Past Papers for Mids./Finals are also Available

1. A series of how many experiments were conducted to test the Multi Mode Theory?

- Options:

- A) 2

- B) 3

- C) 4

- D) 5

- Correct Answer: A) 2

2. If you act without any particular attention, which kind of act a cognitive psychologist would consider it?

- Options:

- A) Learned

- B) Automatic

- C) Environmental

- D) Innate

- Correct Answer: B) Automatic

3. Automatic processes do not affect:

- Options:

- A) Emotional states

- B) Learning states

- C) Environmental states

- D) Practicing states

- Correct Answer: A) Emotional states

4. Automatic processes show little change with age. Once a task is practiced then the age does not matter. They (most of the automatic processes) are acquired early and do not decline in old age. This explains:

- Options:

- A) Task Interference
- B) Developmental Trends
- C) Effect of Instruction & Practice
- D) Depression or High Arousal

- Correct Answer: B) Developmental Trends

5. The notion that patterns are matched to internal constructs before being recognized is referred to as which of the following?

- Options:

- A) Object matching
- B) Template matching
- C) Construct matching
- D) A Biederman template

- Correct Answer: B) Template matching

6. VOT is an abbreviation of which one of the following?

- Options:

- A) View of Tibet
- B) Vision on Terror
- C) Voice-Onset Time
- D) Voice of Tingling

- Correct Answer: C) Voice-Onset Time

7. A criticism of template matching relates to the notion that it may be impossible due to what?

- Options:

- A) The small number of templates required
- B) The large number of templates required
- C) Generalization issues
- D) Recognition components
- Correct Answer: B) The large number of templates required

8. According to Daniel Kahneman, which of the following is a conscious decision to allocate attention to certain tasks or aspects of the environment?

- Options:
 - A) Enduring dispositions
 - B) Arousal
 - C) Monetary Intentions
 - D) Capacity
- Correct Answer: D) Capacity

9. Who conducted experiments for predicting flight performance?

- Options:
 - A) Gopher & Kahneman (1971)
 - B) Lotan & Lotan (1982)
 - C) Mihal & Barett (1976)
 - D) Lotan & Barett (1889)
- Correct Answer: A) Gopher & Kahneman (1971)

10. Most of the research in pattern recognition has been focused on

- Options:
 - A) Image
 - B) Word
 - C) Letter
 - D) Phrase

- Correct Answer: A) Image

1. Norman tried to explain that attention is _____.

- Middle selector
- Surface selector
- Early selector (Correct)
- Late selector

2. The early selection model which focuses on the usage of filters is proposed by which one of the following Cognitive psychology researchers?

- Wedderburn
- Broadbent (Correct)
- Triesman
- Norman

3. We all are living in the past. This past is not a passive term because we receive visual information that is:

- Four seconds old
- Five seconds old
- Three seconds old
- One second old (Correct)

4. Which type of signals are weakened by the attenuator?

- Unattended signals (Correct)
- Broad signals
- High pitched signals
- Low rhythm signals

5. The short-term memory retrieves information from which one of the following kinds of memory systems?

- Long-term memory

- Sensory register
- Working memory (Correct)
- Unconscious memory

6. Which field views computers like humans who can solve problems and learn new things?

- Artificial thinking
- Artificial intelligence (Correct)
- Thinking machines
- Artificial intellect

7. Who presented the groundbreaking paper "On verbal behavior" that shattered the simple-minded behaviorist model of language designed by Skinner?

- Albert Bandura
- J.B Watson
- Noam Chomsky (Correct)
- Charles Darwin

8. Tiny branches connected to the cell body are called:

- Terminal buttons
- Dendrites (Correct)
- Synapses
- Neural branches

9. If someone tries to study which part of the brain is related to the sense of sight, what will be the type of his/her description?

- Chemical level
- Neural level (Correct)
- Hardware Level
- Software Level

10. Identify the part of the brain responsible for higher-level mental processing.

- Temporal Lobe
- Parietal Lobe
- Frontal Lobe (Correct)
- Occipital Lobe
