MGT510 Quiz 3 File by Tanveer Online Academy

Juran holds degrees in which of the following disciplines?	**Engineering and Law**
Which of the following refers to bridge the gaps in the dispersion of quality and to attain the expected value?	**Quality assurance**
What is necessary for a system to be effective?	**The components of any system must work together for the system**
In which one of the following views, productivity and quality are always in conflict?	**Total quality view**
Which of the following models has a goal of organizational survival?	**Organism model**
ISO stands for which one of the following options?	**International organization for standard**
"Trying to focus the group discussion on topics of personal interests rather than the group", depicts which of the following self-oriented behaviors?	**Diverting**

In traditional view, quality was considered as a _____.	**Separate function**
Motivation can be better achieved through trust and leadership than _____.	**Slogans**
In traditional management, performance appraisal, recognition, and reward system place people in which one of the following environments?	**Internal competitive environment**
Which one of the following quality leaders said that quality is "fitness for use"?	**Joseph M. Juran**
What are the ISO (International Organization for Standardization) series standards for industries such as automobiles?	**ISO 9000**
Which of the following statements, in relation to variation, is TRUE for people failing to understand the components of Profound Knowledge?	**They do not know the difference between prediction, forecasting, and guesswork**
When Juran taught quality principles to the Japanese?	**1950s**
ISO-14000 standard is developed for which one of the following industries?	**Environmental management**
Which of the following involves demonstrating the need for improvement, identifying specific projects for improvement, organizing to guide the projects?	**Quality improvement**

"Retiring from the group, being silent or refusing to deal with a particular aspect of the group's work", depicts which one of the following self-oriented behaviors?	**Withdrawing**
Voice of customer is the collection of which of the following options?	**All of the given options**
Which of the following tools is a graphical representation of the variation in a set of data which shows the frequency of a particular value or within a specified group?	**Histogram**
Which of the following operates at the strategic planning level, as well as at daily management level?	**kanri**
All of the following elements are included in formal strategies EXCEPT:	**Analysis and progression towards more structured procedures**
Which of the following tools helps to identify and isolate causes of a problem?	**All of the given options**
"Deliberately ignoring some group members, because either they do not like them or they are not interested in what those people have to say", depicts which of the following self-oriented behaviors?	**Excluding**
Which of the following refers to the gathering of two or more people who interact to achieve an expected outcome?	**Meeting**
All of the following are the objectives achieved simultaneously for the sustained growth to be recognized EXCEPT:	**Effective leadership**

Gauging and measurement were the methods of measurement in which of the following eras?	**Inspection**
All of the following are included in quality improvement EXCEPT:	**Compare performance with goals**
“Dominating others by showing superiority or authority” refers to which one of the following self-oriented behaviors?	**Controlling**
Whose efforts at quality improvement were supported by massive training programs and top management leadership? Japanese	**Japanese**
Which of the following is an answer to the Fourth Absolute of Quality Management as summarized by Crosby; what measurement system is required? Price of nonconformance	**Price of nonconformance**
Which of the following is correct sequence of evaluation of quality management?	**Inspection, Quality Control, Quality Assurance & TQM**
Continual improvement is also termed as _____ improvement.	**Continuous**
American MBO system focuses on results, not processes and encourages _____.	**Short term behavior**
The philosophies of _____ provide fundamental principles on which total quality is based.	**All of the given options**
The sources of variation that fall outside the control limits are likely to be _____sources.	**Special causes**

Which of the following total quality tools is a bar chart that displays the frequency of most important defects in descending order?	**Pareto diagram**
Which of the following tools is a graphical representation of a process, depicting inputs, outputs and units of activity?	**Flow chart**
Human resource practices concentrate on which of the following options?	**All of the given options**
ISO 9004:2000 standard refers to which of the following options?	**Guidelines for performance improvements**
Do not permit overlong examples or irrelevant discussion. This refers to which of the following discussion skills in meetings?	**Managing time**
Taguchi methods emphasize consistency of performance and reduced _____.	**Variation**
All of the following are the major decision areas in supply chain management EXCEPT:	**Production**
Which of the following options is used by a firm as a source of competitive advantage to make its products difficult to copy? Differentiation	**Differentiation**
In group maintenance behaviors, reconciling differences among group members is called:	**Harmonizing**
Quality planning and new product review are the examples of which of the following costs?	**Prevention cost**

