ENG513 Glossary

- **Accredited :**Accredited is (Of a person, organization, or course of study) officially recognized or authorized.
- **Allocation :**The action or process of allocating or sharing out something is called allocation.
- **Alternative 'Concurrent' Model :**A student simultaneously studies both one or more academic subjects, and the ways of teaching that subject, leading to a combined bachelor's degree and teaching credential to qualify as a teacher of that subject.
- **Anomaly :**Something that deviates from what is standard, normal, or expected
- **Approach :**It is a way of looking at teaching and learning. Underlying any language teaching approach is a theoretical view of what language is, and of how it can be learnt. An approach gives rise to methods, the way of teaching something, which use classroom activities or techniques to help learners learn.
- **Assess :**Evaluate or judge
- **Audio Lingual Method :**It is a teaching method and based on behaviorist theory, which postulates that certain traits of living things, and in this case humans, could be trained through a system of reinforcement. The correct use of a trait would receive positive feedback while incorrect use of that trait would receive negative feedback.
- **Autonomous :**(Of a country or region) having the freedom to govern itself or control its own affairs.
- **Caution :**Vigilance, carefulness
- **Collocation :**The habitual juxtaposition of a particular word with another word or words with a frequency greater than chance is called collocation.
- **Communicative Language Teaching Approach :**It is an approach to language teaching that emphasizes interaction as both the means and the ultimate goal of study.
- **Community Language Learning :**It is a language-teaching approach in which students work together to develop what aspects of a language they would like to learn. It is based on the Counselling-approach in which the teacher acts as a counselor and a paraphraser, while the learner is seen as a client and collaborator.
- **Concocted :**Assemble
- **Concordance :**Agreement or consistency
- **Consecutive' Model :**A student simultaneously studies both one or more academic subjects, and the ways of teaching that subject, leading to a combined bachelor's degree and teaching credential to qualify as a teacher of that subject
- **Content Based Instruction :**The focus of a CBI lesson is on the topic or subject matter. During the lesson students are focused on learning about something. This could be anything that interests them from a serious science subject to their favourite pop star or even a topical news story or film.
- **Contextualize :**Place or study in context.

- **Continuous Professional Development :**CPD is the process by which teachers (like other professionals) reflect upon their competencies, keep them up to date, and develop them further.
- **Continuum :**Range, variety
- **Cooperative Language Learning :**It is group learning activity organized so that learning is dependent on the socially structured exchange of information between learners in groups and in which each learner is held accountable for his or her own learning and is motivated to increase the learning of others.
- **Crucible :**A situation of severe trial, or in which different elements interact, leading to the creation of something new
- **Curricula :**It is the plural of curriculum which means syllabus
- **Deontology :**The study of the nature of duty and obligation
- **Dimensions :**Aspects, features
- **Discourse :**In linguistics, discourse refers to a unit of language longer than a single sentence. More broadly, discourse is the use of spoken or written language in a social context.
- **ESP (English for Specific Purposes) :**It stands for English for Specific Purposes. It is defined to meet specific needs of the learners. It makes use of underlying methodology and activities of the discipline it serves. It is centered on the language appropriate to these activities in terms of grammar, lexis, register, study skills, discourse and genre.
- **Feedback :**Feedback is information given to the learner about his/her performance with the objective of improving performance.
- **Grammar :**Grammar is the set of rules and conventions of language shared by a group of native speakers (whereby we decide whether a particular language form is right or wrong).
- **Grammar Translation Method :**Sometimes also known as the Classical Method, this is a traditional teaching technique that was used to teach Latin and Greek and was particularly in vogue during the 16th Century. The focus at this time was on the translation of texts, grammar, and rote learning of vocabulary. There was no emphasis on speaking and listening comprehension because Latin and Greek were taught more as academic subjects rather than a means of oral communication.
- **In-service :**(Of training) intended for those actively engaged in the profession or activity concerned.
- **Innateness :**Existing in, belonging to, or determined by factors present in an individual from birth : native
- **Interpersonal :**The interpersonal function refers to the grammatical choices that enable speakers to enact their complex and diverse interpersonal relations. This tenet of systemic functional linguistics is based on the claim that a speaker not only talks about something, but is always talking to and with others.
- **Intrapersonal :**It is a communicator's internal use of language or thought. It can be useful to envision intrapersonal communication occurring in the mind of the individual in a model which contains a sender, receiver, and feedback loop.

