ENG516 Subjective

By niMma mAlik

Mids Solved paPer

measurable objectives?

Measurable objectives measure whether objectives are met or not. They establish concrete criteria for measuring progress toward the attainment of each objective you set. When you measure your progress, you stay on track, reach your target dates, and experience the feeling of achievement that drives you on to continued effort required to reach your objective. To determine if your objective is measurable, ask questions such how much? How many? How will I know when it is accomplished? If the objective is measurable, it means that the measurement source is identified and we are able to track the actions as we progress towards the objective.

Measurement is the standard used for comparison. Measurements (and the visible progress) go a long way to help us to know when we have achieved our objective.

Relevant objectives?

Relevant objectives in terms of leading to the desired results and relate to needs analysis, what is their current communicative proficiency and what they should be at the end of the course. This means two things; that the goal or target being set with the individual is something they can actually impact upon or change and secondly it is also important to the organization, and is relevant to what the organization is trying to achieve. The manager has to decide these objectives by considering the wider picture.

Achievable objectives?

Achievable objectives see whether set objectives are achievable and attainable in terms of abilities, realistic facilities and logistics. When you identify objectives that are most important to you, you begin to figure out ways you can make them come true. The objective needs to be attainable by you based on the skills you have and the constraints imposed.

Time-bound Objectives?

Time-bound Objectives are concerned **with timely completion**: When do you want to achieve the set objectives? When will we accomplish/ complete this objective? In the objective somewhere, there has to be a date (Day/Month/Year) for when the task has to be started (if it's ongoing) and/or completed (if it's short term or project related). Time-bound means setting deadlines for the achievement of the objective. Deadlines need to be both achievable and realistic. If you don't set a time, you will reduce the motivation and urgency required to execute the tasks. Agreed time frames create the necessary urgency and prompts action.

specific objective?

A specific objective has a much greater chance of being accomplished than a general goal. To set a specific objective you need to answer the six "W" questions: Who: Who is involved? What: What do I want to accomplish? Where: Identify a location. When: Establish a time frame. Which: Identify requirements and constraints. Why: Specific reasons, purpose or benefits of accomplishing the goal. Instead of saying: "Awareness of …" it should be "Learners will be able to speak about the ..." Rules of conciseness and correctness should be applied.

Objectives should be **specific, measurable, achievable, relevant, and time-bound**, **(SMART)**to specify what they need to achieve, answering **six questions**: Who? What? Where? When? Which? Why?

Five points to consider when designing meeting simulation?

1) Who is to chair the meeting, if it is to be chaired at all?

2) What is the chair's role?
3) What contributions are to be made by participants in the meeting?
4) What is the function of the meeting (e.g. to discuss issues, brainstorm, find solutions to problems, give out tasks, make decisions, pass on information, and so on)?
5) How formal will it be (e.g. strict rules of procedure)?
6) Will there be a tight structure (e.g. agenda, timings)?
7) Will minutes be produced? If so, who is responsible?

Explain Negotiating the Syllabus?

Negotiating the syllabus means involving learners in decisions about what should be learned and how. It allows teachers to understand learners' priorities, expectations, and preferences. The process may include asking learners about their goals, preferred activities, or areas they want to improve. This gives learners ownership and motivation and helps in tailoring the syllabus to better meet their needs. By incorporating their views into the course design, the teacher can create a more learner-centered and relevant syllabus.

Negotiation may occur at various stages—before the course begins, during the first lesson, or even continuously throughout the course. Teachers may ask learners about:

- What topics they find most relevant
- What skills they want to improve (e.g., presentations, emails, telephoning)
- What formats they prefer (e.g., group work, one-to-one coaching)

The result is a syllabus that is co-created with the learners, which helps to increase **motivation**, **engagement**, and **effectiveness** of learning. It also promotes **autonomy**, as learners take more responsibility for their own development.

Many activities can be devised for negotiating the syllabus can be used on day one of a course, for example the following: What the group wants - the teacher gives learners a sheet. They fill in the first two questions on their own, and then pass the sheets round so that everyone can see what their colleagues want and do not want and can understand that different people want different things. The sheets are then used as a basis for the third question, the answer to which is, in effect, the syllabus and which will have to be some amalgam of the differing priorities that have surfaced. The learners come to know that what happens is actually a compromise. Getting them to sign at the bottom of the page is a useful way to remind them that they are part of the success of the course. These sheets can be used to review the course later:

- What I want from this course
- What I don't want from this course • What the group wants from this course
- Name: .....
- Date: .....

- Signature: .....

impact of technology?

Technology has become an integral part of Business English teaching. It provides a communicative space where learners and teachers can interact beyond the boundaries of physical classrooms. It enables access to authentic materials, online resources, and interactive tools. The use of internet-based platforms allows for blended learning and personalized instruction.

The availability of e-learning platforms and language learning websites has enhanced learner autonomy and flexibility. Teachers can use web quests, publisher resources, and multimedia to create engaging and realistic learning experiences.

- ❖ Expands access to authentic and real-time resources.
- ❖ Supports interactive and learner-centered instruction.
- ❖ Encourages autonomy and flexibility.
- ❖ Enables blended and distance learning.
- ❖ Creates global communicative environments through virtual tools.

three tasks for foreign language learning?

