

Who, among the following, wrote the book "Research Methods for Business"?

- ▶ Zikmund, W.
- ▶ **Sekaran, U.**
- ▶ Dessler, G.
- ▶ Neuman, W.C.

What does an empiricist believe?

- ▶ All the knowledge that we have of life after death can be used in research.
- ▶ **Knowledge in the form of 'facts' should be gained through sensory experience.**
- ▶ Research conducted within the British Empire was biased and unreliable.
- ▶ Research should not always necessarily rely on the scientific methods.

Action research usually takes place in a single school because;

- ▶ **It is designed to answer questions about improving practice in a particular setting.**
- ▶ It is difficult to secure permission to study students in multiple schools.
- ▶ Teachers do not have the necessary skills to conduct research across multiple settings.
- ▶ Data collection methods used in action research are designed for single settings.

Which of the following is characteristic of action research?

- ▶ Variables are tightly controlled.
- ▶ Results are generalizable.

- ▶ Results demonstrate cause-and-effect relationships.
- ▶ Data are usually qualitative.

Which of the following statements is TRUE for qualitative research question?

- ▶ It asks a question about some process, or phenomenon to be explored.
- ▶ It is generally an open-ended question.
- ▶ It asks a question which may be open ended.
- ▶ It asks a closed ended question.

Which of the following is NOT an example of quantitative variable?

- ▶ Age
- ▶ Grade point average
- ▶ Gender
- ▶ Motivation

In research, something that does not “vary” is known as:

- ▶ Variable
- ▶ Method
- ▶ Constant
- ▶ Control group

The cause variable or the one that identifies forces or conditions that act on something else is known as:

- ▶ Moderating variable
- ▶ Independent variable
- ▶ Categorical variable

- ▶ Dependent variable

Which of the following statements best defines hypothesis?

- ▶ A quantitative study.
- ▶ A tentative prediction of the results of the research.
- ▶ A qualitative research design.
- ▶ The operational definition of the study.

Which of the following is the characteristic/s of Hypotheses in qualitative research studies?

- ▶ Hypotheses are very specific and stated prior to beginning the study.
- ▶ Hypotheses are never used.
- ▶ Hypotheses are often generated as the data are collected, interpreted, and analyzed.
- ▶ Hypotheses are always stated after the research study has been completed.

Hypothesis test may also be called as

- ▶ Informal test
- ▶ Moderating test
- ▶ Significance test
- ▶ t-test

Which of the following refers to "A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review"?

- ▶ Integrative review
- ▶ Theoretical review
- ▶ Self-study review
- ▶ **Historical review**

Which one of the following tasks is NOT accomplished by theoretical framework?

- ▶ Elaborate the relationship among the variables
- ▶ **Explain the logic underlying the relationship between the variables.**
- ▶ Describe the nature, and direction of the relationships among the variables.
- ▶ Relates the previous studies.

Which of the following strategies is useful when defining a particular research question?

- ▶ To clearly articulate the research question, to provide operational, definitions and ensuring its testability.
- ▶ **To clearly articulate the research question, outlining the conditions in which the** phenomena of interest are to be investigated.
- ▶ To provide operational definitions of the ideas or concepts involved in the research.
- ▶ Ensuring that their research question is empirically testable.

What should the business researcher be aware of when signing a confidentiality agreement?

- ▶ Any clause which limits the length of a questionnaire.
- ▶ Any clause which allows the company to comment on findings that will be published.

- ▶ Any clause which increases the level of access for the researcher.
- ▶ Any clause which guarantees the anonymity of research participants.

In a study of concept learning in first-graders, all of the following should happen, except;

- ▶ To help make the experience enjoyable, children should be given substantial incentives to participate.
- ▶ The children should be asked if they want to participate.
- ▶ Teachers of the children in their classes should give informed consent.
- ▶ Parents must give consent.

Which of the following is least likely to occur as an ethical problem with electronic research?

- ▶ Privacy could be invaded.
- ▶ People are not likely to be able to stop once they have begun participating.
- ▶ Debriefing could be avoided.
- ▶ Informed consent cannot be completely monitored

Quantitative research has been criticised because:

- ▶ The reliance on instruments and procedures makes it high in ecological validity.

- ▶ The measurement process suggests a spurious and artificial sense of accuracy.
- ▶ It underestimates the similarities between objects in the natural and social worlds.
- ▶ It has no validity.

Which of the following is a characteristic of a standardized test?

- ▶ The administration of the test is controlled carefully to ensure that all examinees experience the same conditions.
- ▶ The test is developed by experts to ensure it is technically sound.
- ▶ The scores are interpreted in standard ways.
- ▶ All of the given options

Mr. Latif is measuring students' attitudes on a controversial topic. Which of the following would you recommend he use to control for the potential problem of students feeling the need to respond with socially acceptable responses?

- ▶ Ensure construct validity
- ▶ Allow anonymous responses
- ▶ Ensure reliability
- ▶ Ensure confidentiality

Which of the following scales can measure the Temperature?