- **Multiple Intelligence Method :**The concept of multiple intelligence was coined by Howard Gardner around 1983. Gardner was a professor at Harvard University when he suggested that we all learn in different ways and according to different learning preferences. He outlined eight different intelligences that he claims are present in all of us, but to varying degrees.
- **Naturalist :**The ability to understand and organize the patterns of nature
- **NLP (Neuro-Linguistic Programming) :**It is an approach to communication, personal development, and psychotherapy created by Richard Bandler and John Grinder in California, United States in the 1970s. NLP's creators claim there is a connection between neurological processes (neuro-), language (linguistic) and behavioral patterns learned through experience (programming), and that these can be changed to achieve specific goals in life. Bandler and Grinder also claim that NLP methodology can "model" the skills of exceptional people, allowing anyone to acquire those skills. They claim as well that, often in a single session, NLP can treat problems such as phobias, depression, tic disorders, psychosomatic illnesses, near-sightedness, allergy, common cold, and learning disorders.
- **Pedagogists :**The art or profession of teaching
- **Pedagogy :**The method and practice of teaching, especially as an academic subject or theoretical concept
- **Practitioner :**A person actively engaged in an art, discipline, or profession, especially medicine
- **Pre-service :**Relating to the period before a person takes a job that requires training.
- **Seamless :**Unified, all-in-one
- **Semantics :**It is the branch of linguistics and logic concerned with meaning. The two main areas are logical semantics, concerned with matters such as sense and reference and presupposition and implication, and lexical semantics, concerned with the analysis of word meanings and relations between them.
- **Significant :**Noteworthy, important
- **Spatial :**Relating to or occupying space
- **Suggestopedia :**It is a language teaching method originated in the 1970s by Bulgarian psychologist Georgi Lozanov. The name combines the terms "suggestion" and "pedagogy", the main idea being that accelerated learning can take place when accompanied by de-suggestion of psychological barriers and positive suggestion. To this end lessons take place against a background of soothing music in an emotionally comforting environment, with the teacher actively planting and unplanting thoughts in and from the learners' minds.
- **Syllabus :**A syllabus is a document which says what should and will be learnt.
- **Tackle :**Make determined efforts to deal with (a problem or difficult task)
- **Task Based Language Learning :**Task-based language learning is an approach where the planning of learning materials and teaching sessions are based around doing a task. In education, a task refers to an activity where communication is necessary: for example; deciding something, solving a problem, designing or organising something, or telling someone to do something.
- **Technique :**A way of carrying out a particular task, especially the execution or performance of an artistic work or a scientific procedure

- **The Direct Method :**The direct method of teaching, which is sometimes called the natural method, and is often (but not exclusively) used in teaching foreign languages, refrains from using the learners' native language and uses only the target language. It was established in England around 1900 and contrasts with the grammar–translation method & Bilingual method of teaching and other traditional approaches, as well as with C.J.Dodson's bilingual method.
- **The Lexical Approach :**The lexical approach is a method of teaching foreign languages described by Michael Lewis in the early 1990s. The basic concept on which this approach rests is the idea that an important part of learning a language consists of being able to understand and produce lexical phrases as chunks. Students are thought to be able to perceive patterns of language (grammar) as well as have meaningful set uses of words at their disposal when they are taught in this way.
- **The Natural Approach :**The natural approach developed by Tracy Terrell and supported by Stephen Krashen is a language teaching approach which claims that language learning is a reproduction of the way humans naturally acquire their native language.
- **The Silent Way :**The Silent Way is the name of a method of language teaching devised by Caleb Gattegno. It is based on the premise that the teacher should be silent as much as possible in the classroom but the learner should be encouraged to produce as much language as possible. The Silent Way belongs to a tradition that views learning as a problem solving, creative, discovering activity, in which the learner is a principal actor rather than a bench-bound listener (Bruner 1966).
- **Total Physical Response Method :**It is s a language teaching method developed by James Asher, a professor emeritus of psychology at San José State University. It is based on the coordination of language and physical movement. In TPR, instructors give commands to students in the target language with body movements, and students respond with whole-body actions.
- **Whole Language Method :**It describes a literacy philosophy which emphasizes that children should focus on meaning and strategy instruction. It is often contrasted with phonics-based methods of teaching reading and writing which emphasize instruction for decoding and spelling. However, from whole language practitioners' perspective, this view is erroneous and sets up a false dichotomy.

