8) Online chat _____can be used to conduct virtual office hours**. Software**

9) A human or computer-generated voice reads digital text aloud for users in _____ feature of different websites. **text-to-speech**

10) The two readily available online tools to most instructors are email and_____. **Chat**

11) Many _____for ESL students have videos and corresponding transcripts which are free for classroom use. **Websites**

12) In devising **a participation** grade, be sure to define what participation means in the context of a face-to-face class meeting and an online discussion.

13) Students should be referred to on campus so for checking their-------- skills before entering the online program. **Computer**

14) The------- app is progressive and good at spanning concepts from basic level understanding to complex, collegiate-level pieces of writing. **Grammar.**

15) Which app is designed to help students improve paragraph formation, integration of idea, inference, and abstract thinking and expression? **(story builder)**

16) **Determine action**: for the next semester, the teacher decides to repeat the experiment, but allow learners a choice of selecting their own partners or working alone.

17) Hyper means **non-linear**.

18) Dogo is a news website for kids, and provides them with a library of **digital books** and movies as well.

19) Negotiation of meaning differentiates **collaboration** from more cooperative situations in which a group of learners are expected simply to complete a set of narrowly defined tasks with resources to which they have been directed.

20) **Managing:** dealing with the computer, the program and discussing progress made.

21) A process in which two or more learners need to work together to achieve a common goal, usually the completion of a task or the answering of a question is known as **Collaboration**.

22) Students from different institutions and even countries can connect via _____and may be able to work together using the same set of group collaboration tools. **Internet**

23) Students can be informed through _____ emails for continuing online activities in blended courses. **Weekly**

