FINAL TERM

Most Important Repeated Questions

SPRING 2024

By

Marshmallow

VU EXPERT ZOOLOGISTS

IMPORTANT Final term questions

Subjective:

1. Using of triacylglycerol as stored fuel.
2. Name 3 hypercholesterolemic acid.
3. Difference b/w thymine and uracil.
4. Induced fit hypothesis.
5. Five characteristics of cAMP.
6. Characteristics of palmitic acids.
7. Difference blw transport & Contractile protein.
8. Sulfolipids.
9. Three unusual and modified bases.

10. Function of lipoxin.
11. Type of reversible inhibitor.
12. Rancidity and which factors affect them?
13. Types of rancidity.
14. Monoenic lipids.
15. N-glycosidic bond and How it is formed?
16. Name of cofactors.
17. Simple lipids & its types.
18. Difference between adenosine and guanosine
19. Define sphingomyelin. It's two subclass of sphingolipids.
20. Advantages of lineweaver burke plot.
21. Explain perks in quaternary protein structure.
22. Role of nucleotide in energy currency of cells.
23. Importance of sorbitol.
24. Hydrorancidity and oxidative rancidity.
25. Name of pentose sugar in nucleic acid and its characteristics.
26. Advantage of triacylglycerol.
27. Protein folding.
28. Pathway of Arachidonic acid
29. Name the lipoprotein / Types of lipoprotein.
30. Effect of non-competetive behavior on burke plot.
31. Sved burg unit.
32. Starch and its structure.
33. Inhibitor types.

34. Classification of enzymes.
 35. Difference between large and small km.
 36. Explain the function of tRNA.
 37. How the carbon atoms are numbered in pentose sugar of nucleotide & nucleoside.
 38. Role of triacylglycerol in plants.
 39. write down importance of side chain of alanine, valine, leucine, isoleucine.
 40. How activation energy is related to rate of reaction?
 41. Explain Waxes?
 42. Note on waxes? And write its Properties?
 43. Types of waxes?
 44. What are chaperons? write its function.
 45. How light is produced in fireflies?
 46. Uses of lanolin.
 47. Write sources of fatty acids in trans configuration present in body.
 48. Write types of phosphatases present in body?
 49. Simple representation of pentadeoxyribonucleic acid?
 50. Subgroup of oxidoreductase?
 51. Function of cyclic AMP.
 52. Keratin.
 53. Saponification and write about its end product.
 54. Hybridization and how DNA yeild intact duplex.
 55. Selencystein? how it is formed? write its functions.
- 

56. Properties of nitrogenous bases?
 57. How isozyme of hexokinase illustrate significance?
 58. Represent free energy gain at constant Pressure and write their equation.
 59. What is mediterranean diet?
 60. Note on glycerol titration.
 61. Components of nucleotides.
 62. what will be the pH of 0.1M of HCl.
 63. Platelet activating factor.
 64. Eicosanoids.
 65. Function of bile salt and write its composition.
 66. Difference between fats and oils.
 67. Factors affecting influence free energy of protein.
 68. Km michalis equation?
 69. Name three Polyunsaturated fatty acids.
 70. 5 Properties of triacylglycerol.
 71. What is standard free energy Change?
 72. Difference between Adenine and Guanine. DNA interaction.
 73. Furfural compound.
 74. Factors affecting enzymes activity.
 75. Ketogenic amino acids.
 76. function of messenger RNA.
 77. Function of sterols in animal tissues.
 78. Steroids.
- 

- 
79. Cofactors.
 80. Coenzymes.
 81. TAG.
 82. Buffer solution & its components.
 83. Significance of k_m .
 84. Nucleotides as energy currency.
 85. DNA structure.
 86. What are lipids?
 87. Note on Classification of lipids.
 88. Properties of lipids.
 89. Structure of amino acids.
 90. Properties of glycerol (trinitrides).
 91. what is groves in double helix? write its function.
 92. Michaelis menton equation at low $[S]$.
 93. Sulfolipids.
 94. Hydrogenation of fats.
 95. Biomedical importance of carbohydrates.
 96. Ligand.
 97. Represent free pressure at constant pressure and write their equation.
 98. What is mediterranean diet?
 99. Globosides.
 100. Calculate the ratio of the concentrations of acetate and acetic acid required in a buffer system of pH 5.30 ($pK_a = 4.76$).

