MTH104 Quiz 1 by IQRA AZHAR

Let A = {1, 2, 4}, and let R be a relation on A defined by “x divides y”, written x|y. Then _____

Select the correct option

R = { (1, 2), (1, 4), (2, 2), (2, 4), (4, 4)}

R = {(1, 1), (1, 2), (1, 4), (2, 2), (2, 4), (4, 4)

}R = {(1, 1), (1, 2), (1, 4), (2, 4)

none

R = {(1, 1), (1, 2), (1, 4), (2, 2), (2, 4), (4, 4)}

A relation R on a set A is symmetric if whenever a R b and b R c then a R c, that is, if whenever (a, b) ϵ R, and (b, c) ϵ R, then (a, c) ϵ R.

Select the correct option

Given statement is false

.Given statement is true.

Leta=2^3.5^2.7^3andb=2^5.3^4.5^6.11^2.Findlcm(a,b).

Select the correct option

None

lcm(a,b)=2^5.3^4.5^6.7^3.11^2

lcm(a,b)=2^3.5^2.3^4.73.11^2

lcm(a,b)=2^3.5^2

MTH104 Quiz 1 by IQRA AZHAR

LCM=25·34·56·73·112.

LCM(a,b)=25·34·56·73·112.

So, the correct option is:

LCM=2^5·3^4·5^6·7^3·11^2.

Given A={1,2} and B={5,6,7}, then B × A = _____

B×A
={(5,1),(5,2),(6,1),(6,2),(7,1),(7,2)}B×A={(5,1),(5,2),(6,1),(6,2),(7,1),(7,2)}.

Given the set A={0,1,2} with the relations R={(0,1), (1,0)} and S={(0,0), (2,1), (1,0)}. Then S ◦ R = _____

.Select the correct option

S ◦ R={(0,0), (0,1), (2,2)}

S ◦ R={(0,1), (1,1), (2,0)}

S∘R={(0,0),(0,1),(1,0),(2,0)}