- ▶ Nominal scale
- ▶ Ordinal scale
- ▶ Interval scale

- ▶ All of the given options

Following are the properties of nominal scale, except;

- ▶ **Least powerful**
- ▶ Suggest no order
- ▶ Provide categorical information
- ▶ Provide magnitude of object

Which of the following is NOT the implication of Ordinal scale?

- ▶ Characteristics of nominal scale
- ▶ Rank the object
- ▶ **Does not provide magnitude of object**
- ▶ Provide rate

Which of the following statements is correct about validity and reliability?

- ▶ When internal validity is high, external validity is low
- ▶ When internal validity is high, there is no change in external validity
- ▶ **When internal validity is high, external validity is also high**
- ▶ All of the given options

When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.

- ▶ Internal
- ▶ External
- ▶ **Causal**

- ▶ Construct

Mr. Ali has conducted an extensive review of the literature and has deductively reasoned a hypothesis about his problem on the basis of this review. Which type of a research plan is Mr. Ali likely proposing?

- ▶ Qualitative
- ▶ Ethical
- ▶ Both quantitative and qualitative
- ▶ Quantitative

Which of the following is a legitimate purpose of a research plan?

- ▶ It forces you to think through every aspect of a study.
- ▶ It provides detailed procedures to guide the conduct of the study.
- ▶ It provides clear roadmap of the study.
- ▶ Writing a plan facilitates the evaluation of it.

In the statement 'Smoke badly destroys health of people' what is the unit of analysis?

- ▶ Transportation
- ▶ Individuals
- ▶ Pollutants
- ▶ Drugs

While studying supervisor-subordinate relationship in an organization, what is the unit of analysis?

- ▶ Individual

- ▶ Dyad
- ▶ Employer-employee
- ▶ Organization

Which of the following types of survey research is often used for program evaluation or accreditation purposes?

- ▶ Developmental surveys
- ▶ Followup studies
- ▶ Public opinion polls
- ▶ No survey research is appropriate

Which of the following is NOT an example of a problem with using survey research to investigate behaviour?

- ▶ Respondents tend to answer by giving the most socially desirable answer.
- ▶ Respondents may inadvertently omit key terms in the question.
- ▶ Respondents may not give an honest reply to what they see as a threatening question.
- ▶ Respondents may be unwilling to reveal information as they believe they are likely to be identified.

What should the researcher do if they have achieved a low response rate?

- ▶ Copy responses and paste them again.
- ▶ Abandon the research project entirely.
- ▶ Recognize and accept the possible limitations of a low response rate.
- ▶ Fill in some more questionnaires themselves.

Which of the following statements is correct about questionnaire?

- ▶ A questionnaire should run to at least twenty pages.
- ▶ The questions should have no spaces between them so that the whole questionnaire looks small.
- ▶ Only questionnaires that are A3 size achieve high response rates.
- ▶ Clear presentation is more important than overall size.

Critical decision area in questionnaire construction is which of the following?

- ▶ Question content
- ▶ Question wording
- ▶ Response strategy
- ▶ All of the given options

The most critical area of an article to read is;

- ▶ Introduction
- ▶ Abstract
- ▶ Results section
- ▶ Limitations

Which of the following is/are advantage(s) of the self-completed questionnaire?

- ▶ Inability to confirm who completed the questionnaire
- ▶ Its unsuitability for some kinds of respondents
- ▶ Inability to ask many questions that are not directly relevant to the respondent

- ▶ Easy to justify the answer

Time consumed in mall intercept interview is representing which of the following type?

- ▶ High
- ▶ Moderate
- ▶ Low
- ▶ Nil

Which of the following similarity is found in Qualitative research and Survey research?

- ▶ Examine topics primarily from the participants' perspectives.
- ▶ They are guided by predetermined variables to study.
- ▶ They are descriptive research methods.
- ▶ Have large sample sizes.

Which of the following represent a good qualitative problem statement?

- ▶ Defines the independent and dependent variables.
- ▶ conveys a sense of emerging design.
- ▶ Specifies a research hypothesis to be tested.
- ▶ Specifies the relationship between variables that the researcher expects

Which of the following makes research questions very crucial?

- ▶ Guide your decisions about what data to collect and from where.
- ▶ Help you decide which research area interests you.
- ▶ Ensure that your findings have external validity.
- ▶ Prevent you from thinking

Who, among the following, is the writer of Business Research Methods?

- ▶ Neuman, W.C.
- ▶ Zikmund, W.
- ▶ **Sekaran, U.**
- ▶ Dessler, G.

Which of the following is the basis of the Scientific Method?

- ▶ To test hypothesis in conditions that is conducive to its success.
- ▶ To formulate a research problem and disprove the hypothesis.
- ▶ **To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.**
- ▶ To test hypothesis and if they are disproved, they should be abandoned completely.

“Income distribution of employees” in a specific organization is an example of which type of variable?