- ➢ Role-Play (e.g., Telephoning a client)
- ➢ Writing an Email (e.g., Responding to an Inquiry)
- ➢ Problem-Solving Discussion (e.g., Marketing Strategy)

how does James Asher view stress in language learning act?

James Asher is the founder of the **Total Physical Response (TPR)** method. His view is that **stress is a major barrier** to successful language learning, especially in early stages.

Key Ideas:

- Stress-Free Environment
- Listening Comes First
- Physical Response Lowers Anxiety
- Silent Period is OK

differentiates competencies and job performance?

Competencies:

Competencies are the underlying knowledge, skills, behaviors, and attributes that enable a person to perform a job effectively.

Key Features:

- Potential-based: What someone is capable of doing.
- Include technical skills, communication skills, problem-solving abilities, teamwork, etc.
- Can be developed or improved through training.
- Are used in recruitment, training, and development processes.

Example:

- Communication skills
- Leadership ability
- Technical proficiency in Excel

Job Performance

Definition:
Job performance refers to the **actual execution** of job duties and responsibilities — how well a person performs in their current role.

Key Features:

- **Outcome-based**: What someone is actually doing.
- Measured through **appraisals**, **KPIs**, **feedback**, or **productivity metrics**.
- Directly tied to **goals**, **deadlines**, and **outputs**.
- Reflects **results**, not just potential.

Example:

- Meeting sales targets
- Delivering presentations effectively
- Submitting error-free reports on time

Job Performance:

Job performance refers to the **actual execution** of job duties and responsibilities — how well a person performs in their current role.

Key Features:

- Outcome-based: What someone is actually doing.

- Measured through appraisals, KPIs, feedback, or productivity metrics.
- Directly tied to goals, deadlines, and outputs.
- Reflects results, not just potential.

Example:

- Meeting sales targets
- Delivering presentations effectively
- Submitting error-free reports on time

Describe repetition and silence as in silence way method?

Silent Way

- ❖ A teaching method developed by Caleb Gattegno
- ❖ Emphasizes learner autonomy and discovery learning.
- ❖ Teachers remain silent most of the time, using visual aids (e.g., color-coded charts, Cuisenaire rods).
- ❖ Learners explore language and correct themselves, focusing on accuracy and internalization.
- ❖ The teacher guides through minimal intervention, allowing students to take responsibility for their own learning.

Repetition in the Silent Way

- Learners are encouraged to repeat language forms (sounds, words, structures) voluntarily to internalize them.
- Repetition is not forced by the teacher through drilling. Instead, learners self-correct and repeat until they feel confident.

Example:
Students see color-coded charts (like Cuisenaire rods) and repeat target phrases to associate sound with meaning and visual cues.

Silence in the Silent Way

- The teacher stays mostly silent, giving only necessary cues.
- Encourages learners to think, try, guess, and correct themselves rather than rely on the teacher.
- Promotes independent learning and learner responsibility.

- Silence gives time for processing and encourages peer learning and collaboration.

Write Acronym of CEF and ACTFL?

CEF (Common European Framework)

ACTFL (American Council for the Teaching of Foreign Languages)

Write Basic model of learning?

The basic model of learning is: **Practice – Feedback - Competence**. In this basic model feedback is of **central importance** and with practice helps in developing competence. The practice and feedback model can be translated into a lesson plan. A lesson is a series of interrelated steps which aim to develop a certain aspect of language knowledge or communication skills according to the aim of the course. Each lesson should have its own unique aims, coherence and outputs.

In a lesson focusing on a presentation, the following **six step model** can be used:

1) **Input:** text and a task, information about a business or professional area.
2) **Presentation**: Language points: Related to the above, e.g. for presentations what should be appropriate linguistic item should be taught.
3) **Practice:** Practice of the above language form.
4) **Communication points**: Related to communication tasks, i.e. the presentation
5) **Practice:** Practice of the above.
6) **Output Task:** Production of the language and communication task.

Techniques for teaching writing skills?

Techniques for teaching writing skills are

- process writing
- invention techniques
- brainstorming
- word mapping
- quick writing.
- Writing stages include drafting, feedback, and revising, proofreading and editing.

Principles for teaching writing?

The process of writing is **cyclic.**

1) Understand your students' reasons for writing
2) Provide opportunities for students to write.

3) Make feedback helpful and meaningful.
4) Clarify evaluation criteria.

Teaching and training?

The terms teaching and training are used interchangeably. Teaching implies lessons and training implies professional development. The dictionary meaning of teaching is, as in school lessons, to impart knowledge or skills, to impart knowledge of a subject, to cause to learn by example or experience.

Training implies professional training to coach in or accustom to a mode of behavior or to make proficient with specialized instruction and practice.

The scope of Business English is therefore both wide and narrow, so both terms can be used for it. It includes aspects of education in terms of language and specialist content knowledge and training in Business skills which includes negotiations, meetings etc.

Business English teaching is influenced by a wide range of disciplines, including ELT and management training. At the heart of BE, is a need driven approach, which requires trainers' responsiveness in terms of content and methodology. Therefore, it is not surprising that the BE teachers' repertoire of different training styles may draw on a range of different approaches from different areas. Teaching BE is characterized by a diversity of content, therefore teaching it is complex. Teaching and training approaches focus on the following:

- Classroom as bridge
- Sharing control
- Training style

Write a note on TBL – Task-Based Learning?