- 
101. Properties of nucleotides.
 102. Uses of alanine.
 103. Plasmalogases.
 104. Enzyme Kinetics.
 105. Components of Proteins.
 106. Calculate PI for histidine.
 107. Titration curve of glycine.
 108. Difference between beeswax & spermaceti.
 109. Name of three pyrimidines.
 110. Features or characteristics of VLDL
 111. Rate of reaction with substrate concentration.
 112. Enzyme inhibition.
 113. Epimers
 114. Carbohydrates and its types.
 115. Penta deoxy ribonucleotides.
 116. Zero-order reaction.
 117. Three-steps of enzyme catalyzed reaction.
 118. Nomenclature of prostaglandins.
 119. Functional classification of proteins.
 120. Levels of proteins.
 121. Key factors of enzyme activity.
 122. Alpha, beta and gamma carbon.
 123. What are sterols? Give name of some sterols found in mammals.
 124. Enlist common hydrolyases.

- 
125. Large and small non-coding RNA.
 126. Complex lipids & its 3 types.
 127. Photophosphatases
 128. Characteristics of palmitic acid.
 129. Allosteric hemoglobin.
 130. Structural components of Pyrimidine and Purines.
 131. Large and small km.
 132. Components of lipoprotein.
 133. which type of Sugar is involved in nucleic acid?
 134. Michaelis constant K_M .
 135. Biomedical importance of protein.
 136. Common structure of RNA.
 137. PAF.
 138. 3 unnatural pyrimidine bases.
 139. What is the concentration of OH^- in a solution with an H^+ concentration of $1.3 \times 10^{-4} M$?
 140. Protein Motif.
 141. Relation between activation energy and rate of reaction.
 142. Difference between nucleotides and nucleosides.
 143. Calculate the pK_a of lactic acid, given that when the concentration of lactic acid is $0.01 M$ and the concentration of lactate is $0.087 M$, the pH is 4.80.
 144. Primary structure of protein.
 145. Secondary structure of Protein.

- 
146. Simple representation of penta deoxyribonucleic acid.
 147. Lipid chemistry of monoenoic acids.
 148. Amino sugars 3 names.
 149. Formation of banaspati ghee from oil.
 150. Binding of proton with tissue.
 151. what are Sterols? Give some examples.
 152. Rules for given first letter to amino acids.
 153. Histones & its 5 classes.
 154. Primary structure of RNA.
 155. Aromatic aminoacids.
 156. Which amino acid is present in beta bends?
 157. Describe glycerol in detail.
 158. Aromatic rings and explained the classes of aromatic rings.
 159. Enzyme Inhibitor and enzyme activator.
 160. Structure of glycine.
 161. Plasmalogins.
 162. Effect of PH on enzymatic activity.
 163. Importance of fats in body.
 164. Examples of mixed Triglycerides.
 165. Protein structure.
 166. What is Amylase where it is found?
 167. Enzyme activity on different temperature with example.
 168. Domain of proteins.
 169. Role of TAGs in plants.

- 
170. Unnatural pyrimidine name.
 171. Hybridization.
 172. List of essential amino acids.
 173. Conformation of beta protein.
 174. Relationship of velocity and enzyme concentration.
 175. Function of protease & hydrogenase anzyme.
 176. Hydrophobic interaction and disulphide bridge.
 177. Disease caused by Imbalance of omega 6 and omega 3.
 178. How messenger RNA is hetrogenous?
 179. Glucogenic amino acids.
 180. Effect of PH on active site.
 181. Difference between tyrosine, tryptophan and phenylalanine in ring structure.
 182. Name 3 hypercholesterolemic acid.
 183. Medical importance of nucleotide and nucleic acid?
 184. Condensation reaction.
 185. Iodin number and its importance.
 186. 2, 3, biphosphoglycerate.
 187. Enlist Aminoacids non-polar aromatic R-group.
 188. Importance of glucose in humans.
 189. Renaturation? Process of renaturation with exmple of ribonuclease
1.
 190. 3 Pyramidine bases.
 191. Examples of mixed triglycerides.

192. Source of fatty acids in trans-configuration present in our food.
193. Structural characteristics of monosaccharides.
194. How amino acids are differ from each other?
195. Unusual / modified bases
196. Function of Auxillary proteins.
197. Plasmalogens.
198. Function of cGMP.
199. Induced fit hypothesis.
200. mRNA
201. Charguffs rule
202. Difference between RNA and DNA.
203. Define menting temperature T_m .
