EDU601 – Final Term Past Papers File by Tanveer Online Academy

(Subjective)

Question: What was Maria Montessori known for?

Answer: Maria Montessori was known for developing the Montessori method of education, which emphasizes **self-directed learning, hands-on activities, and fostering independence in children**.

Question: What was Karl Jaspers' idea about universities?

Answer: Karl Jaspers believed that universities should focus on **developing free thinkers, promoting critical inquiry, and encouraging the search for truth** rather than simply training for jobs.

Question: Gardner's theory and unschooling?

Answer: Howard Gardner's theory of multiple intelligences suggests that people have different types of intelligences (e.g., linguistic, logical, musical). **Unschooling** promotes learning based on a child's interests, which aligns with Gardner's emphasis on individualized learning.

Question: Difference between fantasy, creativity, and imagination?

Answer: **Fantasy** involves creating unreal scenarios, **creativity** is the ability to generate novel ideas, and **imagination** is the capacity to visualize things not present.

Question: Homeschooling laws in Pakistan?

Answer: Homeschooling is not legally regulated in Pakistan, and there is no formal **government structure or laws** to guide or monitor homeschooling practices.

Question: Forms of democracy?

Answer: Major forms of democracy include **direct democracy, representative democracy, and participatory democracy**.

Question: Types of learners, Scholastic learner?

Answer: Scholastic learners are primarily focused on **academic achievement and formal education**, often excelling in traditional school settings.

Question: Qualification of parents for homeschooling?

Answer: While specific qualifications for homeschooling parents are not widely regulated, it is generally recommended that parents have **basic teaching skills, an understanding of child development, and a willingness to engage in continuous learning**.

Question: Scholarist learner?

Answer: A **scholarist learner** focuses on traditional, structured learning environments and academic achievement, emphasizing study, reading, and testing.

Question: Maria Montessori's importance in teacher training?

Answer: Montessori's methods emphasized the importance of **observing, guiding, and facilitating children's learning**, rather than direct instruction, which has shaped modern teacher training.

Question: Bloom's views on democratic education?

Answer: Bloom believed that **democratic education should foster critical thinking, individual autonomy, and self-direction in learning**, empowering students to become informed citizens.

Question: What is a miniature school?

Answer: A miniature school is a **smaller, often experimental, educational environment** that replicates the structure of a traditional school but in a more compact or alternative format.

Question: Difference between intuitive, traditional, and expert learners?

Answer: **Intuitive learners** rely on gut feelings, **traditional learners** follow established methods, and **expert learners** use advanced skills and knowledge to solve problems.

Question: Criticism of classical education?

Answer: Classical education has been criticized for being **too rigid, focusing too much on rote memorization, and not accommodating diverse learning styles**.

Question: Sensory-motor development stage of Piaget (5 points)?

Answer: In Piaget's sensory-motor stage, children develop **object permanence, understanding cause and effect, coordination of sensory and motor activities, imitation, and early problem-solving skills**.

Question: Define exchange?

Answer: In education, exchange refers to the **transfer of ideas, knowledge, or resources between individuals or groups**.

Question: Difference between formal and informal learning in homeschooling?

Answer: Formal learning involves structured, curriculum-based education, while **informal learning** is more flexible, often based on everyday activities or interests in homeschooling.

Question: Principal of pragmatism?

Answer: The principle of pragmatism in education suggests that **learning should be based on practical experiences, problem-solving, and real-world application**.

Question: What should the qualification in homeschooling be?

Answer: Ideally, homeschooling parents should have a **basic understanding of child development, teaching skills, and knowledge of the subjects they are teaching**.

Question: Principle of Jaspers?

Answer: Karl Jaspers emphasized that **education should promote free thought, intellectual curiosity, and self-reflection**, fostering students' ability to think critically.

Question: Define learning by progressivism?

Answer: Learning by progressivism focuses on **student-centered learning, where education is shaped by the needs, interests, and experiences of students**, rather than a fixed curriculum.

Question: Define liberal education by Bloom?

Answer: Bloom's liberal education emphasizes **developing critical thinking, intellectual skills, and a broad understanding of human knowledge** rather than simply vocational or technical training.

Question: Six principles of progressivism?

Answer: The six principles include **learning through experience, student-centered teaching, integration of subject matter, critical thinking, social responsibility, and active participation**.

Question: Define home schooling?

