ZOO504 FINAL PAST MCQS

1. Bones of Leopard cat are used in some traditional _____ medicine _____Asian
2. Wild life is natural _____ with a great importance_____ Renewable resources
3. Reason of death identify on the basis of _____Post mortem
4. In brown bear sexual maturity is from _____ of age_____4.5-7 years
5. Ayubia national park support _____ species of mammals_____31
6. Barking deer weighs _____22-25kg
7. Capra body length is _____ 52 inches
8. Body color of jungal cat_____ Sandy grey
9. Hog deer protected in _____Bangladesh
10. The name of argoli is a_____ for sheep_____ Mongolian word
11. Sexes in koklass is _____Dimorphic
12. Egg of chukor hatched in 23 to _____ days_____25
13. Wolly flying squirrel native to _____Pakistan
14. The deliberate movement of organisms from one site for _____in another_____ Release
15. Coat of panther is_____ Tawny or light yellow
16. _____fur patterned with markings is the perfect camouflage for their rocky habitat_____ Thick
17. Hazargangi chiltan park establish in_____1978
18. Largest park at sindh_____ kirthar national park
19. Pinecanes_____ conferous tree
20. Criteria declared for wet land is_____9
21. Conservation purpose of zoo_____ fauna
22. In zoo full time officer_____1
23. Endamic species_____ Gela pagos fauna
24. Anti inflammatory drug_____ Diclofenac
25. In conservation Translocation deliberate movement provide site for_____ Release
26. Bones of leopard cat used_____ Asian medicine
27. Urial subspecies locally called_____ Punjabi dunba
28. Foxes are_____ Omnivorous mammals
29. Civelts are related to_____ Cats
30. _____ throated marten larger size_____ yellow
31. kong fishers long term decline chemical and_____ Biochemical
32. Maintenance of hygienic condition by_____ graveyards
33. master plane_____ 5 to 25 years
34. snow leopard_____ thick fur
35. snow leopard wild_____ 6000
36. Paulter coat ranges from tawny or light_____ yellow
37. In wild ass poaching for meal_____ Medicinal purpose
38. Musk deer refer any one of all_____ Seven
39. Indus dolphin navigation_____ Echolocation system
40. Hog deer fully protected in Bangladesh and_____ India
41. IUCN recognize_____ game reserve in Pakistan_____ 66

JOIN VU BIOANIMALS

42. Chashma and tonsha barrage dolphin sanctuary was declared open to the public_____ in 1972
43. _____ projects in more than 60 nations around the world that are intended to help protocol both wild life and the wild place in which live_____ 500
44. Rosy periwinkly leaves extracted as_____ Anticancer
45. Elephant eat up to_____ of food per day_____ 450kg
46. _____wild elephant preservation act_____ 1873
47. The ssc is governed by a steering committee which is headed by the_____ chair_____ Commission
48. Schedule iii wild birds and animals protected through out the_____ year
49. _____determine any wild life species found in any ever_____ Habitat
50. Indus dolphin resereve is natural wet land situated in the_____ Sukkar
51. Gir Forest National Park is a wildlife sanctuary in Gujarat, western India. It was established to protect_____ AsiaticLions

SUBJECTIVE

2 Marks

1. **World most traded animals ?**

Indian Pangolins are considered to be the most traded wild animal in the world.

2. **How many species of Martens?**

Two species common to Pakistan are

- Stone marten (Martesfoina)

The stone marten has a dense fur coat of rich liver chestnut hue

Distribution

Stone martens are found throughout mountain ranges of Baluchistan and Northern areas.

- Yellow throated marten (Martesflavigula)

The yellow throated marten is considerably larger in size than the stone marten.The whole of it's chest, throat and lower jaw are yellowish in color.General body color is silvery, tail is longer; rhinarium is naked and black.