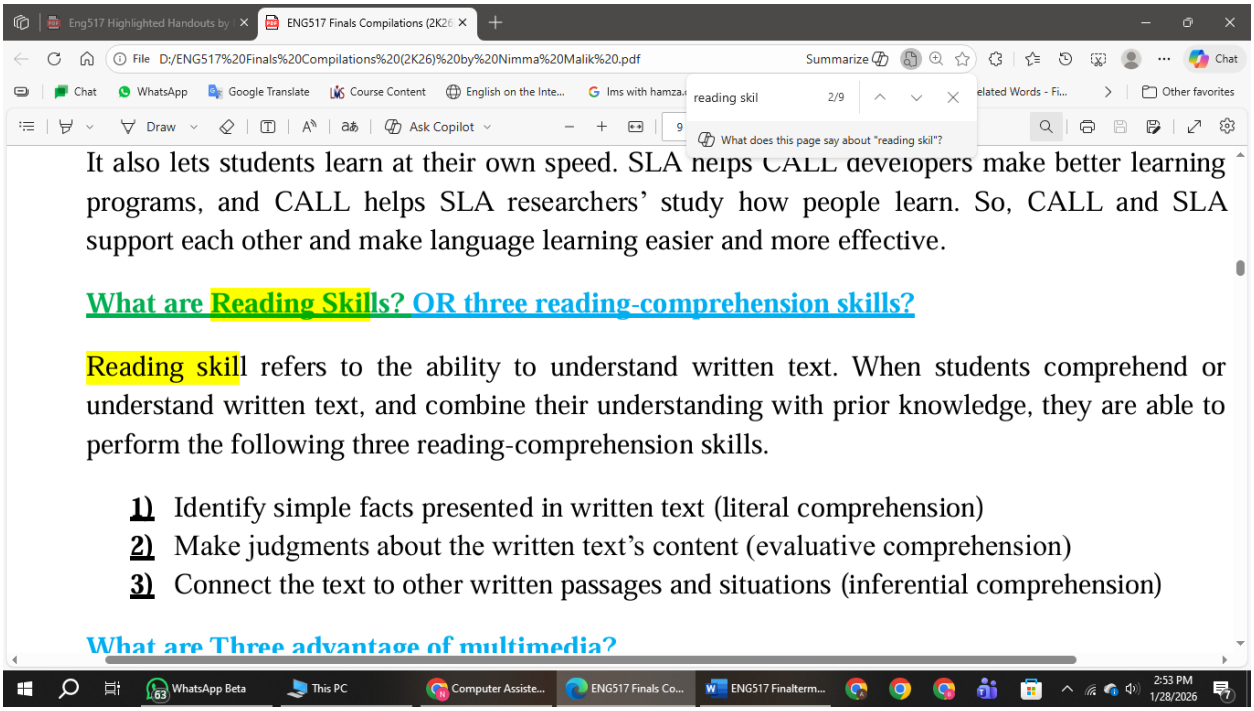

24) Connect the text to other written passages and situations is defined for **(inferential comprehension)**

25) **Therapeutic or empathetic** listening, in which the listener expresses empathy toward the speaker allowing him or her to 'talk through a problem.

26) **[I don't remember the rest of the MCQs. I've added the ones that were from the handouts, and the remaining eight were from the files]**

Subjective:

Short Questions:

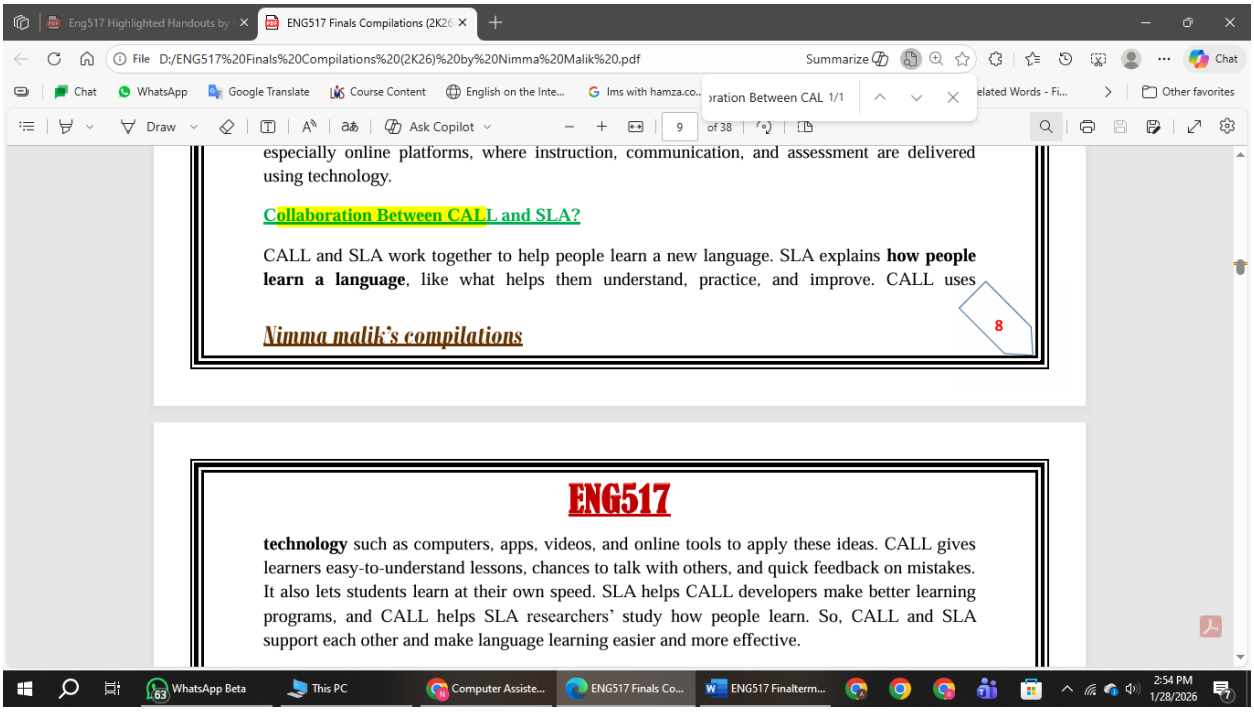

It also lets students learn at their own speed. SLA helps CALL developers make better learning programs, and CALL helps SLA researchers' study how people learn. So, CALL and SLA support each other and make language learning easier and more effective.