ENG514 Glossary

- **Accuracy :**The quality or state of being correct or precise
- **Ambiguity :**The quality of being open to more than one interpretation; inexactness.
- **Anaphora :**The use of a word referring back to a word used earlier in a text or conversation, to avoid repetition, for example the pronouns he, she, it, and they and the verb do in I like it and so do they.
- **Assimilation :**The absorption and integration of people, ideas, or culture into a wider society or culture.

- **Back channelling :**Back channelling is the feedback which a listener gives to a speaker to show that (s)he is following, or understands what the speaker is saying.
- **Behaviorism :**Behaviorism is a learning theory that only focuses on objectively observable behaviors and discounts any independent activities of the mind.
- **Bilingual :**Speaking two languages fluently
- **Cognitive load :**Cognitive load refers to the used amount of working memory resources. Cognitive load theory differentiates cognitive load into three types: intrinsic, extraneous, and germane.
- **Cohesive devices :**Cohesive devices are words used to show how the different parts of a text fit together. In other words, they create cohesion. Some examples of cohesive devices are: determiners and pronouns, which can refer back to earlier words. Conjunctions and adverbs, which can make relations between words clear.
- **Colloquial speech :**Colloquial speech conversational, informal refer to types of speech or to usages not on a formal level
- **Communicative competence :**Communicative competence is a term in linguistics which refers to a language user's grammatical knowledge of syntax, morphology, phonology and the like, as well as social knowledge about how and when to use utterances appropriately.
- **Competence :**The term linguistic competence refers to the unconscious knowledge of grammar that allows a speaker to use and understand a language
- **Competency-based assessment :**Competency-based assessment is a form of assessment that is derived from the specification of a set of outcomes. It states clearly the expected outcomes
- **Computational linguistics :**Computational linguistics is the branch of linguistics in which the techniques of computer science are applied to the analysis and synthesis of language and speech.
- **Conversational adjustments :**Conversational adjustments are the modifications that are made in terms of the interaction and content of the utterance
- **Deictic reference :**A deictic expression or deixis is a word or phrase (such as this, that, these, those, now, then, here) that points to the time, place, or situation in which a speaker is speaking .Deixis is expressed in English by way of personal pronouns, demonstratives, adverbs, and tense
- **EAP :**English for Academic Purposes
- **EFL :**English as a Foreign Language
- **ESP :**English for Specific Purposes
- **Fallacies of reasoning :**A fallacy is the use of invalid or otherwise faulty reasoning, or "wrong moves" in the construction of an argument. A formal fallacy can be expressed neatly in a standard system of logic, such as propositional logic, while an informal fallacy originates in an error in reasoning other than an improper logical form.
- **Fluency :**The quality or condition of being fluent
- **Grammar translation method :**grammar–translation method is a method of teaching foreign languages derived from the classical (sometimes called traditional) method of teaching

- **Historical corpus linguistics :**The modern field of corpus linguistics – based around the computer-aided analysis of extremely large databases of text – is largely a phenomenon of the late 1950s onwards.
- **IELTS :**International English Language Testing System
- **Interactional linguistics :**linguistics is an interdisciplinary approach to grammar and interaction in the fields of linguistics, the sociology of language, and anthropology
- **Interactive listening :**Interactive listening requires learners to engage in face-to-face interactions where they often alternate between the roles of listener and speaker
- **Language acquisition :**Language acquisition is the process by which humans acquire the capacity to perceive. Input in the linguistic context is defined as "All words, contexts, and other forms of language to which a learner is exposed, relative to acquired
- **Language-focused learning :**Language-focused learning has many names ? focus on form, form-focused instruction, deliberate study and deliberate teaching, learning as opposed to acquisition, intentional learning and so on. It involves the deliberate learning of language features such as pronunciation, spelling, vocabulary, grammar and discourse.
- **Lexical resource :**A lexical resource (LR) is a database consisting of one or several dictionaries. Depending on the type of languages that are addressed, the LR may be qualified as monolingual, bilingual or multilingual. For bilingual and multilingual LRs, the words may be connected or not connected, from a language to another.
- **Lexicography :**The activity or occupation of compiling dictionaries.
- **Metacognition :**Metacognition is our ability to think about our own thinking or “cognition
- **Metacognitive awareness :**Metacognitive awareness refers to a state of consciousness of our own thoughts as we focus on a particular cognitive or learning situation
- **Metacognitive instruction :**Metacognitive instruction refers to pedagogical procedures that enable learners to increase awareness of the listening process by developing richer metacognitive knowledge about themselves as listeners, the nature and demands of listening, and strategies for listening
- **Natural Approach :**In the natural approach, language output is not forced, but allowed to emerge spontaneously after students have attended to large amounts of comprehensible language input.
- **Oral channel :**Oral communication is the process of expressing information or ideas by word of mouth.
- **Performance :**The term linguistic performance was used by Noam Chomsky in 1960 to describe "the actual use of language in concrete situations".[1] It is used to describe both the production, sometimes called parole, as well as the comprehension of language.
- **Podcasts :**Podcasts are audio or video files published via the internet
- **Pragmatic competence :**In linguistics, pragmatic competence is the ability to use language effectively in a contextually appropriate fashion. Pragmatic competence is a fundamental aspect of a more general communicative competence
- **Pragmatic processing :**Dealing with things sensibly and realistically in a way that is based on practical rather than theoretical considerations. "a pragmatic approach to politics"