Task-Based Learning (TBL) is a language teaching approach where learners acquire language through meaningful use rather than formal instruction. Instead of being taught vocabulary or grammar rules first, students are given realistic tasks to complete using the language. Task-based learning stimulates a natural desire in learners to improve their language competence by challenging them to complete meaningful tasks.

The goal is **communication, and language** is the tool to achieve it.

Examples of Tasks in Business English:

- Writing a formal email responding to a customer complaint
- Giving a sales presentation using persuasive language
- Planning a marketing campaign in groups and presenting the plan
- Conducting a job interview through role-play
- Analyzing a graph and reporting findings in writing

✅ Advantages of TBL

1. **Learner-Centered:** Focus is on what learners do, not what the teacher says.
2. **Real-World Relevance:** Tasks reflect actual workplace communication.
3. **Improves Fluency:** Encourages spontaneous use of language.
4. **Motivating:** Learners feel the language is useful and applicable.
5. **Supports Different Styles:** Visual, auditory, and kinesthetic learners benefit.

Teacher as a Consultant?

Teacher as a Consultant: A consultant is an expert who is brought in because his or her skills or know-how are not available in the organization. In Business English, this expertise can include the ability to analyze communication and communication needs or to recommend a training supplier. Many freelance teachers operate as consultants; they market themselves in order to gain access to a potential client, they discuss contracts, they carry out needs analysis, they interact not only with the learners, but also with those who make the decision to pay for language training services, and they evaluate training delivery and outcomes.

Within the field of Business English, many teachers call themselves **trainers, coaches, or even consultants**.

Teacher as a Trainer?

A Business English teacher works in the world of business, where trainers are common. There is a fundamental difference in approach - a teacher is traditionally seen as someone whose task is to educate someone so that they can have more chance at succeeding in life (the exact objectives may be fairly loose). A trainer, on the other hand, is someone who is required to change a person's behavior or ability so that they can do a specific job. **Training is job-oriented,** while teaching is person-oriented.

Teacher as a Coach?

A coach is someone who can help the learner take advantage of the learning opportunities in their own working environment. It involves helping the learner to better understand his or her own strengths and weaknesses, and plan accordingly. This is related to the concept of learner autonomy, where the learner takes full responsibility for his or her learning.

Learner requirements?

Important factors for learners could include learners' specific requirements:

- Clear layout and structure

- Relevance
- regular progress checks
- revision opportunities
- entertainment
- self-study sections
- reference sections
- up-to-date content
- authenticity
- Price can also be a factor.

Feedback fluency and accuracy?

Feedback refers to information given to learners about their performance to help them improve.

Giving feedback **in accuracy** is often impressionistic and subjective. However, the practice itself, the ability to participate in a fluency-based activity is in itself a kind of feedback on trainee's ability to perform that task. Task fulfillment is an indication of ability.

Feedback of fluency should be given after the task is over. Interruptions for correction will hinder flow of information and ideas and will curb confidence which is a must for fluency. Gentle correction is desirable when the student is floundering. The role of the trainer as orchestrator and the facilitator should not be underestimated.

Accuracy is **black and white**… Fluency and effectiveness are measured on a scale. In general English, both are developed, but in professional communication, effectiveness matters more.

Five categories in Which word is divided to use?

1) **Lexical** (nouns, verbs, adjectives, adverbs)
2) **Functional words** (determiners, pronouns, modals, prepositions, coordinators)
3) **Inserts** (yeah, well, ouch)
4) **Multi-words:** sentence headers
5) **Phrasal words:** start off, bring up
6) **Collocations:** small print, black and white. They collocate with words as well as adjectives
7) **Idioms:** 'We've missed the boat', 'pulling someone's leg'
8) **Colligation:** Words occur in particular grammatical patterns, e.g. letter of application, letter of complaint, but not market of Europe, or market of France, etc.

difference between Business English (BE) and General English (GE)?

The difference between Business English (BE) and General English (GE) courses is basically that BE aims to fulfill the needs of business and management students. What are these needs? The basic aim of a needs analysis is to collect and examine critically, information about the

current situation (where the students are at present) and the target situation (where they would like to be at the end of the teaching).

Explain Needs analysis?

Needs analysis, carried out **to establish the "what" and the "how"** of a course, is the first stage in Business Communication course development, followed by curriculum design, materials selection, methodology, assessment, and evaluation. However, these stages should not be seen as separate, but as proceeding in a linear fashion. They come at the pre-course stage. The teacher needs to know the needs of the learners so that the objectives of the course may be decided. Business English learners have more precisely defined needs than general English learners and these needs should be incorporated in the course objectives. It is useful to see the needs analysis stage as consisting of **three separate but linked elements:**

- ❖ The range of communication and language required in the learner's present of future profession.
- ❖ The current ability of the learner in terms of language and communication.
- ❖ The actual objective of the training program.

In order to find this, we need to address the following questions:

- What type of information do we need to get?
- How can we get this information?
- How can we translate this information into course objectives?

The scope of Business English has been summarized as developing language knowledge and communication skills:

- General Language Knowledge
- Specialist Language Knowledge
- General Communication Skills
- Professional Communication Skills

cognitive strategies?