Distribution

Yellow throated marten is found in Chitral, Azad Kashmir and Margala hills

3. **How many wildlife Sanctuaries in Pakistan?**

In Pakistan presently there are 99 Wildlife Sanctuaries. IUCN recognized number of Wildlife Sanctuaries in Pakistan.

4. **Why animal trapped?**

Trapping of Wild Animals

JOIN VU BIOANIMALS

- Pets(cats etc.)
- Sold for Medical experimental studies (Monkeys, Rabbits etc.)
- For street shows, circuses (Bears,Parrots,Lions)

5. **What is animal enclosure?**

Essential features regarding animal enclosures are:

- All animal enclosures in zoo shall be so designed as to fully ensure the safety of

i. Animals
ii. Caretakers
iii. Visitors

6. **Scientific name of black buck?**

Antelope Cervicapra.

7. **Aims of PAWS?**

Pakistan Animal Welfare Society (PAWS)

Aims to create an equitable relationship between humans and animals in Pakistan.

8. **How can we educate people about wildlife protection?**

Most people of any country are ignorant about the utility of wildlife. Hence, for the conservation of wildlife there is a great need of educating people.

To achieve this goal following methods can be adapted.

- Celebration of wild life week every year.
- Publicity through media and film shows.
- Holding conducted tours, essay competitions, lectures, seminars, etc.
- Setting up nature clubs in educational institutions.
- Publication of wildlife books and journals.
- Establishment of natural history museums etc.

9. **How herbicides and pesticides can effect endangered species?**

Certain herbicides and pesticides are horrible pollutants that causing severe damage to the environment and animals dependent upon. To provide natural food to animal if spray are done to kill pest or un dew herbs it may cause problems to endangered species as they may die.

10. **Explain Indian pangolin?**
    - **English Name:** Scaly Ant eater
    - **Scientific Name:** Maniscrassicaudata
    - **National status:** Vunerable
    - **IUCN Red list Threat Status:** Endangered

Pangolins are considered to be the most traded wild animal in the world

11. **short note on leopard cat?**

JOIN VU BIOANIMALS

- **Scientific Name:**Prionailurusbengalensis
- **IUCN Red list Threat Status:**Least concern
- **Description**

The leopard cat looks like a miniature, long-legged and more slender version of a leopard. Body markings are like leopard; head with stripes.

12. **How pollution effect wetlands?**

Wetland degradation is a big and growing problem occurring due to pollution inputs.

The primary pollutants causing wetland degradation are

- Sediments
- Fertilizers
- Human sewage
- Animal waste
- Road salts
- Pesticides
- Heavy metals

13. **2 Wild sanctuaries of KPK?**

Khyber PakhtunKhwa(KPK)

- ✓ Manglot
- ✓ Argam Basti

14. **Define wetlands?**

Wetlands are areas where water is the primary factor controlling the environment and the associated plant and animal life.

They occur where the water table is at or near the surface of the land, or where the land is covered by shallow water.

15. **Trading of animals?**

Trading of wildlife and its products.e.g. Bush meat, Ivory, hide, trophy, fur etc.

16. **Invasive species?**

An invasive or alien species is established outside of its natural past or present distribution, whose introduction and/or spread threaten biological diversity.

17. **Habitat of chukor?**

Habitat

Lives on barren rocky slopes with sparsely stunted grass and bushes.In winters, it comes down to an elevation of 1200-1500 m. Re ascends in summer to 2500 m.

18. **Define Territory?**

JOIN VU BIOANIMALS

It is basically the home of the wild animals, it's the particular area in which animals itself defined by other animals or may within the same species to fight to protect that particular area that is called Territory.

19. **How birds and insects help to maintain ecosystem?**

Insects and birds add to the economic gains through pollination of plants.

Maintaining the 'balance of Nature'. e.g. Carnivore-herbivore balance.

20. **Mintaka means?**

Mintaka means : *"Thousand goats.*

21. **Onus proof?**

Onus of Proof

- When in any proceedings taken under this Act.