Answer: Homeschooling is the practice of educating children at home rather than in a traditional school setting, often driven by parents' preferences for personalized education.

Question: What is deep democracy?

Answer: Deep democracy emphasizes the importance of **inclusive decision-making, where all voices are heard and valued**, especially in educational or social settings.

Question: Mathematical learner?

Answer: A mathematical learner excels in **logical reasoning, problem-solving, and working with numbers**.

Question: Skill learner?

Answer: A skill learner focuses on acquiring **practical abilities and hands-on experiences** in various areas.

Question: Nature of knowledge in Jaspers?

Answer: Jaspers believed that knowledge is not just **factual, but deeply philosophical, existential, and transformative**, emphasizing critical reflection.

Question: Criticism of Bagley?

Answer: Bagley's educational philosophy has been criticized for being **too focused on traditional values and methods, and not sufficiently adaptable to modern educational needs**.

Question: Maria Montessori in curriculum?

Answer: Maria Montessori's approach in the curriculum emphasizes **child-centered**

learning, hands-on activities, independence, and fostering a love for learning through self-directed exploration.

Question: Criticism of Bloom?

Answer: Bloom's taxonomy has been criticized for being too **linear, focusing too much on cognitive development and neglecting emotional or social aspects of learning**.

Question: Traditional and expert learner (five reasons on nature of knowledge)?

Answer: Traditional learners rely on established methods, while expert learners apply advanced knowledge. **Nature of knowledge** for traditional learners is often structured and fixed, while for expert learners it is **adaptable, complex, and problem-solving based**.

Question: Sandpaper used by Montessori?

Answer: Montessori sandpaper is used in **sensory activities** to help children learn through **touch and visual recognition**, often in learning letters or shapes.

Question: Exchange learning?

Answer: Exchange learning refers to the **reciprocal transfer of knowledge and skills** between two or more people, allowing them to learn from each other.

Question: Mathematical learner?

Answer: A mathematical learner is someone who excels in **logical reasoning, patterns, and problem-solving** using mathematical concepts.

Question: Rational method in your own words?

Answer: The rational method involves **logical reasoning and critical thinking** to solve problems, using evidence and structured approaches.

Question: Law of homeschooling in Pakistan?

Answer: Homeschooling in Pakistan lacks **formal legal regulation**, although it is **informally practiced** by many families with no formal laws guiding it.

Question: Maieutic education?

Answer: Maieutic education, based on Socratic methods, involves **asking guiding questions** to help learners discover knowledge on their own, fostering critical thinking.

Question: Criticism of classical education?

Answer: Classical education has been criticized for being **too rigid, focusing on memorization, and not accommodating diverse learning styles or real-world skills**.

Question: Three types of democracy?

Answer: The three types of democracy include **direct democracy, representative democracy, and participatory democracy**.

Question: Sports in Do-er?

Answer: The "Do-er" concept in education implies that **sports engage students actively in physical learning, teamwork, and discipline**, encouraging a hands-on approach.

Question: Aims of sensory materials?

Answer: The aims of sensory materials are to enhance **children's sensory experiences, improve focus, develop fine motor skills, and encourage exploration**.

Question: Teachers of essentialism?

Answer: Teachers following essentialism focus on **core subjects, structured lessons, and the transmission of essential knowledge and skills**, often in traditional settings.

Question: Criticism of Bagley?

Answer: Bagley's emphasis on **traditional, rigid curricula** and **teacher-centered instruction** has been criticized for lacking flexibility and adaptability in modern education.

Question: Difference between formal and informal homeschooling?

Answer: Formal homeschooling follows a structured curriculum with set schedules and assessments, while **informal homeschooling** is more flexible and may focus on real-life learning experiences.

Question: Popular democracy?

Answer: Popular democracy refers to a system where **citizens actively participate in decision-making**, either directly or through elected representatives.

Question: Transactional model?

Answer: The transactional model is an approach where **communication and learning occur through mutual exchange** between teacher and learner, emphasizing interaction and feedback.

Question: Referent power?

Answer: Referent power is the **influence a person has over others because of their admired qualities, charisma, or personal traits**.

Question: How TQM is important for continuous organizational improvements?

Answer: Total Quality Management (TQM) ensures **continuous improvement by involving all members of an organization in the process of enhancing quality, efficiency, and customer satisfaction**.

Question: Types of conflicts?

Answer: Types of conflicts include **interpersonal, intrapersonal, organizational, and task-related conflicts**.