- **Pre-listening :**Pre-listening activities are things learners do before a listening activity in order to prepare for listening. Pre-listening tasks include discussion questions, true or false statements, vocabulary work, prediction tasks and brainstorming the topic.
- **Prosody :**The patterns of stress and intonation in a language
- **Register analysis :**Register analysis can be used to determine authenticity of language in relation to lexical and grammatical features
- **Schema :**Schema theory states that all knowledge is organized into units. Within these units of knowledge, or schemata, is stored information.
- **Schemata :**A schema is a generalized description or a conceptual system for understanding knowledge-how knowledge is represented and how it is used.
- **Selective listening :**selective listening refers to listening with a planned purpose in mind
- **Semantic processing :**Semantic processing is the processing that occurs after we hear a word and encode its meaning. Semantic processing causes us to relate the word we just heard to other words with similar meanings. Once a word is perceived, it is placed in a context mentally that allows for a deeper processing.
- **Social cues :**A social cue can either be a verbal or non-verbal hint, which can be positive or negative. These cues guide conversation and other social interactions.
- **Subtitles :**Subtitles are translations of the sound track of a film or television program
- **Syntactic parsing :**Syntactic parsing is the task of recognizing a sentence and assigning a syntactic structure to it.
- **TOEFL :**Test of English as a Foreign Language

ENG515 Glossary

- ✓ **Acronym :**A word made up of the initial letters of a phrase, e.g. 'NATO', 'WJEC'.
- ✓ **Active Reading :**The first essential step to comprehension, active reading forces you to see what you're reading, and to look closely at what's in the text. Active reading involves the questions "Who? What? When? Where? Why? How?" Active readers mark up passages by identifying unfamiliar vocabulary, underlining key words and ideas, and recording their reactions and questions in the margins.
- ✓ **Analogy :**Comparing two sets of words to show some common similarity between the sets. When done as a vocabulary exercise this requires producing one of the words (e.g., cat is to kitten: as dog is to _____?).
- ✓ **Bloom's Taxonomy :**A system for categorizing levels of abstraction of questions that commonly occur in educational settings. Includes the following competencies: knowledge, comprehension, application, analysis, synthesis, and evaluation.
- ✓ **Brainstorming :**Brainstorming: Collecting ideas by thinking freely and openly about all the possibilities; used often with groups.
- ✓ **Cause and Effect :**Ideas are arranged so readers can see which events, or series of events, caused something to take place, or what effect an event or series of events had.