Wild animal, trophy or meat shall be presumed to be the property of until the contrary is proved.

22. **Name largest national park of Pakistan?**

Hingol National Park was established in 1988. It is now named as Dharune-Hingol National Park, formed by the mergence of two Parks.

23. **Scientific name of Wild Goat and Domestic Goat?**

BLACK BUCK ……. Antilope cervicapra WILD GOAT…..Capra aegagrus.

24. **Two dams of Dams?**
    - Tarbela Dam
    - Mangla Dam
    - Hub dum
25. **Game reserve?**

An area where regulated hunting & shooting is allowed.

"A game reserve is an area wherein controlled hunting and shooting is permitted on permit basis.

26. **Define Wildlife?**

"**Wildlife**" refers to neither cultivated or domesticated nor tamed organisms.Or Organisms that grow or live wild in an area without being intervened by humans.

Wild life is natural renewable resource with a great importance throughout world.

27. **Experimental Wild Animals?**

Wild animals as Experimental Animals - Monkeys, Rabbits, Guinea-pigs, Rats etc.

28. **Threat to Indian Vultures?**

JOIN VU BIOANIMALS

Threats

These vultures were being found dead and dying in Pakistan and throughout India.The anti-inflammatory drug diclofenac has been identified as the cause of mortality.Vultures are exposed to diclofenac and other NSAIDs through scavenging on the carcasses of largely cattle and buffalo that have been treated with the drugs prior to death and left for scavengers to consume.Hence likely contributory factors are

- Poisoning
- Pesticide use
- Conversion and disturbance of forested habitats within its range.

29. **Game reserve in Pakistan?**

There are 99 Game reserves in Pakistan . IUCN recognized 66 Game/Hunting reserves in Pakistan.

3 Marks

1. **Urial and Subspecies description?**

Distribution:

Found in Chitral& Northern areas. On mountains upto 3000 meters elevation

2. **Indian Spotted Eagle description?**

Description

A medium-sized eagle about 60 cm in length and has a wingspan of 150 cm with a short tail.Adults are essentially brown. The legs appear longer and thinner due to the tarsii being less thickly feathered. This species has a lighter coloration overall compared to its relativeswith a darker iris that makes the eyes appear darker than the plumage. The young birds are giving a spotted appearance glossy brown. Tips of the head and neck feathers being creamy. The upper tail coverts are light brown with white giving a barred appearance.The median coverts have large creamy spots.After about eighteen months the bird moults and becomes a darker shade and has less spots.

3. **Capra description?**

Description:

Body length 52 inches, 4.4 feet have strong limbs terminating in broad hooves. Female and young male yellow brown to reddish grey. Male are beautiful with long horn, white hair in old age. Male have short beard, Female black beards.

4. **Threats to Sand Dune Cat?**

Threats

Habitat degradation and loss are considered to be the major threats to the Sand Cat. Many areas are also more heavily freqed by humans, their domestic animals and commensals (i.e. red fox, Vulpesvulpes.

JOIN VU BIOANIMALS

- Arid ecosystems are being rapidly converted.
- Infrastructural development
- Human settlement and activity
- Degradation occur through livestock grazing
- They are also killed in retaliation for killing chickens or Houbara and MacQueen's bustard

5. **Note on capra hircus?**
    - **Capra hircus**

Females are beardless but carry backward curving horns. Measure upto 15 cm and bear fine annulations towards their base.The younger males and females show a characteristic shape pattern with a dark stripe running from the corner of eye to the muzzle.Mature males are spectacularly beautiful and may have horns over one meter in length.In adults the hair coat is of reddish buff in color.The belly and the outside of lower limbs, beard and fore part of face varies from black to chestnut brown in color.The shoulder height. They are capable of surviving in very arid desert conditions. They inhabit mountain crests upto 3300 m.

