

ENG518

Treasure for Final-Term

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Maha Malik

Research Methodology

Lesson 20: Writing Discussion of Your Research

Discussion and Conclusion: The format varies and is the most read part of a research study. It includes:

- Interpretation of findings.
- Practical application.
- Overview of the study and findings.
- Relation to previous studies.

Ingredients for Discussion and Conclusion:

- Overview of the study and findings.
- Addressing limitations and possible applications.
- Highlighting future possibilities.

Effective Discussion:

- Put key findings front and center.
- Contextualize meaning.
- Demonstrate the importance of your study confidently.

Lesson 21: Reviewing the Literature

Purpose of Literature Review:

- Identify gaps in existing research.
- Establish context for the study.
- Highlight key debates and methodologies.

Lesson 22: Constructing a Research Literature Review

Abstracting Primary Literature:

- Formulate a systematic procedure for cataloging and storing information.
- Use tools like Microsoft Access or similar systems for organizing studies.
- Record detailed information including authors, titles, journals, and findings.

Lesson 24: Writing a Research Literature Review

Outline for a Literature Review:

- Follow a structure of Introduction, Method, Results, and Discussion.
- Summarize key aspects such as the focus of the study, research questions, hypothesis, sample size, and variables.

Lesson 25: Choosing the Research Methodology

Types of Methodologies:

- Quantitative, qualitative, and mixed methods.
- Match the methodology to the research questions and objectives.

Lesson 26: Sampling Techniques

Key Sampling Methods:

- Probability sampling: Random, stratified, and cluster sampling.
- Non-probability sampling: Convenience, quota, and purposive sampling.

Lesson 27: Ensuring Validity and Reliability

Validity:

- Internal validity ensures causality.
- External validity refers to generalizability.

Reliability:

- Consistency of results across time and observers.

Lesson 28: Action Research Framework

Steps in Action Research:

- Identify a problem.
- Develop a plan of action.
- Implement the plan.
- Evaluate and reflect on the results.

Lesson 29: Data Collection Methods

Types of Data Collection:

- Surveys, interviews, observations, and archival research.

- Choose methods based on research objectives and resources.

Lesson 30: Experimental Research

Key Features:

- Basic assumptions behind the experiment.
- Types of experimental design, including true and quasi-experiments.
- Procedures and steps in designing experimental studies.

Types of Variables:

- Independent,
- dependent, and
- moderating variables.

Lesson 31: Ethical Considerations in Research

Key Ethical Principles:

- Informed consent, anonymity, and confidentiality.
- Avoidance of harm and bias.

Lesson 32: Writing Research Hypotheses

Components of a Hypothesis:

- Clear statement of the expected relationship between variables.
- Testable and measurable.

Lesson 33: Framework of a Research Article

Key Sections:

- Title and abstract.
- Introduction: Defines the research problem and objectives.
- Methodology: Details research design, tools, and procedures.
- Results: Presents findings in a clear format.
- Discussion and Conclusion: Summarizes the significance and future directions.

Lesson 34: Analyzing Data

Steps in Data Analysis:

- Cleaning and preparing data.
- Using statistical or thematic analysis tools.
- Presenting data visually and narratively.

Lesson 35: Conducting Research and Using Tools

Important Considerations:

- Use tools like EndNote and TURNITIN.
- Formulate clear and challenging research questions.
- Search databases effectively using Boolean operators (e.g., AND, OR, NOT).

Lesson 36: Choosing a Documentation Style (APA)

APA Details for Citation:

- Include author names, titles, publication year, volume, and page numbers.
- Use in-text citations and reference lists.

Supporting a Thesis:

- Organize ideas and provide evidence.
- Use headings like Method, Results, and Discussion for structure.

Lesson 37: Conducting Interviews

Types of Interviews:

- Structured, semi-structured, and unstructured.
- Tailor interview style to research objectives.

Lesson 38: Designing Questionnaires

Effective Questionnaire Design:

- Use clear and concise language.
- Include a mix of closed and open-ended questions.

Lesson 39: Research Methods in Literature

Historical and Biographical Approaches:

- Examine the time period and societal context of a work.
- Analyze the relationship between an author's life and their work.

Moral Criticism:

- Literature as a source of moral and philosophical teaching.
- **Advantages**: Useful for analyzing themes and messages.
- **Disadvantages**: Can be overly judgmental or neglect artistic merit.

Lesson 40: Documentation Styles (MLA and CMS)

MLA Highlights:

- Use in-text citations with author names and page numbers.
- Provide a "Works Cited" list at the end.

CMS Highlights:

- Use superscript numbers in the text.
- Provide footnotes or endnotes and a bibliography.

Lesson 41: Plagiarism and Ethical Writing

Avoiding Plagiarism:

- Always attribute original authors for their ideas.
- Paraphrase effectively and cite sources.
- Use plagiarism detection tools like TURNITIN to ensure originality.

Ethical Writing Principles:

- Be honest in presenting data.
- Avoid misrepresentation or fabrication of findings.

Lesson 42: Effective Use of Visuals in Research

Types of Visuals:

- Charts, graphs, and tables for quantitative data.
- Diagrams and illustrations for qualitative findings.

Guidelines for Creating Visuals:

- Ensure clarity and relevance.
- Label axes, include legends, and maintain consistency.
- Avoid overloading visuals with excessive data.

Lesson 43: Peer Review and Revising Drafts

Importance of Peer Review:

- Helps refine research questions and methodology.
- Provides constructive feedback to improve quality.

Revision Strategies:

- Address feedback systematically.
- Improve clarity, coherence, and argumentation.
- Ensure consistency in style and formatting.

Lesson 44: Publishing Your Research

Choosing the Right Journal:

- Match your research scope with the journal's aims.
- Consider impact factor and audience.

Submission Process:

- Follow journal guidelines meticulously.
- Include a concise cover letter highlighting your study's significance.

Lesson 45: Evaluating a Research Proposal

Criteria:

- Significance and context of the proposed research.
- Quality of design, methodology, and tools.
- Likelihood of success and researcher qualifications.
- Reasonableness of the budget and timeframe.
