Semester Fall 2023

LECTURE WISE NOTES:

Short Questions File & MCQ's File

03126968553

COURSE: MCM101

Short Questions File For Midterm

LECTURE # 01

What is the Latin origin of the word "communication," and what does it signify?

Answer: The Latin origin is COMMUNIS, signifying commonness or creating commonness with people.

What is the primary function of communication in human survival?

Answer: The foremost reason is the survival of human beings.

Why is communication considered inevitable for human beings?

Answer: Every moment, individuals are dependent on others for survival.

What role does communication play in cooperation among living creatures?

Answer: Communication is a genuine instinct in all living creatures, fostering cooperation to sustain the cycle of life.

Why has communication been essential from the early days of human civilization in maintaining relationships?

Answer: Communication is essential to identify relations among people and accomplish various tasks.

How has communication been crucial in the course of persuasion and influencing others throughout human civilization?

Answer: Communication has been instrumental in persuading and influencing others, contributing to the growth of human civilization.

In what areas has better communication been a hallmark of human interactivity, according to the text?

Answer: It is evident in conflicts and bringing the enemy down, showcasing superior communication skills.

What is the significance of communication in fulfilling social needs as human culture and civilization nurture?

Answer: Communication is the common thread that knits societies together to fulfill their desire to rise jointly.

How does a piece of information contribute to the relief of human living in the present-day world?

Answer: Information, a form of communication, brings relief by providing insights that impact travel plans, business, and daily living.

What role does communication play in decision-making for individuals, families, and nations in the present-day affairs?

Answer: Communication goes a long way in helping in decision-making, impacting living standards and ensuring a more secure life.

Name the major fields of mass communication discussed in the text.

Answer: General Information, Public Relations, Publicity (Advertising)

What is the primary focus of mass communication in informing people at large?

Answer: The main focus is to inform people about news, views, current affairs, entertainment, and education.

How has the area of public relations evolved in the modern world, according to the text?

Answer: While the area has ancient traces, it has assumed new dimensions in the modern world, benefiting organized and corporate sectors.

What is another term for advertising in the context of mass communication?

Answer: Publicity

What impact has advertising through mass communication had on the global job market?

Answer: It has led to the emergence of a huge advertising industry, offering tens of thousands of jobs worldwide.

LECTURE # 02

What is mass communication, as defined in the text?

Answer: Mass communication is the sending of a message to a large audience using technology.

What is considered a primitive form of mass communication discussed in the text?

Answer: Writing letters, especially those written from the court of kings to nobles and notables.

In what areas did the early move from writing letters progress in terms of mass communication?

Answer: The progression moved to writing books on social life, philosophies, religion, health, and scientific advancements.

Who is credited with the invention of the printing press, and when did it occur?

Answer: Johann Gutenberg, a German goldsmith, invented the printing press in the 1440s.

What was the original method of printing before the invention of the printing press?

Answer: Block printing, involving pressing sheets of paper into individually carved wooden blocks.

Who is credited with the invention of movable type in printing, and when did it occur?

Answer: Bi Sheng in China invented movable type in 1041 AD.

What did Gutenberg introduce or refine in the printing process?

Answer: Gutenberg refined the technique of movable type, the first widespread use of separate characters inserted to make the text.

What was the impact of Gutenberg's printing press on the reproduction of books?

Answer: The Gutenberg press made it possible to create several hundred copies a year, a significant increase from the hand-copying method.

How rapidly did Gutenberg's printing press spread across Europe after its invention in 1453?

Answer: Within thirty years, towns across Europe, from Hungary to Spain and Italy to Britain, had functional printing presses.

What effects did the printing press have on culture and information transfer in Europe?

Answer: The impact was comparable to the development of language, the invention of the alphabet, and the computer. It accelerated the pace of the Protestant Reformation, established a community of scientists, and led to the decline of Latin.

What significant changes did the printing process bring to the reading experience?

Answer: The process of reading shifted from oral readings to silent, private reading, raising the literacy level and revolutionizing education.

How did printing influence the way Europeans thought, especially in the sciences?

Answer: In the sciences, printing marked a move from the medieval language of metaphors to the adoption of the scientific method.

What did the introduction of the printing press change in terms of authorship?

Answer: Authorship became more meaningful, emphasizing who said or wrote what, precise formulations, and time of composition.

How did the spread of printed works affect languages and the creation of modern nations?

Answer: Latin was gradually replaced by national languages, playing a key role in the creation of modern nations.

What major contribution did the printing press make to the availability and dissemination of knowledge?

Answer: Knowledge came closer to the hands of the people, as printed books could be sold at a fraction of the cost of illuminated manuscripts, leading to increased access and discussions.

LECTURE # 03

What is mass communication, and how did the printing process impact it?

Answer: Mass communication is the transmission of messages to a large audience. The printing process opened doors for mass communication, influencing societies, cultures, habits, disputes, and organizations.

What was the first primitive form of mass communication discussed in the text?

Answer: Writing letters, particularly those written from the court of kings to nobles and notables.

When did the concept of regular publication in the form of newspapers emerge, and where was the first English daily newspaper founded?

Answer: The concept emerged around two hundred years after the printing process. The first English daily newspaper, the Daily Courant, was founded in London in 1702.

Who is credited with inventing the Linotype machine, and what impact did it have on newspaper publishing?

Answer: Otto Mergenthaler invented the Linotype machine in 1884. It marked a quantum leap in newspaper publishing, ushering in the era of "hot lead."

Which country has the most newspaper readership, according to United Nations' data from 1995?

Answer: Japan has the most newspaper readership, with three daily papers having a circulation well above 4 million.

How do newspapers generate revenue, and what is the role of advertising in their business model?

Answer: Almost all newspapers make money from advertising. Higher circulation attracts more advertisers, allowing newspapers to charge more for their services.

What technological advancement brought a radical change in mass communication after the printing process?

Answer: Radio brought a radical change in mass communication by reaching the masses through voice.

Who is credited for transmitting signals through radio waves, and when did it happen?

Answer: Guglielmo Marconi is commonly credited for transmitting signals through radio waves in 1895.

What significant event in the USA marked the launch of radio broadcasting in 1920?

Answer: The first regular radio broadcast in the USA in 1920 brought presidential election returns in advance of the newspapers.

When was the BBC (British Broadcasting Corporation) established, and how was it funded?

Answer: The BBC was established in 1923, funded by public taxes on radio receivers, rather than commercials.

What was the impact of the Radio Act of 1927 in the United States?

Answer: The Radio Act of 1927 created the Federal Radio Commission (FRC), which organized the licensing of transmitters and assigned radio station frequencies.

When was television invented, and how long did it take for it to become a strong source of mass communication?

Answer: Television was championed in 1927, taking around ten years to become a strong source of mass communication.

What halted the progress of television during the 2nd World War, and what developments followed after the war?

Answer: The 2nd World War halted the progress of television. After the war, there was a rapid advancement in telecommunication, with TV stations being set up, regulations enacted, and sets sold.

When did computers become a major source of communication across the world?

Answer: Computers became a major source of communication across the world in the 1990s.

In what year did Pakistan have its first TV station, and where was it located?

Answer: Pakistan had its first TV station in Lahore in November 1964.

LECTURE # 04

What analogy is used to explain communication as a complex process of elements?

Answer: Communication is compared to complex objects like a building or a machine, with various basic elements.