Which of the following is a process for focusing on customer wants or needs in the design or redesign of a product or service?	**Quality Function Deployment**
Which of the following is concerned about quality for achievement of TQM?	**Everyone in the organization**
Which of the following are the methods of measurement in quality assurance era?	**Programs and systems**
All of the following are Deming's seven deadly diseases except:	**Lack of inter connectivity between departments**
Which one of the following quality leaders said that quality is "non faulty system"?	**W. Edwards Deming**
Which of the following options is the theme of zero defect production?	**Doing it right the first time**
Which of the following quality leaders is best known for his advocacy of zero defects management?	**Crosby**
Which one of the following themes refers to the combination of benefits derived from using a product or services?	**Customer value strategy**
Which of the following factors affect the individual performance of an employee within a system?	**All of the given options**
According to Ishikawa, which of the following options is the broader interpretation of quality?	**All of the given options**
The concept of quality has often been defined from a transcendent view as _____.	**Innate excellence**

Corporate culture is shifting its focus from upgrading technology to upgrading _____	**People**
Which of the following involves determining what to control, establishing units of measurement so that data may be objectively evaluated?	**Quality control**
Which of the following is/are the unit(s) of organization?	**All of the given options**
All of the following are the basic requirements of ISO 9000 EXCEPT:	**Customers and processes be displeased**
Total quality relates to which of the following in which it enhances an organization's ability to gain a sustainable competitive advantage in the marketplace?	**Strategic Management**
Which of the following statements is TRUE for ISO 9000?	**Describes the principles of a quality management system and defines the terminology**
Which one of the following options is included in ISO 9000 QMS manual?	**Quality work instructions**
ISO 9000:2000 standard refers to which one of the following options?	**Customer satisfaction**

Which of the following provides a mean of translating customer requirements into appropriate technical requirements for each stage of product development?	**Quality function deployment**
Which one of the following levels of ISO 9001,9004 (2000) describes about "no systematic approach"?	**Level 1**
All of the following are the benefits enjoyed by ISO 9000 registered organizations EXCEPT:	**Worst quality and quantity of products and services**
Which of the following refers to quality of products, people, processes and environments?	**Big Q**
Excellent communication between _____ is the key to total organizational excellence.	**Customers and suppliers**
Which of the following takes into consideration the status and importance of the processes and areas to be audited?	**Audit planning**

Which of the following is the first category in Malcolm Baldrige National Quality Award and is recognized as the "driver" of successful quality systems?	**Leadership**
Which of the following tools is a visual display that maps out the cause and effect links among complex, multivariable problems or desired outcomes?	**Relations diagram**
Which of the following is NOT the category in Baldrige Award?	**Supply chain**
Which one of the following options is included in training plan?	**Measurement of the effectiveness of training**
Which of the following is NOT the characteristic of the organizations operating according to the principles of quality management?	**A commitment to fundamental improvement through knowledge, skills, problem solving, and teamwork**
Crosby's program calls for measuring and publicizing which of the following options?	**Cost of poor quality**
Which of the following is the level of Australian business excellence award?	**The business improvement level**

Fault tree analysis is an example of tools for which of the following options?	**Risk assessment**
According to Ishikawa, which of the following options is not the broader interpretation of quality?	**Quality of product**
Process audit and test of purchased material belong to which of the following types of quality costs?	**Appraisal cost**
Under which perspective of the balance scorecard, would you classify the customer retention measurement?	**The customer perspective**
Identify the example of internal failure costs.	**Re-inspection**
All of the following are the considerations of the organizations to ensure that all processes operate as an efficient network, EXCEPT:	**Ensuring inputs, activities and outputs are clearly defined and controlled**
Which of the following should be analyzed to provide inputs for corrective and preventive action, and process improvements?	**Quality records**
Which of the following organizations has a little chance of survival?	**With no vision about how to create long-term customer loyalty**
Organization must identify preventive actions to eliminate the causes of potential _____.	**Non Conformance**

Strongly integrated improvement process relates to which of the following?	**Best-in-class performance performance level**
Special causes are occurred due to which of the following?	**Outside Influence**
Which of the following separates special causes of variation from common causes of variation?	**Statistical process control**
Which of the following characteristics is NOT necessarily needed to be a good leader?	**A charismatic personality**
All of the following are the initial considerations in the Hoshin Kanri approach to business system change EXCEPT:	**Ceasing resources for performing activities to achieve business objectives**
Which of the following tools is used to analyze the past and present situation?	**Pareto diagram**
Which of the following tools allows large numbers of ideas to be sorted into groups for review and analysis?	**Affinity diagram**
Which of the following is not the role of middle management in implementation of quality strategy?	**Must identify and develop future leaders of the organization**
Which of the following is a systematic process for capturing customer requirements and translating these into requirements that must be met throughout the 'supply chain'?	**Quality Function Deployment**

