

CS625 current final term papers 2024

Mcqs

Circumstances that have potential to cause loss or harm is:

Threat

Which contracts are used to access some aspect of an organization and to make proposals for improvements.

Consultants

Brute force (Hackers try out all the **combination of all keyboard** Brute force letters

How to Protect Your Self from cyber-attack.

Use caution when you click link

_____ is common ethical issue on internet. **Privacy**

Accessing a computer without the authorization of the owner

Computer hacking

Intentionally entering false data or amending data into the computer. **Input frauds**

The process of attempting to gain or successfully gaining, unauthorized access to computer resources is called **hacking**.

Privacy is ethical issue on internet.

One of the main concerns associated with a period of mission critical application is? **Safety and Reliability**

Defamation is the ___ of information.

Facebook and MySpace open to people **13** and olders.

_____ are moral issues.

Plagiarism

Regression is concerned with?

rules and directions

Sudden unwanted changes in the look and execution of an application are called which type of hacking?

Software Hacking

A program that automatically detects security weakness in remote host.

Scanners

Risk Assessment is:

Assessing Potential Loss

The hardware or a processes may be protected by a **patent**.

The look of the product may be registered in the **Designs Registry**.

Information Security also known as **InfoSec**.

Product liability and the Consumer Protection Act ensures that the **manufacturer is liable for damage in product**.

One of the common factors in failure of system safety is **People**.

After acceptance of the product the warranty period is of how many days? 30 days (not sure but mostly chances)

Short

Enlist three things that can be delivered to client as a result of software contract

Contracts for the supply of custom-

- ♣ a short introductory section
- ♣ a set of standard terms and conditions
- ♣ a set of appendices or annexes

What do you think which information from following we should not share on social media websites?

1. Financial information

2. CNIC

3. Phone number

4. News articles

5. Memes and Jokes

Write the name of three fields in which computer controlled systems are used.

Nowadays, computer-controlled systems are to be found in a wide range of diverse applications such as:-

- ♣ Industry: Manufacturing systems, robots etc.
- ♣ Medicine: Intensive care monitoring, radiotherapy etc.
- ♣ Transport: Railway signaling systems, aircraft, space shuttle etc.
- ♣ Military and defense applications

Who benefits from data protection measures.

Which of the following is an exclusive and non-exclusive license from the following:

- A. A license that grants only one person the right to use the copyright. **Exclusive**
- B. A license that allows multiple people to use the copyright simultaneously. **Non-Exclusive**

4 common hacking tools

1. FTP
2. TELNET
3. Scanners

Scanners A program that automatically detects security weakness in remote host

Telnet It is terminal emulation program that allows us to connect to remote system

FTP FTP is one type of protocol but some time it is used as hacking tool, port 21 for the ftp. For connecting ftp we need some ftp s/w known as ftp client. For connecting ftp server you have to hammer that server.

Four moral issues associated with internet

rptd

Regards Ayesha Batool

Information security organisational structure two basic workers ya shayed element is tarha ka Tha kuch

Five social networking applications

1. Twitter
2. Fcaebook
3. MySpace
4. Youtube
5. Flickr

Three general categories of controls exist:

(risk mngmnt m ati h yeh)

♣ Policies ♣ Programs ♣ Technical control

The CIA: Information Security Principles:

The CIA principle ♣ Confidentiality ♣ Integrity ♣ Availability

Information Classification

1. Government classifications
2. Private Sector classifications ♣ Criteria

Computer hacking

Accessing a computer without the authorization of the owner. In this case the person accesses the computer secretly for stealing information, data or manipulation of data for diverse purpose

Types of hacking

1. Website Hacking

2. Net Hacking
3. Password Hacking
4. Software Hacking
5. Ethical Hacking
6. Email Hacking
7. Computer Hacking

What should do after hacked?

1. Shut down /Turn off the system
2. Separate the system from network
3. Restore the system with backup Or reinstall all programs
4. Connect the system to the network
5. Good to call the police

Penetration Testing Methodologies

♣ White box model White box modelbox model box model Tester is told everything about the network topology and technology and is authorized to interview IT personnel as well. Makes the job easier for him

♣ Black box Black box model Company staff does not know about the test. Tester is not given detail about the network so the burden is on the tester to find out the details. The test determines if the security personnel are able to detect an attack.

♣ Gray box Gray box model This mode of test is combination of both white and black box models. The company provides the tester with partial information about the network.