What are Reading Skills? OR three reading-comprehension skills?

Reading skill refers to the ability to understand written text. When students comprehend or understand written text, and combine their understanding with prior knowledge, they are able to perform the following three reading-comprehension skills.

1) Identify simple facts presented in written text (literal comprehension)
2) Make judgments about the written text's content (evaluative comprehension)
3) Connect the text to other written passages and situations (inferential comprehension)

What are Three advantage of multimedia?

especially online platforms, where instruction, communication, and assessment are delivered using technology.

Collaboration Between CALL and SLA?

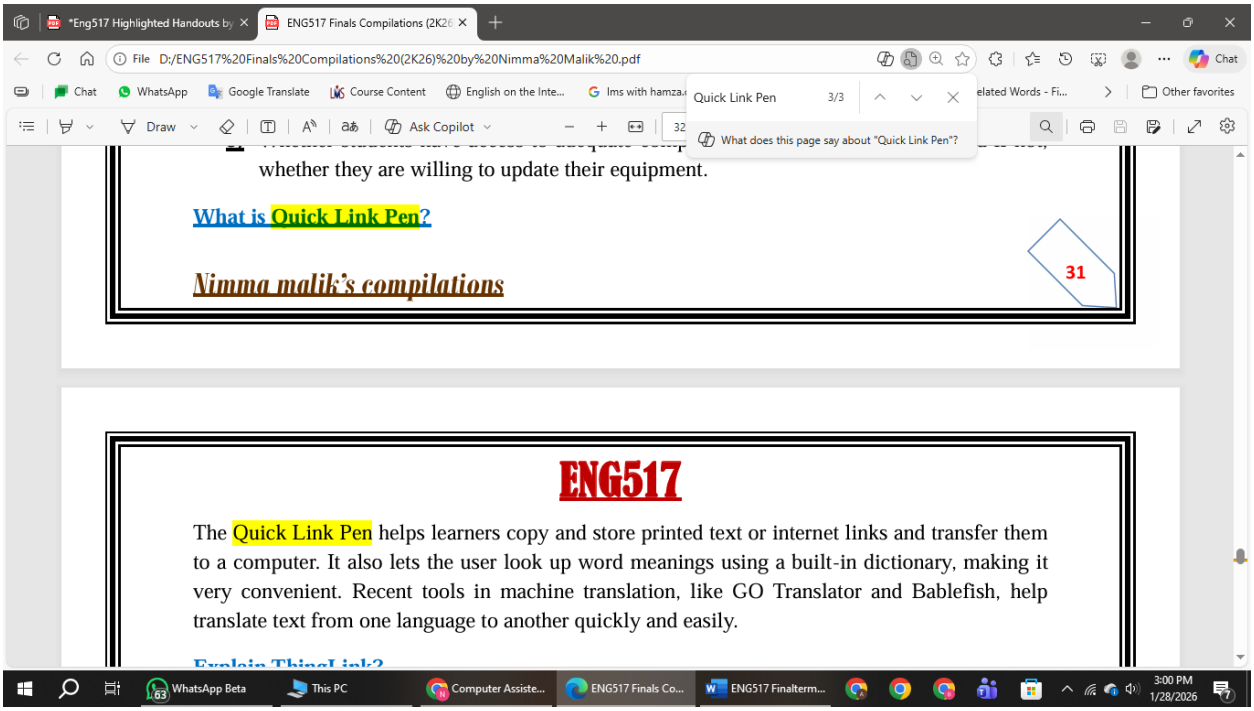

CALL and SLA work together to help people learn a new language. SLA explains **how people learn a language**, like what helps them understand, practice, and improve. CALL uses

technology such as computers, apps, videos, and online tools to apply these ideas. CALL gives learners easy-to-understand lessons, chances to talk with others, and quick feedback on mistakes. It also lets students learn at their own speed. SLA helps CALL developers make better learning programs, and CALL helps SLA researchers' study how people learn. So, CALL and SLA support each other and make language learning easier and more effective.

whether they are willing to update their equipment.