Question: Team stages?

Answer: The stages of team development are **forming, storming, norming, performing, and adjourning**.

Question: Why is reward important?

Answer: Rewards are important because they **motivate individuals, reinforce positive behavior, and acknowledge accomplishments**.

Question: Explain rubric and its elements?

Answer: A rubric is a tool used for **assessing students' work based on predefined criteria**, often including **categories like quality, clarity, and completeness**.

Question: Limitations of multiple choice questions?

Answer: Multiple choice questions may limit **critical thinking, encourage guessing, and may not fully assess complex concepts or higher-order thinking**.

Question: Why restricted response type is better than selection type?

Answer: Restricted response types require students to **generate specific, thoughtful answers**, reducing guesswork compared to selection types.

Question: Write item in CCT?

Answer: CCT (Critical Thinking Test) items usually ask students to **analyze, evaluate, or infer conclusions** based on given information.

Question: Issues in test administration?

Answer: Issues in test administration can include **bias, unclear instructions, technical problems, and fairness in accommodations**.

Question: Define achievement test briefly?

Answer: An achievement test measures **how well a student has learned specific skills or knowledge** within a certain time period.

Question: Five characteristics of achievement test?

Answer: Characteristics include **validity, reliability, clarity, fairness, and relevance** to the curriculum.

Question: Five rules of alternative-type questions?

Answer: Rules include **clarity of question, focus on one concept, appropriate difficulty, unbiased language, and relevance to objectives**.

Question: Maria Montessori sandpaper?

Answer: Montessori sandpaper is used for **sensory learning, especially for tracing letters and numbers**, helping children to learn through touch and sight.

Question: Three characteristics of skilled learners?

Answer: Skilled learners are **independent, resourceful, and effective at problem-solving**.

Question: Qualifications of parents according to homeschooling laws?

Answer: While Pakistan has no strict laws on homeschooling, parents are expected to have **basic teaching knowledge and an understanding of child development**.

Question: Teacher-centered classroom proposed by perennialists?

Answer: In a **teacher-centered classroom**, teachers are seen as the main authority, focusing on the transmission of universal knowledge and timeless truths.

Question: Define progressivism in your words?

Answer: Progressivism in education emphasizes **student-centered learning, problem-solving, and critical thinking**, focusing on adapting education to the needs and interests of learners.

Question: Write three points on understanding of quadrivium?

Answer: The quadrivium, in classical education, includes **arithmetic, geometry, music, and astronomy**, offering a well-rounded education that develops analytical and logical thinking.

Question: Views of Jasper on democratic education?

Answer: Karl Jaspers believed that **democratic education should foster critical thinking, open dialogue, and a sense of responsibility**, encouraging students to engage in society's challenges.

Question: Role of teacher according to essentialists?

Answer: Essentialists view the teacher as a **primary source of knowledge**, focusing on teaching core subjects and ensuring mastery of fundamental academic skills.

Question: What is classical education and its trivium and quadrivium?

Answer: Classical education includes the **trivium (grammar, logic, rhetoric)** and **quadrivium (arithmetic, geometry, music, astronomy)**, emphasizing a rigorous, well-rounded curriculum rooted in ancient traditions.

Question: Law of education in Pakistan of homeschooling?

Answer: Pakistan currently has no specific **homeschooling laws**, though homeschooling is practiced informally, and parents are encouraged to meet educational standards for their children.

Question: Maria's view on social justice in the classroom?

Answer: Maria Montessori advocated for **inclusive education**, ensuring that all children, regardless of background, have access to **respectful, individualized learning** and opportunities for growth.

Question: What should be the role of the teacher according to Piaget?

Answer: Piaget believed teachers should act as **guides, facilitating active learning** and exploration based on the student's developmental stage, allowing for discovery and self-directed learning.

Question: Stages of trivium?

Answer: The trivium includes three stages: **Grammar (learning the basics), Logic (understanding relationships and reasoning), and Rhetoric (expressing ideas effectively)**.

Question: Skilled learner?

Answer: A skilled learner is **independent, resourceful, and adaptable**, able to apply knowledge effectively in various situations.

Question: Popular democracy?

Answer: Popular democracy is a form of democracy where **citizens are directly involved** in decision-making, often through voting and active participation.

Question: Difference between intuitive, traditional, and expert learner?

Answer: Intuitive learners rely on gut feeling, traditional learners follow set methods, and expert learners apply deep knowledge and advanced strategies to problem-solving.

