# EDU654 Quiz 1 File by Tanveer Online Academy

| | |
|---|---|
| In which country of the world the most recommended book in high school is Conceptual Physics? | United States |
| A well-defined collection of distinct objects is called: | Set |
| The word “teacher” is derived from the word “teacan” which means _____ | To show |
| Discovery-based learning is___. | student-centered |
| _____ are a very powerful support for thinking. | Images |
| Comparing Pakistani and International books on probability, _____ book has no diagrams. | Baluchistan Board book |
| A concept taught to the students is only meaningful when _____ | Related to rote learning |
| Which of the following concept was given by James E Zull? | Understanding the brain function |
| When preparing for problem-based instruction, the teacher would be least concerned with: | preparing answers to the problem situation. |
| Metacognition is not important for: | Rote learning |
| Paul Zieth has identified --------- steps to problem solving in his book "The Art and Craft of problem solving" | 4 |
| Following is an example of a set except: | Multiplication of Ali and Nariman’s toys with their friends |
| Discovery based learning has a direct link with the theory of ----------. | Constructivism |
| Comparing Pakistani and International books on probability, _____ book has 50 diagrams. | Harvard book |
| There are _____ levels of learning outcomes. | Three |
| In the problem-based learning model, the teacher: | presents situations. |
| The classroom environment that is most conducive for successful problem-based instruction is: | moderately structured and student centered. |
| Logic and deduction are included in --------. | Mental process |
| An outstanding lecture must comprise of the following except: | Boring |

| | |
|---|---|
| **Which is considered as one of the best practice for teaching programming?** | **Pair** |
| **Set is defined as:** | **any well-defined collection or list of distinct objects** |
| **There are ------- stages of Poly's method.** | **Four** |
| **Without reflection, learning is only -------.** | **Activity** |
| **Discrete mathematics does not involve ------- and -------.** | **Calculus, analytical** |
| **Discovery-based learning is characterized by _____.** | **an emphasis on investigation of real-life situations** |
| **Which of the following concept was given by Marvin Winsky in his book The Emotion Machine?** | **Artificial intelligence** |
| **In Punjab textbook, following are present EXCEPT:** | **Use of visual tools** |
| **What does discovery-based learning build on?** | **Intuition** |
| **The teacher must keep in mind when posing a problem all points except:** | **Move from complex to simple** |
| **The problem-based learning model has all of the following features except:** | **highly structured learning environment.** |
| **The concept of sets was included first time in 1967 in ----- syllabus.** | **FSC** |
| **"Teacher is a _____ word.** | **Latin** |
| **The time consumed in ------ learning is worthwhile.** | **Discovery** |
| **Which of the following is the first step of problem solving according to Paul Zeitz?** | **Strategy level** |
| **Addition of two sets is find out by applying the:** | **Union** |
| **Which of the following are the physical components of computer hardware?** | **Keyboard and Mouse** |
| **With which of the following process,teachers are closely associeted?** | **Learning** |
| **Which type of student's ability is assessed by the following question: What is CPU?** | **Cramming** |
| **Kinesthetic learners learn best** | **By doing** |
| **Which one of the following is the strongest indicators of how well students will learn new information?** | **Prior knowledge** |
| **Which theory of learning is associated with mental processes?** | **Cognitivism** |
| **The purpose of teaching is to facilitate:** | **Learning** |
| **Learning styles** | **are unique to the individual.** |
| **Which concept from the following was developed by Polya in his book?** | **Plan to solve the problem** |

