

CS201P Finalterm Paper 2023 No 1

By Pin2.

MCQS 20Totaly from handouts

Question 1

Important points about

Variable in C++.

Answer:page 16

Question 2

Write a program that print the sum of 1 to 1000 odd numbers using while loop

Answer:page 48

Question 3 error correct karnay thay

Answer:page 382 and 383

Question 4 program ke output find Karni the two dimensional array ka tha program

CS201p Current Paper 2023 Finalterm No 2

MCQs from handout

Subjective 4 questions

Q1.write output from this code

```
#include<iostream>
```

```
Using namespace std;
```

```
Int num1= 34, int num2 = 45 int= num3 = 46
```

```
If(num1 >num2&& num 1>num3)
```

```
Cout<<number 1 is greater ;
```

```
Else if (num 2 >num1 && num2>num3
```

```
Cout<< number 2 is greater;
```

```
Else if (num3>num1 & num3 >num2)
```

```
Cout<<number 3 is greater;
```

```
Else
```

```
Cout<<All number are equal;
```

Q2.write output in this code

```
Intnum1=4,num2=5,fact 1= 1 fact2= 1
```

```
While (num1>1)
```

```
{
```

```
Fact1= fact 1*num1;
```

```
Num1 = num 1-1;
```

```
}
```

```
Cout<< the function of number 1 is <<fact 1<<endl;
```

```
While
```

```
Fact2= fact2*num2;
```

```

Num1 = num 2-1;

}

Cout<< the function of number 2is <<fact 2<<endl;

If(fact >fact2)

Cout<<the factorial of number 1 is greater than 2

Cout<<the factorial of number 2 is greater than 1

```

Q3.write output

```

Template <classT>

```

```

Class first {

```

```

Public:

```

```

First ()

```

```

Cout<<created/n:

```

```

}

```

```

First ()

```

```

Cout<<destroyed/n:

```

```

}

```

```

Template <class u>

```

```

Class second {

```

```

Public:

```

```

Second{Cout<<created/n:

```

```

}

```

Second ()

Cout<<destroyed/n:

}

Q4. Write max 2 int program.

Allah sbko kamiyaab kry duaon Mai yad rahky ga

I wish you very best of luck all

CS201p Finalterm Paper 2023

Paper asan tha kafi(as compare to CS201)

20 mcqs (was very easy and from lab quizzes)

5 descriptive questions (5 marks each)

Descriptive b kafi asan thy...2 ki output btani thi(both from classes) aur 1 theory wala tha(file handling se related) aur 1 code likhna tha (while loop wala)

CS201p Paper 2023

1. overload function square for integer and float data type. The overload function will take a single arguments square.

2. write program find sum odd number 1 to 1000 by using while loop.

3. write program print matrix shape element[2][2] by using class Matric.

4. write output (sum I books different Marks and find average and average compared by using if-esle statement)

4*(Marks 5)=20

Total marks 40

cs201p long questions

```
1. #include <iostream>
```

```
using namespace std;
```

```
template<class T,int max>
```

```
int arrayMax(T arr[], int n)
```

```
{
```

```
    int m = max;
```

```
    for(int i=0 ; i<n ; i++)
```

```
        if(arr[i]>m)
```

```
            m= arr[i];
```

```
    return m;
```

```
}
```

```
int main()
```

```
{
```

```
int array1[]={10,20,15,12};

int n1 = sizeof(array1)/sizeof(array1[0]);

char array2[]={1,2,3};

int n2 = sizeof(array2)/sizeof (array2[0]);

cout << arrayMax < int,10000>(array1,n1)<< endl;

cout << arrayMax < char,256>(array2,n2);

return 0;

}
```

Output btani thi is ki

2. 1 if or else wala aya tha code likha howa tha us ki output likhni thi easy tha
3. or 1 if else wala aya us me nested if bhi use howa pra tha wo correct kerna tha code me mistakes thi kafii
4. 1 question tha user kio number enter kry us no. ka cube lena tha

long question me aya tha ...code likhna tha is ka
