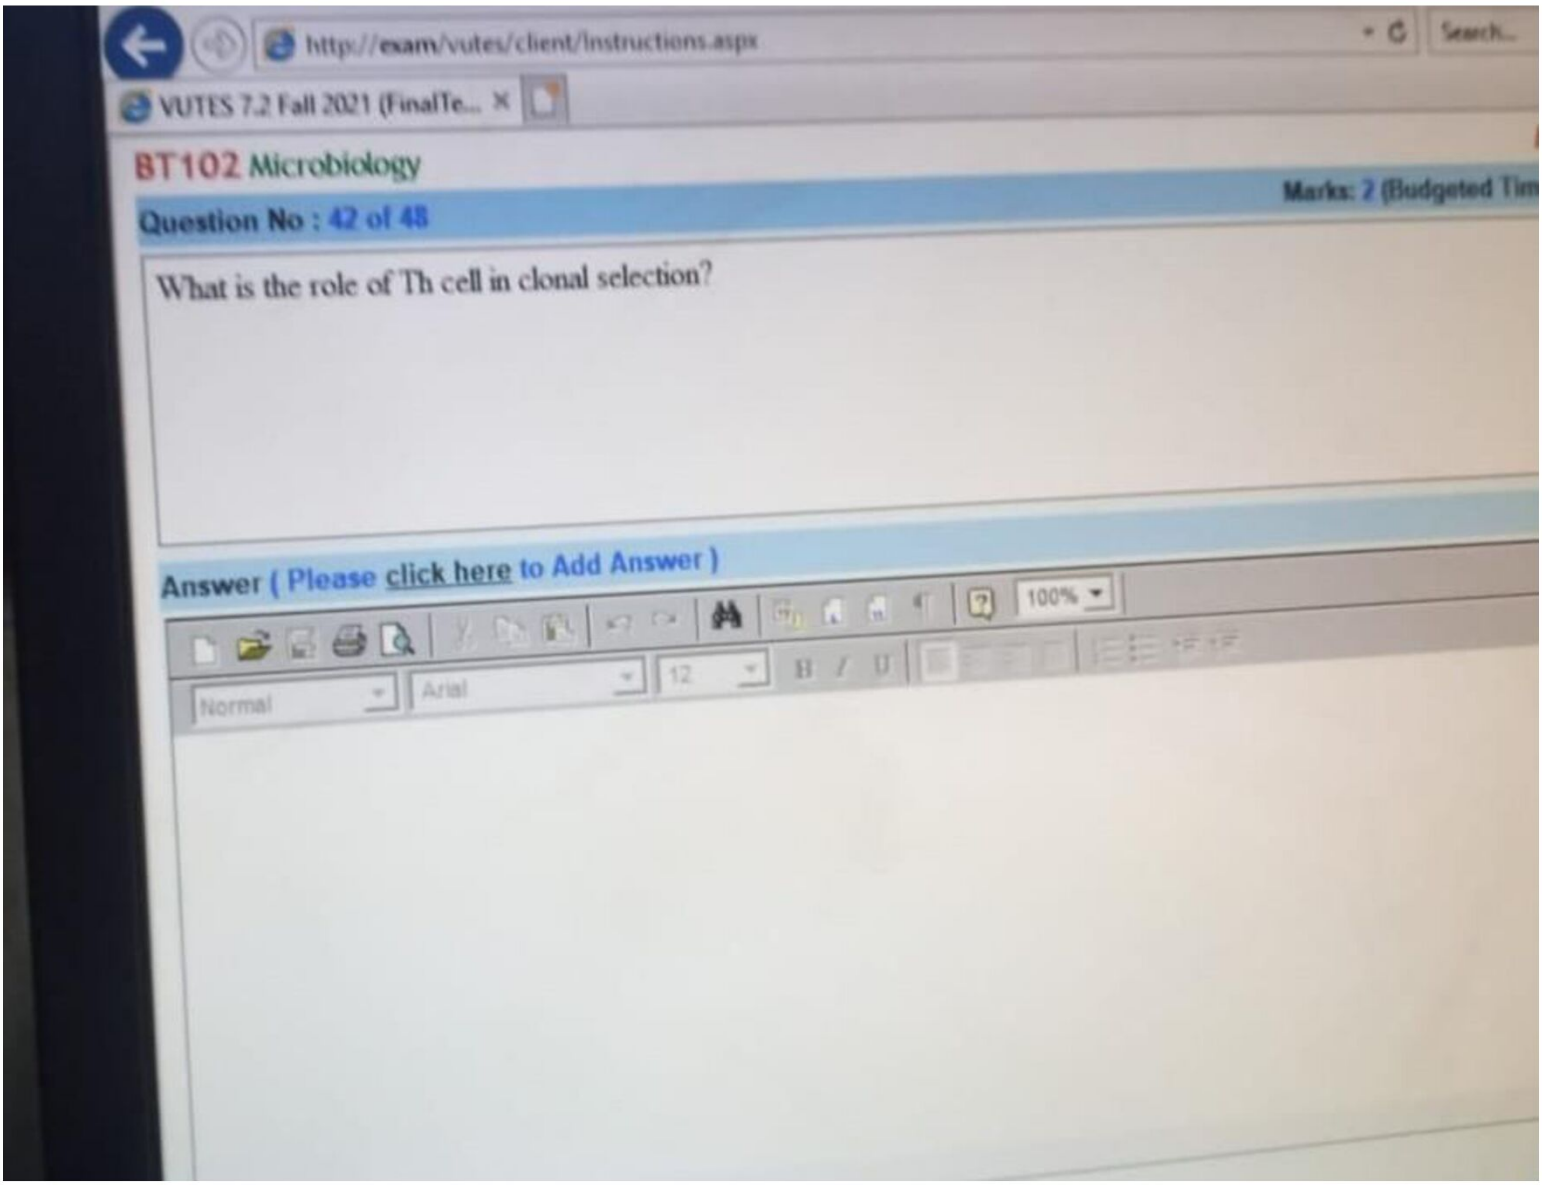

Answer:

- ☐ **Mucus membrane:**
- ☐ **Tubal organs**

Effort By Amaan Khan

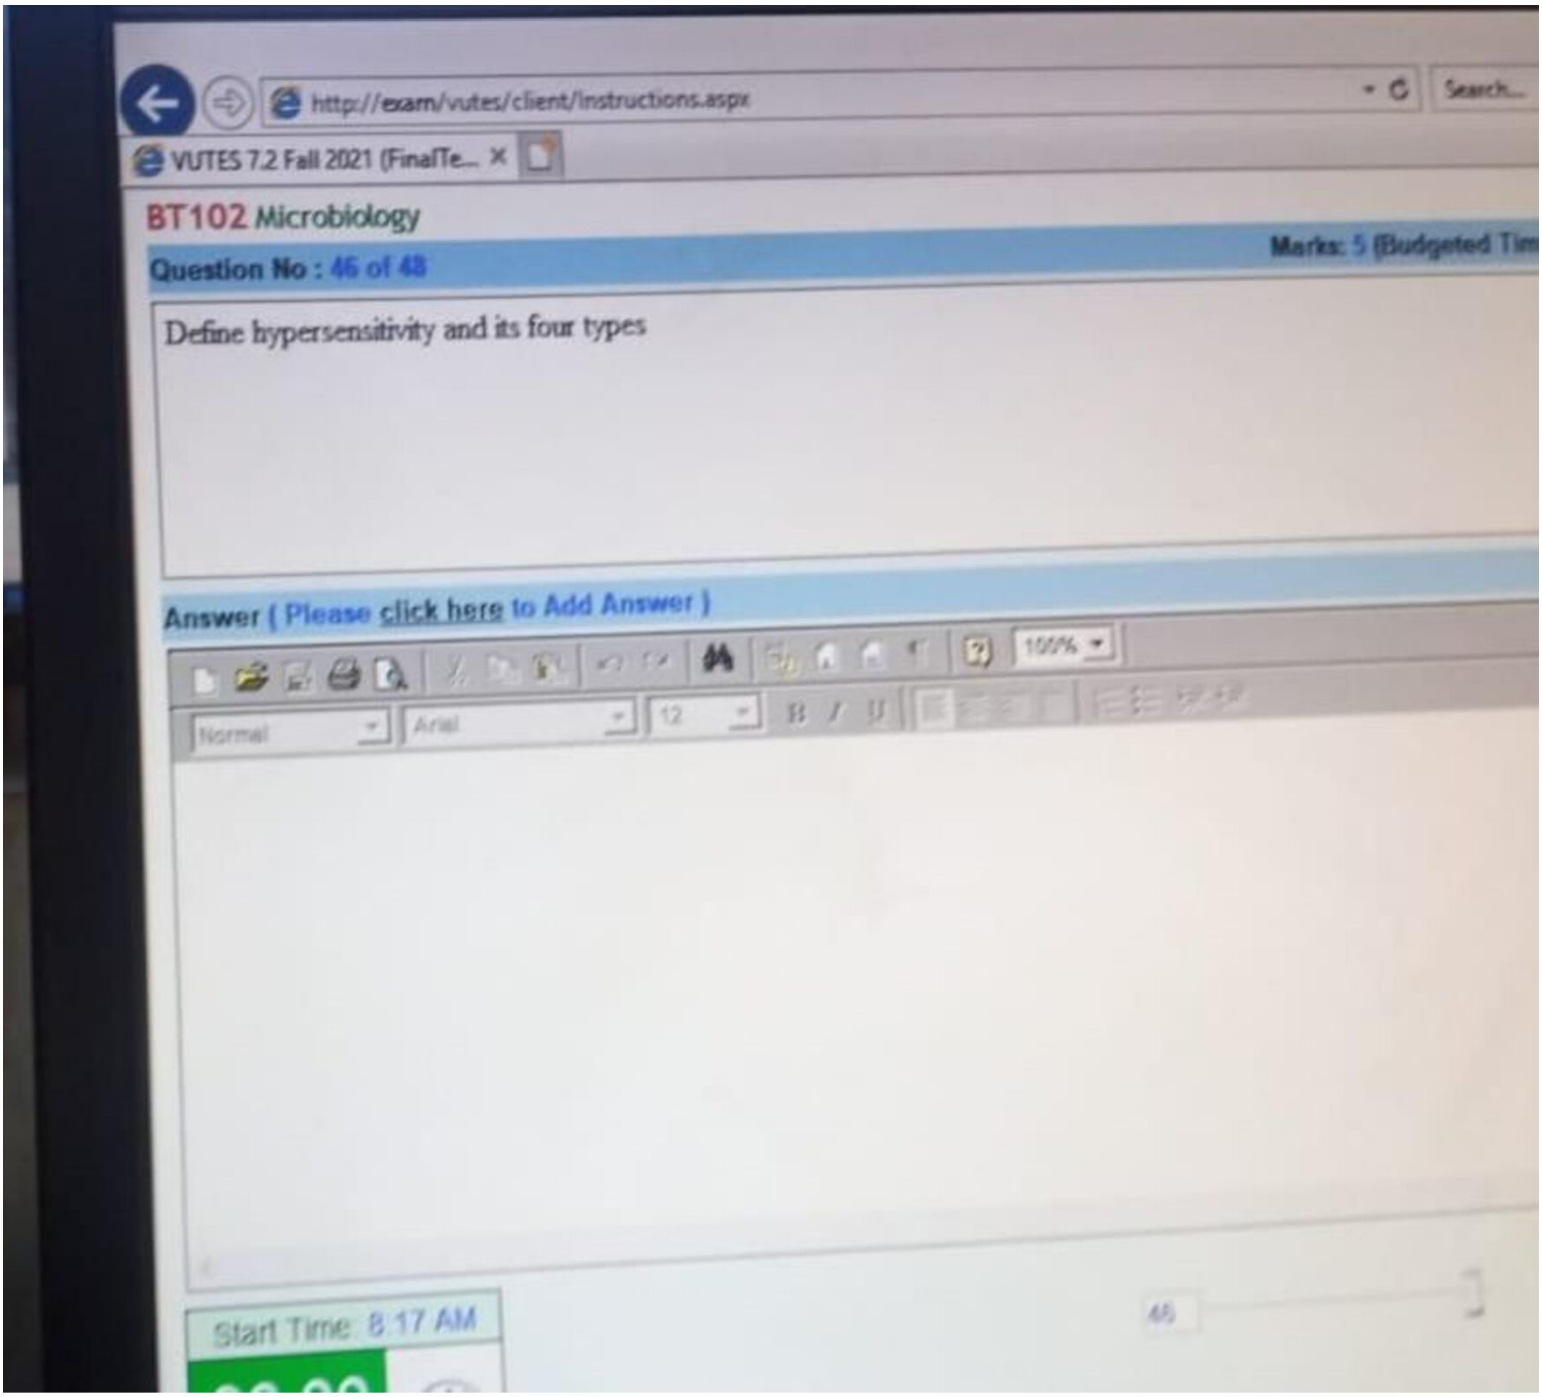

VU Medical Zone

- ☐ **Respiratory system and digestive system as largest portals**
- ☐ **Skin: It is the largest organ of the body in terms of the surface area.**
- ☐ **Parenteral route: By injury**
- ☐ **Preferred route of entry: Streptococci inhaled vs ingested**

Effort By Amaan Khan

VU Medical Zone

Answer:

Hypersensitivity: ☐ Abnormal antigenic response

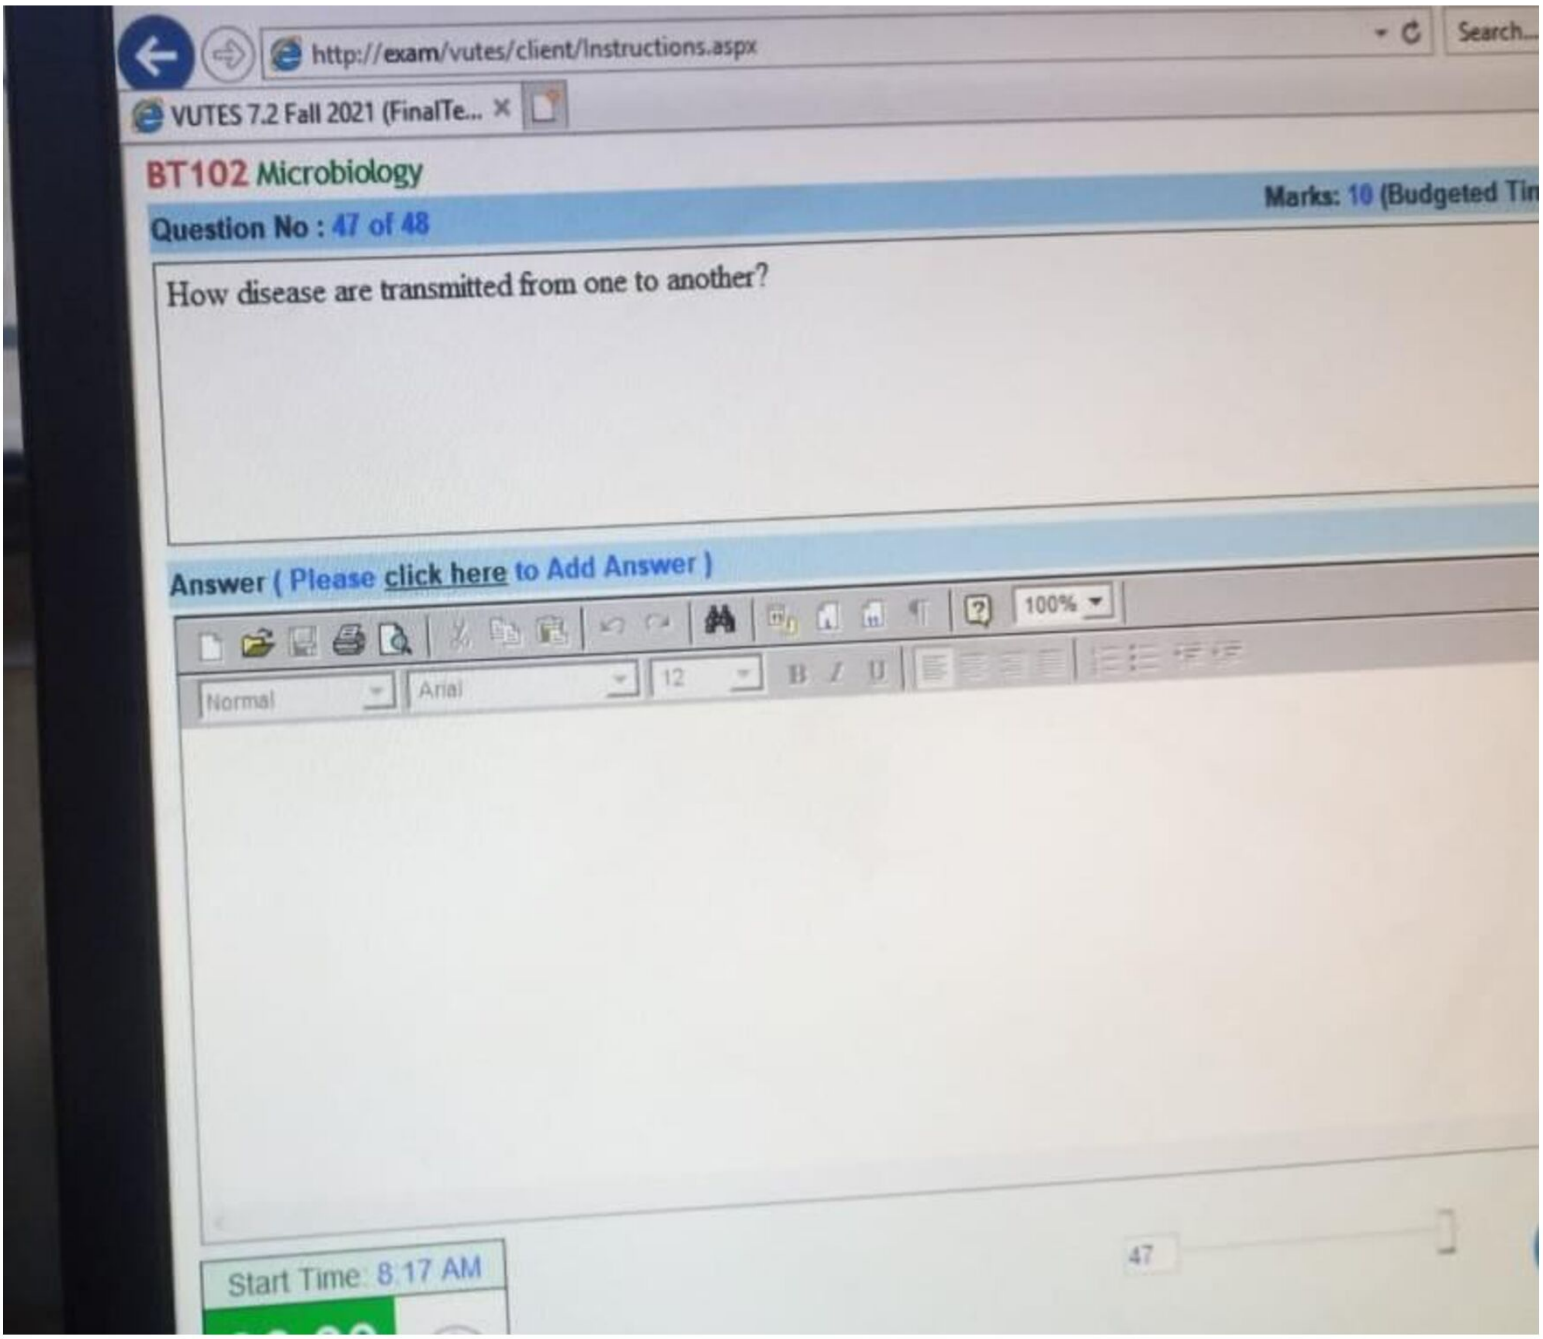

☐ Allergy: another name

☐ Those antigens are called allergens.