| | |
|---|---|
| **Meaningful learning comes from contradiction,resolution and:** | **Understanding** |
| **Which option from the following is the art of teaching?** | **Pedagogy** |
| **Set is defined as:** | **any well-defined collection or list of distinct objects** |
| **Kinematics is concerned with** | **describing the movement of objects** |
| | |
| **What is the historical focus of teacher education?** | **Content knowledge** |
| **What does TPACK stands for?** | **Technological Pedagogical Content Knowledge** |
| **Which of the following concept was given by Marvin Winsky in his book The Emotion Machine?** | **Artificial intelligence** |
| **Learning is:** | **Self active** |
| **When preparing for problem-based instruction, the teacher would be least concerned with:** | **preparing answers to the problem situation.** |
| **Which of the following is considered as an example of Modern Classroom?** | **Technology** |
| **Logic and deduction are included in --------.** | **Mental process** |
| **The lecture will be communicated more effectively if teachers** | **prepares good notes in advance and use them as their guides** |
| **The statements of learning achievements are called as:** | **Learning outcomes** |
| **Discovery based learning is ----------.** | **Student centered** |
| **The degree of success a teacher has in using technology for instruction is mostly dependent on:** | **The teacher's ability** |
| **In discovery-based learning, the teacher's role is most similar to the teacher's role in _____.** | **Discussion** |
| **What does discovery-based learning build on?** | **Intuition** |
| **Which of the following involves the concept of velocity, displacement and acceleration?** | **Kinematics** |
| **In the problem-based learning model, the teacher:** | **presents situations.** |
| **Who sayings are these, "A major goal of this research was to understand the relationships between two key domains: teacher thought processes; and teachers' actions and their observable effects on learners."** | **Mishra and Koehler's** |
| **How many stages of Poly's method are there?** | **4** |
| **Discovery based learning has a direct link with the theory of ----------.** | **Constructivism** |
| **Which theory argues that humans generate knowledge and meaning from an interaction between their experiences and their ideas?** | **Constructivism** |
| **What should a teacher do to investigate the level of student's understanding at the end of a lesson?** | **Pose a question** |

| | |
|---|---|
| **Which of the following is an educational philosophy which holds that learners ultimately construct their own knowledge?** | **Constructivism** |
| **Which of the following is computer hardware?** | **Processor** |
| **The aim of a teacher is:** | **to develop the abilities of students** |
| **From the following options which helps a person to make sense of the world?** | **Prior knowledge** |
| **Which of the following is a design and it requires inputs and some outputs?** | **Process** |
| **From the given below which is most suitable for the study of human behavior?** | **Psychology** |
| **Which theory assumes that a learner is essentially passive, responding to environmental stimuli?** | **Behaviorism** |
| **Successful educational practices evolve from the application of which of the following methods?** | **Scientific** |
| **It is important to test which of the following knowledge of the students?** | **Prior** |
| **The problem-based learning model has all of the following features except:** | **production of artifacts.** |
| **The shortest distance between two points is known as** | **Displacement** |
| **How many stages of Bloom's Taxannomy are there?** | **6** |
| **Which approach can only be used for online learning?** | **Constructivist** |
| **Which statement in NOT True for the Pedagogy?** | **It is a static process.** |
| **Which of the following expectations students have from group learning?** | **To distribute the work equally** |
| **Rate of change of velocity is called** | **Acceleration** |
| **What should be the aim of a teacher when he or she enters a classroom?** | **Bring Change** |
| **What type of classroom environment is required from the teacher in recent times?** | **Personalized learning** |
| **Computer system consists of:** | **Hardware and software** |
| **Which option from the following is related to the subject matter?** | **Content knowledge** |
| **Why will you ask questions from students during the course of a lecture?** | **To learn whether students are understanding (the lecture) or not** |
| **The average velocity and the instantaneous velocity of an object will be the same if:** | **the object's acceleration is zero** |
| **An explanation for why something occurs or how it occurs is called:** | **Theory** |
| **How many stages of Poly's method are there?** | **4** |
| **Learning through positive reinforcement is an example of which of the following technique?** | **Behaviorist** |
| **Positive reinforcement is the application of a** | **Stimulus** |

| | |
|---|---|
| **Whose responsibility is it to create a classroom environment that attracts children to study?** | **Teachers** |
| **Discovery-based learning differs from the presentation method because it has a focus on _____.** | **facilitating investigations** |
| **How many stages of Poly's method are there?** | **4** |
| **What is the most important thing for the student's learning?** | **Understanding** |
| | |