Question: What is implementation of teacher according to essentialists?

Answer: Essentialists believe teachers should **deliver structured lessons** based on essential knowledge and ensure mastery of core academic subjects through traditional methods.

Question: Bloom criticism?

Answer: Bloom's taxonomy has been criticized for being too **linear** and **cognitive-focused**, not addressing social or emotional development adequately.

Question: Miniature school?

Answer: A miniature school refers to **small-scale, experimental education settings** that aim to create more personalized and innovative learning environments.

Question: Write 3 characteristics of skilled learner?

Answer: A skilled learner is **self-motivated, critical thinker, and effective problem solver**, able to navigate complex learning tasks with autonomy.

Question: Bloom's view on democratic education?

Answer: Bloom emphasized that democratic education should promote **higher-order thinking skills** like analysis, evaluation, and synthesis, preparing students for active civic participation.

Question: Learning process by progressivist?

Answer: Progressivist learning is **inquiry-based, hands-on, and experiential**, encouraging students to actively engage with material through exploration and critical thinking.

Question: Difference between imagination, fantasy, and creativity?

Answer: **Imagination** is the ability to form ideas without immediate reality; **fantasy** is unreal and often disconnected from reality, while **creativity** involves using imagination to produce original, useful ideas.

Question: Sensorial Education and its aims?

Answer: Sensorial education in Montessori focuses on developing **children's sensory perceptions** (sight, touch, hearing, etc.) to help them better understand and engage with their world.

Question: Write a note on Free School?

Answer: Free Schools offer **child-centered education**, often allowing students to choose what and how they learn, promoting independence and self-directed learning.

Question: Characteristics of Allen Bloom's philosophy?

Answer: Bloom's philosophy stresses the **importance of classical education**, the study of **great texts**, and the development of **critical thinking and cultural understanding**.

Question: Progressive definition?

Answer: Progressive education focuses on **student-centered learning, inquiry, and experiential activities**, preparing students for active participation in democratic society.

Question: Democratic education criticism?

Answer: Critics argue democratic education can be **too idealistic, may lack structure**, and may not adequately prepare students for real-world challenges or responsibilities.

Question: Home schooling formal approach?

Answer: A formal approach to homeschooling follows a structured curriculum, with **set standards, assessments**, and **curricular objectives** that ensure academic progress.

Question: Scholastic learner?

Answer: A scholastic learner excels in **academic tasks, valuing structured learning, memorization**, and systematic study habits.

Question: Casa dei Bambini?

Answer: Casa dei Bambini, founded by Maria Montessori, was the first **Montessori school**, focusing on **hands-on learning, independence, and respect for the child's natural development**.

Question: How sandpaper letters used by Maria?

Answer: Montessori's sandpaper letters are used to **teach children the shapes and sounds of letters** through touch, reinforcing learning through sensory experience.

Question: Imagination, fantasy, and creativity?

Answer: Imagination involves **mental creation**, fantasy is a form of **unreal thought**, and creativity is the ability to **bring imagination into real-world application**.

Question: Homeschooling political environment?

Answer: The political environment for homeschooling varies by region, often reflecting the **regulatory standards and acceptance of non-traditional education methods**.

Question: Intuitive, traditional, expert learning?

Answer: Intuitive learners rely on instincts, traditional learners follow established methods, while expert learners use **advanced strategies** to process information deeply.

Question: Maria Montessori intro?

Answer: Maria Montessori was an Italian educator who developed the **Montessori method**, emphasizing child-led learning, hands-on activities, and respect for children's natural curiosity.

Question: Culture of evolution?

Answer: The culture of evolution refers to an **ongoing process of change** in educational methods, adapting to new research and societal shifts, particularly focusing on **student development**.

Question: Bloom's recommendations?

Answer: Bloom recommended that education should focus on **higher-order thinking** skills, such as analysis, evaluation, and synthesis, rather than mere recall.

Question: Learning exchange?

Answer: Learning exchange refers to the **reciprocal sharing of knowledge** between students, teachers, or institutions, often fostering deeper understanding and collaboration.

Question: Criticism on curriculum?

Answer: Criticism of curriculum often focuses on its **rigidity**, **lack of adaptability to student needs**, and the tendency to prioritize **standardized testing** over creativity and critical thinking.

Question: Homeschooling me parental education?

Answer: For homeschooling, parents should have at least **basic educational qualifications** and a good understanding of **curriculum design** to support their children's learning effectively.