- In males is 85 to 95 cm. In females 55 to 60 cm.
- The weight of adult Males up to 120 kg, Females 50 to 55 kg

6. **Note on brown bear?**
    - ❖ **Scientific Name:** Ursusarctos
    - ❖ **IUCN Red list Threat Status:** Least concern
    - ❖ **Syn;** Grizzly Bear
    - ❖ **Description:**

Large animals, dark in colour, long guard hair over the shoulder, characterized by a distinctive humps on shoulders, long claws on the front paws. Sexual maturity: 4.5 to 7 years of age.Litter size ranges from one to four but two are common.Cubs remain with their mothers for at least two and half years.Female breed every three years.

- ❖ **Feeding habit:**

Chiefly vegetarian. Feed mostly on fruits, honey and ants.Occasionally kill sheep and goat.

7. **Note on Leopard cat?**

✓ **Scientific Name:**Prionailurusbengalensis
✓ **IUCN Red list Threat Status:**Least concern
✓ **Description**

The leopard cat looks like a miniature, long-legged and more slender version of a leopard. Body markings are like leopard; head with stripes.

Its fur varies highly in colour and markings according to the region. Generally spotted body fur coat

- **In the tropics** Fur is yellowish-brown with white underparts
- **In the northern** part of the species' range Greyish brown thick fur and are also larger and heavier than the ones in the south.

JOIN VU BIOANIMALS

The size and shape of the black markings covering the body and limbs are also highly variable. The spots sometimes form lines along the neck and back. The irises are deep, golden brown to grey. Males are larger than females

- Body length 54-60 cm
- Weight 3-4 kg.
- Longevity: up to 13 years
- Litter size:2-3 cubs

8. **Hygiene and feeding zoo rules?**

Maintenance of hygiene is important in every walk of life.

- Every zoo shall have ensure timely supply of wholesome and unadulterated food.
- The food must be in sufficient quantity to each animal according to the requirement of the individual animal, so that no animal remains undernourished.
- Every zoo shall have provide for a proper waste disposal system for treating both the solid and liquid wastes generated in the zoo.
- All leftover food items and animal excreta shall be removed from each enclosure regularly.
- Waste disposal should be done in a congenial manner to general cleanliness of the zoo.
- The zoo operators shall make available round the clock supply of potable water for drinking purposes in each enclosure.

9. **What is location of Astore sanctuary?**

Location:

- Astore District
- Between Nanga Parbat
- Gilgit–Baltistan, Pakistan

10. **Mention number of animals in large and mini zoo?**
    - Large Zoo (More than 75 numbers)
    - Mini Zoo (20 numbers)
11. **Indian Pangolian?**
    - **English Name:** Scaly Ant eater
    - **Scientific Name:** Maniscrassicaudata
    - **National status:** Vunerable
    - **IUCN Red list Threat Status:** Endangered

Pangolins are considered to be the most traded wild animal in the world

- **Description**

The Indian Pangolin has Relatively tiny head, Hump-backed body.Thick tapering tail almost equal in length to its body.They are completely covered with scales. Made of keratin which is getting harden as the creatures get older.The scales bear fine longitudinal striation on their surface.There is hardly any external ear. The muzzle tapers to a narrow, down-curving snout.The hind legs are stout and rather columnar with five blunt pinkish white toe nails.

12. **Threats to wild ass?**

JOIN VU BIOANIMALS

Threats

- Illegal trade seems to happen primarily on a national level.
- Poaching for meat, hides and fat, is believed to have apparent medicinal properties.
- Overgrazing by livestock reduces food availability, and herders also reduce the availability of water at springs.The cutting down of nutritious shrubs and bushes exacerbates the problem.
- A series of drought years could have devastating effects on this species
- Habitate fragmentation is a particular concern in Mongolia as result of the increasingly dense network of infrastructure

13. **Location of safari park?**

Safari park in Lahore Pakistan.