Which one of the following quality tools is developed by K. Ishikawa?	**Cause-and-Effect Diagrams**
Most companies are attaining ISO 9000 registration due to which of the following reasons?	**All of the given options**
Which of the following is an analytical tool consisting of a bar graph that can be used to identify the range image problems?	**Histogram**
What is required after developing and implementing the QMS in the process of acquiring the certificate of ISO 9000?	**Final assessment by registrar**
Which of the following tools is used for clarifying problems by "thinking multi-dimensionally"?	**Relations diagram**
Which of the following levels of performance measurement framework describes about individual performance management?	**Level 1q**
When is the re-certification required?	**Every three years**
Which of the following can be used as a benchmark for assessing different organizations for equivalent comparison?	**Maturity Model**
When common causes occur then organization should _____	**Modify the System**
All of the following characteristics are included in histogram, EXCEPT:	**Provides both a visual and statistical means to test the strength of a relationship**
In creative problem solving, which of the following steps refers to make the solution work?	**Implementation**

When does the Statistical Process Control start?	**It starts the moment a control chart is employed**
Which of the following is the key benefit of customer focus principle?	**Increased revenue**
ISO 9000 Quality Management System manual includes all of the following EXCEPT:	**Quality description**
Production and Service Operations include which of the following options?	**All of the given options**
Which of the following is NOT necessarily required in organizational change?	**Understand the history behind the current culture**
Which of the following is NOT necessarily required in organizational change?	**Understand the history behind the current culture**
All of the following are the quality assurance activities of the Company-wide Quality Control EXCEPT:	**Inspection and sales**
All of the following are included in responsibilities of management representative, EXCEPT:	**Establish quality function at different levels**
Which of the following is TRUE for higher costs of quality?	**Doing the wrong thing in the wrong way**
Juran advocates a never-ending spiral of activities that includes all of the following EXCEPT:	**Inspection and testing**

Which of the following should be reviewed by the organization to identify requirements for operations that realize products or deliver services in order to ensure compliance with specifications?	**Training and competence of people**
Which of the following is the agreed generic product category as per ISO-9000?	**Software**
Which of the following is the alternate name of the Australian quality award?	**Business excellent award**
Which of the following is not included in leadership competencies?	**None of the given**
Who noted that deficiencies in the original planning cause a process to run at a high level of chronic waste?	**Juran**
All of the following options are included in core leadership skills, EXCEPT:	**Internal auditing**
Which one of the following performance levels has good results and sustained improvement trends?	**Best-in-class performance**
How many categories are involved in the criteria for business excellence?	**Seven**
Organization can easily understand important customer and operational requirements after successfully accomplish of _____	**Strategic Planning**
All of the following are the disadvantages of functional structure, EXCEPT:	**It provides organizations with a clear chain of command**

All of the following are the leading practices, EXCEPT:	**Provide a concise and flexible means for identifying strings of text of interest**
Which of the following is the objective of ISO-9000 family of Quality management system?	**Customer satisfaction**
All of the following are the examples of measurement and monitoring methodologies, EXCEPT:	**Fault tree analysis**
Which of the following standards are based on PDCA methodology?	**ISO 9001 and ISO 9004**
Identify the example of external failure costs.	**Customer returns**
How the Baldrige Award recognizes the importance of total quality principles?	**Through integration with overall business planning**
Which one of the following is not included in external failure costs?	**Material review**
Which of the following is NOT an advantage of functional structure?	**It enables employees to learn about customer expectations**
All of the following options are included in consideration of internal auditing, EXCEPT:	**Performance results and expectations**
Crosby notes that most companies' spend_____ percent of their sales dollars on quality costs.	**15 to 20**

Guidelines for software engineer are discussed in which one of the following ISO standards?	**ISO-9003 (2004)**
Juran defines quality as “fitness for use”. This can be broken down into how many categories?	**Four**
Which of the following is viewed as a Consistent Pair?	**ISO 9001 and ISO 9004**
Juran’s prescriptions focus on three major aspects of quality that is called:	**Quality trilogy**
Which of the following statements is TRUE for little q?	**Striving for quality in a limited or specific area**

Which of the following is the first category in Malcolm Baldrige National Quality Award and is recognized as the “driver” of successful quality systems?