- ➢ Summarizing: Main idea
- ➢ Induction: Figuring out rules' samples
- ➢ Imagery: Visualize
- ➢ Auditory representation: Repeating words
- ➢ Making inferences: Guess meaning
- ➢ Using resources: Ability to use reference material
- ➢ Grouping: Classifying words, concepts
- ➢ Note-taking: Writing key words, concepts
- ➢ Elaborating prior knowledge: Relating

Metacognitive Strategies?

- **Planning:** Previewing paying attention main ideas, seeking
- **Monitoring**: Self-checking one's comprehension
- **Evaluating:** Developing ability to evaluating own task

Social/Affective Strategies?

- **Cooperating**: Learning how to work with peers
- **Clarifying:** Asking questions
- **Self-talk:** Reducing anxiety by talking positively to oneself

How ready-made material is useful for teacher?

The most common ready-made material **is course books**, which are popular all over the world. Course books are textbooks, of which the teacher and the students have copies, which are to be followed systematically as the basis for course design. Ready-made materials provide a framework... and are useful for inexperienced teachers, large classes, or when time is limited. Advantages of using course books are that they save teacher's work, the teacher doesn't have to choose the lesson, and the activities, the lesson plan can be followed as given in the particular unit. Course books provide a solid framework, which is particularly useful for less experienced teachers and those who are under pressure of time.

Ready-made materials are useful because they save preparation time, provide a clear structure, and are often designed by experts with built-in pedagogical support. They help teachers manage large classes, support inexperienced instructors, and allow a consistent standard of teaching across different settings.

Disadvantages are that course books can get outdated easily. The culturally content might be inappropriate in certain contexts. They might be based on different assumptions about language learning. It is worth thinking about the different perspectives of those connected with course books, material produced in-company or indeed any mass-produced material.

Ethical standards given by society for technical communication strategies. Write five ethical standards?

Ethics are **a final objective** in technical writing. Ethical communication entails being honest about the product and services, in terms of considering the needs of the consumer and the business.

The "**Code for Communicators"** to achieve ethical standards given by the Society for Technical Communication states:

1) Use language and visuals with precision
2) Prefer simple, direct expression of ideas

3) Satisfy the audience need for expression
4) Strive to improve professionally
5) Respect colleagues: Electronic communication, confidentiality, courtesy
6) Respecting intellectual property.

Ethical principles for technical communicators include **legality, honesty, confidentiality, quality, fairness** and professionalism.

Five threads on which grids normally consist?

Grids normally consist of a combination of the following components, sometimes **called threads**, because they weave through the course and could be seen as holding it together:

- **Grammar** (e.g. tenses, word order, verb patterns, relative clauses)
- **Lexis** (e.g. vocabulary, idioms, expressions, collocations)
- **Pronunciation** (e.g. intonation, rhythm, stress, chunking)
- **Functions** (e.g. complaining, agreeing, persuading, explaining)
- **Business skills** (e.g. presenting, negotiating, telephoning, socializing)
- **Topics** (e.g. finance, marketing, production, management)
- **Learning strategies** (e.g. learning styles, recording vocabulary, preparing for a test)
- **Situations** (e.g. assisting visitors, checking into a hotel, running a meeting)
- **Texts** (e.g. examples of spoken or written discourse)
- **Language skills** (e.g. reading, writing, listening, speaking)
- **Intercultural skills** (defining, comparing culture)
- **Storyline approach** (materials have characters for the storyline)
- **Tasks** (learners use language to do something and achieve an outcome

Write a note on small talk?

When people are engaged in a business situation, they are not talking **business** all the time. There are times when they have to talk about normal, everyday matters, like discussing the weather, exchanging pleasantries, asking after each other's health, etc. Such talk is called 'small talk' and is part of normal human interaction. Business English learners will have to carry out small talk in-between meetings, at airports, in the corridors and car parks, over food, and other contexts of socializing. Practice should therefore be part of their Business Communication training.

Small talk requires learners to engage in polite discussion on, often banal subjects, using appropriate language.

What is Learners' Needs Analysis?

In language teaching, especially in Business English, Needs Analysis is the process of identifying what learners require to learn, based on their current skills, future goals, and context

of use. Needs analysis is a vital part of course design. Learners have different goals and expectations… Their communication needs vary depending on their jobs, roles, and industries. An effective needs analysis helps the teacher understand the learners' **necessities**, **lacks**, and **wants**.

When syllabus can be negotiated?

The syllabus can be negotiated **at any time** - indeed, the teacher and learners can re-negotiate as the course progresses. Sometimes, there are practical issues which influence what actually happens, such as availability of video equipment, or the teacher's own expertise and experience. Sometimes, it may be necessary for the teacher to guide the discussions so that the end result is **achievable**, or meets a sponsor's aims.

The syllabus is usually negotiated with the students and the **organization**. By discussing these issues with them, the main priorities can be decided together, you can identify what activities could be done to foster learner autonomy, you can agree on how progress will be **assessed** and how you will be **giving feedback.** The syllabus states the actions to be taken in order to achieve the aims and objectives. It lists what is to be covered during the course and states an order. The syllabus can be **re-negotiated** at any time. Sometimes, in the middle of a course, a student asks for help because he/she needs to prepare a presentation for an unexpected trip. It usually is a very dynamic syllabus and you need to be flexible enough to adapt to new and changeable circumstances.

dominant trends of WW?

The post WW-II world has been dominated by **two trends** – the importance of commerce and technology, which generated the demand for a unifying language and because of various factors, one being the power of the USA, this role fell to English. As English became the accepted international language, non-native workers and students needed it for functional and academic purposes.