14. **Primary objective of national parks?**

Primary objective

To protect natural biodiversity along with its underlying ecological structure.

Other objectives

- To manage the area in order to perpetuate, in as natural a state as possible.
- To maintain viable and ecologically functional populations.
- To contribute to local economies through tourism.

To manage visitor use for inspirational, educational recreational purposes

15. **Three rules for zoo?**

Zoo Rules

Zoo is a facility in which animals are

- Housed within enclosures
- Displayed to the public
- They may also breed
- "Today, the zoo is on the list of inevitable field trips and vacation destinations."

16. **Threats to snow leopard?**

Major threats to snow leopards

✓ **Poaching**

Snow leopards have long been killed for theirBeautiful fur, Bones, Body parts, Traditional Asian Medicine.

✓ **Conflict with communities**

JCNU VU BIOANIMALS

Retaliation for attacking herders' livestock.Decline in the leopard's natural prey is forcing them to rely more on livestock for food and increasing the risk of retaliatory killings. Due to hunting, competition from increasing livestock herds, and habitat loss.

- ✓ **Shrinking home:** Snow leopards need vast areas to thrive**.** Expanding human and livestock populations are rapidly encroaching on their habitat. New roads and mines are also fragmenting their remaining range.
- ✓ **Changing climate**

All the threats will be exacerbated by the impact of climate change on the fragile mountain environment. Hence, putting the future of snow leopards at even greater risk.

- ✓ **Lack of effective law enforcement.**

17. Feeding habits of common peafowl?

Feeding habit

Omnivorous:

- Grain and green crops to insects
- Small reptiles
- Mammals
- Berries
- Termite
- Grasshopper
- Ants and beetles.
- Roots in high fairly open trees in large number.

18. What are conservation strategies for kingfisher ?

Conservation Actions Underway

- Bern Convention Appendix II.
- EU Birds Directive Annex I.
- There are no known current conservation measures for this species within its European range.

Conservation Actions proposed

- Preservation of rivers and streams must be mediated through industry, agriculture and water authorities
- Research to investigate the importance of individual threats and mitigation measures against all the factors.

19. Note on barking deer?

- **Muntjacs**

✓ Muntiacusmuntja
✓ Cervusmoschatus
✓ Cervusmuntjak

- **IUCN Red list Threat Status**: Least concern

JOIN VU BIOANIMALS

It gives calls similar to barking, usually upon sensing a predator. Hence the common name for all muntjacs of "barking deer

- **Description:**

It is a little dainty creature and weighs about 22-25 kg.Coloration varies from deep brown to yellowish with creamy or whitish markings.Only males have antlers.The upper canines of the male are elongated into tusks, which curve strongly outward from the lips.Females also develop small tusks in the upper jaw.Capable of inflicting sever injuries with these tusks, when defending themselves or their fawns.Two bony ridges are present in the front part of the skull.

20. Maintenance of Zoo?

- ✓ No zoo shall acquire any animal in violation of Wildlife Act.
- ✓ No zoo shall exhibit any animal that is seriously sick or injured.
- ✓ No zoo shall use any animal, other than the elephant in plains and yak in hilly areas for riding purposes.
- ✓ Each zoo shall be closed to visitors at least once a week.
- ✓ Each zoo shall have a wall at least two meters high from the ground level.

21. Name national Park?

- Ayub National Park
- Chinji National Park
- Hingol National Park

22. Rules of Administrator of large zoo?

Large zoo

At least one full time curator having the sole responsibility of looking after the upkeep of animals and maintenance of the animal enclosures. At least two full-time veterinarians.

23. Note on rabies ?

Rabies(Hydrophobia) : Bite Wound Disease

Host: Any mammal, usually carnivores; highest incidence is in skunks, foxes, bats, and raccoons.

Transmission: Bite wounds, infected saliva in cuts or skin abrasions, aerosol in bat caves.