Select the correct option

Management by fact

Leadership

Continuous improvement

Process orientation

The correct option is:

Leadership

Leadership is the first category in the Malcolm Baldrige National Quality Award and is recognized as the "driver" of successful quality systems.

Next Question

When cross functional teams take initiatives and quality systems are assessed then which of the following systems is used by the organization?

Select the correct option

Maturing System

Dysfunctional System

Awakening System

Developing system

Answer

The correct option is:

Maturing System

Next Question

How many steps are described for problem solving?

Select the correct option

6

5

7

8

Answer

The correct option is:

7

Typically, problem-solving is often described in 7 steps. These steps may vary slightly depending on the specific problem-solving model being used, but a common framework involves defining the problem, gathering information, generating potential solutions, analyzing those solutions, making a decision, implementing the decision, and evaluating the results.

Next Question

Which one of the following levels of performance measurement framework describes about strategy and goal development?

Select the correct option

Level 3

Level 4

Level 2

Level 1

Answer

The correct option is:

Level 2

Level 2 of a performance measurement framework often involves strategy and goal development. This level is crucial for aligning organizational objectives and strategies with performance measures.

Next Question

All of the following are the elements of a total quality culture, EXCEPT:

Select the correct option

Agility

Visionary leadership

Internal audit

Customer driven excellence

Answer

The correct option is:

Internal audit

Internal audit is not typically considered an element of a total quality culture. The other three options - Agility, Visionary leadership, and Customer-driven excellence - are commonly associated with fostering a total quality culture within an organization. Internal audit, while important for ensuring compliance and effectiveness, is more closely related to quality management processes rather than being a direct element of a quality culture.

Next Question

Which of the following statements is TRUE for vision statement?

Select the correct option

It is an aspirational description of what an organization would like to achieve in the mid-term or long-term future

It communicates the company’s purpose both for those in the organization and for the public

It is the plan integrating an organization's major goals, policies, and action sequences into a cohesive whole

It is a written declaration of firm's core purpose and focus, which normally remain unchanged

Answer

The correct option is:

It is an aspirational description of what an organization would like to achieve in the mid-term or long-term future

A vision statement is an aspirational description of what an organization would like to achieve in the mid-term or long-term future. It is a forward-looking statement that outlines the organization's goals and aspirations.

Next Question

Which of the following tools is used to identify potential problems and countermeasures in a plan?

Select the correct option

Matrix Diagram

Process Decision Program Chart

Relations Diagram

Affinity Diagram

Answer

The correct option is:

Process Decision Program Chart

The Process Decision Program Chart (PDPC) is a tool used for identifying potential problems and countermeasures in a plan. It helps in visualizing the potential outcomes of different decisions and their impact on the overall plan.

Next Question

The Capability Maturity Model can help in all of the following EXCEPT:

Select the correct option

Setting process improvement goals and priorities

Providing a yardstick for assessing current practices

Documenting procedures as to how the various processes for design operate

Providing guidance for quality processes

Answer

The correct option is:

Documenting procedures as to how the various processes for design operate

The Capability Maturity Model (CMM) is primarily focused on assessing and improving the maturity of processes within an organization. It helps in setting improvement goals, providing a yardstick for assessing current practices, and offering guidance for quality processes. However, the detailed documentation of procedures is not the primary emphasis of the CMM. It focuses more on the maturity and effectiveness of processes rather than extensive procedural documentation.

Next Question

Which one of the following nationals defines quality as value received for the dollar spent?Select the correct option

Indians

Japanese

Americans

Pakistanis

Answer

The correct option is:

Americans

The definition of quality as "value received for the dollar spent" is often associated with American perspectives on quality. This definition emphasizes the idea that quality involves receiving good value and satisfaction for the money spent.

Next Question

Which of the following is NOT included in the performance indicators based on objective data?

Select the correct option

Delivery schedule performance

Customer notifications related to quality or delivery issues

Delivered part quality performance

Customer calmness excluding field returns

Answer

The correct option is:

Customer calmness excluding field returns

Customer calmness, excluding field returns, is more subjective and may not be easily quantifiable or measurable with objective data. The other options—delivery schedule performance, customer notifications related to quality or delivery issues, and delivered part

quality performance—are more concrete and objective, making them suitable for performance indicators based on objective data.

