The special theory of relativity is applicable to the object moving with maximum velocity equal to:

Select the correct option

- Speed of light
- More than speed of light
- Less than speed of light
- Double the speed of light

Question # 2 of 10 (Start time: 07:30:44 PM, 08 February 2021)

The combined effect of resistance and reactance is known as:

Select the correct option

○	Inductance
○	Conductance
○	Resistance
●	Impedance

When an electromagnetic wave meets a reflecting surface, the direction taken by the reflected wave is determined by:

Select the correct option

●	the material of the reflecting surface
○	the index of the medium
○	the intensity of the wave
○	the angle of incidence

Question # 10 of 10 (Start time: 07:18:26 PM, 08 February 2021)

Kirchhoff's 2nd rule is the manifestation of the law of conservation of:

Select the correct option

- ○ Momentum
- ● Energy
- ○ Charge
- ○ Mass

Question # 3 of 10 (Start time: 07:11:15 PM, 08 February 2021

When light passes from air to glass, it bends:

Select the correct option

○	toward the normal and slows down
●	toward the normal without changing speed
○	toward the normal and speeds up
○	away from the normal and slows down

Question # 6 of 10 (Start time: 07:14:19 PM, 08 February 2021)

Electromagnetic waves do not transport:

Select the correct option

○	Energy
○	Momentum
●	Charge
○	Information

Question # 8 of 10 (Start time: 07:16:35 PM, 08 February 2021)

Which of the following electromagnetic radiations has photons with the greatest energy?

Select the correct option

○	blue light
○	yellow light
○	x rays
◉	radio waves

PHY101

Question # 10 of 10 (Start time: 07:18:26 PM. 08 February 2021)

Kirchhoff's 2nd rule is the manifestation of the law of conservation of:

Select the correct option

- Momentum
- Energy
- Charge
- Mass

Question # 3 of 10 (Start time: 07:31:28 PM, 08 February 2021)

Two parallel straight wires carrying current in same direction will:

Select the correct option

●	Attract each other
○	No effect
○	May repel or attract
○	Repel each other

Question # 2 of 10 (Start time: 07:10:12 PM, 08 February 2021)

Huygens' construction can be used only:

Select the correct option

- ○ for light
- ● for an electromagnetic wave
- ○ for transverse waves
- ○ for all of the above and other situations

Question # 7 of 10 (Start time: 05:37:00 PM, 08 February 2021)

When an electromagnetic wave meets a reflecting surface, the direction taken by the reflected wave is determined by

Select the correct option

O	the material of the reflecting surface
O	the index of the medium
O	the intensity of the wave
O	the angle of incidence

Question # 5 of 10 (Start time: 07:13:29 PM, 08 February 2021)

The A.C circuit in which current and voltage are in phase the power factor is

Select the correct option

○	0
●	1
○	0.5
○	infinity

Question # 1 of 10 (Start time: 07:29:31 PM, 08 February 2021)

Following are the ways by which light can interact with matter, EXCEPT:

Select the correct option

- ○ Emission
- ● Interference
- ○ Absorption
- ○ Transmission

Question # 7 of 10 (Start time: 07:34:35 PM, 08 February 2021)

Polarization means _____.

Select the correct option

○	To guide the light in only one direction
●	To change the frequency of the light
○	To alter the wavelength of the light
○	To separate the light into its colors

Question # 4 of 10 (Start time: 07:12:24 PM, 08 February 2021)

Average value of current and voltage over complete cycle is:

Select the correct option

○	Positive
○	Negative
●	Zero
○	Infinite

Question # 6 of 10 (Start time: 11:32:07 AM, 09 February 2021)

A detector is used to detect the speed of a particular wave. If the frequency of an electromagnetic signal is 400 MHz, the speed detected by detector is _____

Select the correct option

○	300000 m/h
○	300000 km/s
○	300000 m/min
○	300000 mm/s

Question # 3 of 10 (Start time: 07:31:28 PM, 08 February 2021)

Two parallel straight wires carrying current in same direction will:

Select the correct option

●	Attract each other
○	No effect
○	May repel or attract
○	Repel each other

Question # 10 of 10 (Start time: 07:18:26 PM, 08 February 2021)

Kirchhoff's 2nd rule is the manifestation of the law of conservation of:

Select the correct option

- Momentum
- Energy
- Charge
- Mass

Question # 1 of 10 (Start time: 07:29:31 PM, 08 February 2021)

Following are the ways by which light can interact with matter, EXCEPT:

Select the correct option

○	Emission
●	Interference
○	Absorption
○	Transmission

Question # 2 of 10 (Start time: 11:08:02 AM, 09 February

Inductive reactance XL of an inductor is:

Select the correct option

○	πfL
○	4πfL
○	2πfL
○	2πL

Question # 6 of 10 (Start time: 11:12:46 AM, 09 February 2021)

No lens is perfect because_____.

Select the correct option

○	They suffer from aberration
○	They are not perfectly spherical
○	It is nearly impossible to polish them
○	They are not cleaned with accuracy

uestion # 7 of 10 (Start time: 11:13:57 AM, 09 February 2021)

When we accelerate the charge, which types of waves are produced?

Select the correct option

○	Mechanical waves
○	Travelling waves
○	Stationary waves
○	Electromagnetic waves

Question # 7 of 10 (Start time: 11:33:25 AM, 09 February 2021)

Room temperature is about 20 degrees on the:

Select the correct option

○	Kelvin scale
◉	Celsius scale
○	Fahrenheit scale
○	Absolute scale

Question # 3 of 10 (Start time: 11:29:18 AM, 09 February 2021)

The most refined form of matter is:

Select the correct option

○	Smoke
○	Fog
●	Light
○	Smog

Question # 9 of 10 (Start time: 11:35:35 AM, 09 February 2

Emission of electron by metals on heating is called:

Select the correct option

○	Photoelectric emission
○	Compton emission
●	Thermionic emission
○	Secondary emission

Question # 2 of 10 (Start time: 11:28:38 AM, 09 February 2021)

When white light passes through a prism, it splits into _____ colors.

Select the correct option

○	6
○	7
○	8
○	9

Question # 9 of 10 (Start time: 07:37:06 PM, 08 February 2021)

Radio waves and light waves are _____.

Select the correct option

○	Longitudinal waves
○	Transverse waves
●	Electromagnetic and transverse both
○	Electromagnetic and longitudinal both

Question # 8 of 10 (Start time: 11:34:37 AM, 09 February 2021

What is the unit of magnification factor?

Select the correct option

○	meter.Kelvin
○	radian.Kelvin
○	degree.Kelvin
●	no units

Question # 5 of 10 (Start time: 11:31:20 AM, 09 February 2021)

The wavelength of light beam A is twice the wavelength of light beam B. The energy of a photon in beam A is:

Select the correct option

○	half the energy of a photon in beam B
○	one-fourth the energy of a photon in beam B
○	equal to the energy of a photon in beam B
○	twice the energy of a photon in beam B

Question # 9 of 10 (Start time: 10:42:42 AM, 09 February 2021)

The reaction of an induction at 50 Hz is 10 Ω, its reactance at 100 Hz becomes

Select the correct option

○	20 Ω
○	5 Ω
○	2.5 Ω
○	1 Ω

A particular device transmitted a signal in the form of electromagnetic waves of frequency 7.5 * 108 Hz. What is the wavelength of the signal?