- ✓ **Chronological Order :**Ideas are arranged in the order in which they occurred (or in the order in which they should occur)
- ✓ **Cognates :**Words that are related to each other by virtue of being derived from a common origin (e.g., 'decisive' and 'decision' or education (English) and educación (Spanish).
- ✓ **Coherence :**Coherence is the orderly relationship of ideas, each leading smoothly and logically to the next. You must weave your ideas together so skillfully that the reader can easily see how one idea connects to another and to the central thought. This central thought, of course, is expressed in the topic sentence for a paragraph and in the thesis for an essay.
- ✓ **Cohesion :**Cohesion is the grammatical and lexical linking within a text or sentence that holds a text together and gives it meaning. It is related to the broader concept of coherence.
- ✓ **Composition :**Composition: A process in which a writer's ideas are combined into one unified piece of writing.
- ✓ **Conditional :**A tense of a verb which expresses the idea that what happens depends on something else. Conditional forms often involve conjunctions such as 'if' or 'then' and verb forms such as 'would' or 'may'.
- ✓ **Connotation :**The implied or suggested meaning.
- ✓ **Decoding: :**The ability to translate a word from print to speech, usually by employing knowledge of sound symbol correspondences; also the act of deciphering a new word by sounding it out.
- ✓ **Deductive reasoning :**Deductive reasoning: The act of reasoning from a general idea to a specific point or conclusion.
- ✓ **Denotation :**The exact or dictionary meaning.
- ✓ **Emphasis :**Emphasis: Placing greater stress on the most important idea in a piece of writing by giving it special treatment; emphasis can be achieved by placing the important idea in a special position, by repeating a key word or phrase, or by simply writing more about it.
- ✓ **Etymology: :**The origin of a word and the historical development of its meaning (e.g., the origin of our word etymology comes from late Middle English: from Old French ethimologie, via Latin from Greek etumologia, from etumologos 'student of etymology,' from etumon, neuter singular of etumos 'true').
- ✓ **Explicit :**Explicit instruction involves direct explanation. The teacher's language is concise, specific, and related to the objective. Another characteristic of explicit instruction is a visible instructional approach which includes a high level of teacher/student interaction. Explicit instruction means that the actions of the teacher are clear, unambiguous, direct, and visible. This makes it clear what the students are to do and learn. Nothing is left to guess work.
- ✓ **Exposition :**Exposition: Writing that explains.
- ✓ **Expository Text :**Reports factual information (also referred to as informational text) and the relationships among ideas. Expository text tends to be more difficult for students than narrative text because of the density of long, difficult, and unknown words or word parts.
- ✓ **Figurative language :**Figurative language - language used to create a special effect or feeling; goes beyond the immediate meaning of the words used; writing in which a word or phrase is used to heighten the meaning by using comparative or exaggerated language or means something other than what it first appears to mean

- ✓ **Fluency :**Fluency is the ability to read a text accurately, quickly, and with proper expression and comprehension. Because fluent readers do not have to concentrate on decoding words, they can focus their attention on what the text means.
- ✓ **Genre :**A kind of fiction or nonfiction.
- ✓ **Grapheme :**A grapheme is a letter or letter combination that spells a single phoneme. In English, a grapheme may be one, two, three, or four letters, such as e, ei, igh, or eigh.
- ✓ **Homograph :**Two words spelled the same but pronounced differently and with different meanings
- ✓ **Homophone :**Two words that sound alike but are spelled differently and have different meanings.
- ✓ **Illustration :**Illustration is the graphic component of a text and can include images and artwork created with a variety of media. Charts, graphs, maps, and timelines can also be considered illustration. Authors and illustrators can also use font variations and variety to communicate information graphically; this can be considered illustration. Illustrations convey meaning.
- ✓ **Inverted sentence :**A sentence in which the normal word order is inverted or switched, usually so that the verb comes before the subject.
- ✓ **Jargon :**The technical language of a particular group that is inappropriate in most formal writing since it is frequently not understandable by those outside the group.
- ✓ **Literal :**The actual or dictionary meaning of a word; language that means exactly what it appears to mean.
- ✓ **Metaphor :**Metaphor - a figure of speech that is implied rather than directly stated; usually reveals a comparison by means of vivid expression
- ✓ **Modifier :**A word, phrase, or clause that limits, alters, or describes another word or group of words.
- ✓ **Onset :**Consonant sounds which may precede the vowel in a syllable, such as t in table.
- ✓ **Paraphrasing :**Paraphrasing - to restate a phrase by using other words in order to shorten the passage or to make it more comprehensible to the author or reader
- ✓ **Personal narrative :**Personal writing that covers an event in the writer's life; it often contains personal comments and ideas as well as a description of the event.
- ✓ **Plagiarism :**Plagiarism - using the words or ideas of others without proper acknowledgment or permission
- ✓ **Proofreading :**Proofreading - close reading of a text, using symbols of correction, examining it for errors in conventions, mechanics and/or grammar
- ✓ **Research :**Research - a process of inquiring into a topic through various means including exploring what one believes and knows about the topic, seeking out other voices in the conversation, investigating and documenting others' ideas, considering them in relation to one's own.
- ✓ **Rime :**The vowel plus consonant element of a syllable - able in table.
- ✓ **Scaffold :**Scaffolds are structures or tools implemented by educators that support students' learning. Scaffolds 158 Glossary help the learner reach a level of achievement that he may not

be able to reach without the scaffold. A lesson plan format is a procedural scaffold. Outlines and graphic organizers are examples of instructional scaffolds.

