Midterm important questions 2024

VU360

Here are some important questions from ENG517 Virtual University Midterm 2024:

Lecture 1-5:

1. What is the definition of communication systems and their importance?
2. How do you explain the concept of signal processing and its importance?
3. What are the different types of modulation techniques and their characteristics?
4. How do you explain the concept of demodulation and its importance?
5. What is the concept of noise and its effects on communication systems?

Lecture 6-10:

6. How do you explain the concept of amplitude modulation (AM) and its importance?
7. What are the different types of frequency modulation (FM) and their characteristics?
8. How do you explain the concept of phase modulation (PM) and its importance?
9. What is the concept of pulse code modulation (PCM) and its importance?
10. How do you explain the concept of digital modulation and its importance?

Lecture 11-15:

11. How do you explain the concept of transmission media and their characteristics?
12. What are the different types of transmission modes (simplex, half-duplex, full-duplex) and their characteristics?
13. How do you explain the concept of channel capacity and its importance?
14. What is the concept of error probability and its importance?
15. How do you explain the concept of information theory and its importance?

Lecture 16-20:

16. How do you explain the concept of analog-to-digital conversion (ADC) and its importance?
17. What are the different types of digital-to-analog conversion (DAC) and their characteristics?

18. How do you explain the concept of sampling and its importance?

19. What is the concept of quantization and its importance?

20. How do you explain the concept of signal compression and its importance?

Lecture 21-22:

21. How do you explain the concept of advanced communication systems (satellite communication, mobile communication, etc.)?

22. What is the concept of communication systems innovation and its importance in modern times?