Next Question

Organization should identify root causes of problem in which step of problem solving?

Select the correct option

Cause Analysis

Future Plans

Standardisation

Current Situation

Answer

The correct option is:

Cause Analysis

Identifying the root causes of a problem is typically done in the "Cause Analysis" step of the problem-solving process. This step involves a thorough examination to understand the underlying factors or reasons contributing to the problem.

Next Question

Which of the following is a process improvement approach based on a process model?

Select the correct option

Organizational Model

Capability Maturity Model

Locust Model

Black Widow Model

Answer

The correct option is:

Capability Maturity Model

The Capability Maturity Model (CMM) is a process improvement approach based on a process model. It provides a framework for assessing and improving the maturity of an organization's processes, particularly in software development. The CMM outlines stages of maturity, each representing a level of process improvement and capability.

Next Question

Keeping in view the Deming PDCA cycle and ISO clauses, Planning quadrant relates with which of the following clause?

Select the correct optionReload Math Equations

Clause 6 Resource Management

Clause 8 Measurement, analysis and improvement

None of the given options

Clause 7 Product Realization

Answer

The Planning quadrant of the Deming PDCA (Plan-Do-Check-Act) cycle corresponds to:

Clause 7 Product Realization

In the ISO 9001 standard, Clause 7 addresses the realization of products, and it involves planning for the processes related to the product. Therefore, the Planning quadrant aligns with Clause 7 in the context of ISO standards.

Next Question

What the organization must accomplish to achieve the mission, by examination and categorization of the impacts?

Select the correct option

Illegal and policy factors

Key process indicators

Critical success factors

The enemy indicator

Answer

The correct option is:

Critical success factors

Critical success factors (CSFs) are the essential areas of activity that must be performed well for an organization to achieve its mission. They are elements or conditions that are critical for the success of the organization. Examining and categorizing the impacts related to achieving the mission is part of the process of identifying and understanding critical success factors.

Next Question

Which of the following tools is used to break down broad categories into finer and finer levels of detail?

Select the correct option

Tree diagram

Affinity diagram

Relations diagram

Matrix diagram

Answer

The correct option is:

Tree diagram

A tree diagram is a tool used to break down broad categories into finer and finer levels of detail. It is a visual representation that starts with a broad category at the top and branches into subcategories or details.

Next Question

Which of the following tools is used for data collection that facilitates the interpretation of data?

Select the correct option

Histogram

Pareto diagram

Flow chart

Check sheet

Answer

The correct option is:

Check sheet

A check sheet is a tool used for data collection that facilitates the interpretation of data. It is a simple form or document used to systematically collect data in real-time, making it easier to analyze and interpret the information.

Next Question

Which of the following is not the sub clause of "Management Responsibility" clause of ISO 9001 (2000)?

Select the correct optionReload Math Equations

Quality Policy

None of the given options

Customer focus

Management commitment

Answer

The correct option is:

Quality Policy

"Quality Policy" is not a subclause of the "Management Responsibility" clause in ISO 9001:2000. The subclauses typically include aspects such as customer focus, management commitment, quality policy, planning, responsibility, authority, communication, and review.

Next Question

Which of the following statements is TRUE for adapters of change?

elect the correct option

They fear a loss of control

They sometimes fear the unknown

They are often unaware of how a proposed change will be perceived by potential resisters

They are patient with the concerns of resisters

Answer

The correct option is:

They are patient with the concerns of resisters

Adapters of change are generally more patient with the concerns of those who may resist the change. They are often more open to understanding and addressing the concerns of individuals who might be hesitant or resistant to the proposed changes.

Next Question

Training requirement, employee resistant and calibration of equipments are the _____

Select the correct option

Barriers for successful registration

Reason for attaining ISO 9000 registration

Objectives of successful registration

Benefits of installing QMS

Answer

The correct option is:

Barriers for successful registration

Training requirements, employee resistance, and calibration of equipment can be considered as potential barriers or challenges for successfully achieving ISO 9000 registration. These are aspects that organizations may need to address in the process of implementing and maintaining a Quality Management System (QMS) to meet ISO 9000 standards.

Next Question

Which one of following options is included in ISO registration process?

Select the correct option

Selection of supplier

Take corrective actions

Training requirement

Conduct TNA

Answer

The correct option is:

Take corrective actions

The ISO registration process involves various steps, and taking corrective actions is a crucial component. Corrective actions are necessary to address any non-conformities or deficiencies identified during the audit or assessment process, ensuring that the organization's Quality Management System (QMS) aligns with the requirements of the ISO standards.