Who is considered the chief initiator of any communication, and what is the role of the sender?

Answer: The sender is considered the chief initiator of communication. The sender is the person who creates and transmits the message.

What is the encoded form of the message, and who is responsible for creating it?

Answer: The encoded form of the message is the crux of the feeling expressed in words, gestures, or any other form. The sender is responsible for creating the encoded message.

What is the role of the channel in the communication process, and how is it defined in various contexts?

Answer: The channel is part of the communication process that carries the message to its destination. In various contexts, the channel can be paper for printed words, air for voice, or wires for telephonic conversation.

Who or what is the receiver in the communication process, and why is it considered a wide-ranging element?

Answer: The receiver is the person or entity for whom the message is intended, and it can vary from an individual to a group, an army, a nation, or all nations, depending on the nature of the message.

What is the role of an interpreter in the communication process, and what is the challenge associated with it?

Answer: An interpreter is required to understand and decode the message so that the purpose of communication is served. Noise, or the loss of part of the original meaning, often occurs at this stage.

What is feedback, and why is it considered a vital part of the communication process?

Answer: Feedback is the continuous exchange of approval or disapproval from the receiver to the sender after interpreting the message. It helps the sender modify or discipline the message, ensuring effective communication.

What does "context" refer to in the communication process, and how can it impact the meanings of a message?

Answer: Context refers to the background factors in which a message is delivered and received. Changes in context can alter the meanings of a message altogether.

What is a model in communication, and how does it represent an object or event?

Answer: A model is a systematic representation of an object or event in an idealized and abstract form. Communication models are pictures that represent the complexities of communication.

What are the six elements proposed by the Shannon-Weaver's Model of Communication, and what is its main focus?

Answer: The six elements are Source, Encoder, Message, Channel, Decoder, and Receiver. The model's main focus is on the transmission and reception of information, particularly in a technological context.

Who or what is the "source" in the communication process, and what role does the encoder play?

Answer: The source is the person or group initiating communication. The encoder translates the source's purposes into a code, expressing the message in a form understood by the channel.

What is meant by "semantic noise," and why is it more challenging to deal with than physical noise?

Answer: Semantic noise refers to factors like social class, cultural background, experience, attitudes, and beliefs that can introduce noise into communication. It is more challenging to deal with because it is related to people's knowledge, skills, experiences, and prejudices.

What is the role of the decoder in the communication process, and why is it crucial for effective communication?

Answer: The decoder interprets and decodes the message so that the receiver can understand it. It is crucial because even if the receiver has all the equipment to receive the message, decoding is necessary for comprehension.

According to the Lasswell Formula, what are the five major components in studying communication, and what is its primary concern?

Answer: The five major components are "Who?", "Says what?", "In which/what channel?", "To whom?", and "With what effect?". Its primary concern is directing research in mass communication and propaganda.

Who introduced the Lasswell Formula, and what is its relevance to the study of communication?

Answer: Harold Lasswell introduced the Lasswell Formula. It is relevant to directing research in mass communication and provides a useful model for studying communication, regardless of the category.

LECTURE # 05

What was Shannon's primary focus in developing his communication model?

Answer: Shannon focused on the engineering side of communication, organizing elements like encoder and decoder in a logical sequence for technical applications.

What was the drawback of Shannon-Weaver's model concerning the interpretation of messages?

Answer: Shannon's model showed little concern for the interpretation of messages; it was more mechanical and emphasized decoding rather than understanding.

Who modified the Shannon-Weaver's model to address the gap in interpretation, and how was it achieved?

Answer: Schramm and Osgood modified the model by adding elements of decoding for interpretation and introducing a feedback loop for a more interactive communication process.

What are the advantages of using models in communication studies?

Answer: Models provide a general perspective, clarify complex events, and lead to new discoveries by offering vantage points for questioning and interpreting observations.

What is the risk associated with studying communication through models, particularly in terms of simplification?

Answer: There is a risk of oversimplification, but it's essential to distinguish between simplification and over-simplification. Models, by nature, simplify to aid understanding.

How do models sometimes become confused with reality, and what caution is emphasized by critics?

Answer: Models can be confused with reality when they function as substitutes for events. Critics emphasize that the map (model) is not the territory (reality), urging skill in map reading or model interpretation.

What is meant by "premature closure" in the context of model building, and what danger does it pose?

Answer: Premature closure refers to pressing for a sense of completion in a system through abstraction. The danger is that it limits awareness of unexplored possibilities, hindering conceptualization.

Who modified the Shannon-Weaver's model, and what did Schramm-Osgood's Interactive Model introduce that the previous model lacked?

Answer: Schramm and Osgood modified the model. Their interactive model introduced concepts like feedback, a field of experience, and simultaneous encoding and decoding activities.

What is "entropy," and how does it relate to uncertainty in a system?

Answer: Entropy is the measure of uncertainty in a system. Uncertainty increases with the number of messages, and the value of information depends on the probability of its occurrence.

Define "redundancy" in the context of information, and why is it important for message efficiency?

Answer: Redundancy is the degree to which information is not unique in a system. It is crucial for message efficiency because a balance between the unexpected and the predictable enhances understanding.

What is the concept of "noise" in communication, and how can it interfere with the reception of a message?

Answer: Noise refers to information not related to the message. It can interfere with reception through background noise, channel issues, message organization, or psychological interference.

What does "channel capacity" measure, and how does it impact the battle against uncertainty in communication?

Answer: Channel capacity measures the maximum amount of information a channel can carry. It impacts uncertainty by eliminating alternative possibilities, reducing the need for numerous questions.

Who introduced the S-M-C-R Model, and what are the five elements within both the source and the receiver?

Answer: David Berlo introduced the S-M-C-R Model. The five elements are source-receiver relationship, communication skills, knowledge level, socio-cultural systems, attitudes, message (code, content, treatment), and channel (five senses).

What verbal communication skills are highlighted by Berlo, and how do they affect communication fidelity?

Answer: Berlo identifies two encoding skills (speaking and writing) and two decoding skills (listening and reading). Thought or reasoning is crucial to both encoding and decoding. These skills affect communication fidelity by influencing the ability to analyze intentions and encode messages effectively.

What emphasis does Berlo place on the source-receiver relationship, and why is it considered crucial in communication?

Answer: Berlo places great emphasis on the source-receiver relationship, considering it an important variable in the communication process. The success of the source is not solely determined by skill level but also by the shared level of skills with the receiver.

LECTURE # 06

What are the two broad classifications of human communication?

Answer: Intra personal communication and Inter personal communication.

Define Intra personal communication.

Answer: Intra personal communication involves communication within the self of an individual, where all communication elements are located within that person.

Give examples of activities falling under Intra personal communication.

Answer: Activities like meditation, thinking, monologue, and dreaming while asleep are examples of Intra personal communication.

What is Inter personal communication, and how is it further classified?

Answer: Inter personal communication involves two or more individuals exchanging information. It is further classified into Inter personal, Group Communication, Organizational communication, and Mass Communication.

Provide an example of Group Communication.

Answer: Group Communication is exemplified by exchanges where participants enjoy equal status, such as discussions among hockey team players, class-fellows, doctors, teachers, etc.

Explain Organizational communication and its typical structure.

Answer: Organizational communication occurs on vertical lines within an organization. It involves passing instructions from higher ranks to lower ranks, maintaining a chain of command.

What is Mass Communication, and why is technology crucial for it?

