Psy510 midterm preparation file

ZB

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

In the name of God , Most  
Gracious, Most merciful

Psy510

**MCQS**

1. Which of the following is a key characteristic of developmental psychology?

- a) Focuses on mental illness
- b) Studies changes across the lifespan
- c) Examines only childhood behavior
- d) Focuses on neural development

Answer: b) Studies changes across the lifespan

2. Which of the following theorists is most associated with cognitive development?

- a) Sigmund Freud
- b) Jean Piaget
- c) Erik Erikson
- d) Carl Rogers

Answer: b) Jean Piaget

3. In Piaget's theory, the ability to perform operations mentally rather than physically is part of the \_\_\_\_\_ stage.

- a) Sensorimotor
- b) Preoperational
- c) Concrete operational
- d) Formal operational

Answer: c) Concrete operational

4. According to Vygotsky, learning occurs most effectively in the zone of proximal development, which is the difference between:

- a) What a child can do alone and what they can do with help
- b) A child's potential and their actual development
- c) What a child can do with peers and with adults
- d) A child's readiness to learn and their willingness to do so

Answer: a) What a child can do alone and what they can do with help

5. Erik Erikson's psychosocial stages of development emphasize the importance of:

- a) Free will
- b) Social relationships
- c) Sexual stages
- d) Cognitive structures

Answer: b) Social relationships

6. Which of the following best describes the concept of "attachment" in developmental psychology?

- a) The bond between a child and their caregivers
- b) The ability to form social groups
- c) The capacity for abstract thinking
- d) The stage when children first learn language

Answer: a) The bond between a child and their caregivers

7. In the context of learning theories, which type of reinforcement increases the likelihood of a behavior?

- a) Positive reinforcement
- b) Negative punishment
- c) Positive punishment
- d) Negative reinforcement

Answer: a) Positive reinforcement

8. Which of the following is an example of a fixed-ratio schedule in operant conditioning?

- a) Receiving a paycheck every week
- b) Receiving a reward after every 10 responses
- c) Receiving a reward after a random number of responses
- d) Receiving a reward after an unpredictable amount of time

Answer: b) Receiving a reward after every 10 responses

9. Which of the following is the primary difference between classical and operant conditioning?

- a) Classical conditioning is voluntary; operant conditioning is involuntary
- b) Classical conditioning involves association between stimuli; operant conditioning involves reinforcement or punishment
- c) Classical conditioning only occurs in animals; operant conditioning occurs in humans
- d) Classical conditioning uses reinforcement schedules, while operant conditioning does not

Answer: b) Classical conditioning involves association between stimuli; operant conditioning involves reinforcement or punishment

10. Which of the following is an example of observational learning?

- a) Learning to ride a bike through trial and error
- b) Learning by hearing instructions from a teacher
- c) Learning by watching a peer perform a task
- d) Learning through reinforcement

Answer: c) Learning by watching a peer perform a task

11. Which type of memory allows us to retain information for a short period, typically 30 seconds or less?

- a) Long-term memory
- b) Short-term memory
- c) Sensory memory
- d) Working memory

Answer: b) Short-term memory

12. The ability to recall information without cues or hints is known as:

- a) Recognition
- b) Recall
- c) Relearning
- d) Priming

Answer: b) Recall

13. Which theory of motivation focuses on the idea that individuals are motivated by the need to achieve a balance between arousal and relaxation?

- a) Drive theory
- b) Maslow's hierarchy of needs
- c) Yerkes-Dodson law
- d) Self-determination theory

Answer: c) Yerkes-Dodson law

14. According to Maslow's hierarchy of needs, the most basic human needs are:

- a) Esteem needs
- b) Physiological needs
- c) Love and belonging needs
- d) Self-actualization

Answer: b) Physiological needs

15. In terms of motivation, intrinsic motivation refers to:

- a) Performing a behavior for external rewards
- b) Performing a behavior because it is inherently satisfying
- c) Performing a behavior due to social pressure
- d) Performing a behavior to avoid punishment

Answer: b) Performing a behavior because it is inherently satisfying

16. Which of the following best describes a "fixed mindset" according to Carol Dweck?

- a) Belief that abilities can be developed through effort
- b) Belief that intelligence is static and unchangeable
- c) Belief that motivation drives achievement
- d) Belief that effort has little impact on success

Answer: b) Belief that intelligence is static and unchangeable

25. Which of the following is an example of sensory adaptation?

- a) Not noticing the smell of perfume after a few minutes
- b) Responding to a loud noise after it suddenly occurs
- c) Recognizing a familiar face in a crowd
- d) Memorizing a list of items