- ✓ **Scanning :**Scanning is reading rapidly in order to find specific facts. Scanning helps you locate a particular fact.When you find the answer of a specific question from the given text.
- ✓ **Schema :**The schema theory suggests that knowledge is stored in abstract structures called schemas. People organize and retain information in their memories based on a hierarchy of characteristics. For instance, in my schema for my dog Tessa, I have an overarching concept of animal, then pet, then dog, then poodle, then finally the specific traits of this particular dog. When applied to reading comprehension, schema theory postulates that readers have preconceived concepts that influence their understanding of texts. This background knowledge is applied when texts are being read. Schemas change when new information supplants old or is integrated into prior understandings.
- ✓ **Schema: :**Refers to prior knowledge, the knowledge and experience that readers bring to the text.
- ✓ **Skimming :**Skimming is reading rapidly in order to get a general overview of the material, it tells you what general information is within a section.When you see a piece of writing to see what it is about.
- ✓ **Spontaneity :**Spontaneity: Doing, thinking, or writing without planning.
- ✓ **Syllable Types :**There are six syllable types: 1. Closed: cat, cobweb 2. Open: he, silo 3. Vowel-consonant-e (VCE): like, milestone 4. Consonant-l-e: candle, juggle (second syllable) 5. R-controlled: star, corner, 6. Vowel pairs: count, rainbow
- ✓ **Syntax :**The way in which words are arranged to show relationships (Crystal).
- ✓ **Tone :**The writer's attitude toward the subject; for example, a writer's tone may be light, serious, sarcastic, tongue-in-cheek, solemn, or objective.
- ✓ **Transitional markers :**Words or phrases that help clarify the relationships between ideas and tie them together, for example, nevertheless, moreover, most important, as a result.
- ✓ **Unity :**Unity - combining sentences, paragraphs, ideas and details to form a coherent piece of writing

ENG516 Glossary

- ❖ **Accuracy :**Accuracy in technical communication refers to grammatical and contextual correctness.
- ❖ **Achievable objectives :**Achievable objectives are those objectives which are achievable and attainable in terms of abilities, realistic facilities and logistics.
- ❖ **Assessment and Evaluation :**Assessment is concerned with individual student's learning. Evaluation refers to course evaluation as a whole.

- **Authentic Materials :**The term 'authentic' denotes that the texts were written for purposes other than language teaching and learning. Authentic materials could be real commercial documents, newspaper articles, recordings of meetings and conversations used in the workplace, newspaper clippings, excerpts from case studies, reports.
- **Aviation English :**Aviation English is the de facto language of civil aviation which is called Radiotelephony; it is a specialized communication between pilots and air traf?c controllers, and other personnel associated with the aviation industry.
- **Backwash Effect :**When the course is designed with the test in mind, its effect is called wash-back. Wash-back, according to Brown and Hudson, is "the effect of testing and assessment on the language teaching curriculum that is related to it".
- **Business Communication :**The communication which takes place at the workplace, in the educational setting, corporate office, or in a government job, is called business communication and is basically carried out in the English language.
- **Business English for Academic Purposes :**English for academic purposes or EAP comes under the umbrella of ESP, and is required for those who use language to perform academic tasks or for employment.
- **Case Studies :**A case study is a description of a problem or decision faced by a company business. It describes a specific business problem and creates a jumping off point for analysis and discussion.
- **Code of conduct :**Code of conduct is the rules which are observed in different fields of life including education and pedagogy.
- **Communication Needs :**Communication needs are the communication channels - traditional like letters and reports and the telephone as well as modern like the internet, intranet, fax, and instant messages-which we use to communicate.
- **Communicative Language Teaching :**Communicative language teaching (CLT), aims to develop learners' ability to use language to communicate. CLT is not a precise term and can mean different things to different people.
- **Controlling :**Setting standards, checking actual performance against standards, taking corrective action as needed
- **Course Books :**Course books are the major source of framework material which can be used extensively.
- **Dealing with Professional Content :**A contentious issue in teaching of Business Communication is the amount of professional content in the course design.
- **Designing a Course :**Designing a business English course is a matter of making a series of decisions based on information gathered during a needs analysis about learners' communication, business and pedagogical needs.
- **Discourse Competence :**Discourse competence, on the other hand, deals with language in use, although it is important to note that the word discourse can be used in a variety of ways by language professionals.
- **EAL :**English as an Additional Language
- **EBE :**English for Business and Economics