GATT related to which property rights of software product?

General Agreement on Tariffs and Trade (GATT) concerned the protection of intellectual property rights in the face of widespread piracy of software product

Factors affecting system safety:

Ø Hazard analysis

Ø Requirements and specification

- θ System Reliability and safety
- θ Design
- θ Testing and debugging
- θ Safety integrity analysis and risk assessment
- θ Documentation

Categories of computer fraud

Computer fraud is further divided into three categories

- ♣ Input frauds Input frauds e.g. intentionally entering false data or amending data into the computer
- ♣ Output frauds Output fraud involves stealing or misusing system output
- ♣ Program frauds Program frauds Program fraud involves the dishonest alteration of a computer program

Software Security

Liability and Practice

Regularity issues

Ethical hacking

Data protection

Internet and network security

Penetration testing methodologies

Info security practices

Moral Issues OF Internet

- θ Plagiarism
- θ Sending spam. People waste time deleting spam if the spam filter allows it through
- θ Companies monitoring staff use of the internet and e-mail
- θ Using someone's wireless internet connection without permission

Ø Using photo editing software to distort reality

Remedies for breach of copyright

A copyright owner has all the usual civil remedies of search, injunction, damages and an action for an account of profits made in breach of copyright

A copyright owner is also given an important power to enter premises without using force in order to seize infringing copies, or articles specifically designed or adapted for making copies

There are four types of contractual arrangement which are widely used in connection with the provision of software services:

♣ fixed price ♣ contract hire ♣ time and materials ♣ consultancy

Certification and licensing (regularity issues)

: Certification requires that either the product or the practitioner conforms to some specified standard whereas licensing means that the product cannot go on the market at all, or the practitioner operate, unless the product is licensed or the practitioner in possession of the requisite licens

Categories of misuse

Under the study of the English criminal law, the Law Commission highlighted a number of categories of misuse of computers

Ø Computer fraud

Ø Unauthorized obtaining of information from a computer

♣ Computer hacking ♣ Eavesdropping on a computer

♣ Making unauthorized use of computers for personal benefit

Ø Unauthorized alteration or destruction of information stored on a computer

Ø Denying access to an authorized user

Ø The unauthorized removal of information stored on a compute

Brute force (pass hacking m ati hyeh)

Brute force (Hackers try out all the combination of all keyboard letters)

How u protect yourself from cyber crime

How to Protect Your Self:

- θ Keep private information private
- θ Do not post address, ssn, phone number, financial info, your schedule, full birth date
- θ Be careful not to display information used to answer security questions (e.g., favorite pet, mother's maiden name)
- θ Use caution when you click links
- θ Be careful about installing extras on your site
- θ Be wary of unknown friends (strangers)
- θ Google yourself
- θ Don't blindly connect
- θ Trust your gut instinct
- θ Use and maintain anti-virus software
- θ Use strong passwords
- θ Don't use the same password for a social networking site and for your email

Four types of software services contract

1. Fixed price
2. contract hire
3. time and materials
4. consultancy

Intellectual property rights

Intellectual property rights include:

1. Confidential information
2. Patents
3. Trade marks

4. Designs
5. Copyrights protecting computer programs

Enlist five hacker Creeds.

1. Access to computers should be unlimited and total.
2. Always yield to the Hands-On Imperative
3. All information should be free.
4. Mistrust authority -- promote decentralization.
5. Hackers should be judged by their hacking.
6. You can create art and beauty on a computer.
7. Computers can change your life for the better.

Information Security Organizational Structure

Information Security Organizational Structure:

Q. Likely - Discriptive – Description

Level	Descriptor	Example of Description
1	Insignificant	No injuries, low financial loss
2	Minor	First aid treatment, onsite release immediately contained, medium financial loss
3	Moderate	Medical treatment required, onsite release contained with outside assistance, high financial loss
4	Major	Extensive injuries, loss of production capability, offsite release with no detrimental effects, major financial loss
5	Catastrophic	Death, toxic release offsite with detrimental effect, huge financial loss

Level	Descriptor	Description
A	Almost certain	Is expected to occur in most circumstances
B	Likely	Will probably occur in most circumstances
C	Possible	Might occur at some time
D	Unlikely	Could occur at some time
E	Rare	May occur only in exceptional circumstances

Best Of Luck

Remember Me In Your Prayers
