30-8-2020 Final Notes of - Sta 630

UMAR

1- How would you differentiate between History effect and Mechanical loss in experimental Research?

Answer. History effect is specific event in the external environment occuring between the 1st and 2nd measurement that is beyond the control of the experimenter and that effects the validity of an experiment.

Mechanical loss is problem may be experienced due to equipment failure.

2 Write Note on three varities of Non reactive observations?

Answer. (1) - Physical traces

(i) - Erosion ⇨ wear and tear sugest use. greater

(ii) Accretion ⇨ Accumulation of physical evidence suggests behavior.

(2) - Archives

(i) Running Records ⇨ Regularly produced public records may reveal lot of information.

(ii) other Records ⇨ irregular or private records

(3)- observations.
(i)- External appearance: How people appear may indicate social factors-
(ii) Count behaviors: Counting how many people do something can be informative
(iii)- Time duration. How long people take to do things may indicate their intention.

3- Term Inductive to describe Qualitative Data Analysis and interpretation?

Answer. In inductive term answers should address methodological characteristics such as data collection and coding, developing categories and patterns, and interpreting relationships across patterns.

4- Discuss Solomon Four Group - Design in experimental research with the help of example -

Answer. Solomon Four Group Design to gain more confidence in internal validity in experimental

Scanned with CamScanner

Date

designs, it is advisable to set up two experimental groups and two control groups. one experimental group and one control group can be given the both pretest and the posttest.

Group	Pretest	Treatment	Postest.
Experimental.	01	X	02
Control.	03	–	04
Experimental.	–	X	05
Control	–	–	06.

5- Ethical Dilema of Field Researc

Answer. The direct personal involvement of a field Researcher in the social lives of other people raises many ethical dilemas. Dilemas arises when researcher is alone in the field and has little time to make a moral decision.

6- How Researchers locate evidence in Historical

Scanned with CamScanner

Comparative research ?

Answer. Historical Comparative Research draw on four types historical evidence or data.

(1) Primary sources.
(2) Secondary sources.
(3) Running Records-
(4) Recollections.

Tradition historians can rely heavily on primary sources. H-C Researchers often use secondary sources.

7- Historical Research Follow scientific Approach ?

Answer. Historical Comparative Research follows scientific approach because of reasons.

(1) Can be survey of events in history
(2) Historical-comparative Researchers mostly do longitudinal analysis.
(3) Historical-comparative researchers make cross-cultural comparisons of social reforms or economic reform

Date

8- Importance of Measurement and coding in non-Research with help of example -

Answer.

Careful Measurement is crucial in content analysis because a researcher takes different and murky symbolic communication and turns it into precise, objective, Quantitative data. Coding to make replication possible. because coding system is set of instructions.

9- Advantages of Cluster Sampling?

Answer. ① Feasibility
② Economy.
③ Reduced variability.

10- Do you explain inferences from non-reactive data by using secondary survey data?

Answer. A researcher's ability to infer casuality or to test a theory on the basis of non-reactive data is limited. It is dificult to use unobtrusive

measures to establish temporal order and eliminate alternative explanations.

11- Research process, once you collect the data how would perform the scoring index activity?

Answer.

① Remember the measurement of of Job satisfaction.

② No of Statements on each element

③ Likert scale (5) responde category. Strong Agree, Agree, disagree, Neutral

④ There are positive or Negative Statements Positive Statements score Strongly Agree = 5 Agree = 4, Neutral = 3, disagree = 2 - disagree = 1.

12. Would you explain spontaneity and confession by using secondary data?

Answer. Spontaneity actions or feelings can be recorded when they occured rather than at a time specified by the

Scanned with CamScanner

researcher. If respondent was keeping a diary. He or she may have been recording spontaneous feelings about a subject.

Confessions - A person may be more likely to confess in a document particularly one to be read only after his/her death then in an interviews or mailed Questionnaire.

13- No and duration in FDG?

Answer. The Number of focus group session to be conducted depends upon project needs, resources and new information is still coming from the sessions.

For duration, a focus group session typically lasts up to an hour and a half.

14 Suggest the Apropriate data collection tool that can be used by Research organization?

Scanned with CamScanner

Date

Answer. Secondary data are usually historical, already assembled and do not require access to respondents or subjects. Secondary data may be collected by large bureaucratic organization like the bureau of Statistics.