- **EGAP :**English for General Academic Purposes
- **EGBP :**English for General Business Purposes: targets those learners who have lack of working experience (pre-experienced or low-experience)
- **EGP :**English for General Purposes
- **EMP :**English for Medical Purposes
- **EOP :**English for Occupational Purposes
- **ERPP :**English for Research Publication Purposes
- **ESAP :**English for Visual Arts Study
- **ESBP :**English for Specific Business Purpose
- **ESS :**English for Social Sciences
- **EST :**English for Science and Technology
- **Ethnocentrism :**Ethnocentrism is the view that one's culture is the center of everything, and other cultural groups are judged with reference to it and are compared to one's cultural group.
- **EVP :**English for Vocational Purposes
- **Feedback :**Feedback is information given to the learner about his/her performance with the objective of improving performance.
- **Framework Materials :**Frameworks are explicitly structured contexts designed to help teachers and learners.
- **Grammar :**Grammar is the set of rules and conventions of language shared by a group of native speakers (whereby we decide whether a particular language form is right or wrong).
- **Grid :**A grid or framework sets out the aims and objectives, followed by all the elements that we believe are necessary for someone to be able to meet the objectives.
- **Intercultural Competence :**One's ability to know and deal with attitudes, behaviors, beliefs, and values of other cultures other than one's own culture.
- **Leading :**Getting others to get the job done, motivating
- **Learning Strategies :**Learning strategies are "…characteristics we want to stimulate in students to enable them to become more proficient language learners" (Oxford, 1990).
- **Learning Styles :**Dunn and Dunn (1979) define learning styles as "A term that describes the variations among learners in using one or more senses to understand, organize, and retain experience".
- **Linguistic Competence :**Linguistic competence is shown in the use of the basic elements that go together to form a language, such as vocabulary, grammar, phonology.
- **Listening Skills :**Listening is a conscious selective process, unlike hearing which is involuntary, depends on non-verbal signals.
- **Necessities, Lacks, Wants :**We call 'necessities' the type of need determined by the demands of the target situation. The gap between the target proficiency and existing proficiency can be referred to as the learner's lacks. Wants are learners own view of what they "want" from the course, which might be in conflict with the course and the instructor's perceptions of learners' necessities and lacks.
- **Negotiations :**A negotiation is a special meeting in which parties need each other's agreement in order to achieve an effective result.

- **Organizing :**Delegating/assigning tasks, establishing channels of authority, coordinating work of management teams
- **Pedagogical Needs :**Pedagogical needs are teacher's needs, needs of learning situation or the learning environment and learning needs or learning styles of learners.
- **Planning :**It includes establishing goals and standards, developing plans, and rules and procedures and forecasting future.
- **Presentations :**Presentations are communication situations in business where one person is speaking, while others listen.
- **Proposals :**Proposals are basically long reports, whose purpose is to persuade someone or a company to carry out what you propose. When you write a proposal, you are aiming to sell your idea or convince or persuade someone to accept your idea.
- **Ready-made Materials :**The most common ready-made material is course books, which are popular all over the world. Course books are textbooks, of which the teacher and the students have copies, which are to be followed systematically as the basis for course design.
- **Scope of Business Communication :**The legitimate scope of business English teachers is to design and deliver courses which aim to increase the language knowledge and communication skills, management skills, cultural awareness and professional context.
- **Smart Objectives :**Objectives should be specific, measurable, achievable, relevant, and time-bound, to specify what one needs to achieve, answering six questions: Who? What? Where? When? Which? Why?
- **Staffing :**Deciding what type of people should be hired, setting performance standards, evaluating performance
- **Syllabus :**A syllabus is a document which says what should and will be learnt.
- **Tailor-made Material :**Tailor-made material is designed to supplement the course book or the regular course.
- **Task based Learning :**The task-based approach aims at providing opportunities for learners to experiment with and explore both spoken and written language through learning activities.
- **Task Based Test :**The task-based approach in language teaching aims at providing opportunities for learners to experiment with and to explore both spoken and written language through learning activities which are designed to engage learners in the authentic, practical and functional use of language for meaningful purposes.
- **Teaching and Training :**The terms teaching and training are used interchangeably. Teaching implies lessons and training implies professional development.
- **Teaching Business English :**Various reasons account for the growing awareness about the need for teaching Business Communication - increased trade/commerce activities, globalization, faster means of travel, growth of ICT, internationalization of education, social media, etc. This is accompanied by an acceptance of English as a lingua franca by almost all nations of the world. The teaching of English communication has been influenced by a variety of disciplines, including linguistics, general language learning and teaching, educational psychology and management training.