Effort By Amaan Khan

VU Medical Zone

- ☐ **Immune system acts in a damaging manner.**
- ☐ **Type I (Anaphylactic):**
- ☐ **Type II (Cytotoxic):**
- ☐ **Type III (Immune complex):**
- ☐ **Type IV (delayed cell mediated)**

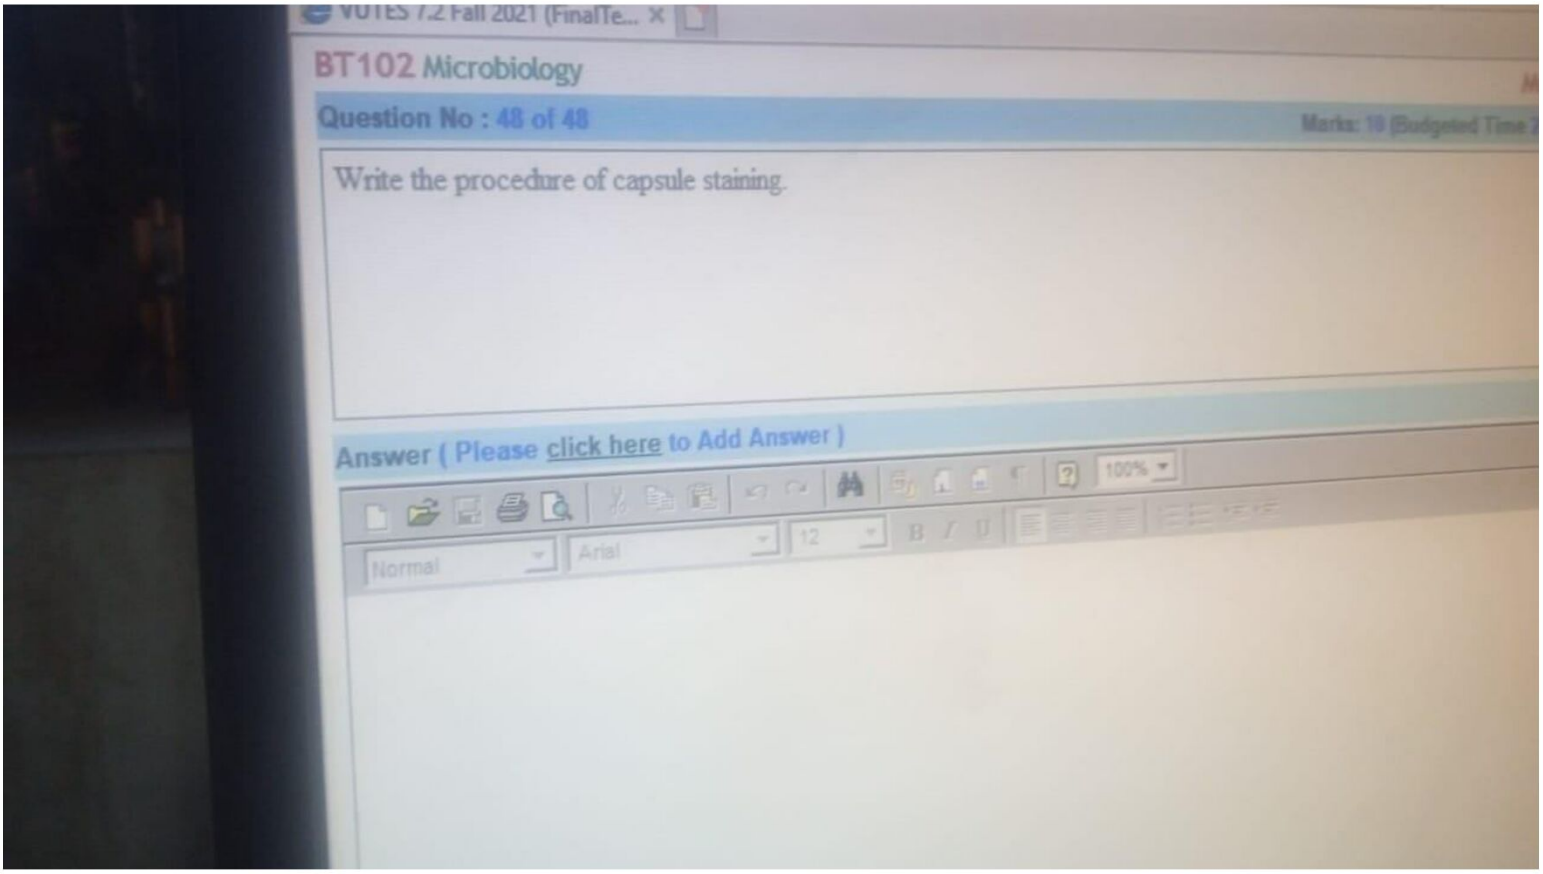

Effort By Amaan Khan

Answer:

Contact Transmission

- ☐ **Direct: person to person**
- ☐ **Physical contact**
- ☐ **Influenza**
- ☐ **Indirect: A nonliving object is involved**
- ☐ **Fomite: any nonliving object (towel, bedding)**

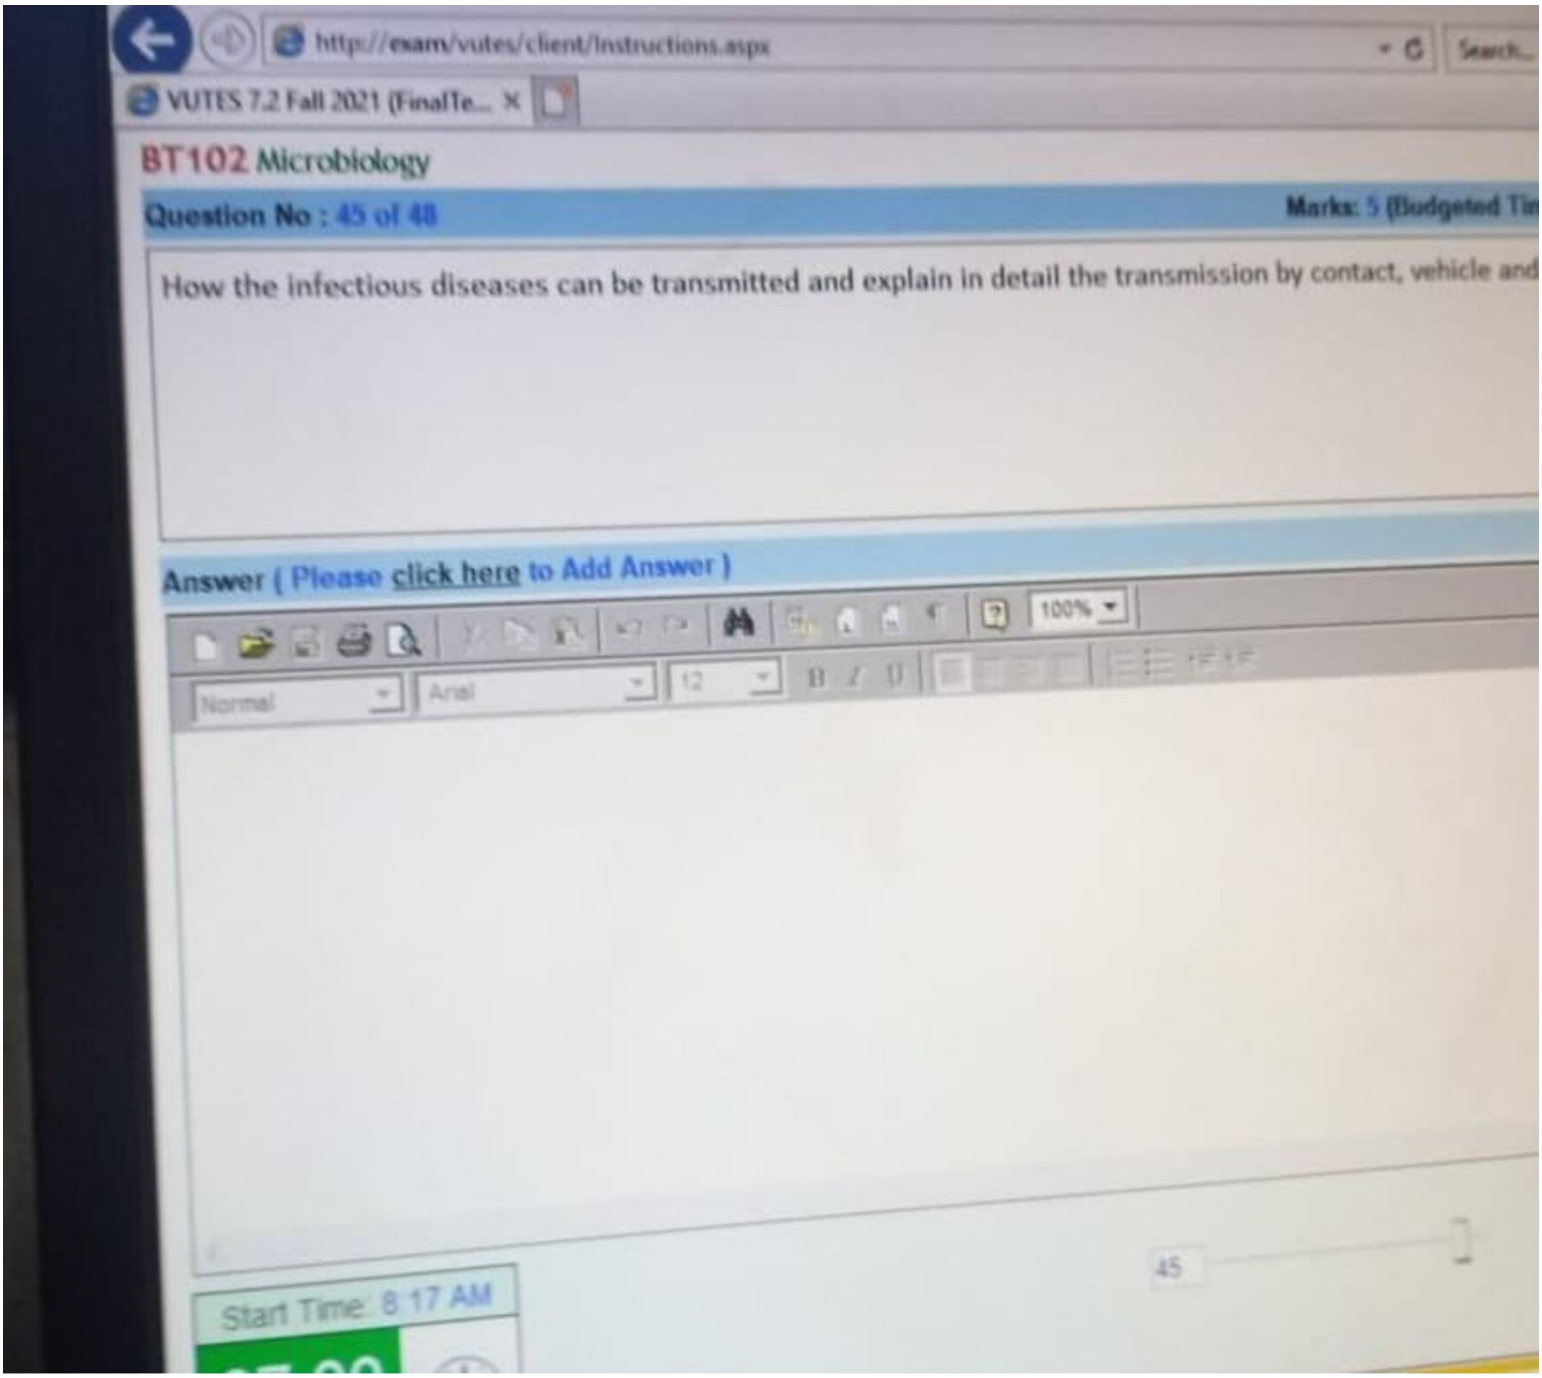

Answer:

- ☐ **Prepare a thick smear in a loopful of congo red (1%) stain**

Effort By Amaan Khan

- ☐ Fixation in acid alcohol for 15 sec
- ☐ Wash with dH20
- ☐ Cover it with acid fuchsin for 1 min.
- ☐ Wash with water
- ☐ Bacteria stains red
- ☐ Capsule colorless
- ☐ Dark blue background
