	FINALTERM EXAMINATION FALL 2007 STA630 - RESEARCH METHODS (Session - 4)	Marks: 60 Time: 150min

StudentID/LoginID: _____

Student Name: _____

Center Name/Code: _____

Exam Date: Wednesday, March 12, 2008

Please read the following instructions carefully before attempting any question:

All questions are compulsory.

This exam consists of **15 Multiple Choice Questions** (MCQs) carrying **1** mark each; **5 True/False statements** carrying **1** mark each; **5 Fill in the Blanks** carrying **1** mark each; **5 Short Questions** carrying **5** marks each; and **1 descriptive question** –carrying **10** marks.

For each MCQ, read the available choices carefully and select the most appropriate choice which you consider is the correct answer.

To answer fill in the blanks questions, write the word which you think is the most suitable by comprehending the whole phrase. More than one answer will be marked **zero**.

Remember not to spend too much time on any one objective type question since all objective type questions carry equal marks; it is important to manage your time according to the marks allocated to each question.

Save your answer before proceeding to the next question.

Do not click the "**Finish**" button while solving your paper. Once you clicked the "Finish" button, you will not be able to access your paper again. Click it at the end of your paper. That means you have submitted your complete paper.

A clock is given in the exam software. **Software will automatically close at the end of given time.**

Use of mobile phone is strictly prohibited. Switch off your mobile phone during the exam.

Failure to comply with the Supervisor's directions will result in your test being cancelled. Please comply with supervisor's directions to avoid any unpleasant event.

For Teacher's use only

Question	21	22	23	24	25	26	27	28	29	30	

Marks										
Question	31									
Marks										

Question No: 1 (Marks: 1) - Please choose one

An experiment has high _____ if one has confidence that the experimental treatment has been the source of change in the dependent variable.

- ▶ Internal validity
- ▶ External validity
- ▶ Internal and external validity
- ▶ Internal and external reliability

Question No: 2 (Marks: 1) - Please choose one

_____ is the arbitrary and subjective.

- ▶ Probability sampling
- ▶ Non- Probability sampling
- ▶ Cluster sampling
- ▶ All of the given options

Question No: 3 (Marks: 1) - Please choose one

Which of the following is NOT included in the stages of interviewing?

- ▶ Asking questions
- ▶ Recording the responses
- ▶ Probing
- ▶ Coding the data

Question No: 4 (Marks: 1) - Please choose one

Critical decision areas in questionnaire construction are_____

- ▶ Question content
- ▶ Question wording
- ▶ Response strategy

► All of the given options

Question No: 5 (Marks: 1) - Please choose one

_____ is based on the concept of random sampling.

► Non- probability sampling

► Probability sampling

► Random sampling

► Multiple sampling

Question No: 6 (Marks: 1) - Please choose one

A sampling design in which the elements in the population do NOT have a known or predetermined chance of being selected as sample subject is:

► Convenience sampling

► Stratified sampling

► Non-Probability sampling

► Probability sampling

Question No: 7 (Marks: 1) - Please choose one

_____ is the population for which results are required.

► Finite population

► Infinite population

► Target population

► None of the given options

Question No: 8 (Marks: 1) - Please choose one

Which of the following technique yields a simple random sample?

► Choosing volunteers from an introductory psychology class to participate

► Listing the individuals by ethnic group and choosing a proportion from within each ethnic group at random

► Numbering all the elements of a sampling frame and then using a random

number table to pick cases from the table

► Randomly selecting schools, and then sampling everyone within the school

Question No: 9 (Marks: 1) - Please choose one

Which of the following designs permits a comparison of pretest scores to determine the initial equivalence of groups on the pretest before the treatment variable is introduced into the research setting.

► (a) One-group pretest-posttest design

► (b) Pretest-posttest control group design

► (c) Posttest-only design with nonequivalent groups

► Both b and c

Question No: 10 (Marks: 1) - Please choose one

Where do you provide a step-by-step account of what the researcher and participants did during the research study?

► Introduction

► Abstract

► Procedure

► Design

Question No: 11 (Marks: 1) - Please choose one

Which of the following has high response rate?