Select the correct option

○	0.4 m
○	40 m
○	4.0 m
●	4.04 m

Question # 5 of 10 (Start time: 11:11:27 AM, 09 February 202

In meta stable state, electrons reside:

Select the correct option

○	10^-8 sec
○	10^-5 sec
○	10^-3 sec
○	10^-13 sec

Question # 5 of 10 (Start time: 07:32:49 PM, 08 February 2021)

When an electromagnetic wave meets a reflecting surface, the direction taken by the reflected wave is determined by:

Select the correct option

●	the material of the reflecting surface
○	the index of the medium
○	the intensity of the wave
○	the angle of incidence

Question # 2 of 10 (Start time: 07:30:44 PM, 08 February 2021)

The combined effect of resistance and reactance is known as:

Select the correct option

○	Inductance
○	Conductance
○	Resistance
●	Impedance

Question # 9 of 10 (Start time: 11:16:08 AM, 09 February 2021)

Following are the ways by which light can interact with matter, EXCEPT:

Select the correct option

○	Emission
○	Interference
○	Absorption
○	Transmission

Question # 3 of 10 (Start time: 10:34:40 AM, 09 Febr

Emission of electron by metals on heating is called:

Select the correct option

○	Photoelectric emission
○	Compton emission
○	Thermionic emission
○	Secondary emission

Question # 10 of 10 (Start time: 11:36:20 AM, 09 Februar

Capacitive reactance Xc is:

Select the correct option

○	2πfC
○	1/2πfC
○	4πfC
○	1/4πfC

Question # 10 of 10 (Start time: 11:16:53 AM, 09 February 2

$2dSin\theta = m\lambda$ is called:

Select the correct option

○	Laplace's equation
○	Reflection equation
○	Refraction equation
○	Bragg equation

Question # 4 of 10 (Start time: 11:10:15 AM, 09 February 2021)

Which of the following have the greatest wavelength?

Select the correct option

○	Gamma rays
○	Ultraviolet
○	Infrared
○	Radio waves

Question # 4 of 10 (Start time: 07:32:21 PM, 08 February 2021)

If 0.5 T field over an area of 2m3 which lies at an angle of 600 with field. Then the resultant flux will be

Select the correct option

○	0.25 T
○	0 25 Wb
●	0 50 Wb
○	0 50 T

Question # 5 of 10 (Start time: 11:59:13 AM, 09 February 2021)

Total Marks: 1

The appearance of colors in thin film is due to:

Select the correct option

- Interference
- Diffraction
- Dispersion
- Polarization

(Start time: 10:33:44 AM, 09 February 2021)

The special theory of relativity is applicable to the object moving with maximum velocity equal to

Select the correct option

- Speed of light
- More than speed of light
- Less than speed of light
- Double the speed of light

PHY101:Online Quiz # 3 Physics (PHY101)

Quiz Start Time: 11:44 AM, 09 February 2021

Question # 9 of 10 (Start time: 11:54:04 AM, 09 February 2021)

Total Marks: 1

Which of the following is true of all virtual images?

Select the correct option

- O They can be seen but not photographed
- O They are smaller than the objects
- O They are larger than the objects
- O None of these

Question # 5 of 10 (Start time: 10:37:20 AM, 09 February

The speed of light in free space is:

Select the correct option

○	Variable
○	Less than that in air
○	Unpredictable
○	Constant

Question 4 of 10 (Start time: 10:35:47 AM, 09 February 2021)

A particular device transmitted a signal in the form of electromagnetic waves of frequency 7.5 * 108 Hz. What is the wavelength of the signal?

Select the correct option

○	0.4 m
○	40 m
○	4.0 m
○	4.04 m

Question # 7 of 10 (Start time: 10:40:03 AM, 09 February 2021)

Constant-volume gas thermometers using di?erent gases all indicate nearly the same temperature when in contact with the same object if:

Select the correct option

- ○ The volumes are all extremely large
- ○ The volumes are all the same
- ○ The pressures are all extremely large
- ○ The particle concentrations are all extremely small

Question # 3 of 10 (Start time: 11:48:06 AM, 09 February 2021)

Total Marks: 1

There is a temperature at which the reading on the Kelvin scale is numerically:

Select the correct option

- Equal to that on the Celsius scale
- Lower than that on the Celsius scale
- Equal to that on the Fahrenheit scale
- Less than zero

Question # 1 of 10 (Start time: 10:32:43 AM, 09 February

Greenhouse gases absorb _____ radiation.

