1. What are the precautions made in BSL2 as compared to BSL1.
2. Write biosafety measurements in TB lab?
3. Define Biosecurity ?
4. Physical Security elements?
5. Equipment used in BSL3, write 5
6. How risk can be reduced through risk management?
7. Write note on special practice in BSL2.
8. Discuss Malicious risk groups and Its Types?
9. biosecurity?
10. BSL3?
11. BSL4?
12. risk management?
13. measure required for tb lab?
14. Define immunity, innate and adaptive immunity in detail
15. Method for microbial control in detail
16. Method of microbial identifications
17. Describe transduction, conjugation transformation
18. Characteristics of aerophiles

19. bio safety?
 20. BSL2 precautions
 21. what you know about risk management?
 22. discuss transport security element.
 23. write some activities of bio safety officer.
 24. Functions of physical security?
 25. What are surveillance elements?
 26. Duties of technical committee?
 27. Immunization against pathogens?
 28. What are bio weapons, discuss its threats?
 29. What are Malicious risk groups, explain it?
 30. How risk can be reduced through risk management?
 31. What are surveillance elements?
 32. Malicious risk group
 33. Bioweapons and threat
 34. Function of technical advisory
 35. Surveillance element
 36. Immunizations of staff against pathogens
 37. Define biosecurity
 38. Biosafety rules
- 

- 39. Economical use of fungi
- 40. Difference between vertical and horizontal gene transfer
- 41. Define plasmogamy, karyogamy and meiosis
- 42. Define immunity, innate and adaptive immunity in detail