Answer: a) Not noticing the smell of perfume after a few minutes

26. Which of the following is an example of a primary reinforcer in operant conditioning?

- a) Praise from a teacher
- b) Money
- c) Food
- d) A sticker

Answer: c) Food

27. In terms of sleep, the stage in which vivid dreaming occurs is:

- a) NREM Stage 1
- b) NREM Stage 2
- c) NREM Stage 3
- d) REM sleep

Answer: d) REM sleep

28. Which of the following brain structures is primarily responsible for regulating emotional responses?

- a) Hippocampus
- b) Cerebellum
- c) Amygdala
- d) Medulla

Answer: c) Amygdala

21. The fundamental attribution error refers to the tendency to:

- a) Overestimate the influence of external factors on behavior
- b) Attribute others' behavior to their personality rather than situational factors
- c) Attribute our own behavior to external factors
- d) Underestimate the role of personality in shaping behavior

Answer: b) Attribute others' behavior to their personality rather than situational factors

22. The "foot-in-the-door" technique is a method of persuasion that involves:

- a) Asking for a small request to increase the likelihood of agreeing to a larger one later
- b) Asking for a large request initially, then offering a smaller one
- c) Offering incentives to encourage compliance
- d) Creating a sense of urgency to compel immediate action

Answer: a) Asking for a small request to increase the likelihood of agreeing to a larger one later

23. Which of the following is most associated with the humanistic approach to psychology?

- a) The role of unconscious motives in behavior
- b) The study of observable behaviors
- c) The idea that people are inherently good and motivated by self-actualization
- d) The focus on genetic influences on behavior

Answer: c) The idea that people are inherently good and motivated by self-actualization

24. The case of Phineas Gage, who survived a severe brain injury, contributed to our understanding of:

- a) The localization of brain function
- b) The role of the corpus callosum in communication
- c) The stages of cognitive development
- d) The relationship between brain activity and emotion

Answer: a) The localization of brain function

## Midterm preparation file

25. Which of the following is an example of sensory adaptation?

- a) Not noticing the smell of perfume after a few minutes
- b) Responding to a loud noise after it suddenly occurs
- c) Recognizing a familiar face in a crowd
- d) Memorizing a list of items

Answer: a) Not noticing the smell of perfume after a few minutes

26. Which of the following is an example of a primary reinforcer in operant conditioning?

- a) Praise from a teacher
- b) Money
- c) Food
- d) A sticker

Answer: c) Food

27. In terms of sleep, the stage in which vivid dreaming occurs is:

- a) NREM Stage 1
- b) NREM Stage 2
- c) NREM Stage 3
- d) REM sleep

Answer: d) REM sleep

28. Which of the following brain structures is primarily responsible for regulating emotional responses?

- a) Hippocampus
- b) Cerebellum
- c) Amygdala
- d) Medulla

Answer: c) Amygdala

## Midterm preparation file

30. Which of the following best defines "self-actualization" in Maslow's hierarchy of needs?

- a) The need for social relationships
- b) The desire for esteem and respect
- c) The realization of one's full potential
- d) The ability to meet basic physiological needs

Answer: c) The realization of one's full potential

31. Which type of intelligence refers to the ability to think abstractly, solve problems, and use reasoning?

- a) Crystallized intelligence
- b) Fluid intelligence
- c) Emotional intelligence
- d) Social intelligence

Answer: b) Fluid intelligence

32. According to the theory of multiple intelligences, which of the following is an example of linguistic intelligence?

- a) Solving mathematical problems
- b) Understanding emotions and feelings
- c) Using language effectively to express ideas
- d) Being able to navigate and orient in space

Answer: c) Using language effectively to express ideas

## Midterm preparation file

**33. Which of the following best describes the concept of "grit"?**

- a) A personality trait characterized by persistence and passion for long-term goals
- b) The ability to quickly adapt to changing environments
- c) A person's ability to achieve success without effort
- d) A type of intelligence that is based on hard work and motivation

**Answer: a) A personality trait characterized by persistence and passion for long-term goals**

**34. Which of the following is a primary criticism of the Stanford-Binet IQ test?**

- a) It does not account for emotional intelligence
- b) It is biased towards people from certain cultural backgrounds
- c) It only measures logical reasoning and not creativity
- d) It does not accurately measure the intelligence of young children

**Answer: b) It is biased towards people from certain cultural backgrounds**

**35. Which of the following is an example of a situational factor that can influence behavior?**

- a) Personality traits
- b) Gender
- c) Environmental conditions
- d) Intelligence

**Answer: c) Environmental conditions**

**36. Which theory of emotion suggests that physiological arousal and cognitive labeling occur simultaneously?**

- a) James-Lange theory
- b) Cannon-Bard theory
- c) Schachter-Singer theory
- d) Lazarus theory