Answer: Mass Communication originates from one source and targets a wide audience. Technology is essential for reaching a large number of receivers without the involvement of technology.

How can the communication process be examined based on different forms of exchanging messages?

Answer: The communication process can be examined based on Verbal and Non-verbal forms of communication.

What is Verbal communication, and what industries does it encompass?

Answer: Verbal communication includes messages said or written in words. It encompasses text in books, magazines, newspapers, as well as words heard on radio, television, and other public address systems.

What significant role has Verbal communication played in history and human civilization?

Answer: Verbal communication has recorded human civilization, growth, and conflicts, contributing to the spread of religions and sharing scientific knowledge over centuries.

Describe Non-verbal communication and its components.

Answer: Non-verbal communication involves human senses (sight, taste, touch, hearing, and smelling). Components include symbols, signs, emblems, gestures, and sensory communication.

How much of human communication takes place through senses, according to the text?

Answer: About 90% of human communication takes place through senses, with the rest through words as languages.

Give examples of symbols and signs in Non-verbal communication.

Answer: Examples include victory signs, traffic signals, red-cross mark, and the symbol of a dove. These convey messages vividly and are easily understood.

Why is the combination of Verbal and Non-verbal communication considered strong?

Answer: The combination is practical and powerful, as seen in TV matches, feature films, newspapers, and magazines. It enhances the effectiveness of communication.

How do newspapers and magazines incorporate Non-verbal communication?

Answer: Newspapers and magazines, primarily relying on verbal communication, also include non-verbal elements like images, graphics, and maps to explain various aspects of daily life.

Why has the use of Non-verbal communication become essential in modern communication?

Answer: Non-verbal communication is essential in modern communication to enhance understanding and effectively convey messages. It is widely used across various media forms, including newspapers, magazines, and books.

LECTURE # 07

Why is the message crucial in communication?

Answer: The message is crucial in communication as it determines the content and meaning of the communication.

How does human communication differ from mechanical communication?

Answer: Human communication is complex and can't be repeated exactly due to variables, while mechanical communication, like a car horn or telephone bell, remains consistent.

Why is it challenging to repeat a human message exactly as before?

Answer: Composing a human message involves a range of variables, and even a slight change may alter its meaning at the receiving end.

Why is the script in mass communication not changed frequently?

Answer: In mass communication, scripts are not changed frequently to avoid misunderstandings among millions of receivers, requiring highly trained individuals to dispatch messages consistently.

What are the two categories into which messages are generally divided?

Answer: Verbal and Non-verbal.

Define Verbal Message and provide examples.

Answer: Verbal messages are composed in spoken or written words. Examples include text in newspapers, magazines, books, and spoken words on radio, TV, and telephone.

What is the Linguistic Barrier in Verbal Communication?

Answer: Linguistic Barrier occurs when people, even from the same clan, do not possess the same linguistic skills, leading to potential misunderstandings.

Explain the Standard Meaning's Problem in Verbal Communication.

Answer: Even with shared language, words may have different meanings. For example, the word 'hot' might have different interpretations without a precise reference like 40 degrees Celsius.

What challenges arise in Written Message communication?

Answer: Written words may not effectively convey personal experiences, making it challenging for readers to fully understand feelings, especially if they lack similar experiences.

Why is decoding or understanding feelings described as difficult in written communication?

Answer: Decoding or understanding feelings in written communication is difficult because readers may not have experienced the described feelings, making it challenging to empathize.

Why is historical writing particularly challenging in terms of verbal communication?

Answer: Historical writing becomes challenging as words' meanings change through time, and cultural shifts alter the interpretations of the same words.

What does Static Evaluation mean in Verbal Communication?

Answer: Words don't carry the same meanings through time and space. A word that had a specific meaning a hundred years ago may not have the same meaning today.

Define Non-verbal Message and give examples.

Answer: Non-verbal messages involve gestures, symbols, signs, etc. Examples include gestures like victory signs, facial expressions of pain or pleasure, and universal signs like a red-cross for medical care.

How do gestures contribute to Non-verbal communication?

Answer: Gestures, such as a victory sign or a wink of an eye, convey messages of emotions, pain, pleasure, or victory.

What is mentioned as a globally understood symbol in Non-verbal communication?

Answer: The red-cross sign, blaring of an ambulance siren, and traffic signals are globally understood symbols in Non-verbal communication.

How does voice accentuation play a role in communication?

Answer: Voice accentuation, changing voice levels, and stressing words are common in mass communication to convey specific meanings. It enhances the impact of verbal communication.

LECTURE # 08

Why is the message in mass communication considered the most sensitive area?

Answer: The message in mass communication is the most sensitive because it can lead to confusion, conflict, and misgivings due to varied interpretations by different receivers.

What makes mass communication messages prone to conflicts?

Answer: Mass communication messages are prone to conflicts as the same set of words can be interpreted differently by different receivers, leading to misunderstandings.

Provide an example illustrating the conflict arising from different interpretations.

Answer: The example of the conflicting interpretations of the desire for a peaceful solution in Kashmir by Pakistan, India, the United Nations, and others showcases the issue.

Why do misgivings arise in mass communication messages?

Answer: Misgivings arise because mass communication messages are not understood solely from the face value of words, leading to doubts in the mind of the receiver.

What happens when composing a message in a conflict-ridden situation?

Answer: Composing a message in a conflict-ridden situation is challenging, as even carefully chosen words may not appease those on the opposing side, deepening the conflict.

Explain the term "Negative Message – Propaganda."

Answer: Negative Message or Propaganda involves deliberately distorting facts and outlook to worsen understanding on a subject and gain advantage, commonly used in wars and political discords.

How is mass communication used for commercial benefit, leading to the advertising industry?

Answer: Mass communication is utilized to garner commercial benefit, giving rise to the advertising industry, where messages are crafted to promote products or services.

What is one way to overcome conflicts in communication?

Answer: One way to overcome conflicts is to use a standard language, focusing on polite and decent words that command more acceptability, especially in matters of disputes.

Why is brevity of message suggested in severe conflicts?

Answer: Issuing a brief and calculated statement in severe conflicts helps avoid controversies and reduces the chances of escalating the problem, causing fewer infringements.

What is emphasized in addressing multicultural audiences in mass communication?

Answer: Ethical considerations are emphasized, especially concerning religious and social values, to ensure the message respects diverse cultures and values.

Why is the world's multicultural composition challenging for mass communication students?

Answer: The multicultural composition of the world is challenging for mass communication students because it's difficult to address people from different cultures with varying interpretations of words.

What advice is given regarding ethics in composing a message for mass communication?

Answer: It is advisable to take care of ethics while composing a message, considering religious and social values, to do justice to the diverse perspectives of the audience.

LECTURE # 09

What is the immediate effect of communication?

Answer: The immediate effect of communication is discovery, whether it's about individuals, ideas, or physical exploration.

How has communication historically contributed to exploring the world and developing civilization?

Answer: Throughout history, communication has tremendously helped mankind explore the world around and develop civilization by providing answers to the quest for discovery.

What is the second most important effect of communication after discovery?

Answer: The second most important effect of communication is the creation of relationships with people and things around, either by establishing new relationships or strengthening existing ones.

How has mass communication been used to create relationships between distant societies?

Answer: Mass communication has played a strong role in creating relationships between distant societies, with diplomats and heads of states engaging in communication to establish connections.