24. Characteristics of the male tragopan?

Medium sized pheasant. Sexes are highly dimorph. Male grey upper parts and reddish facial skinNumerous white spots. Each spot bordered with black and deep crimson patches on the sides and back of the neck.The throat is bare with blue skin while the bare facial skin is red. They have a small black occipital crest.

- Weighs 1.8–2.2 kg (4.0–4.9 lb)
- Length from 55–60 cm (22–24 in)

JOIN VU BIOANIMALS

5 Marks

25. Indian Pangolin?

English Name: Scaly Ant eater

Scientific Name: Maniscrassicaudata

National status: Vunerable

IUCN Red list Threat Status: Endangered

Pangolins are considered to be the most traded wild animal in the world

Description

The Indian Pangolin has Relatively tiny head, Hump-backed body.Thick tapering tail almost equal in length to its body.They are completely covered with scales. Made of keratin which is getting harden as the creatures get older.The scales bear fine longitudinal striation on their surface.There is hardly any external ear. The muzzle tapers to a narrow, down-curving snout.The hind legs are stout and rather columnar with five blunt pinkish white toe nails.

Habitat and Ecology

It occurs in various types of tropical forests as well as open land, grasslands. Degraded habitat, including in close proximity to villages. The species is thought to adapt well to modified habitats. Provided its ant and termite prey remains abundant.The animal is Solitary, Nocturnal, Burrow-dwelling. During mating season, adult males and females share the same burrow. Females usually give birth to one young. Gestation period of 165 days.Longevity in the wild is unknown. In captivity it has been recorded up to 13 years 2 months. This species is arboreal in some habitats, and is a good climber, using its prehensile tail and claws to climb trees

Distribution

Native:

India, Nepal, Pakistan

Mangla,Potohar and Salt Range across Indus south to near Karachi and northward in the mountainous areas uptoKallat

- Sri Lanka
- Possibly extinct:
- Bangladesh

Threats

Primarily threatened by Hunting, Poaching (for meat and scales), Illegal international trade. Up to 100,000 pangolins are estimated to be hunted and sold every yearits meat is consumed as a source of protein locally. The meat is considered a delicacy in China, Vietnam and other parts of south-east Asia. Scales are used in whole or powdered

JOIN VU BOAMMALS

form in the preparation of traditional medicines.An increase in theAgrarian economy Improved irrigation. The use of pesticides comprise additional threats to this species. Occasionally killed out of fear for having an odd shape

26. Species conserved by SGP?

Small Grants Programme (SGP)

- *"Small support for long term impact".*

SGP of WWF-Pakistan has been supporting grass root level organizations and researchers to strengthen efforts to conserve threatened and endangered species and ecosystem. Under the programme more than 450 projects have been successfully completed.
SGP has supported innovative conservation initiatives for priority species and ecosystem.

- Marine turtles
- Snow leopard
- Indus River dolphin
- Sharks
- Mangroves forests
- Indus river delta
- Coniferous forests.

Collaborative research programs should be initiated with neighboring countries with common ecosystem.

27. Chashma and taunsa barrage river dolphin?

Chashma and Taunsa Barrage Dolphin Sanctuary was declared open to the public in 1972

Location:

- Mianwali District, Punjab-Pakistan

Features:

For a wide variety of waterfowls including threatened species, an important site for

  - Breeding
  - Staging
  - Wintering
- Mid-winter waterfowl counts in recent years have regularly exceeded 20,000 birds
- Anatidae (ducks, geese, swans)
- The endangered Indus Dolphin occurs in the river both upstream and downstream of the barrage

Issues for consideration:

- Taunsa Barrage Wildlife Sanctuary is currently confronted with multiple issues
- Limited cultivation is practiced inside the sanctuary area
- Clearing off the natural vegetation
- Alteration of the natural ecosystem
- Degrading wildlife habitat
- Invasion of alien species

JOIN VU BIOANIMALS

- Hence, adverse environmental impacts.

