

BIO503

Assignment 1, FALL 24

Total Marks: 10

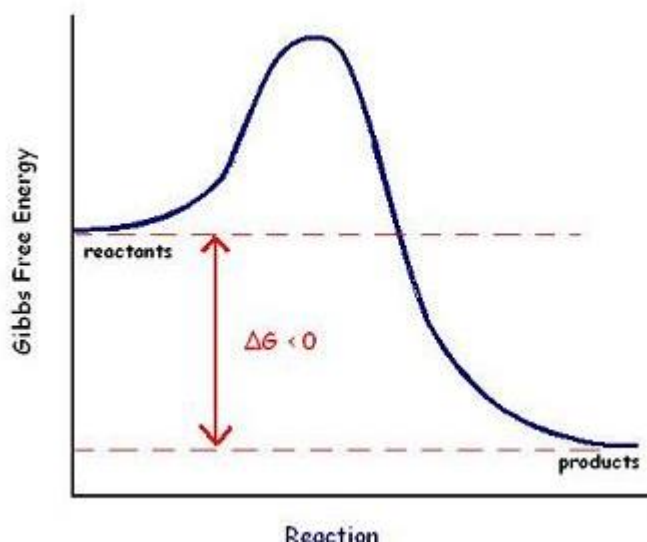

Due date: 30-November-2024

Question1: 10 Marks

Provide answers to following questions:

1. Photosynthesis/respiration which one is exothermic and endothermic reaction. (2 Marks)
2. With the help of software/ tool (<https://chemix.org> OR Biorender.com) draw this energy diagram: (8 Marks)

Instruction: The diagram drawn should look exactly like this image:

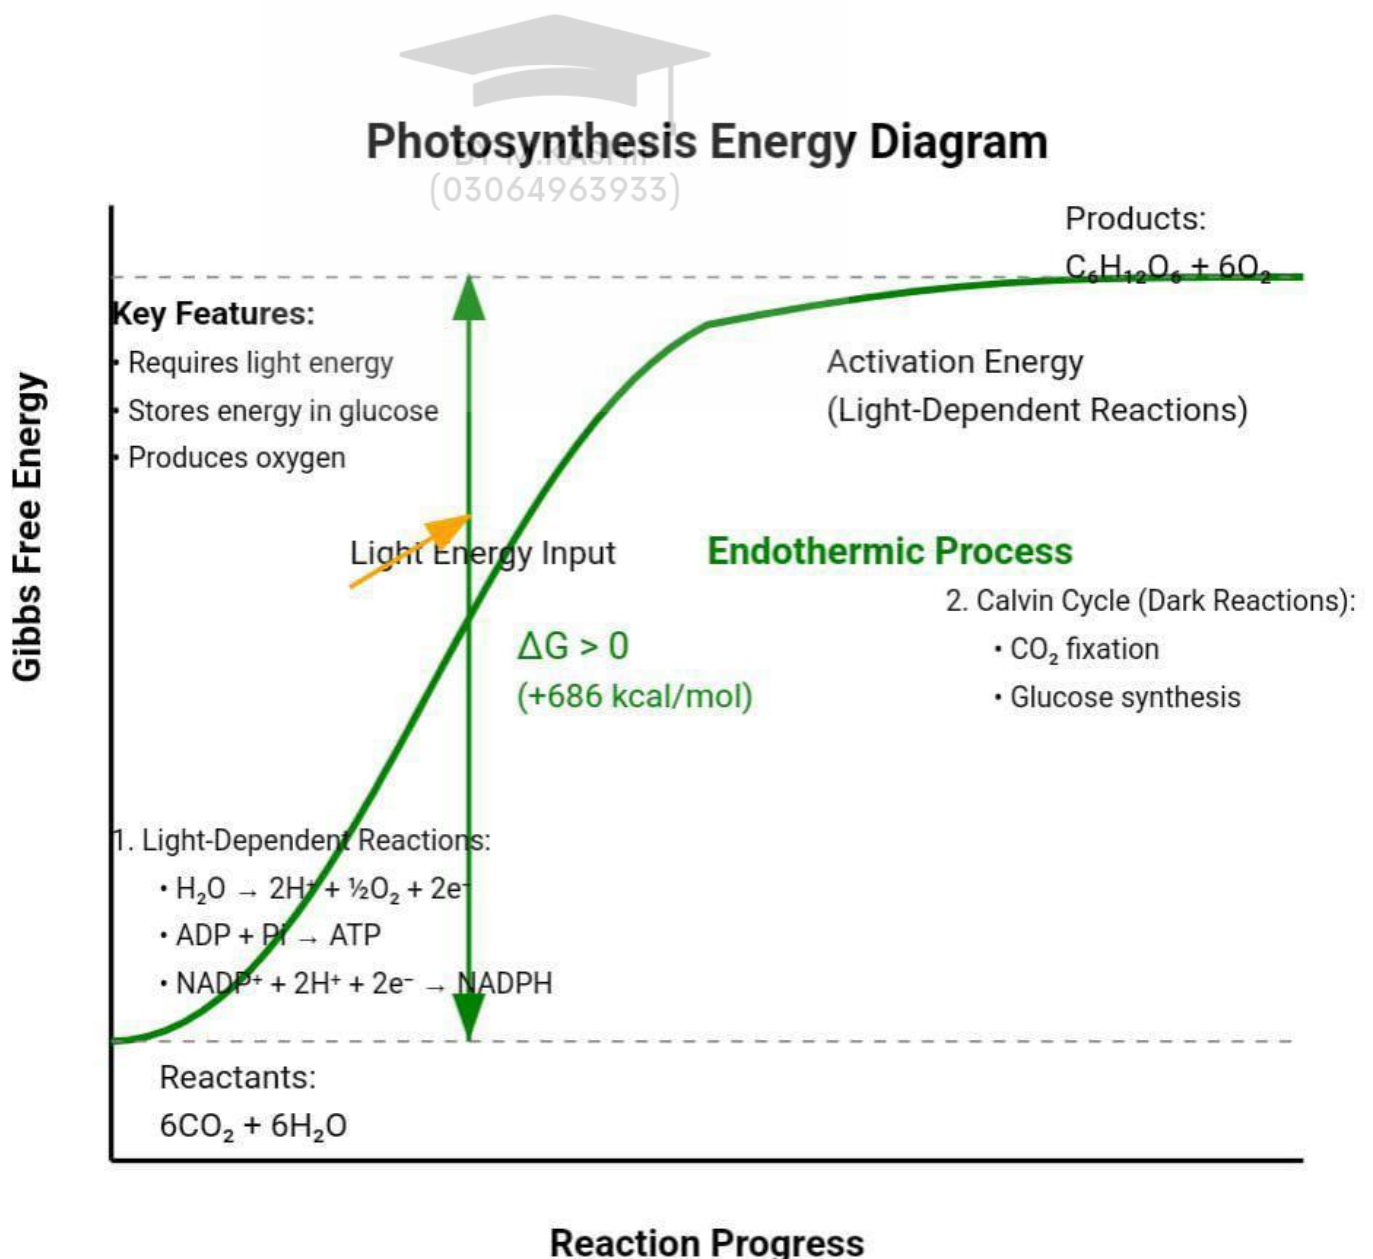

1. Photosynthesis/respiration which one is exothermic and endothermic reaction. (2 Marks)

Solution

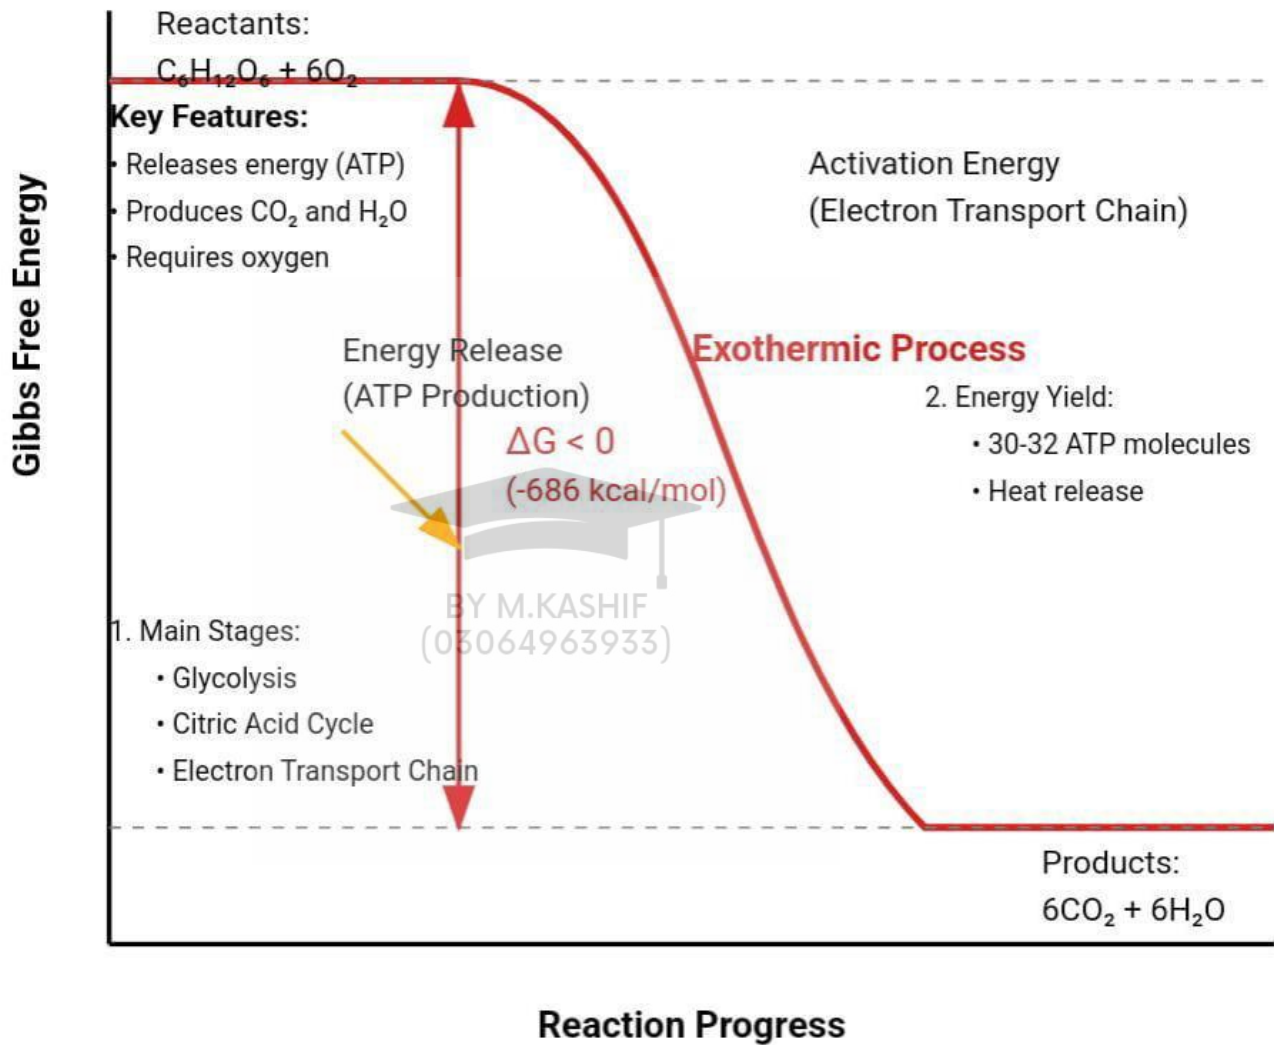

Photosynthesis is an **endothermic reaction** as it absorbs energy (light energy) to convert carbon dioxide and water into glucose and oxygen.