What is the hallmark effect of communication in human efforts?

Answer: The hallmark effect of communication is the human effort to provide assistance to fellow beings, saving lives from disasters and coordinating rescue operations.

What is stimulation or persuasion in the context of communication effects?

Answer: Stimulation or persuasion refers to the effect of communication on human behavior, where advice or appeals at mass levels can activate individuals or groups to take specific actions.

Give an example of communication causing relaxation as an effect.

Answer: Watching a humorous TV play or receiving jokes is an example of how communication can effectively bring relief and relaxation in common life.

How does communication contribute to the growth of social values, physical structures, and intellectual levels of a society?

Answer: Communication contributes to the growth of social values, physical structures, and intellectual levels by organizing people, fostering coherence in living styles, and sharing knowledge on common issues.

Explain the role of communication in the globalization campaign.

Answer: Communication plays a crucial role in the globalization campaign by facilitating the exchange of ideas, expertise, and knowledge among people worldwide, leading to collective human progress.

Are the effects of communication limited to present-day activities?

Answer: No, the effects of communication go beyond present-day activities and extend to different times and spaces, contributing to the collective progress of humanity over time.

Give an example of a scientific invention influenced by communication over a period of time.

Answer: The invention of radio is an example of a scientific invention influenced by communication over a period of 150 years, with scientists contributing ideas and theories.

How has communication overcome distance considerations in sharing knowledge and research?

Answer: Communication has overcome distance considerations by allowing scientists to share knowledge and research widely, making collective human progress more integrated.

LECTURE # 10

What is the main mystery in communication that often leads to debates?

Answer: The mystery in communication that often leads to debates is the variation in cultures from place to place and through times, creating hurdles in understanding messages.

How is culture defined in the context of communication?

Answer: Culture, in the context of communication, is defined as the way people live, encompassing living habits, eating style, dressing up, language, social values, traditions, and religion.

What is the process of passing on culture from one generation to the next called?

Answer: The process of passing on culture from one generation to the next is called enculturation.

How does enculturation impact individuals settling in a different culture?

Answer: Individuals settling in a different culture continue to practice their cultural values through enculturation, impacting their communication and daily life.

What is the most challenging process in communication and cultural conflicts?

Answer: The most challenging process in communication and cultural conflicts is acculturation, where individuals learn the rules and norms of a culture different from their native culture.

How does acculturation affect communication for someone settling in a different land?

Answer: Acculturation requires adapting to the living style of a different land, and resisting it can lead to communication problems and misunderstandings.

What is cultural shock in communication, and when does it commonly occur?

Answer: Cultural shock in communication occurs when people from one culture have to live in another culture with radically diverse values, leading to a breakdown in understanding.

What is the first principle of intercultural communication mentioned to overcome communication gaps?

Answer: The first principle is to prepare yourself in advance about the new culture you may face by learning social norms through videos, newspapers, and magazines.

Why do even learned people experience a sense of fear in intercultural communication?

Answer: Even learned people experience a sense of fear in intercultural communication, and this fear may exist more at ordinary people level due to the fear of miscommunication and potential embarrassment.

How can overcoming fears in intercultural communication be achieved?

Answer: Overcoming fears involves making a fair assessment of what you want to communicate in relation to the social values of the people you are communicating with, gaining positive feedback to dispel fear, and building confidence.

What is the importance of understanding different meanings in intercultural communication?

Answer: Understanding different meanings of phrases, gestures, and body language in a new culture is crucial to bridge communication gaps and make the process more effective.

What role do hard and fast values play in improving communication in a new culture?

Answer: Hard and fast values play a crucial role in improving communication by providing insights into cultural norms, such as not eating with the left hand in Muslim culture or the significance of eye contact.

What is the significance of certain phrases in American culture, and why is it important to know?

Answer: In American culture, phrases like "come over and pay us a visit" are often friendly gestures and not formal invitations. Knowing these nuances is important to avoid misunderstandings.

How has the world been moving towards reducing communication hurdles in recent times?

Answer: With advancements in electronic media, internet chatting, and increased travel, the world is moving towards acculturation, and people are gaining a better understanding of each other's cultures.

What is the potential impact of increased exposure to different living styles through media on communication?

Answer: Increased exposure to different living styles through media can potentially reduce communication hurdles as people become more familiar with each other's cultures.

What is the role of electronic media and internet chatting in overcoming communication challenges?

Answer: Electronic media and internet chatting play a role in overcoming communication challenges by facilitating increased exposure to diverse cultures and fostering understanding

LECTURE # 11

What has been emphasized about non-verbal communication in comparison to verbal communication?

Answer: Non-verbal communication outsmarts verbal communication by a significant margin, especially in real-time interactions through human senses, body gestures, and signs.

What is the primary mode of communication in terms of time and space?

Answer: In terms of time and space, language comprising words is the primary mode of communication, such as historic records in books, religious teachings, and scientific works.

What remains shrouded in obscurity regarding languages, despite their importance?

Answer: The invention of languages, whether man-made or divine, and the stage at which their grammar rules and nouns were set up remain shrouded in obscurity.

What common practice exists for almost every language regarding describing things?

Answer: Polarization is a common practice for almost every language, describing things in extreme positions, limiting the expression of nuanced or middle-ground opinions.

Why does polarization in language create challenges in communication?

Answer: Polarization in language restricts individuals from expressing nuanced opinions or middle-ground perspectives, forcing them into extreme positions that may not reflect their true feelings.

What is the impact of labeling in language on people of different categories?

Answer: Labeling in language leads to impressions about people based on categories, influencing perceptions and interactions, even if individuals within a category may vary significantly.

Why does labeling contribute to communication issues in third-world countries regarding the United Nations?

Answer: Labeling may lead to suspicion and misconceptions, causing communication issues in third-world countries that regard the United Nations as an extension of the developed world.

What problem arises when words are attached to a person, and those meanings persist over time?

Answer: The problem of static meanings arises when words are attached to a person, and those meanings persist even when the person undergoes changes or developments.

How does language contribute to indiscrimination among individuals in certain professions?

Answer: Language provides common nouns that lead to indiscrimination among individuals in certain professions, causing preconceived notions about their behavior.

What is the purpose of the debate on language and communication?

Answer: The purpose of the debate on language and communication is not to prove that languages are worthless but to highlight areas where languages fall short of conveying accurate meanings, causing communication challenges.

LECTURE # 12

What problem has mass media faced since the emergence of mass communication?

Answer: Mass media has faced the problem of stereotyping in sending information across, often promoting perceptions that are far from reality.

In which industries are stereotypes sometimes inevitable, according to the text?

Answer: Stereotypes are sometimes inevitable in the advertising, entertainment, and news industries, where a quick, common understanding of information is needed for a wide audience.

What do stereotypes act like, providing a quick understanding of individuals or groups?

Answer: Stereotypes act like codes, providing audiences with a quick, common understanding of a person or group based on characteristics such as class, ethnicity, race, gender, social role, or occupation.

How are stereotypes defined in the text?

Answer: Stereotypes are defined as ideas held by individuals about members of particular groups, often based solely on attitude, used in a negative or prejudicial sense to justify discriminatory behaviors.

What problem arises when stereotypes are widely accepted by listeners (receivers) in communication?

Answer: When stereotypes are widely accepted, listeners (receivers) may take assumptions for granted, leading to wrong conclusions and sometimes resulting in complete communication disasters.