Question: How Maria Montessori used Sandpaper for learning?

Answer: Maria Montessori used **sandpaper letters** to teach children the **shapes and sounds of letters** by letting them trace the textured letters, combining tactile and auditory learning.

Question: Sensorial Education and its aims?

Answer: Sensorial education in Montessori focuses on developing children's **senses (touch, sight, sound, taste, and smell)** to enhance their perception and understanding of the world around them.

Question: Explain logic in classical education?

Answer: Logic in classical education, particularly the **trivium**, emphasizes the study of **reasoning**, focusing on understanding relationships, making inferences, and constructing arguments logically.

Question: What are three forms of democracy?

Answer: The three main forms of democracy are **direct democracy** (citizens vote on laws), **representative democracy** (elected officials represent the people), and **participatory democracy** (citizens are involved in decision-making).

Question: Write any five aims of classical education?

Answer: Classical education aims to develop **critical thinking**, **moral understanding**, **knowledge of classical texts**, **rhetorical skills**, and **logical reasoning**.

Question: Write points on concrete operational development by Piaget?

Answer: In Piaget's concrete operational stage (7-11 years), children develop the ability to **think logically**, understand **cause and effect**, and grasp the concept of **conservation** (e.g., quantity remains the same even if appearance changes).

Question: The Formal Approach?

Answer: The formal approach in education involves structured, **systematic instruction**, often emphasizing **set curricula**, **rigorous assessments**, and **standardized methods** of teaching.

Question: Evolution of culture?

Answer: The evolution of culture refers to the **gradual change** and development of societies, influenced by **technology, communication, and educational systems** that adapt to new challenges and discoveries.

Question: Progressivist theory?

Answer: Progressivist theory in education focuses on **student-centered learning**, where students actively engage in problem-solving and exploration, rather than rote memorization.

Question: Education law in Pakistan?

Answer: Education law in Pakistan emphasizes the **right to education**, with the government ensuring **free and compulsory education** for children up to a certain age, while homeschooling lacks clear regulations.

Question: Idea of university by Jasper?

Answer: Karl Jaspers envisioned the university as a **place for critical reflection and dialogue**, promoting **independent thinking** and intellectual growth, rather than simply vocational training.

Question: 5 points of classical education?

Answer: Classical education focuses on:

1. Studying classical languages (Latin, Greek)

2. Critical thinking and logical reasoning
3. Moral and ethical development
4. Rhetorical skills and communication
5. Historical and cultural literacy.

Question: Key points in Montessori?

Answer: Key points in Montessori education include **independent learning, hands-on activities, respect for the child**, and an environment that promotes **self-discipline and exploration**.

Question: Types of learners?

Answer: Types of learners include:

1. **Visual learners** (learn best with visual aids),
2. **Auditory learners** (learn best through listening),
3. **Kinesthetic learners** (learn best through movement and touch).

Question: Quadrivium?

Answer: The quadrivium consists of **four subjects**: arithmetic, geometry, music, and astronomy, traditionally studied after mastering the trivium in classical education.

Question: Progressivism?

Answer: Progressivism is a student-centered approach that encourages **active learning**, critical thinking, and problem-solving, with an emphasis on **real-life applications** of knowledge.

Question: Role of teacher according to Jasper?

Answer: According to Jaspers, the teacher's role is to **facilitate intellectual growth**,

encourage **critical inquiry**, and foster **independent thinking**, rather than merely transmitting knowledge.

Question: Why democracy is necessary for education?

Answer: Democracy in education is essential as it promotes **equality, participation, and respect for diverse perspectives**, preparing students for **active citizenship** and a participatory society.

Question: Scholastic learner?

Answer: A scholastic learner thrives in **structured, academic environments**, valuing **memorization, discipline**, and **systematic study methods**.

Question: Allan Bloom characteristics?

Answer: Allan Bloom's philosophy emphasized **classical education**, the study of **great books**, and the development of **intellectual rigor** and **cultural understanding**.

Question: Interpersonal and intrapersonal learner?

Answer: Interpersonal learners excel in **social interactions** and understanding others, while intrapersonal learners have strong **self-awareness** and emotional intelligence.

Question: Intuitive, expert, traditional learner?

Answer: Intuitive learners rely on **gut feelings**, traditional learners follow **set methods**, and expert learners apply **advanced knowledge and strategies** to complex problems.