Next Question

All of the following are included in inputs to management review, EXCEPT:

Select the correct option

Results of audits

Customer feedback

Recommendations for improvement

Planning for future resources

Answer

The correct option is:

Planning for future resources

Inputs to management review typically include results of audits, customer feedback, and recommendations for improvement. While the planning for future resources is important in organizational management, it may not be a direct input to the management review process.

Instead, future resource planning is often part of the overall strategic planning process within the organization.

Next Question

Documentation and data on existing products are examples of which of the following?

Select the correct option

Either internal or external inputs

External inputs

Internal inputs

Neither internal nor external inputs

Answer

Documentation and data on existing products are examples of:

Internal inputs

These inputs are within the organization's control and are used for various processes, including quality management and improvement.

Next Question

Which of the following is NOT an example of information sources for understanding the processes related to interested parties?

Select the correct option

Competitor analysis

Development stages

Contract requirements

Market research

Answer

The correct option is:

Development stages

Development stages are typically not considered an information source for understanding processes related to interested parties. Information sources such as competitor analysis, contract requirements, and market research are more directly related to gathering information about external factors, stakeholders, and market conditions. Development stages, on the other hand, are usually focused on the internal processes of product or service development within the organization.

Next Question

How many maturity levels are there in the Capability Maturity Model?Select the correct option

Four

Six

Seven

Five

Answer

The Capability Maturity Model (CMM) traditionally has five maturity levels. Each level represents a stage in the evolution and improvement of an organization's processes.

Therefore, the correct option is:

Five

Next Question

What is required after taking corrective action in the process of acquiring the certificate of ISO 9000?Select the correct option

Selecting a third party registrar

Selecting the appropriate standards

Final assessment by registrar

Submitting quality manual for approval

Answer

After taking corrective action in the process of acquiring the certificate of ISO 9000, the next step typically involves:

Final assessment by registrar

Once corrective actions have been implemented to address any non-conformities identified during the audit process, a final assessment or audit by the registrar is conducted to verify that the organization's Quality Management System (QMS) complies with the ISO 9000 standards.

Next Question

Which of the following performance levels is a systematic process-based approach, early stage of systematic improvements?

Select the correct option

Stable formal system approach

No formal approach

Best-in-class performance

Reactive approach

Answer

The correct option is:

Reactive approach

The early stage of systematic improvements is often characterized by a reactive approach. In this stage, organizations may address issues as they arise, but the improvement processes may not yet be formalized or systematic. As an organization progresses, it can move towards a more systematic and proactive approach, eventually reaching higher performance levels like the stable formal system approach or best-in-class performance.

Next Question

In the levels of organizational maturity, the dysfunctional system precede which of the following systems?

Select the correct option

World Class System

Maturing System

Awakening System

Developing System

Answer

In the levels of organizational maturity, the dysfunctional system precedes the:

Awakening System

The progression is typically from a dysfunctional system to an awakening system, then to a developing system, maturing system, and ultimately, a world-class system as the organization matures and improves its processes.

Next Question

Which of the following is TRUE for design and development outputs under ISO 9001:2000 - Quality Management Systems ?

Select the correct option

It meets the input requirements for design and development

It Identifies of and corrects against potential conformance

It is used where excess in product will only be apparent in use

It is Insignificance and concealment of significant features of the processes

Answer

The correct option is:

It meets the input requirements for design and development

Design and development outputs, according to ISO 9001:2000, should meet the input requirements specified for design and development. This ensures that the designed product or service meets the intended specifications and requirements.

Next Question

The deployment of policies and implementation of plans to achieve the objectives are the responsibilities of which of the following options?

Select the correct option

Suppliers

Customers

Management

Employees

Answer

The correct option is:

Management

The deployment of policies and the implementation of plans to achieve objectives are responsibilities typically attributed to the management of an organization. Management is responsible for setting the direction, defining policies, and ensuring that plans are effectively executed to meet the organization's goals and objectives.

Next Question

Under which perspective of the balance scorecard, would you classify new customer acquisition measurement?

Select the correct option

The customer perspective

The learning & growth perspective

The financial perspective

The business process perspective

Answer

The correct option is:

The customer perspective

New customer acquisition is generally classified under the customer perspective in the Balanced Scorecard framework. This perspective focuses on metrics related to customer satisfaction, retention, and acquisition, among other customer-related factors.