15 What is bracketing?

Answer. Researchers attempt to read primary sources with the eyes and assumptions of Contemporary who lived in past.

16- Accretion and count behaviors?

Answer. Accretion: Accumulation of physical evidence suggests behavior.

Count behaviors. Counting how many people do something can be informative.

17- Independent variable?

Answer. It is the variable you have control over, what you can choose and manipulate.

Scanned with CamScanner

18 Being Researcher, how would you criticize the use of secondary data in Research?

Answer:

Many documents used in Research were not originally intended for research purposes. Biad are -

(i) - Selective Survival
(ii) - incompleteness.
(iii) - Lack of Availability of documents.
(iv) - Limited to verbal behaviors.
(v) - Sampling bias.
(vi) - Lack of Standardized format.

19- Different measures of central tendency are used?

Answer: Three measures of central tendency, or measure of the center of frequency distribution (i) Mean, Mode (iii) Median which are often called averages. (Less precise, less clear, Same thing).
Mode is most Comonly occuring Number.
Median is Middle point.
Mean also called Arithematic Average.

20 Functions of the Recorder?

Answer. ① Data, time and place.
② Names and characteristics of participants.
③ General principal of group dynamics.
④ opinion of participants.
⑤ Vocabulary used.

21 Historical Comparative depends upon some factors. List down.

Answer. ① Historical Comparative depends upon tracking the development of social forms overtime as well as its broad historical processes.
② Compairing those forms and its developmental processes across cultures.

22 Using APA style describe Quotation i-e what is their format in writting a literature view?

Answer. American psychologist Association style was developed by social and behavioral scientists. The writing of Apa requires the writer to pay attention to mechanical details in the writting such as

Scanned with CamScanner

Date

margins, typeface, page headers and line spacing.

Writting literature article reviews is not an easy task for any level student. This is because student is required to read the literature material which are usually wide and provide their deeper meaning in the article reviews.

23 Parts of executive summary?

Answer. Summary contains four elements.

① The objective of the report are stated including most important background and specific purpose of the project.

② The major results are presented

③ Conclusion that are based on results

④ The recomendation or suggestions for actions which are baled on conclusion.

24. Parts of Research Report?

Answer. ① Prefatory parts-

(i) Title page (ii) Title page (iii) Letter of transmital (iv) Letter of authorization. (v) Table of content (vi) Executive Summary.

② Main body-

(i) Intro (ii) Methodology (iii) Results. (iv) Conclusions. (v) Refrence.

Scanned with CamScanner

Date

3- Appended parts.
(i) Data collection -
(ii) Detailed calculations
(iii) General Tables.
(iv) other Support material -
(v) Bibliography.

25. Bivriate table ?

Answer. Bivariate contingency table is widely used.
This table is based on cross tabulation.

26 How can we use Secondary Analysis ?

Answer. Secondary Analysis is increasingly used by researchers.
It is inexpensive.
It can permits comparison.
It facilitate Replication.

27 Refrence Formate ?

Answer. Author ⇒ Abraham Maslow -
Name Journal ⇒ international journal of psychology.
Title ⇒ Need Hierarchy theory.
Page No = 20 - 23.
Year of publish ⇒ 1946.

Scanned with CamScanner

Date

28- What is bibliography?

Answer.

① Bibliography is the list of works that are relevant to the topic of research.

② A reference list is subset of bibliography which includes details of all the citations used in the literature survey.

29 Explanatory Research?

Answer. When we encounter issues that is already known. we might begin to wonder why things are the way they are. The desire to know "why" to explain is the purpose of explanatory research. It builds upon explanatory or descriptive research.

30- Basic Research	Applied Research.
① intrinsically satisfying	R → Part of job.
(i)- Freedom	Constrained on demands
(ii)- Hi standard Applied.	of sponsors.
(iii)- Logic and rigorous	R → Quick and dirty
(iv)- Research design.	may not meet hi standard.
(v)- Basic knowledge.	Practical payoff
Success → results published impact on other scientists	Success → used by sponsors.

Date

32 Ratio scale properties-

Answer. ① Uniquely classifiers.
② Preserves order.
③ Equal intervals.
- Natural zero-
Weight and distance.