What is the global nature of stereotyping in communication?

Answer: Stereotyping in communication, originating from the printing process, is a global phenomenon, affecting mass media worldwide and posing challenges that experts are striving to overcome.

Name some common stereotype groups mentioned in the text.

Answer: Common stereotype groups include age, race, ethnicity, gender, nationality, religious belief, profession, and social class.

What approach does the Islamic (religious) perspective advocate concerning individuals?

Answer: The Islamic (religious) perspective emphasizes that individuals should be judged based on their individual deeds rather than their cast, creed, or tribe at the time of justice on doomsday.

What does the text highlight as the sore point in media stereotyping?

Answer: The sore point in media stereotyping is that the overuse of certain ideas can make people (receivers) believe in the truth of what is being said, even if it is a stereotype.

Why are standards of beauty imposed on women, according to the text?

Answer: The text suggests that standards of beauty are imposed on women for economic reasons, ensuring growth and profits for the cosmetic and diet product industries.

LECTURE # 13

What is the primary concern before discussing mass media's impact on societies in the contemporary world?

Answer: The primary concern is understanding how mass media began under circumstances that seem difficult to believe in modern times.

How did people exchange views and information about distant territories around the sixth century?

Answer: There is no clear trace, but it is believed that exchange of views and information about distant territories might have occurred through travelers and war expeditions.

What is highlighted as the breakthrough in mass communication in the text?

Answer: The breakthrough in mass communication is attributed to the invention of paper, although it was still far from the concept of mass communication.

What was the first fascination towards mass media mentioned in the text?

Answer: The first fascination towards mass media was books, which, though limited in topics, symbolized pioneers in mass communication.

During which periods did significant developments occur in the history of books, according to the text?

7th to 13th Century: The age of religious "manuscript" book production.

13th to 15th Century: The secularization of book production.

15th to 16th Century: The first printed books.

16th to 17th Century: New information is put into books with important consequences on European life and society.

What is the "carpet page" from the Book of Durrow, and what does it represent?

Answer: The "carpet page" is a decorated page from the Book of Durrow. It represents an attempt to convey the beauty of God's message to mankind through illumination and decoration.

What issue did the manuscripts of monasteries face in affecting life in Europe?

Answer: The manuscripts were mostly locked up in monasteries, making them inaccessible to the general public, hindering their use for scholarship.

What contributed to the rise of a print-dominated society between the 13th and 16th centuries?

Answer: The rise of a print-dominated society was fueled by the reproduction of classic texts of antiquity and the development of new kinds of books in science.

What changes did the technology of the printing press bring to Europe in the 15th century?

Answer: The technology of the printing press, coupled with changes in the political/economic system, wrought changes in the ways in which Europe saw its place in the world.

What was the original method of printing, and where is it believed to have originated?

Answer: The original method of printing was block printing, believed to have originated in China and used mostly to print Bibles in Europe.

LECTURE # 14

What breakthrough in the printing process marked a significant change in the world during the next hundred years?

Answer: The breakthrough in the printing process led to people from advanced countries using the new invention to express their opinions on both religious and secular matters.

How did the role of gatekeepers in the world of information change during the early years of printing?

Answer: The role of gatekeepers in the world of information was considerably reduced, and new idea-exchange programs became popular worldwide.

What marked the pioneer work in using print as a medium to spread information during the early years of printing?

Answer: Pioneer work in print as a medium started with irregular pamphleteering and evolved into regular publications, including tens of thousands of magazines, books, newspapers, and newsletters.

What significant events in the early 1500s are mentioned in the context of print media?

1500s: Newsheets appear in Venice, Italy.

1605: Relations, France.

1690: Public Occurrences, the first U.S. Newspaper.

1704: John Campbell publishes the Boston News-Letter.

How did colonial rulers influence the emergence of print media in India?

Answer: The history of media in united India is colored by the colonial experience, with foreign rulers influencing the surfacing of print media.

Who started the first regular publication from Indian soil, and what was it known for?

Answer: James Augustus Hickey started the Hickey's Bengal Gazette or the Calcutta General Advertiser in 1780, regarded as the first regular publication. It specialized in writing on the private lives of the Sahibs of the Company.

What role did William Bolts play in the early attempts to start a newspaper in India?

Answer: William Bolts, an ex-employee of the British East India Company, attempted to start the first newspaper in India in 1776 but faced disapproval from the Court of Directors of the Company.

Which was the first newspaper in Bombay (Mumbai), and when did it come into existence?

Answer: The Bombay Herald came into existence in 1789, and in 1790, it merged with the Bombay Gazette, recognized as the publication for "official notifications and advertisements."

Which Urdu newspaper started in 1822, and what made it unique in terms of language use?

Answer: The Persian weekly Jam-e-Jahan Numa started in 1822, publishing in both Urdu and Persian **at different times. It was one of the early newspapers, with a focus on weekly or biweekly publication.**

Which Urdu newspaper was recognized as the largest circulated newspaper around 1850?

Answer: Munshi Harsukh Rai started the weekly Kohinoor around 1850, with a circulation of 350, making it the largest circulated newspaper of that time.

LECTURE # 15

When did Samuel Morse successfully establish a link between Baltimore and Washington DC with the telegraph?

Answer: May 14, 1844.

What was the first telegraph message transmitted by Samuel Morse?

Answer: "What hath God wrought."

How did the telegraph revolutionize communication in the 19th century?

Answer: It allowed rapid long-distance communication, overcoming the limitations of existing methods.

Who coined the term "telegraph" to describe long-distance messaging methods?

Answer: Claude Chappe.

In what year did Charles Wheatstone develop a telegraph that linked Liverpool with Manchester?

Answer: 1839.

What was the significant development by Carl Steinheil in telegraphy in Germany?

Answer: He developed a telegraph that printed coded messages on a ribbon.

How did Samuel Morse contribute to the invention of the electric telegraph?

Answer: He realized the potential of using an electromagnet to send messages and developed a practical system.

When did Samuel Morse officially inaugurate the telegraph link between Baltimore and Washington DC?

Answer: May 14, 1844.

How much telegraph cable covered the world in 1862?

Answer: 240,000 km, with 77,000 km in the United States and 24,000 km in Great Britain.

What were the primary applications of the telegraph in the 19th century?

Answer: It was used in railroads, news dispatch, industry, and general public messaging.

What technology replaced the telegraph as a primary source of communication?

Answer: The telephone and radio.

How fast was data transmitted using Morse code in the latter half of the 1800s?

Answer: About four to six bits per second.

When was the telephone first demonstrated as a working electrical voice-transmission system?

Answer: 1863 by Johann Philipp Reis.

Who was awarded the patent for the first operational telephone?

Answer: Alexander Graham Bell in 1876.

What were the initial drawbacks of the magnetic telephone design?

Answer: Callers had to shout to overcome noise, and there was a time lapse in transmission.

When was the first manual telephone exchange opened?

Answer: In 1878, serving 21 customers in New Haven, Connecticut.

What technological innovation allowed transatlantic telephone communication in 1956?

Answer: The laying of a submarine cable across the Atlantic.

When were communication satellites first utilized for telecommunication?

Answer: 1962.

What technology revolutionized the telecommunication industry in 1980?

Answer: The introduction of fiber-optic systems.

LECTURE # 16

What are the four major advancements mentioned in the paragraph that brought a boon to print communication?

Answer: Printing press, telegraph, telephone, and telex.