**Answer: b) Cannon-Bard theory**

## Midterm preparation file

37. According to the James-Lange theory of emotion, emotions result from:

- a) A cognitive appraisal of a situation
- b) The physiological response to an event
- c) A simultaneous occurrence of arousal and emotion
- d) A learned response to stimuli

Answer: b) The physiological response to an event

38. Which of the following is most associated with a "groupthink" mentality?

- a) Independent decision-making and problem-solving
- b) The desire for consensus and group harmony leading to poor decisions
- c) The open and honest exchange of ideas in a group setting
- d) An increase in individual creativity and contribution in group settings

Answer: b) The desire for consensus and group harmony leading to poor decisions

39. The "fundamental attribution error" involves:

- a) Attributing one's own behavior to external factors
- b) Overestimating the impact of dispositional factors in others' behavior
- c) The tendency to make decisions based on stereotypes
- d) Assuming all people in a group behave similarly

Answer: b) Overestimating the impact of dispositional factors in others' behavior

40. Which of the following terms refers to the tendency to adjust one's behavior or beliefs to match those of others?

- a) Conformity
- b) Obedience
- c) Compliance
- d) Aggression

Answer: a) Conformity

## MCQS

## Midterm preparation file

41. In the context of social psychology, obedience refers to:

- a) Changing one's behavior to align with others
- b) Following the commands of an authority figure
- c) Giving in to peer pressure to fit in
- d) Avoiding conflict in group settings

Answer: b) Following the commands of an authority figure

42. According to Kohlberg's theory of moral development, individuals at the "conventional level" of moral reasoning focus primarily on:

- a) Avoiding punishment
- b) Upholding laws and social rules
- c) Following self-chosen ethical principles
- d) Pursuing universal ethical principles

Answer: b) Upholding laws and social rules

43. In the context of motivation, which of the following is most associated with the term "self-determination"?

- a) Pursuing goals to avoid external rewards
- b) Achieving personal growth and fulfillment through autonomy
- c) Developing motivation through extrinsic factors
- d) Achieving success through external validation

Answer: b) Achieving personal growth and fulfillment through autonomy

44. Which of the following is an example of a "representativeness heuristic"?

- a) Estimating the likelihood of an event based on its similarity to a prototype
- b) Making decisions based on the ease with which information comes to mind
- c) Choosing an option that provides immediate rewards over long-term benefits
- d) Solving a problem by trying all possible solutions

Answer: a) Estimating the likelihood of an event based on its similarity to a prototype

45. Which of the following is most likely to lead to an increase in conformity?

- a) The presence of an expert in the group
- b) An absence of group cohesion
- c) A unanimous group opinion
- d) A situation in which individuals are highly knowledgeable

Answer: c) A unanimous group opinion

46. According to Freud, the unconscious mind is primarily responsible for:

- a) Logical thinking
- b) Repressed desires and unresolved conflicts
- c) Conscious decision-making
- d) Critical thinking and problem-solving

Answer: b) Repressed desires and unresolved conflicts

**Passing criteria of this course**

| Letter Grade | Grade Points | Equivalent Percentage |
|--------------|--------------|-----------------------|
| A+           | 4.00         | 90-100                |
| A            | 4.00         | 85-89                 |
| A-           | 3.66 - 3.99  | 80-84                 |
| B+           | 3.33 - 3.65  | 75-79                 |
| B            | 3.00 - 3.32  | 71-74                 |
| B-           | 2.66 - 2.99  | 68-70                 |
| C            | 2.00 - 2.65  | 61-67                 |
| D            | 1.00 - 1.99  | 50-60                 |
| F            | 0.00         | 00-49                 |

**Passing Criteria for a Course:**

The passing criteria is defined in such a way that it ensures the student shall be consistent in his studies throughout the semester.

Therefore, for passing a course/subject, student shall fulfill the following:

- Secure minimum **20%** score in Formative Assessments/Mid terms
- Secure minimum **20%** score in Final Term Examinations.
- Secure at least **40%** marks in aggregate while fulfilling the above requirements

**Course Selection and Credit Hours**

**Q: How do I select courses when the course selection is open?**

**A: Follow these steps:**

- 1. Check the credit hours allowed by your university (e.g., 21, 18, or 15 credit hours).**
- 2. Each subject typically has 3 credit hours.**
- 3. Divide the total allowed credit hours by 3 to determine how many subjects you can select.**

**Examples:**

**21 credit hours = 7 subjects**

**15 credit hours = 5 subjects**

**Remember, the university may allow different credit hours for each student, so check your specific allowance.**

**By following these steps, you can make informed decisions during course selection and manage your credit hours effectively.**