Oil crisis of 1970s resulted in a massive flow of funds and Western expertise into the oil-rich countries. English language became a big business and commercial pressures began to exert their influence, and demand on the English teaching profession for cost effective courses.

Key issues for reflection?

Key issues for reflection are:

1) Personal/professional targets along the cline
2) Methods for achieving them
3) Organization in Business
4) Types of companies: public/private, etc.

5) Management and management activities: The key functions in business organizations (departmental)
6) The main sectors in which businesses operate

Explain listening skills?

Listening is a **receptive skill** which is as important as speaking. Listening is a conscious selective process, unlike hearing which is involuntary, depends on non-verbal signals. It is a taught behavior. Untrained people hear only **25% time**. Listening effectively is crucial to communication. No communication can take place if messages are not heard. Collaboration demands that all voices be heard.

There are **various barriers** to listening, which the Business English teacher should be aware of:

- Physical barriers
- Psychological barriers
- Language problems
- Non-verbal distractions
- Multitasking
- Focusing on your own response
- Preconceived notions
- Interrupting the speaker
- Noise
- Unfamiliar words

Keys to effective listening:

- Stop what you are doing.
- Do not talk
- Make eye contact
- Take notes
- Be objective
- Ask questions
- Control your reactions

Principles for teaching listening are as follows:

1) Expose students to different ways of processing information
2) “Bottom-up versus top-down”
3) Expose students to different types of listening
4) What they listen for
5) Specific information
6) Global of gist: main ideas

Key issues in business communication?

1) Language and cultural barriers
2) Poor communication skills
3) Inadequate needs analysis
4) Medium-related problems (email vs. face-to-face)
5) Misuse or overuse of technology

Discuss Four distinct teaching styles?

Four distinct teaching styles have been identified by Marshall and Wheeler:

The Listener

- Prefers trainee talks more than the trainer.
- Wants trainee to be self-directed and autonomous.
- Appears relaxed and unhurried.

The Director:

- Takes charge, gives directions, and appears self-confident.
- Is well organized, tells students what to do.
- Is final judge of everything

The Interpreter:

- Separates self from learners and observes.
- Uses theory as a foundation.
- Presents well-constructed interpretations.

The Coach:

- Allows learners to evaluate their own progress.
- Involves trainees in discussions.
- Draws on the strengths of the group.
- Uses trainees as a resource.

The Consultant:

- ✓ Is an expert.
- ✓ Is bought in to give **advice, analyze, and carry out assessment of courses**.
- ✓ See whether objectives are met are not.

Difference between units and module?

The syllabus can also be **organized into units**. In course books, the syllabus is organized into blocks often **called units,** each of which has a logical or thematic coherence, even if the unit is not necessary to be completed in one lesson. One unit may lead on to the next, or there may be flexibility with the order in which they are used, but there is normally some continuity between units.

Modules, in contrast, are **normally independent blocks** which can be put together in various ways to create a course; many schools and teachers have ready-to-go modules on specific communication skills. The teacher simply has to select the relevant modules for a particular group.

Business English teachers need to focus on which key components?

Business English teachers need to focus on three key components in particular:

1) linguistic competence
2) discourse competence
3) intercultural competence.

5 activities of teaching business English in online environment?

Teaching BE in an online environment can be quite different than teaching in a classroom. Teaching online requires specific competencies and skills associated with effective online course teaching and facilitation. Before your online course begins, it is important that you feel confident using the tools in the online learning environment and that you become familiar with how the course is set up.

The following are some of the **key activities to consider**:

- Create an effective course outline that communicates course expectations
- Create guidelines of online behavior, and course organization
- Effectively use the learning management system (LMS) and other technologies selected to support the course, including Microsoft Office and Adobe Acrobat
- Possess an understanding of copyright and intellectual property issues in using content in an online course

turn-taking and pauses?

Turn-taking is the orderly exchange of speaking roles during a conversation. It ensures that communication flows smoothly and politely, especially in professional settings. **Turn-taking** shows respect and cooperation. Learners need to understand the cultural rules and linguistic signals for taking turns in professional interactions.

Pauses are short silences in speech that may occur naturally (to think or breathe) or strategically (to emphasize or wait for input). Learners must develop fluency that includes **natural pausing**,

which signals confidence and control over the message. **Pauses** help organize thoughts, encourage responses, or avoid overlapping speech.

IMRD Model?

IMRD model (Introduction, Method, Results, Discussion) is a widely used format in report writing. Learners should be guided to structure their reports using this model to ensure clarity and coherence. The model helps organize ideas logically and is especially useful for academic and business reports.

IMRD structure to:

- Guide students in organizing content clearly.
- Help them focus on purpose, procedure, data, and analysis.
- Improve both the **readability** and **professionalism** of reports.
- Promotes **clarity and logical flow**

5 External Audience of report writing?

- Clients or Customers
- Shareholders or Investors
- Government Agencies or Regulators
- Suppliers or Vendors
- Media or the General Public

Two ways of proficiency test?

1) **Norm referenced**: Norm referenced scores are compared with each other: e.g. 'Mariam scored 90 out of 100 in the top 10 percent'. Numbers, rankings, and letter grades are used.
2) **Criterion referenced:** Criterion referenced are compared with an external standard, gives qualitative information what a learner can do with language.