Respiration is an **exothermic reaction** as it releases energy by breaking down glucose into carbon dioxide and water.

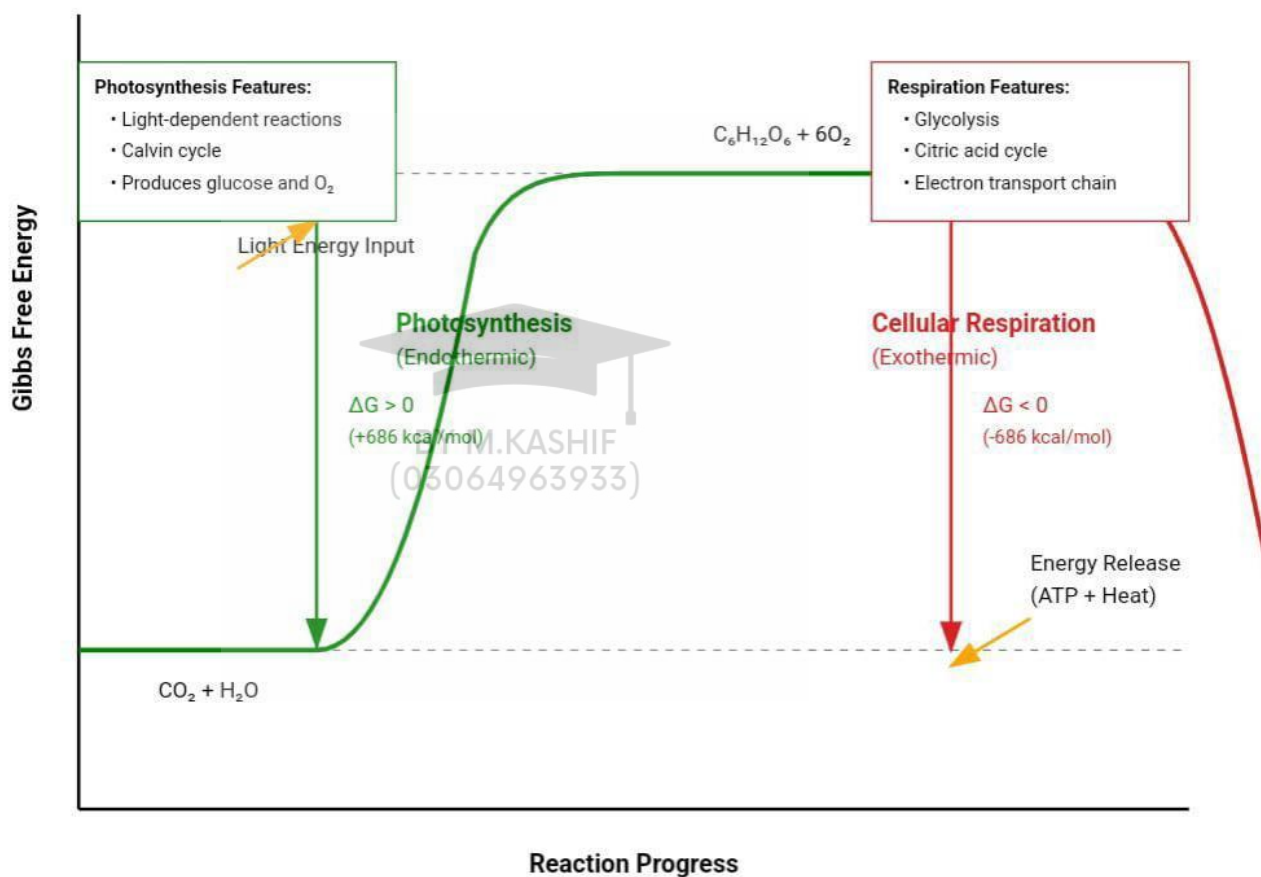

2. With the help of software/ tool (<https://chemix.org> OR Biorender.com) draw this energy diagram: (8 Marks)

Cellular Respiration Energy Diagram

Photosynthesis and Cellular Respiration Energy Cycle