Select the correct option

○	gamma
○	ultraviolet
○	microwaves
○	infrared

quiz.vu.edu.pk/QuizQues

Question # 7 of 10 (Start time: 11:52:20 AM, 09 February 2021)

Total Marks: 1

The "strength" of a lens is measured in _____.

Select the correct option

- Meters
- Diopters
- Lense meter
- Provatans

Question # 3 of 10 (Start time: 05:33:43 PM, 08 February 20

$2dSin\theta = m\lambda$ is called:

Select the correct option

- Laplace's equation
- Reflection equation
- Refraction equation
- Bragg equation

Question # 6 of 10 (Start time: 10:38:24 AM, 09 Februa

Polarization means _____.

Select the correct option

○	To guide the light in only one direction
○	To change the frequency of the light
○	To alter the wavelength of the light
○	To separate the light into its colors

Question # 10 of 10 (Start time: 10:44:00 AM, 09 February 2021

When we accelerate the charge, which types of waves are produced?

Select the correct option

○	Mechanical waves
○	Travelling waves
○	Stationary waves
○	Electromagnetic waves

Question # 8 of 10 (Start time: 10:41:38 AM, 09 February 2021)

If Io is the peak value of an AC supply, then its rms value is given as Irms:

Select the correct option

○	Io/√2
○	Io/0.707
○	Io/2
○	√2 Io

Question # 10 of 10 (Start time: 07:38:00 PM, 08 February 2021

For an electron, the rest mass energy is:

Select the correct option

- ○ 0.411 MeV
- ● 0.511 MeV
- ○ 0.611 MeV
- ○ 0.711 MeV

Quiz Start Time: 11:44 AM, 09 February 2021

Question # 1 of 10 (Start time: 11:44:54 AM, 09 February 2021)

Total Marks: 1

Average value of current and voltage over complete cycle is:

Select the correct option

- O Positive
- O Negative
- O Zero
- O Infinite

Inductive reactance XL of an inductor is:

Select the correct option

○	πfL
○	4πfL
○	2πfL
○	2πL

Question # 7 of 10 (Start time: 07:15:23 PM, 08 February 2021)

Following are the ways by which light can interact with matter, EXCEPT:

Select the correct option

○	Emission
●	Interference
○	Absorption
○	Transmission

Question # 1 of 10 (Start time: 07:08:48 PM, 08 February 2021)

Which of the following electromagnetic radiations has photons with the greatest momentum?

Select the correct option

○	blue light
○	yellow light
■	x rays
○	radio waves

Question # 9 of 10 (Start time: 05:55:26 PM, 08 February 2021)

The wavelength of red light is 700 nm. Its frequency is _____

Select the correct option

- 4.29 * 10^14 Hertz
- 4.29 * 10^13 Hertz
- 4.29 * 10^15 Hertz
- 4.29 * 10^12 Hertz

Question # 7 of 10 (Start time: 05:52:00 PM, 08 February 2021)

Force on a charged particle is zero when projected at angle with the magnetic field

Select the correct option

○	0 degree
○	90 degree
○	270 degree
○	180 degree

Question # 9 of 10 (Start time: 07:17:48 PM, 08 February 2021)

Interference of light is evidence that

Select the correct option

○	the speed of light is very large
○	light is a transverse wave
●	light is a wave phenomenon
○	light is electromagnetic in character

Question # 2 of 10 (Start time: 08:44:41 PM 08 February 20

The amplitude modulation frequency ranges from

Select the correct option

- 540 kHz to 1000 kHz
- 540 kHz to 1600 kHz
- 520 kHz to 1600 kHz
- 540 kHz to 1400 kHz

PHY101:Online Quiz # 3 Physics (

Question # 4 of 10 (Start time: 07:32:21 PM, 08 February 2021)

If 0.5 T field over an area of 2m3 which lies at an angle of 600 with field. Then the resultant flux will be

Select the correct option

- ○ 0.25 T
- ○ 0.25 Wb
- ● 0.50 Wb
- ○ 0.50 T