33- Problem defination-

Answer. Problem defination is clear, precise, and succinct statement of the questions or issues that is to be investigated with the goal of finding an answer or solution.

34 Report writting?

Answer
① Communicating the Research finding
② Report is technical.
③ Historical document.
④ Academic purpose

35 Advantages of E-mail surveys?

Answer. ① Speed of distribution.
② Lower distribution and processing cost.
③ More flexibility.
④ Comfortable level of Responder is high.

Date 31-8-2020

36- Data collection techniques?

Answer. Every researcher collects data using one or more techniques. Techniques may be grouped into two categories.

(i)- Quantitative. collecting data in form of Numbers-

(ii)- Qualitative -collecting data form of words or pictures.

37. Probability Non Probability

There are several ways to taking a sample

In probability Sampling	In non-probability
every element in the population has a known nonzero probability of selection. Its types are	Sampling the probability of element has been Chosen is unknown. Its types are.
① Simple Random Sample.	① Convenience Sampling
② Systematic Random Sample	② Purposive Sampling.
③ Stratified Random Sample.	③ Quota Sampling.
	④ Snowball Sampling.
	⑤ Sequential Sampling.

38 Unit of Analysis?

Answer. Unit of Analysis refers to the level of aggregation of the data collected during the subsequent data analysis stage.

Date

39- **Pilot testing?**

Answer. Pilot testing is to identify potential problems with the methods logistics and the Questionnaire. Pilot testing also called pre-testing means small scale trial run. Pilot testing involves the use of small Number of respondents to test the appropriatness of the Questions and their comprehension.

40- **Ethnography and Ethno-methodology?**

Answer. Two modern extensions of field research are :

Ethnography or Ethno methodology - build on social constructionist perspective.

Enthnography comes from cultural anthropology. Ethno means people or enthnography refers to describing something. Enthnography means describing the culture. It is understanding of culture of people from their own perispective.

Ethno-methodology implies how people create reality and how they interpet it. It examines ordinary social interaction.

Date

41. Survey interview. Field interview

① Clear start and clear end.
② Same standard Questions are asked of all respondents in the same sequence.
③ interviewers appears neutral at all times.
④ It is always with one respondent alone.

① Start and end are not clear.
② Questions are for specific people or situations.
③ interviewer shows interest in responses encourage, elaboration
④ It is like a friendly conversational exchange but with more interviewer Questio

42 Telephone interviewing ?

Answer. Telephone interview is mainstay of commercial survey research. Data collected by telephone may be comparable to that collected in personel interviews.
Benefits are. ① High speed. ② Save cost.
③ Callbacks.

43 Self Administered ?

Answer. Self - Administered Questionnaire has become ubiquitous in moder living. Self Adminstered mail Questionnair are

Scanned with CamScanner

Date

delievered not only through postal services, but also via fax and courier service.

Advantages are:-

① Geographical flexability.
② Sample Accessability.
③ Saves time.
Saves cost.

44 Role of pilot testing?

Answer. Role of pilot testing.

Pilot testing is rehearsal of your research study. Allowing you to test your research ~~your~~ with small Number of test participants.

Pilot study is small scale study. Establish the validity of research based upon the expert knowledge of other researchers.

45. Experimental Research?

Answer. Builds on the principal of positive approaches more directly than do the other researches.

Its purpose is to control the research situation so that casual relationship among variables may be

Scanned with CamScanner

Date

evaluated.

46. **Pre testing or post test?**

Answer. Pre testing is the stage in survey research when survey questions and questionnaires are tested on members of target population/study population, to evaluate the reliability and validity of the survey instruments prior to their final distribution.

A post test design is an experiment where measurements are taken both before and after a treatment.

47.

Human interactive Media.	**Electronic interactive Media.**
① Personel forms of Communication.	Allows researcher to reach the large audience.
② Human being direct a message to and interact with another individual.	Controlled by user themselves. Actively involved in 2-way communication.

Scanned with CamScanner

Date

48- Population	Target population.
① Aggregation of specified study elements. ② pool of All Available elements is called population.	Researcher wants to focus on is called target population. Also called survey population.

49 Historical data researchers evidene ?

Answer ① Primary sources.
② Secondary sources.
③ Running records.
④ Recollections.

So Purpose of FGD? formal

Answer The purpose of focus group is to obtain in-depth information on concepts
