

# ***Paper Pattern***

**Paper Pattern:** There will be 52 questions

MCQs: 40      2 Marks: 4      3 Marks: 4      5 Marks: 4

**Time Duration:** 120 minutes.

**Syllabus:** Lesson 21-42(Topics 104-209)

# ***Objectives***

## ***Compiled by Ahmad Mehboob***

Q. The shape of the lips: spread as in /i:/ vowel.

Q. sonorant's are sonorant's because they are formants

Q. Which one is the most important feature for tonal languages?

Vowel quality, intonation, pitch

Q. Waveform of nasals is \_\_\_\_\_ to waveform of vowels.

**DIFFERENCE (distinctive)**

Q. sonorants are different from vowels because they have \_\_\_\_\_ amplitude (lower)

Q. confirming the pitch of spectral slice one should ignore \_\_\_\_\_ at beginning (small spikes)

Q. Difference between F2 and F1 is related to \_\_\_\_\_ of vowels. (Backness)

Q. Assimilation is particularly studied in phonetic of Individual

Q. Which language have fixed phrase stress Japanese

Q. In Japanese all morae have approximately same duration

## ENG507 (Finals) Solved Fall2019

---

Q. Which language has no nasal vowels \_\_\_\_?

- a) English                      b) Siraiki                      c) Urdu.

Q. Nasalization is common feature of Indo Aryan languages

Q. formats structure of approximants is match with vowels

Q. IPA is the set of symbols and diacritics that have been officially approved by IPA.

Q. Nasalization diacritic is called tilde

Q. I and owe the cluster of \_\_\_\_.

- V ✓                      CV                      ccvc                      cvc

Q. Cardinal vowels produced by \_\_\_\_.

- Daniel Jones ✓                      Noam Chomsky

Q. ELT stands for (English Language Teaching)

Q. More than 3 syllables are called (trisyllabic)

Q. Which of the following sounds is represented by the symbol [t̚] (there is a diacritic mark under [t] which I am unable to type?? DENTAL STOP

Q. Which of the following symbol represents voiced alveolar tap. ɾ

Q. In source- filter theory, filter represents CAVITY.

Q. The formants that characterize different vowels are the result of the different shapes of the VOCAL TRACT.

Q. One should watch for the burst and aspiration in the STOP SOUNDS.

Q. Which of the following vowel sounds (in the given words) will be uttered with neutral lips? SET

Q. Frontness or backness of a vowel is determined by the position of TONGUE

Q. R- coloring is also termed as rhotacization.

Q. Spanish has a very simple system contrasting only FIVE vowel sounds.

Q. In English, sounds /w/ and /j/ are considered SEMI VOWELS

Q. Which of the following symbols represents labilization as a secondary gesture? [w̠]

Q. The last part of the syllable is called CODA

## ENG507 (Finals) Solved Fall2019

---

- Q. The study of the sequences of phonemes is called **PHONOTACTICS**
- Q. In syllable timed languages, all syllables tend to have a/an **EQUAL** time value.
- Q. In tonal languages, which of the following is an essential component of the pronunciation of a word? **PITCH**
- Q. In Mandarin, the word [ma] means “mother” when it is said with **HIGH PITCH**
- Q. The study of intonation is sometimes called **INTONOLOGY**
- Q. Which of the following types of phonetics is considered for specific purposes only? **INDIVIDUAL PHONETICS**
- Q. Two native speakers of a language will always speak **WITH SOME VARIATION**
- Q. The features [voiceless] and [breathy voice] are studied under the cover term ‘Laryngeal
- Q. ‘Radical’ is a cover for [pharyngeal] and [epiglottal] articulations made with the **ROOT OF THE TONGUE** of the tongue.
- Q. In the production of a plosive like [p], which of the following is not a sub-task? **CLOSE THE TEETH**
- Q. Speech is quite diverse and complex particularly when it comes to the phonetics of **INDIVIDUAL**
- Q. Phonotactically speaking, which of the following sequences of phonemes will be acceptable in English. **/bleidg/**
- Q. Which of the following words uses a seven phoneme pattern of syllable? **STRENGTHS**
- Q. PRAAT software is particularly useful for the **ACOUSTIC** analysis.
- Q. The measurements are taken from the middle of a vowel sound because it is the **NUCLEUS** portion.
- Q. F1 is inversely related to the **HEIGHT** of the vowel.
- Q. The difference between F2 and F1 is related to the **FRONTNESS** of the vowel.
- Q. Sonorant is **VOWEL** like sounds.
- Q. **Sonorant** is the sounds that basically consist of nasals and glides
- Q. Which of the following features (place of articulation) best describes the stop /p/? **BILABIAL**
- Q. Which of the following features (place of articulation) best describes the stop /g/. **GLOTTAL**

Q. The question that is mainly answered by the contrastive function of distinctive feature theory is 'how "is it different"?'?

Q. Which of the following functions of the distinctive feature theory answers the question, 'What is it'? **DESCRIPTIVE**

Q. Which of the following is considered a **GOLDEN** method of SLA? **Task Based Learning and Teaching (TBLT)**

Q. The activities of **ELTR** are planned and sponsored by British Council Pakistan

Q. English Language Teaching Reforms (ELTR) are the projects of the **Higher Education Commission (HEC)** of Pakistan

Q. in spectrograms, time runs from left to right, and the frequency of the components is shown on the **vertical** scale.

Q. Acoustics is the study of the physics of the **speech signal**

Q. One should observe gap in pattern with burst for **voiceless** and sharp formant beginning for voiced stops.

Q. Which of the following vowel is uttered by rounding lips? **/u/**

## ***(02 Marks) Questions***

Q. spectrogram help to know about bilabial sound.....2 [The most favourite of VU; V.V.IMP for 2 marks questions. They are asking about stops or bilabial or approximants.]

**Voiced** - vertical striations corresponding to the vibrations of the vocal folds

**Bilabial** - locus of both second and third formants comparatively low

**Alveolar** - locus of second formant about 1700–1800 Hz.

**Velar** - usually high locus of the second formant

**Retroflex** - general lowering of the third and fourth formants

**Stop** - gap in pattern (with burst for voiceless and sharp formant beginning for voiced stops)

**Fricative** - random noise pattern in higher frequency regions

**Nasal** - formant structure similar to that of vowels (with formants at 250, 2500, and 3250)

**Lateral** - formant structure similar to that of vowels (with formants at 250, 1200, and 2400)

Which of the following is the correct symbol for voiced bilabial fricative?

Select the correct option

|                                  |             |
|----------------------------------|-------------|
| <input checked="" type="radio"/> | [ɸ]         |
| <input type="radio"/>            | [β] correct |
| <input type="radio"/>            | [b+]        |
| <input type="radio"/>            | [p+]        |