How did the availability of these technologies impact the publishing industry?

Answer: The publishing industry flourished, providing jobs and financial comfort globally.

Into how many categories can the publishing industry, synonymous with print media, be classified?

Answer: Three categories - Newspapers, Magazines, and Books.

When was the first regular publication that could be defined as a newspaper introduced?

Answer: Around 150 years after the invention of the printing press, in 1605.

Which newspaper is considered the world's oldest still in circulation, published in Sweden in 1645?

Answer: Post-och Inrikes Tidningar.

Who is recognized as the world's first journalist and began publishing the Review in 1704?

Answer: Daniel Defoe.

What invention in 1844 played a crucial role in communication alongside print media?

Answer: The Telegraph.

In 1851, which news agency was established, becoming a significant player in global news?

Answer: Reuters.

Who developed the first tabloid newspaper, the Daily Mirror, in London in 1903?

Answer: Alfred Harmsworth (Lord Northcliffe).

Besides newspapers, what are some common contents found in general-interest newspapers?

Answer: Political events, crime, business, culture, sports, opinions, and more.

What are the various types of magazines mentioned in the paragraph?

Answer: Art magazines, business magazines, music magazines, computer magazines, children's magazines, health and fitness magazines, history magazines, humor magazines, inspirational magazines, men's magazines, women's magazines, luxury magazines, news magazines, online magazines, pulp magazines, pornographic magazines, regional magazines, satirical magazines, and teen magazines.

How often are magazines typically published, as mentioned in the paragraph?

Answer: Weekly, biweekly, monthly, bimonthly, or quarterly.

When did books become part of the mass media after the invention of the printing press?

Answer: After the 15th century.

What was the primary material used for writing before the invention of paper in Europe?

Answer: Vellum (animal skin).

When did papermaking begin in Europe, and what significant change occurred during the industrial revolution?

Answer: Papermaking began around the 11th century, and during the industrial revolution, paper began to be made from wood pulp.

What is mentioned as one of the earliest references to the use of bookmarks in books?

Answer: In 1584, Christopher Barker presented Queen Elizabeth I with a fringed silk bookmark.

What technological advancements in the mid-20th century contributed to the rise of book production?

Answer: Steam-powered printing presses, Monotype, and linotype presses.

What marked the beginning of modern public libraries in the 15th century?

Answer: The advent of paperback books.

How did paperback books impact book ownership in the 20th century?

Answer: Paperback books made owning books affordable for many people.

LECTURE # 17

What was the title of the first US newspaper, and when did it come out?

Answer: The first US newspaper was titled Publick Occurrences, and it came out in 1690.

Why was Publick Occurrences shut down after printing only one issue?

Answer: It was possibly shut down by colonial officials, likely due to censorship and control issues.

What marked a turning point in the struggle between governments and print media in the paragraph?

Answer: Print media gained societal backing and organized itself, making it difficult for governments to control it.

When did parliaments come into play to enact laws disciplining the media?

Answer: Parliaments came into play when the tug of war between governments and media became challenging.

What is the primary focus of Press Laws mentioned in the paragraph?

Answer: Press Laws concern the licensing of books and the liberty of expression, especially in newspapers.

Who assumed the right to control expression before the invention of printing, as stated in the paragraph?

Answer: The Church assumed the right to control expression.

What was introduced by Pope Alexander VI in 1501, signaling the beginning of censorship?

Answer: A bill against unlicensed printing, introducing the principle of censorship.

What is the basic principle behind most freedom of information legislation?

Answer: The burden of proof falls on the body asked for information, not the person asking for it.

In which country was the oldest freedom of information legislation passed, and when?

Answer: Sweden's Freedom of the Press Act of 1766.

Can you name some Australian states with their corresponding Freedom of Information Acts?

Answer: Australian Capital Territory, New South Wales, Northern Territory, Queensland, South Australia, Tasmania, Victoria, Western Australia.

In Canada, what allows citizens to demand records from federal bodies?

Answer: The Access to Information Act.

What does European Union Regulation 1049/2001 grant to any Union citizen or legal person?

Answer: The right of access to documents of the European Parliament, Council, and Commission.

When did the Indian Right to Information Act come into effect?

Answer: The Indian Right to Information Act came into effect on October 12, 2005.

When did the Freedom of Information Act go into effect in the United States?

Answer: The Freedom of Information Act went into effect the year after being signed, in 1967.

What ordinance was promulgated by President Pervez Musharraf in Pakistan in 2002?

Answer: The Freedom of Information Ordinance 2002.

Name some laws from the colonial period in the subcontinent related to press and publication.

Answer: The Registration of Books and Newspaper Act (1867), The Press (Emergency Power) Act (1931), The States (Protection Against Disaffection) Act (1922), and others.

Which article of the Constitution of Pakistan (1973) guarantees freedom of speech and expression?

Answer: Article 19.

What does Article 19 of the Universal Declaration of Human Rights state?

Answer: Everyone has the right to freedom of opinion and expression.

What principles are outlined in the Declaration of Principles on the Conduct of Journalists?

Answer: Respect for truth, defense of freedom principles, honest collection and publication of news, fair comment and criticism, and others.

What was the original method of printing before the invention of the printing press?

Answer: Block printing, also known as xylography, was the original method of printing.

Where is it believed that block printing originated, and what was the earliest known printed text?

Answer: Block printing is believed to have originated in China, and the earliest known printed text is the Diamond Sutra, printed in China in 868 A.D.

Who is credited with inventing movable type in printing, and in what year?

Answer: Bi Sheng invented movable type in 1041 A.D. in China.

What type of type did Bi Sheng initially use, and who sponsored the production of metal type?

Answer: Bi Sheng initially used clay type, and Goryeo (Korea) sponsored the production of metal type in the early 15th century.

What is the benefit of movable type for alphabetic-based languages, and when did it become extensively used in China?

Answer: Movable type is more apparent for alphabetic-based languages. It became extensively used in China with the introduction of the European-style printing press.

What materials did Gutenberg use for the first widespread use of movable type in Europe?

Answer: Gutenberg used separate metal characters, an oil-based ink, and "rag" paper introduced from China.

What period is collectively referred to as incunabula in the context of printed books?

Answer: The period between the first work of Johann Gutenberg and the year 1500 is collectively referred to as incunabula.

What replaced hand-copied manuscripts with printed works, and how did it impact book production?

Answer: The Gutenberg press replaced hand-copied manuscripts, allowing the creation of several hundred copies a year and transforming book production.

Where did the first printing press in a Muslim territory open, and what script did it use?

Answer: The first printing press in a Muslim territory opened in Andalusia (Muslim Spain) and used the Hebrew script.

What is typesetting, and why was it considered a true art form?

Answer: Typesetting is the placement of characters on the page. It was considered a true art form due to its complexity, passed down from master to apprentice.

Who invented the steam-powered press, and when did it come into existence?

Answer: Friedrich Gottlob Koenig and Andreas Friedrich Bauer invented the steam-powered press in 1812.

How did the industrial revolution impact printing, and who perfected the early steam-powered press?

Answer: The industrial revolution increased printing efficiency. Koenig and Bauer perfected the early steam-powered press.

What is the primary advantage of offset printing, and when did it become the most popular form of commercial printing?

Answer: The primary advantage is consistent high image quality. Offset printing became the most popular form in the 1950s.

What is lithography, and how does it differ from offset printing?