External proposals?

The title page for an external proposal is the first page of the proposal. It gives:

- The Title
- Proposal Audience
- Proposal Author
- Date of submission, Time it covers

External proposals are aimed for an external audience. They are written to sell a service or a product outside your company. If your company has developed new software, it will need a proposal to market the new item as well as the services which go towards its installation. It will cover such issues as marketing, purchases, contractors and trainers.

The components of proposal?

The components of proposal can be divided roughly into three main parts:

1) Title page, Cover letter, Table of contents, List of Illustrations
2) Abstract, Introduction, Discussion, Conclusion/Recommendation
3) Glossary, Works Cited, Appendices

internal proposal?

The title page for an internal proposal includes the following:

- Titles
- Names: positions, company, department, etc.
- Dates of submission

Internal proposals are aimed for an audience within the company. They relate to issues which are addressed by –company management. When topics are large, then a longer report or proposal is needed to cover such diverse topics as extensive financial budgeting, time for planning and a commitment to new staffing.

reverse chronological resume?

Usually, you write a reverse chronological resume if you are a traditional job seeker, a recent high school or college graduate, aged 18-25, and you hope to enter the profession in which you have received your college training or certification. In the resume you list your education and experience in reverse chronological order. If you are already working, then you list your current job using present tense verbs, and for past jobs you use the past tense, telling where and when you worked there, what your responsibilities were, what steady progress in your profession - in terms of promotions and salary increases, and how you hope to stay in it. Functional and Chronological Resume are two types of resumes.

functional resume?

You write a functional resume when you are a non-traditional job applicant, returning to work after a gap and are not fresh graduate. You have not received education for a job and have changed jobs frequently or you plan to join a new profession. A non-traditional job applicant has to emphasize his skills as related to the job he/she is seeking and quantify his/her accomplishments. Education and experience should be given in reverse chronological order. Both provide the same content; it is only in how the organization of the content varies.

Components of Resumes? OR Elements of CV?

Whether you are writing a reverse chronological or a functional resume, you have to include the following basic components:

1) Identification
2) Career Objectives
3) Summary of Qualifications
4) Employment
5) Education
6) Professional Skills
7) Professional Affiliations
8) Military Experience
9) Optional Components
10) Portfolios
11) References
12) Personal Data

Write five Medical English language practice in the language laboratory?

Medical English language practice in the language laboratory:

1) Doctor patient role plays
2) Rehearsals of mini conference talks
3) Presentations at conferences
4) Feedback crucial component
5) Recorded to give feedback on language, pronunciation, delivery style

The teacher's role in practice activities?

The teacher's role in practice activities is as:

- Activator of resources
- Animator of activities
- Provider of feedback

Characteristics of a placement test?

1) **Validity:** in that it should test what it is designed to test.
2) **Face validity:** Face validity is to be credible to the learner, if we give a grammar test to a learner who is interested to improve presentation skills, the prospective learner may start to question our judgment.
3) **Authenticity**: Tied with this is the question of authenticity, that the test should reflect the target language, and the way it is used (this is why a placement test should, ideally, follow the target situation analysis).
4) **Reliability:** It should be reliable so that if different testers do the same test, the result should be the same; likewise, if the learner took the test two days later, they should get the same result.

Advantages of Authenticity materials?

Authentic materials are "texts, audio, or visuals created for real-life communication purposes, not specifically for language teaching." Examples include news articles, emails, company reports, podcasts, and advertisements.

Advantages of Authentic Materials:

- Real-World Relevance
- Motivation and Engagement
- Cultural Awareness
- Rich Vocabulary and Structure
- Skill Integration

Write a note on E-learning?

E-learning refers to **learning through digital platforms** using the **internet**, often supported by tools like videos, forums, online quizzes, and virtual classrooms. E-learning platforms allow for flexible, learner-driven education where materials, tasks, and interaction can be accessed remotely.

✅ **Advantages of E-Learning**

- Flexibility
- Learner Autonomy
- Access to Resources
- Interactive Tools
- Blended Learning
- Scalability

❌ **Disadvantages of E-Learning**

- Requires Self-Motivation
- Limited Human Interaction
- Technical Issues
- Less Personalization
- Over-reliance on Technology

What information give on the title page of the report?

The title page gives the title of the report, name of the company, writer/s submitting the report, and date of submission.

The cover letter prefaces the reports, provides the reader with an overview and tells the reader what the report holds. **The table of contents** indicates the position of the contents by giving their location in page numbers.

The long report components?

The long report is composed of the following components:

1) Front matter
2) Text
3) Back matter

how fluency is achieved?

Fluency has to do with the **flow and effort of speaking**. Flow can be observed, although not measured, and improvement can be seen in fluency in a foreign language user with practice over regular contact and use of the target language. **Practice** is the key to achieve fluency in intensive as well as extensive courses. Fluency improves confidence and hence competence. So, it is important to give encouragement. All can give evaluation, as smooth flow is apparent to a teacher and co-trainees, although it will be subjective.

Criteria for Course Books?