► Mail interviewing

► Telephone interviewing

► Personal interviewing

► None of the given options

Question No: 12 (Marks: 1) - Please choose one

Observation studies are also known as _____ research.

► Experimental

► Field

- ▶ Quantitative
- ▶ None of the given options

Question No: 13 (Marks: 1) - Please choose one

Open-ended questions provide primarily _____ data.

- ▶ Unprocessed data
- ▶ Qualitative data
- ▶ All of the given options
- ▶ None of the given options

Question No: 14 (Marks: 1) - Please choose one

Which one of the following is NOT a major method of data collection:

- ▶ Questionnaires
- ▶ Interviews
- ▶ Focus groups
- ▶ All of the given options are methods of data collection

Question No: 15 (Marks: 1) - Please choose one

Which of the following statement is incorrect?

- ▶ In non participant observation the observer is just an observer.
- ▶ In participant observation, the data accuracy is high.
- ▶ Participant observation is also referred to as field research.
- ▶ None of the given options

Question No: 16 (Marks: 1) - Please choose one

If the subjects are given a pretest it will not affect their performance in the posttest.

- ▶ True
- ▶ False

Question No: 17 (Marks: 1) - Please choose one

In non- reactive research the subjects do not have knowledge that they are being studied.

- ▶ True
- ▶ False

Question No: 18 (Marks: 1) - Please choose one

In experimental group the subjects do not under go any treatment; however in control group the subjects are given the treatment.

- ▶ True
- ▶ False

Question No: 19 (Marks: 1) - Please choose one

When multiple questions are asked in one question, it leads to ambiguous answers provided by the respondents.

- ▶ True
- ▶ False

Question No: 20 (Marks: 1) - Please choose one

An advantage of communication analysis is that it provides access to the inaccessible subjects.

- ▶ True
- ▶ False

Question No: 21 (Marks: 1)

Pretest is the phase when the _____variable is measured prior to the introduction of treatment.

Question No: 22 (Marks: 1)

If the percentages are calculated column wise in a table, then we will make comparison between the variables in a_____.

Question No: 23 (Marks: 1)

In order to make two identical groups for experiment, the procedures to be undertaken are randomization and _____.

Question No: 24 (Marks: 1)

The main advantage of _____questionnaire is that a wide geographical area can be covered in the survey.

Question No: 25 (Marks: 1)

A type of bias in questions occurs when they are phrased in an emotionally charged manner, they are described as _____ questions.

Question No: 26 (Marks: 5)

Make one hypothesis for each of the following types of hypotheses. (1 mark each)
i. If-then hypothesis
ii. Directional hypothesis
iii. Non directional hypothesis
iv. Null hypothesis
v. Alternative hypothesis

Question No: 27 (Marks: 5)

Which is the most powerful scale among Nominal, Ordinal, Interval and Ratio scale, and why?

Question No: 28 (Marks: 5)

A manager finds that off-the-job classroom training has a great impact on the productivity of the employees in her department. However, she also observes that employees over 60 years of age do not seem to derive much benefit and do not improve with such training.

i. Identify the independent, dependent and moderating variables in the given scenario. (3)
ii. How the moderating variable you identified in part (i) is affecting the independent-dependent variable relationship in the scenario? (2)

Question No: 29 (Marks: 5)

The accounts executive has established a new accounting system that utilizes maximum computer technology. Before making further changes, he would like to get a feel for how the accounting clerks react to the new system by acting as if he has no doubts about their acceptability of the new system. He may then casually talk to the first five accounting personnel that walk into his office, trying to gauge their reactions.
i. Describe the type of sampling the director should use in the given scenario, probability or non probability? (1)
ii. What type of sampling technique is being used and why? Explain. (2)
iii. **Give two characteristics of the type of sampling technique that you selected in part (ii). (2)**

Question No: 30 (Marks: 5)

You are doing research on "how to increase the efficiency level of labor". For the research purpose you have conducted an interview with the supervisor.

Give two structured and two unstructured questions that you may ask related to your research. (2.5+2.5)

Question No: 31 (Marks: 10)

What is meant by validity and reliability? Describe the situations in which validity and reliability problems occur.