Answer: Lithography is a printing technology where images are transferred to a plate, and it differs from offset printing in its method of image transfer.

When did the first lithographic offset printing press come into existence, and what material covered the offset cylinder?

Answer: The first lithographic offset printing press was created in England around 1875, and the offset cylinder was initially covered with cardboard and later with rubber.

Who is credited with using an offset press to print on paper, and in what year did this occur?

Answer: American Ira Washington Rubel is credited with using an offset press to print on paper in 1903.

What is the most common kind of offset printing derived from, and what is the process involved?

Answer: The most common kind of offset printing is derived from the photo offset process, involving film negatives and photomechanical printing plates.

What has become the de facto standard for documents downloaded and read independently of HTML pages on the web?

Answer: PDF files have become the de facto standard for documents on the web.

What is desktop publishing, and what program is often used for desktop publishing?

Answer: Desktop publishing involves using programs like PageMaker or Quark Express for complete page design capabilities.

LECTURE # 19

What major changes did the rapid growth of print media bring to the life of people?

Answer: The rapid growth of print media brought across-the-board changes by exposing people to secular ideas and weakening the church's grip on social life.

How did the printing of books contribute to standardizing languages?

Answer: The printing of books in high numbers standardized languages by setting meanings for words, phrases, symbols, and signs.

What impact did the early newspapers and periodicals have on economic ideas?

Answer: The breaking down of the church's control over written communication by newspapers and periodicals led to common discussions on money generation methods and increasing trade.

How did print media act as a catalyst for industrialization in the 18th century?

Answer: Print media highlighted scientific work and new technologies, acting as a catalyst for industrialization by spreading science ideas and encouraging debates.

When did the world start knowing about democracy and civil rights, and what contributed to this awareness?

Answer: By the sixteenth century, the world started knowing about democracy and civil rights, with political ideas spreading through print media.

What role does the print media play in education?

Answer: Print media has been responsible for running educational campaigns, conveying information, and featuring experts from various fields for ordinary people.

How has the media stood firm during times of war, and what role does it play?

Answer: Media stands firm during war, guiding people on what to do and keeping the nation's spirit high by disseminating crucial information.

In addition to serious matters like education and politics, what other areas does the media cover for entertainment?

Answer: The media covers articles and information about music, sports, and other recreational activities for entertainment.

How has the media contributed to bringing the world closer?

Answer: The media has brought the world closer by highlighting similarities and differences in human living, encouraging travel for business, health, or educational purposes.

What significant shift in information transfer does the printing of books with movable type mark in Europe?

Answer: The printing of books with movable type marks a paradigm shift in information transfer, comparable to the development of language, the invention of the alphabet, and the computer.

How did Gutenberg's findings accelerate the Protestant Reformation?

Answer: Gutenberg's findings allowed a broader audience to read Martin Luther's German translation of the Bible, accelerating the pace of the Protestant Reformation.

Why was wood block printing more suited for Korea and China compared to the printing press?

Answer: In Korea and China, wood block printing was more suited for short runs of uncertain return, unlike the high capital investment of a printing press for texts like the Bible.

How did the printing process change the importance of authorship?

Answer: The printing process made authorship more meaningful, emphasizing who said or wrote what and ensuring precise citation of references.

What changes did the introduction of page numbering, tables of contents, and indices bring about?

Answer: The introduction of page numbering, tables of contents, and indices became common due to the printing process, facilitating precise referencing.

How did printing change the process of reading?

Answer: The printing process changed the process of reading from oral readings to silent, private reading.

How did printing contribute to raising the literacy level and revolutionizing education?

Answer: Printing gradually raised the literacy level by making books more accessible and revolutionized education by changing the way people read.

How did the emphasis in early printed works differ from illuminated manuscripts?

Answer: Early printed works emphasized the text and line of argument, whereas illuminated manuscripts focused on images and the beauty of the page.

What shift did the introduction of the printing press bring to the sciences?

Answer: The introduction of the printing press marked a shift in the sciences from the medieval language of metaphors to the adoption of the scientific method.

How did the spread of printed books contribute to the creation of modern nations?

Answer: The spread of printed books into the hands of the people led to the replacement of Latin by national languages, contributing to the creation of modern nations.

LECTURE # 20

What is the primary area that benefited the most from the extraordinary growth of mass media from the seventeenth century?

Answer: Advertising is the primary area that benefited the most from the extraordinary growth of mass media.

What does advertising generally mean in the context mentioned in the paragraphs?

Answer: Advertising generally means announcing new products and services with commercial interest that people can use as part of their daily life.

Before the printing process introduced in the fifteenth century, how were verbal announcements commonly made?

Answer: Verbal announcements were commonly made through the beat of drums or distribution of hand-written bills before the printing process.

How did the printing process in the fifteenth century unexpectedly lead to an entirely new industry?

Answer: The printing process in the fifteenth century unexpectedly led to an entirely new industry by creating jobs for millions of people worldwide and generating enormous business.

Why are mass communication and advertising essential for each other's survival?

Answer: Mass communication and advertising are essential for each other's survival because outlets of mass media are often opened after ensuring ample support from the advertising business.

In the colonial period, where were advertisements primarily displayed, and what information did they provide?

Answer: In the colonial period, advertisements were primarily signboards on inns, coffeehouses, etc. providing information about real estate, rewards, slave sales, and sale of articles, wine, and cloth.

Who founded the first continuously appearing newspaper, and when was it established?

Answer: The first continuously appearing newspaper, the Boston News-Letter, was established in 1704.

What changes did Benjamin Franklin introduce to newspaper advertising in the Pennsylvania Gazette?

Answer: Benjamin Franklin introduced large-point headings, the use of white space to separate advertisements from text, and illustrations (cartoons) after 1750 in the Pennsylvania Gazette.

What technological changes were triggered by the diffusion of steam power in the 1850s?

Answer: The diffusion of steam power in the 1850s triggered a wave of technological changes, leading to increased mechanization and mass production.

How did manufacturers create brand names and familiarize buyers nationally with their products?

Answer: Manufacturers created brand names and familiarized buyers nationally with their products through advertising in newspapers, streetcars, billboards, and magazines.

What significant role did advertising play during the economic depression of 1893–1897?

Answer: Advertising played a significant role during the economic depression by helping businesses insulate themselves from downturns in sales and production.

Why did businesses need methods like advertising during economic downturns, according to the paragraphs?

Answer: Businesses needed methods like advertising during economic downturns to insulate themselves from cyclical downturns in sales and production.

How did urbanization contribute to the increase in advertising in the U.S. between 1860 and 1900?

Answer: Urbanization, with 20 percent of the population in urban areas in 1860 and nearly 40 percent by 1900, increased the need for easy provision of consumer goods, leading to more advertising.

Who were advertising agents in the 1850s, and how did their role change around 1880?

Answer: In the 1850s, advertising agents were middlemen buying and reselling advertising space. Around 1880, N. W. Ayer and Son offered an "open contract," becoming the company's sole advertising agent.

What did the American Association of Advertising Agencies do in 1917, and how did it impact the advertising industry?

Answer: The American Association of Advertising Agencies was formed in 1917, creating industry standards and contributing to the advertising industry's increased respect.

When did modern advertising, with the goal of creating desire for a product, begin?

Answer: Modern advertising, with the goal of creating desire for a product, began in the early twentieth century.

How did academic psychologists contribute to advertising in the late 1890s?