The criterion for course book selection is generally **applicable** to all; however, for a certain course or learner population it **can be specific**. General requirements are that it has a clear layout and is reviewed periodically. A more specific selection for a certain course or learner population could have for example colorful and attractive illustrations for younger learners, and vocabulary and text relevant to topic for **science and technology** students. One of the most important points to note is that a course book has clear stated objectives. Other points are:

- Coverage: Systematic
- Authentic texts language
- Topics: relevant
- Focus on communication
- Specialist Vocabulary
- Needs: Relevant

Principles of writing?

Principles of writing effectively are:

1) **Accuracy:** Refers to the correct use of language forms: grammar vocabulary spelling).
2) **Fluency:** Fluency refers to the mechanics required speed of writing, effort, flow of writing).

3) **Effectiveness:** Refers to the impact it has on the reader in terms of layout, conciseness, coherence, cohesion, appropriacy of style, use of a variety of features, tables, highlighting etc.
4) **Conciseness**
5) **Ethics**

Difference between left brain and right brain learner?

Learning success depends on a number of factors. There are a number of different ways to look at learning styles. One is based on the findings of research into brain function, that the right and left sides of the brain play different roles in how we process information. Depending on which side of their brain is dominant, there are the 'left-brain' learners who tend to analyze, and to be logical and objective. They may prefer traditional lectures, reading, and clearly structured classroom activities and 'Right-brain' learners tend to be more impulsive and informal, and may appreciate the use of graphics and role-play activities to enhance their learning.

Learning styles are related to **NLP (Neuro-Linguistic Programming),** which is a collection of techniques, models, and theories based on how the mind works and how people behave and communicate. NLP has been useful to some business English teachers because of the insight it gives into various communication skills such as building rapport, non-verbal communication, active listening, and so on, but it can also help our learners understand how they perceive the world, and what affects that perception.

CLT and TBL?

communicative language teaching (CLT): CLT focuses on enabling learners to communicate effectively and fluently in real-life situations.

Task-Based Learning (TBL) is a method where tasks (real-world goals) are the core unit of planning and instruction. Language is learned through completing tasks, not through direct grammar instruction.

Importance of spelling in academic writing?

In academic and professional writing**,** accuracy is critical. Spelling errors reduce the credibility of the writer and distract from the intended message. Well-written reports with correct spelling demonstrate attention to detail and command over language. Correct spelling is crucial in academic writing because it affects clarity, credibility, and communication.

- ❖ Correct spelling ensures your message is clearly understood.
- ❖ Accurate spelling reflects attention to detail and seriousness.
- ❖ Spelling mistakes can lead to lower grades or rejection in formal academic settings.
- ❖ Clear and accurate spelling ensures that your ideas are communicated effectively.

What is formal and informal writing?

Formal Writing:

Formal writing is used in academic, professional, or official contexts, where the tone is polite, structured, and precise.

📂 Examples of Formal Writing:

- Business reports
- Academic essays
- Professional emails
- Research papers
- Job applications

Informal Writing

Informal writing is used in personal, casual, or social contexts. The tone is relaxed, friendly, and often conversational.

📂 Examples of Informal Writing:

- Personal emails or messages
- Blog posts
- Text messages
- Notes to friends or family
- Informal social media posts

Syllabus design?

Once the **aims and objectives are established**, the next step is to define a learning plan or a course syllabus. A syllabus is a document which says what should and will be learnt. Once we **know what we want the course** to achieve, we can move on to thinking about the syllabus. Why do we need a syllabus? One view says that the disadvantage of a syllabus is that it curbs the creativity of teachers and students. The disadvantages outweigh the advantages: some important content might be left, may result in significant gaps, let alone the prohibitive amount of work for the teacher.

A syllabus provides a criterion for material selection, defining the kinds of texts to look for and the type of materials to develop. Success or failure to achieve the state of knowledge can be tested. A syllabus provides a **visible basis** for testing. It gives a road map to the teachers and students - a visible goal and the means to achieve it. Uniformity is an essential condition for any institutionalized activity such as education and a syllabus are one way in which this standardization is achieved or at least attempted.

management issues?

A management issues are usually concerned with general type (management function according to the nature of job) and local factors which affect that company (financial, geographical). The management requires a number of skills - to define duties and responsibilities clearly, set deliverables, policies and estimates, to allocate resources and for communicating with all stakeholders. A good manager has to deal with a broad range of stake holders – employees, clients, subcontractors, competitors and vendors and has to communicate clearly, concisely, nd effectively. He/she will also have to sign off on major decisions, such as "change orders" and choose the best possible team for day-to-day decisions.

five areas where the future manger will have to communicate?

The five areas where the future manger will have to communicate are as follows:

1) **Planning:** It includes establishing goals and standards, developing plans, and rules and procedures and forecasting future.
2) **Organizing:** Delegating/assigning tasks, establishing channels of authority, coordinating work of management teams
3) **Staffing:** Deciding what type of people should be hired, setting performance standards, evaluating performance
4) **Leading:** Getting others to get the job done, motivating
5) **Controlling:** Setting standards, checking actual performance against standards, taking corrective action as needed

corporate culture?

Organizational or corporate culture describes the specific behaviors and values found in organizations. So, for example, a young company with twenty employees which sells groceries via the internet is likely to have a very different way of doing things compared to an older, more traditional engineering company which has been in existence for over a hundred years, and which has more than 300,000 employees scattered in different parts of the world. Professions also have their own distinct cultures.