Management Plan:

WWF-Pakistan has developed a sustainable management plan. Indus river dolphin conservation project.

28. Urial and it's sub species?

Urial& Sub Species

Prominent species in Pakistan

- Ovisammon (Marcopolo sheep)
- Ovisorientalis (Urial)

Ovisorientalis

Urial is a wild sheep with long legs and relatively small horns, native to central Asia. Urial is represented by three sub species in Pakistan.

OvisorientalisvigneiLadakhUrialor Shapu

Fur tends to be more greyish in winter and less red.The chest ruff is comparatively short with black hairs predominating.The horns turn markedly inwards at their tips

Distribution:

Found in Chitral& Northern areas. On mountains upto 3000 meters elevation

Status:Endangered

Ovisorientalisblandfordi

Afghan or Baluchistan Urial. Luxuriantly developed neck ruff. The body fur is reddish. The rams have horns which often develop more than a complete arc. Tips of horn bending slightly outwards

Distribution:

Found in Sindh, Baluchistan andSouthern hilly regions of KPK.

Status: Endangered

Ovisorientalispunjabiensis

Locally called as Punjabi Dunba. Tend to be smaller and stokier in build compared with the Afghan sub-species. Mature rams develop a conspicuous saddle mark in the form of a vertical band of mixed black and white hairs.Horns are more massive at their base than the Afghan population. Horns never curve round in more than a complete arc.

Distribution:

JOIN VU BIOANIMALS

Occurs in between the Indus and Jhelum rivers at elevations of 250 -1,500 m

- Salt range
- Kala Chitta
- Jhelum hills.

Status: Endangered

Threat:

The status of Punjab urial is susceptible to physical and emotional injury.

Reasons for Decline in numbers

- Poaching
- The capture of newborn lambs that are kept as pets
- Fragmentation of home ranges
- Competition with domestic livestock

Habitat disturbance and destruction associated with increasing agriculture, forestry and mining.The construction of the M-2 Motorway between Islamabad and Lahore created a substantial barrier to seasonal migrations and to dispersal.

29. Wetland types ?

Types of Wetlands:Five major wetland types are generally recognized.

i. Marine
ii. Estuarine
iii. Lacustrine
iv. Riverine
v. Palustrine

Marine: Coastal wetlands including coastal lagoons, rocky shores, and coral reefs.

Estuarine: Including deltas, tidal marshes, and mangrove swamps.

Lacustrine: Wetlands associated with lakes.

Riverine: Wetlands along rivers and streams.

Palustrine: Wetlands that lacks flowing water, “marshy”;marshes, swamps and bogs

30. Note on malenocephalustragopan?

Facts:

Tragos= goat

Pan=Greek god

JOIN VU BIOANIMALS

Tragopans are commonly called "horned pheasants" Having two brightly colored, fleshy horns on their heads. They can erect during courtship displays. There are five recognized species of tragopans.

- Western tragopan (Tragopanmelanocephalus)
- Satyr tragopan(Tragopansatyra)
- Temminck's(tragopan Tragopantemminckii)
- Blyth's tragopan(Tragopanblythii)
- Cabot's tragopan(Tragopancaboti)

1. **Tragopanmelanocephalus**

Syn: Western Tragopan,Black-headed Tragopan, Western Horned-pheasant

Description:

Medium sized pheasant. Sexes are highly dimorph. Male grey upper parts and reddish facial skinNumerous white spots. Each spot bordered with black and deep crimson patches on the sides and back of the neck.The throat is bare with blue skin while the bare facial skin is red. They have a small black occipital crest.

- Weighs 1.8–2.2 kg (4.0–4.9 lb)
- Length from 55–60 cm (22–24 in)

Females have pale brownish-grey upper parts finely vermiculated. Spotted with black, and most of the feathers have black patches and central white streaks.