Answer: Academic psychologists applied principles of psychology to advertising content in the late 1890s, contributing to the development of modern advertising.

What were the two types of advertising that conflicted in the early twentieth century?

Answer: The two types of advertising that conflicted were "reason-why" advertising and "atmosphere" advertising.

How did advertising change after World War I, and what role did it play during the war?

Answer: Advertising changed after World War I, emphasizing buyers' needs and desires over product characteristics. During the war, advertising played a patriotic role, selling Liberty and Victory Bonds and supporting war efforts.

LECTURE # 21

In which century did the rediscovery of Greek and Roman literature occur across Europe?

Answer: The rediscovery of Greek and Roman literature occurred in the 13th century.

What movement developed in the next century as a result of the rediscovery of Greek and Roman literature?

Answer: The humanist movement developed in the next century as a result of the rediscovery of Greek and Roman literature.

Besides emphasizing Greek and Latin scholarship, what did humanists believe about individuals within society?

Answer: Humanists believed that each individual had significance within society.

During which centuries did the printing process lead to significant changes in arts and sciences?

Answer: The printing process led to significant changes in arts and sciences from the 14th century to the 16th century.

What were the major changes in Europe during the 14th to 16th centuries, particularly in Italy?

Answer: The major changes included economic flux, a shift in power to the cities, and the development of small Italian republics into dictatorships, especially in Italy.

At the height of the Renaissance, how many major city-states were there in Italy?

Answer: At the height of the Renaissance, there were five major city-states in Italy: Naples and Sicily, the Papal State, Florence, Milan, and Venice.

What areas of study developed during the Renaissance as a result of the search for ancient texts?

Answer: Botany, zoology, magic, and astrology developed during the Renaissance as a result of the search for ancient texts.

Who were some of the scientific thinkers during the Renaissance, and what were their contributions?

Answer: Scientific thinkers included Leonardo da Vinci, Nicolaus Copernicus, Galileo, and Johannes Kepler. Their contributions ranged from astronomical observations to anatomical studies.

How did printing techniques contribute to the dissemination of old research during the Renaissance?

Answer: Printing techniques made it possible to send old research, still safe in handwritten texts, to scholars living in distant countries, contributing to the dissemination of knowledge.

What were some of the works published by scientific thinkers during the Renaissance?

Answer: Copernicus wrote "De revolutionibus," Galileo published "Siderius nuncius," and Kepler published the first two laws of planetary motion in 1609.

How did humanism in Renaissance rhetoric differ from Aristotelian scholasticism?

Answer: Humanism in Renaissance rhetoric was a reaction to Aristotelian scholasticism. Humanists differentiated between physical utterance and intangible meditation, prioritizing common usage over logical rules.

What did Joseph Webbe, Roger Ascham, and Thomas Elyot contribute to humanism in literature?

Answer: Joseph Webbe wrote textbooks, Roger Ascham emphasized studying speeches of ancient orators, and Thomas Elyot suggested rules for effective statesmanship.

What was Thomas More's significant contribution to humanism?

Answer: Thomas More's significant contribution to humanism was "Utopia," a design for an ideal society based primarily on works by classical authors.

How did humanism impact English literature, and which authors exemplified humanist values?

Answer: Humanism impacted English literature, as seen in works by Ben Jonson and William Shakespeare. Jonson's works exemplified humanist values, focusing on virtues and vices.

Who were notable proponents of humanist thought in France, and what were their contributions?

Answer: Michel de Montaigne and François Rabelais were notable proponents of humanist thought in France. Montaigne's essays examined society, while Rabelais's work emphasized individual beliefs.

When did the scientific revolution generally begin, and what were some areas of transformation?

Answer: The scientific revolution generally began in 1543, with transformations in physics, astronomy, biology, institutions supporting scientific investigation, and the widely held picture of the universe.

Who coined the term "The Scientific Revolution," and what influenced subsequent historiography?

Answer: Alexandre Koyré coined the term in 1939, influencing traditional historians like A. Rupert Hall and J.D. Bernal. Subsequent historiography, including Steven Shapin's work, was influenced by Koyré's definition.

Name some notable figures and their contributions during the scientific revolution.

Answer: Nicolaus Copernicus (heliocentric theory), Andreas Vesalius (anatomy), Galileo (telescope, laws of motion), Johannes Kepler (laws of planetary motion), William Harvey (circulation of blood), René Descartes (deductive reasoning), Antony van Leeuwenhoek (microscopy), Isaac Newton (laws of motion, universal gravitation).

What significant advancements occurred in optics during the scientific revolution?

Answer: Optics was revolutionized by Robert Hooke, Christiaan Huygens, René Descartes, and Isaac Newton, who developed theories of light as either waves or particles during the scientific revolution.

LECTURE # 22

Why has communication been one of the oldest characteristics of human life?

Answer: Communication has been essential due to survival, cooperation, relationship building, persuasion, influence, power, social needs, and information exchange.

What are the different categorizations of communication?

Answer: Intrapersonal Communication, Interpersonal Communication, Organizational Communication, Group Communication, and Mass Communication.

What are the key elements of communication?

Answer: Sender, Message, Channel, Receiver, Interpreter, Feedback, and Context.

When and where was the printing press invented?

Answer: The printing press was invented in the 15th century by Johann Gutenberg in the West, with a prior version in China in 1041.

What is a model in communication?

Answer: A model is a systematic representation of an object or event in an idealized and abstract form.

Who proposed the Shannon-Weaver's Model of Communication, and what are its six elements?

Answer: Claude Shannon and Warren Weaver proposed the model, and its six elements are Source, Encoder, Message, Channel, Decoder, and Receiver.

How did Wilbur Schramm alter the Shannon-Weaver's model in 1954?

Answer: Schramm introduced the Interactive Model, emphasizing simultaneous encoding and decoding activities, along with the inclusion of an "interpreter" and feedback.

What is David Berlo's SMCR Model, and what are its five elements?

Answer: Berlo's model includes Source, Message, Channel, Receiver, and the crucial element of Noise, affecting both encoding and decoding.

What are the forms of communication in exchanging messages?

Answer: Verbal and Non-verbal communication.

What are the divisions of messages in communication?

Answer: Verbal and Non-verbal messages.

What are some examples of verbal messages?

Answer: Spoken or written words, such as letters, newspapers, magazines, books, radio, TV, and telephone communication.

What are some challenges in non-verbal communication?

Answer: Gestures, signs, symbols, body language, and voice accentuation.

What are the effects of communication?

Answer: Discoveries, social growth, relationship building, stimulation, helping others, and relaxation.

How is culture defined in the context of communication?

Answer: Culture refers to the way people live, including habits, language, social values, traditions, and religion.

What is the process of passing on culture from one generation to the next called?

Answer: Enculturation.

What is the process of adopting or learning the rules and norms of a different culture called?

Answer: Acculturation.

What is stereotyping, and which groups are commonly stereotyped?

Answer: Stereotyping is forming ideas about individuals based on their group membership. Common groups include age, race, ethnicity, religious beliefs, gender, and social class.

What is propaganda, and what is its purpose?

Answer: Propaganda aims to present one-sided views that favor a particular party or perspective.

When did the concept of regular publication in the form of newspapers appear, and where was the first English daily newspaper founded?

Answer: The concept appeared in the 17th century, and the first English daily newspaper, the Daily Courant, was founded in London in 1702.