🌍 Why Corporate Culture Matters:

1) Influences communication and relationships
2) Affects employee motivation and satisfaction
3) Determines acceptable behaviors
4) Impacts global business interactions
5) Guides new employees in adapting quickly

Asking questions before presentation?

Presenters should begin by asking about the audience's background or what they expect to learn. This creates a connection and helps guide delivery. Asking questions **before** a presentation is a **communication strategy** used to:

1) Expectations
2) Background Knowledge
3) Needs or Interests
4) Clarification
5) Interactive Icebreakers

Stimulus activities in authentic material?

Stimulus activities are those that trigger learners' thinking, engagement, and interaction using real-world texts (i.e., authentic materials). These activities are meant to stimulate interest, initiate discussion, and activate prior knowledge. Authentic materials provide real input for learners to develop language and strategies for dealing with unfamiliar content... They stimulate learners to engage with content that reflects actual language use.

🔍 Examples of Stimulus Activities Using Authentic Materials

- News Article
- Business Email
- Company Website
- Financial Report (excerpt)

Factors in delegation?

1) Policy
2) Organization
3) procedures and techniques
4) technology and leadership
5) effectiveness and motivation.

Delegation and Communication?

At the core of delegation are what to delegate and to whom. However, the conceptual elements involved in what and who to delegate to need to be matched by communication skills if the delegation itself is to be effectively communicated. For the business English teacher, it is useful to note the importance attributed to delegation in large organizations, and to think about the skills required to communicate the delegation and to ensure the feedback system for information is well carried out. Effective communication is central to the process involved in explaining the tasks to the people to whom you are delegating, understanding their reservations and concerns, getting their agreement and commitment and sharing feedback on the progress of delegated tasks.

Supplementary Materials?

Supplementary materials should be based on learners' needs. Most teachers teaching course books need supplementary materials to some extent, even if they have to tailor them to the needs of a particular class /offer richer options. Besides course book, the teacher can use computers which have a huge potential in retrieving and storing information. Using computers is motivating and attractive for students, who, however, need to be computer literate. The Need of practice and availability remains a concern. As a teacher's resource in making materials, computers are invaluable, as research can be accessed.

Traditional class teacher, armed with chalk and talk, was the sole imparted of wisdom. Now sources of knowledge have diversified and expanded in non-traditional ways, so the classroom has also become a place where multiple sources are used to bring the outside world into the class. The sophisticated BE learner expects to be given the latest trends, methodologies and equipment in classes. Even with an excellent course book and a wide variety of other materials, there comes a point when the teacher needs to make their own supplementary materials. This should be:

- Relevant
- Personalized
- Work sheets: Easy to make, MCQs, True/false tests, excellent for end of unit quizzes, easy to administer and check.
- Work cards:

How framework technique is useful for making syllabus?

A useful technique is to use a grid or framework in making a syllabus. A grid or framework sets out the aims and objectives, followed by all the elements that we believe are necessary for someone to be able to meet those objectives. The main components of this framework are based on the competencies identified as:

1) Linguistic competence (Language based),
2) Discourse competence (identification of possible discourse learners will encounter, specialist knowledge)
3) Intercultural competence (communication needs in international business/educational environment).

Advantages of framework?

The advantages of frameworks are that they provide a sense of structure and progress to all involved. They also serve as a syllabus.

Other benefits are:

- **Ready-made texts and tasks**: Available for appropriate level
- **Economy:** Cheapest material available
- **Convenience:** To use, easy to carry, pack, and stack. Guidance: For inexperienced teachers.
- **Autonomy**: Learners can learn, monitor, and review with autonomy

Disadvantages of framework?

Disadvantages are that they might be inadequate, i.e. cannot supply needs of diverse learners, topics might not interest everyone, and may inhibit teacher's creativity. Some frameworks work in homogenous classes and cannot cater to diverse learning styles. They have their own rationale and approach. The using of too many framework materials results in making the teaching process overly easy for teachers whose role might be reduced as just mediators of content.

What is framework?

A framework usually consists of a diagram or a simple outline, or a list of key words which can be used as a prompt. Some can be produced before the lesson and some in conjunction with learners. Several techniques can be used to elicit the desired response:

- Ask the learners to bring in their diary (or calendar) for next week, and take you through their plans.
- Ask learners to draw a time plan of a project they were involved with and talk about it.

Using frameworks in teaching Business English has several advantages. First of all, they are easy to produce, they can generate relevant language, the learner can focus on meaning rather than form, and they can be used with all levels of learners. It is possible to run an entire course of Business English using just framework materials.

Components of feedback?

Feedback is **information given** to the learner about his/her performance with the objective of improving performance.

It has two components

1) **Assessment**, in which you simply inform how well or bad the learner has performed, and gives a grade like 70% or a comment like "good", fair".
2) **correction**, more specific information on learner's performance is given through explanation, of provision of alternatives or eliciting from learners. It tells of what the learners did right and what was wrong

types of evaluation?

- Trainer evaluation: in which the teacher decides how effective your training has been.
- Trainee evaluation: The trainees evaluate how effective the training has been.

five main phases of development?

The development and growth of ESP started in 1960s and has undergone five main phases of development:

1) Phase 1: The Concept of Special Language:
2) Phase 2: Rhetorical or Discourse Analysis.
3) Phase 3: Target Situation Analysis/Needs Analysis
4) Phase 4: Skills and Strategies.
5) Phase 5: Learner-centered Approaches