- ▶ Discontinuous variable
- ▶ Dependent variable
- ▶ **Continuous variable**
- ▶ Independent variable

Hypothesis test may also be called as:

- ▶ Informal test
- ▶ Moderating test
- ▶ Significance test

► **t-test**

What should the business researcher be aware of when signing a confidentiality agreement?

- Any clause which limits the length of a questionnaire.
- **Any clause which allows the company to comment on findings that will be published.**
- Any clause which increases the level of access for the researcher.
- Any clause which guarantees the anonymity of research participants.

Quantitative research has been criticised because:

- The reliance on instruments and procedures makes it high in ecological validity.
- **The measurement process suggests a spurious and artificial sense of accuracy.**
- It underestimates the similarities between objects in the natural and social worlds.
- It has no validity.
- The measurement process suggests a spurious and artificial sense of accuracy.

Which of the following BEST describes an assessment that examines students' ability to conduct a chemistry experiment in the lab?

- Aptitude
- Interest inventory

► **Performance assessment**

- Standardized test
- Aptitude

One of the preoccupations of quantitative researchers is with generalization, which is a sign of:

► **External validity**

- Internal reliability
- External reliability
- Internal validity

A study design in which the researcher might create _____ to establish cause-and-effect relationship is called Experimental Design.

► **An artificial setting, control some variables and manipulates the independent variable**

- A natural setting, control some variables and manipulates the dependent variables
- An artificial setting, control some variables and manipulates the dependent variable
- All of the given options
- An artificial setting, control some variables and manipulates the independent variable

Which of the following types of survey research is often used for program evaluation or accreditation purposes?

- ▶ Developmental surveys
- ▶ **Followup studies**
- ▶ Public opinion polls
- ▶ No survey research is appropriate

What should the researcher do if they have achieved a low response rate?

- ▶ Copy responses and paste them again.
- ▶ Abandon the research project entirely.
- ▶ **Recognize and accept the possible limitations of a low response rate.**
- ▶ Fill in some more questionnaires themselves.

Which of the following characteristic of the scientific method is defined as the confirmation or refutation of the observation through the scientific method by using sensory experience?

- ▶ **Empirical**
- ▶ Verifiable
- ▶ Observable
- ▶ Cumulative

Which of the following study requires the collection of data at one point in time from a large number of respondents?

- ▶ Case study
- ▶ **Cross-sectional study**
- ▶ All of the given options
- ▶ Longitudinal study

Basic research can also be called as

- ▶ Practical research
- ▶ **Fundamental Research**
- ▶ Action research
- ▶ Assessment research

Methodological reviews can be best explained as:

▶ **Evaluation of the previous research methodologies used by the researchers**

- ▶ Assessment of the models built by the previous researchers
- ▶ Reviewing the review in the systematic manner
- ▶ Studying the specific context under study
- ▶ Evaluation of the previous research methodologies used by the

researchers

The review that presents the current state of knowledge by combining different reports is called:

- ▶ Self study review
- ▶ Theoretical review
- ▶ Systematic review
- ▶ **Integrative review**

The best method to narrow down a topic is to:

- ▶ Develop theoretical framework
- ▶ **Review literature**

- ▶ Test a hypothesis
- ▶ Conduct a survey

Why should we study research for our degree requirement?

- ▶ Because we live in a society that is driven by research.
- ▶ To improve our critical thinking skills.
- ▶ To learn how to critically evaluate published research.
- ▶ **All of the given options**

Different factors affect the outcome of survey. In a study using a self completion questionnaire, which of the following would probably NOT affect the outcome?

- ▶ **Interviewer training**
- ▶ Sample size
- ▶ Incentive quality
- ▶ Question wording
- ▶ Interviewer training

The response rate of the internet survey can be increased due to:

- ▶ Personality of the researcher
- ▶ **Maximum number of the questions 76 page**
- ▶ Sponsoring agency
- ▶ All of the given options
- ▶ Maximum number of the questions

Questions:

Question No: 1 (Marks: 3)

What is the primary difference between test/retest and internal consistency?

Question No: 2 (Marks: 5)

Researchers interviewed a group of people in a specific room. They were told that only their interaction with each other and their point of views on a specific issue are being studied but in fact high frequency sound waves were passed through that room and their effect on human behavior was being observed.

Answer the following questions:

Is it an act of deception? Give reason for your choice.

Do you think it was necessary to deceive the respondent in this experiment?

What can the researcher do after the completion of research to rectify the damage done to the respondents?

Question No: 3 (Marks: 5)

What is personal interviewing, how it can be conducted and at which places?

Question No: 4 (Marks: 3)

How would you differentiate between History Effect and Mechanical Loss in Experimental research?

Question No: 5 (Marks: 5)

Write a note on any three varieties of non reactive observations.

Question No: 6 (Marks: 5)

Defend the use of the term inductive to describe qualitative data analysis and interpretation.

Question No: 7 (Marks: 5)

Briefly discuss the Solomon s Four Group Design in experimental research with the help of example?

Question No: 8 (Marks: 5)

Involvement with deviants is the Ethical dilemma of field Research how would explain (Marks 3) Page 140