- Weigh 1.25–1.4 kg (2.8–3.1 lb).
- Length 48–50 cm (19–20 in).
- Monogamous

Feeding Habit

The diet primarily consists of leaves of trees and shrubs. Also includes roots, flowers, acorns, seeds, berries, grubs and insects. Tragopans are shy and wary birds quick to hide amongst the dense vegetation they inhabit if disturbed.

Distribution

Native:India, Pakistan

Found in western Himalayas, between 8000-12000 from hazara eastward to Garhwali- ladakh

IUCN Status: Vulnerable

Distribution in Pakistan

- Largely restricted to area between Jhelum and Kunhar rivers of Hazara district
- Forest of Kaghan valley, in Machiara National park (A.K)
- Pales valley in Cholistan district

JOIN VU BIOANIMALS

Threats

Hunting and trapping for

- Its meat (especially in winter)
- Its decorative plumage

Conservation

CITES Appendix I

31. **Aesthetic Important of Wildlife?**

It is the pleasure to enjoy the beauty of wildlife

- People enjoy seeing plants and animals in their natural habitats for recreation.
- They are a source of joy, wonder, and pleasure for many people.
- Wildlife tourism (ecotourism).
- Bird watching, is now a growing part of wildlife tourism.
- Animals photographed for recreational purposes also have aesthetic value.
- Exotic game ranches
- Viewing non-native species in a "near-native" habitat.
- Visiting Safari parks/zoo as recreational activity
- Visiting hilly areas for recreational purpose

32. **Note on ramsars of Sindh**

Sindh

- Keenjhar (Kalri) Lake
- Haleji Lake
- Drigh Lake
- Indus Dolphin reserve
- Jubho lagoon
- Nurri Lagoon

10 Marks

1. **Leopard Cat description ?**

Scientific Name: Prionailurusbengalensis

IUCN Red list Threat Status: Least concern

Description

The leopard cat looks like a miniature, long-legged and more slender version of a leopard. Body markings are like leopard; head with stripes.

Its fur varies highly in colour and markings according to the region. Generally spotted body fur coat

JOIN VU BIOANIMALS

- **In the tropics** Fur is yellowish-brown with white underparts
- **In the northern** part of the species' range Greyish brown thick fur and are also larger and heavier than the ones in the south.

The size and shape of the black markings covering the body and limbs are also highly variable. The spots sometimes form lines along the neck and back. The irises are deep, golden brown to grey. Males are larger than females

- Body length 54-60 cm
- Weight 3-4 kg.
- Longevity: up to 13 years
- Litter size:2-3 cubs

Habitat and Ecology

Leopard Cats can occur in a wide variety of habitats. Tropical rainforest, Temperate coniferous forest, Shrub forest and successional grasslands. The northern boundary of its range is limited by snow cover. Leopard Cat does not occur in deep snow. It is not found in the cold steppe grasslands, and generally does not occur in arid, treeless areas.The Leopard Cat is predominantly nocturnal and crepuscular.Some diurnal activity has been recorded.

Distribution

The leopard cat occurs throughout most of India, West into Pakistan and Afghanistan. Its range extends into the Himalayan foothills across most of China. North to the Korean peninsula and into the Russian Far East.It is found in most of Southeast Asia: Thailand, Vietnam and China. On the islands of Sumatra, Java, Borneo and Taiwan. On small islands off South Korea.The leopard cat is the only wild cat species which is native to Japan and the Philippines.

Threats

Leopard cat skins are commercially traded internationally for the fur trade, primarily coats.Skins are also used as decorations in some parts of its range. They are occasionally kept as pets. Sometimes taken from the wild. Sometimes from captive breeding. They have been interbred with domestic cats, particularly in the West, to make the popular Bengal breed. Their bones are used in some traditional Asian medicines

Conservation

Leopard Cat populations in Bangladesh, India and Thailand are listed on CITES Appendix I. All other populations are listed on Appendix II.