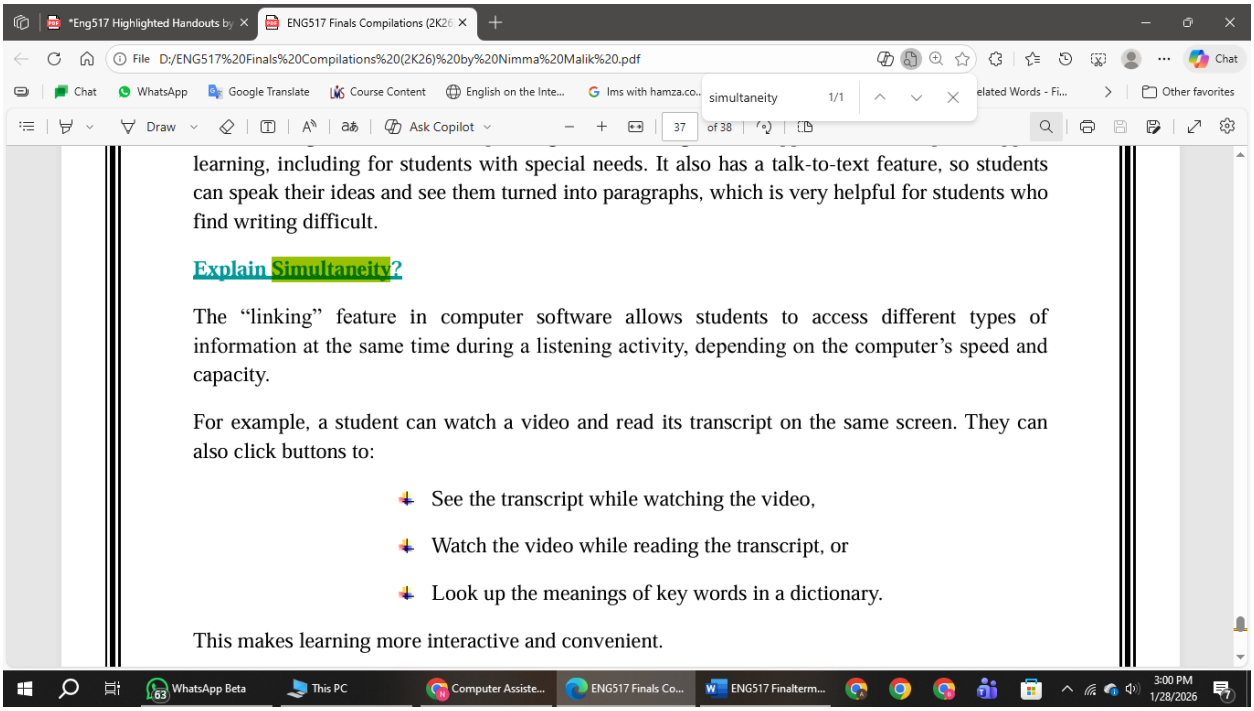

What is Quick Link Pen?

Nimma malik's compilations

31

ENG517

The Quick Link Pen helps learners copy and store printed text or internet links and transfer them to a computer. It also lets the user look up word meanings using a built-in dictionary, making it very convenient. Recent tools in machine translation, like GO Translator and Bablefish, help translate text from one language to another quickly and easily.

learning, including for students with special needs. It also has a talk-to-text feature, so students can speak their ideas and see them turned into paragraphs, which is very helpful for students who find writing difficult.

Explain Simultaneity?