Next Question

All of the following options are included in capacity planning, EXCEPT:

Select the correct option

Intended use

Electronic monitoring

Post realization activities

Acceptance criteria

Answer

The correct option is:

Electronic monitoring

Capacity planning typically involves considerations related to intended use, post-realization activities, and acceptance criteria. Electronic monitoring is not directly related to capacity planning; it is more associated with tracking and managing processes or systems electronically.

Next Question

Which of the following is the requirement of organization excellence?

Select the correct option

Customer Focus

System Focus

Stakeholder Focus

Strategic Focus

Answer

The correct option is:

Stakeholder Focus

While all the options are important, "Stakeholder Focus" is generally considered a key requirement for organizational excellence. Organizations should consider and meet the needs and expectations of all relevant stakeholders, including customers, employees, suppliers, and the community. This holistic approach ensures a comprehensive consideration of all parties involved in or affected by the organization's activities.

Next Question

Which one of the following options bases all actions, activities, and decisions on what is most likely-within an ethical framework to ensure successful performance in the marketplace?

Select the correct option

Financial Management

Network Management

Strategic Management

Operations Management

Answer

The correct option is:

Strategic Management

Strategic management is the process of formulating and implementing strategies to achieve organizational objectives. It involves making decisions about the allocation of resources and designing plans to achieve long-term goals. Strategic management, when practiced ethically, ensures that all actions, activities, and decisions are based on what is most likely to lead to success within an ethical framework.

Next Question

Which of the following tools is used to break down broad categories into finer and finer levels of detail?

Select the correct option

Matrix diagram

Affinity diagram

Tree diagram

Relations diagram

Answer

The correct option is:

Tree diagram

A tree diagram is a tool used to break down broad categories into finer and finer levels of detail. It is a visual representation that starts with a broad category at the top and branches into subcategories or details.

Next Question

Which of the following is a fundamental resource for the continual development of an organization’s knowledge base which can stimulate innovation?

Select the correct option

Information

Infrastructure

Work environment

Product realization

Answer

The correct option is:

Information

Information is a fundamental resource for the continual development of an organization's knowledge base, and it can stimulate innovation. A well-informed organization is better equipped to make informed decisions, adapt to changes, and foster a culture of continuous learning and improvement.

Next Question

There are several primary reasons of cultural change that must either precede or at least parallel to the implementation of total quality. Which of the following is NOT a primary reason?

Select the correct option

Employees may not adapt to too many changes

It can be difficult to overcome the past

Change cannot occur in a hostile environment

Moving to total quality takes time

Answer

The correct option is:

Employees may not adapt to too many changes

The statement "Employees may not adapt to too many changes" is not a primary reason for cultural change but rather a potential challenge or concern during the process of change. The primary reasons often include overcoming past issues, creating a non-hostile environment, and recognizing that the transition to total quality takes time.

Next Question

Which of the following performance levels has no results, poor results or unpredictable results?

Select the correct option

No formal approach

Stable formal system approach

Best-in-class performance

Reactive approach

Answer

The correct option is:

No formal approach

In a "No formal approach" performance level, there may be no formalized processes in place, resulting in poor or unpredictable results. This stage lacks a systematic and structured approach to managing processes, which can lead to inconsistent outcomes.

Next Question

Which of the following is the first category in Malcolm Baldrige National Quality Award and is recognized as the “driver” of successful quality systems?

Select the correct option

Continuous improvement

Process orientation

Management by fact

Leadership

Answer

Next Question

Under which perspective of the balance scorecard, would you classify the growth in sales revenue measurement?

Select the correct option

The learning & growth perspective

The business process perspective

The financial perspective

The customer perspective

Answer

The correct option is:

The financial perspective

Growth in sales revenue is typically classified under the financial perspective in the Balanced Scorecard framework. This perspective focuses on financial indicators that reflect the organization's financial performance and success.

Next Question

Which of the following is not the characteristic of critical success factor?

Select the correct option

Must have goals

Balance between strategic and tactical issue

Not more than 4 to 8 words

Support operational work

Answer

The correct option is:

Not more than 4 to 8 words

Critical Success Factors (CSFs) are generally concise statements, but there is no strict rule that limits them to a specific number of words. The focus is on ensuring clarity and effectiveness in expressing the key factors critical to the success of an organization or a project.