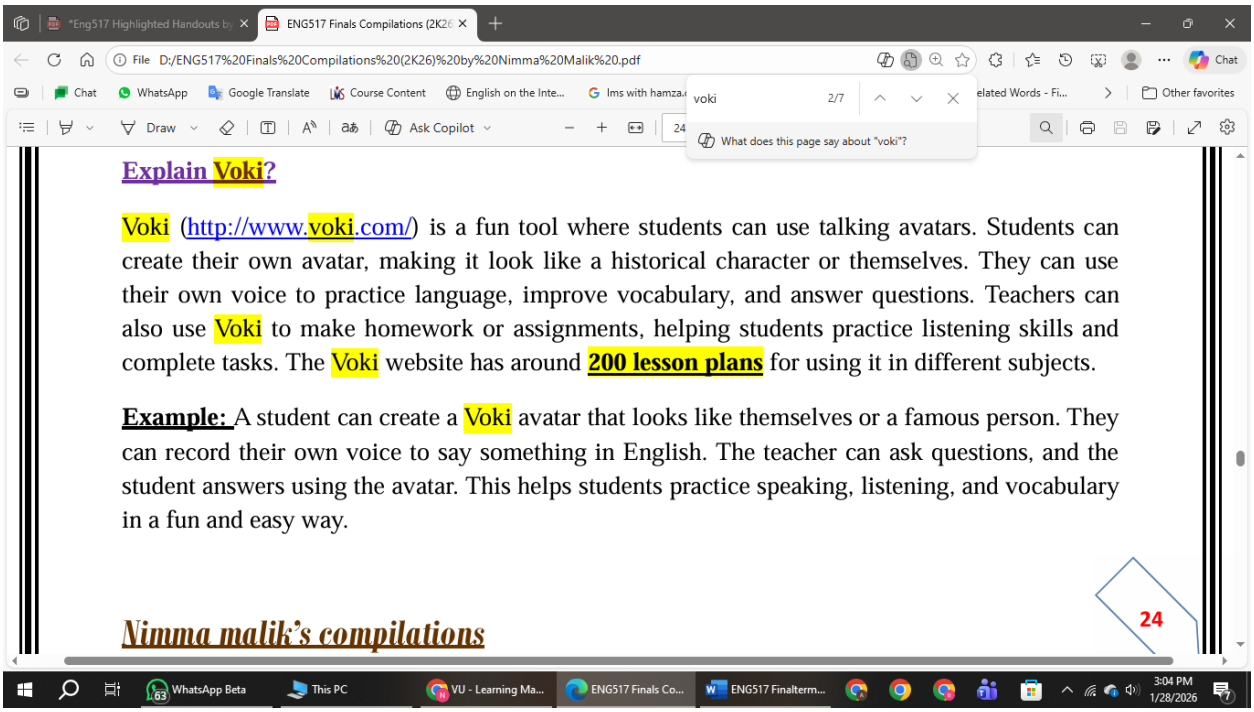

The "linking" feature in computer software allows students to access different types of information at the same time during a listening activity, depending on the computer's speed and capacity.

For example, a student can watch a video and read its transcript on the same screen. They can also click buttons to:

- See the transcript while watching the video,
- Watch the video while reading the transcript, or
- Look up the meanings of key words in a dictionary.

This makes learning more interactive and convenient.

Long Questions:

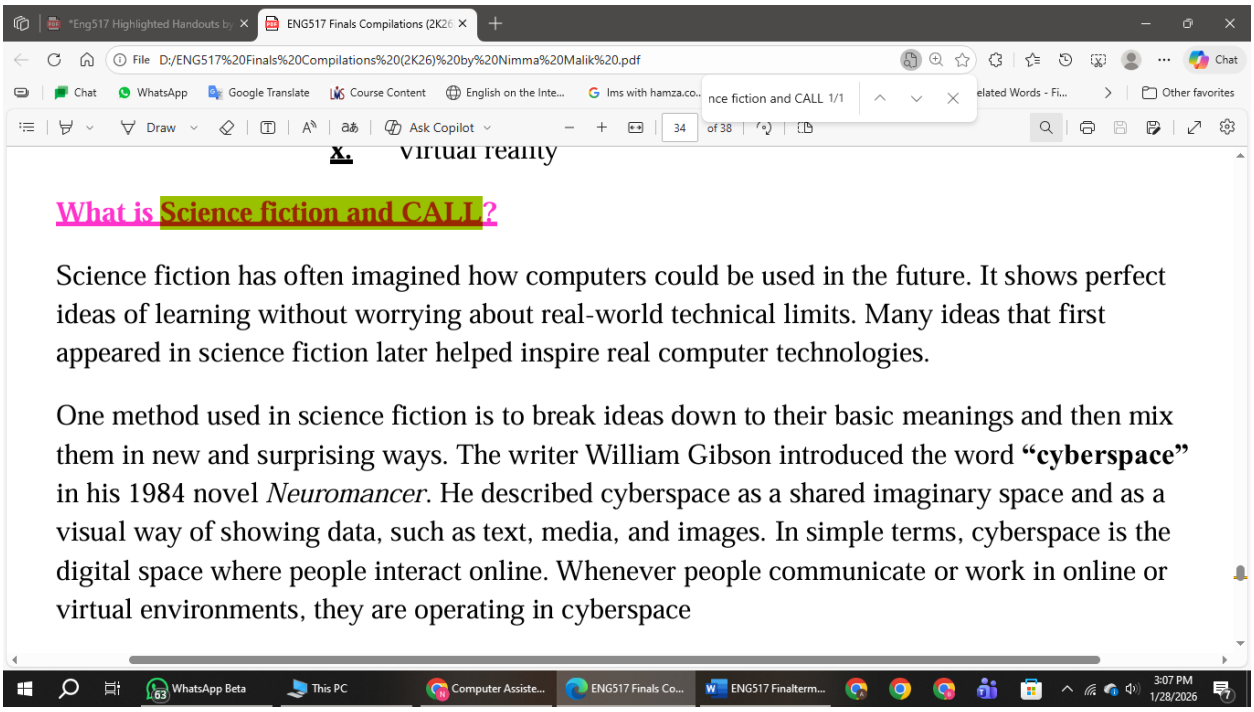

Explain Voki?

Voki (http://www.voki.com/) is a fun tool where students can use talking avatars. Students can create their own avatar, making it look like a historical character or themselves. They can use their own voice to practice language, improve vocabulary, and answer questions. Teachers can also use Voki to make homework or assignments, helping students practice listening skills and complete tasks. The Voki website has around **200 lesson plans** for using it in different subjects.

Example: A student can create a Voki avatar that looks like themselves or a famous person. They can record their own voice to say something in English. The teacher can ask questions, and the student answers using the avatar. This helps students practice speaking, listening, and vocabulary in a fun and easy way.

What is Science fiction and CALL?

Science fiction has often imagined how computers could be used in the future. It shows perfect ideas of learning without worrying about real-world technical limits. Many ideas that first appeared in science fiction later helped inspire real computer technologies.

One method used in science fiction is to break ideas down to their basic meanings and then mix them in new and surprising ways. The writer William Gibson introduced the word **"cyberspace"** in his 1984 novel *Neuromancer*. He described cyberspace as a shared imaginary space and as a visual way of showing data, such as text, media, and images. In simple terms, cyberspace is the digital space where people interact online. Whenever people communicate or work in online or virtual environments, they are operating in cyberspace

ENG517 Final paper **28 Jan 2026**

What are the benefits of CALL in reading skills?

Answer:

1) **Interactive reading** – Students can click words, get meanings, hear pronunciation, and see examples instantly.
2) **Improves vocabulary** – Hyperlinks, glossaries, and multimedia support help learners understand new words quickly.
3) **Better comprehension** – Quizzes, immediate feedback, and guided tasks help check and build understanding.
4) **Individualized learning** – Learners can read at their own pace and choose texts according to their level and interest.
5) **Access to authentic texts** – Online articles, blogs, e-books, and news expose learners to real-world language.

Remember me in your kind and precious prayers