- **The Evaluators :**The evaluators are who decide how effective the training, the trainer, the trainees, the participants and the audience are.
- **The Face of Politeness :**'Face of Politeness' is a technical term meaning attention paid to the self-respect of addressee and ultimately of oneself. It is about meeting a person's 'face needs' for self-respect.
- **Types of Letters :**There are various types letters e.g. inquiry letter, bad news letter, recommendation letter, transmittal letter, and so on.
- **Types of Reports :**In business many different kinds of reports are a requirement and are written routinely. Feasibility, recommendation, research, proposals trip/lab/minutes of meetings, incident, progress, investigation reports are the most common ones.
- **Using Role-Plays and Simulations :**Using Role-Plays and Simulations Role-plays are activities where the learners take on a role, they do not play themselves. A simulation refers to an activity where the learner is playing him or her, and (ideally) simulates what he or she might do in real life.
- **Using the Syllabus :**The use of syllabus varies according to teaching context, country and institution. The human factor and individual characteristics are also factors as are resources, human and material, and the teaching approach.
- **VESL :**Vocational English as a Second Language
- **What are Needs? :**The difference between current situation and the target situation is called need.
- **What is Culture? :**A national culture is related to national identity and attributes of groups of people. A company culture is a set of corporate values which is shared by a team or department.
- **What is Intercultural Training? :**Intercultural training is about helping people to interact successfully with people from other cultures.

ENG517 Glossary

- **Affordances :**Affordances are the visual clues that an object gives to its use as well as what the program is capable of doing in terms of both intended and unintended functions. A chair is for sitting on and the size of the seat suggests that it might be comfortable for that purpose, but the chair can also be stood upon or used as a weapon; these are other affordances. An object can have both affordances and misaffordances, things that distract from the object's intended use. Affordances can be both obvious and learned. A misaffordance for a chair would be design features that disguised its purpose or interfered with its principal purpose of being sat upon.
- **AI :**Artificial Intelligence refers to the ability of a computer to mimic human thinking processes.
- **AILA :**Association Internationale de Linguistique Appliquée.
- **ALLP :**The Athena Language Learning Project developed at Massachusetts Institute of Technology.
- **ALTE :**Association of Language Testers in Europe.

- **Applet :**A small application, often written in the Java computer language, that can be embedded in a web page to perform a small function.
- **Asynchronous :**Refers to communication that takes place at different times, for example, through email in which a message is sent and may be read at leisure by the recipient.
- **Avatar :**is an online personality that might resemble a person or almost anything else. Avatars are used in MOOs to represent a person and can be manipulated to move around an environment and interact with other participants' avatars.
- **BASIC :**Beginner's All-purpose Symbolic Instruction Code, a computer programming language developed in the mid-1960s.
- **Beta software :**a pre-commercial version of a software package that is made publicly available to identify problems in the software.
- **Bookmark :**An Internet bookmark is a marker for a web page; the word is also used as a verb.
- **Bot :**A small automated program which searches and indexes a range of websites for some specific information, such as the best price for an airline ticket or to create a current reference set. Bots are also known as spiders, ants, web crawlers and other terms reflecting small variations in function.
- **CAI :**Computer-Aided Instruction refers to learning at the computer, but not necessarily to do with language. Although not necessarily intended by all those who use the acronym, the term instruction suggests a teacher-centred approach.
- **CAL :**Computer-Assisted Learning. Similarly to CAI, CAL may refer to the learning of any subject (including language learning) using a computer. But in contrast to CAI, CAL emphasizes the learner.
- **CALI :**Computer-Assisted Language Instruction, a term commonly used in North America.
- **CALICO :**Computer-Assisted Language Instruction Consortium.
- **CALL :**Computer-Assisted Language Learning can be defined as learning language at the computer either as a direct activity through structured lessons or during an activity peripheral to the study of language but that, nonetheless, promotes language awareness and acquisition. In some cases, computer software that is used for teaching subjects other than language, such as mathematics, is included under the umbrella of CALL if the software's language has been simplified or otherwise adapted for use by non-native speakers. For the sake of brevity, in this book CALL is used as a collective term to include related terms except where a specific distinction needs to be made or in quotes from the literature where an author's original choice of term is preserved.
- **CALT :**Computer-Assisted Language Testing.
- **CAT :**Computer-Assisted Teaching (or Computer-Adaptive Testing).
- **CBL :**Computer-Based Learning.
- **CBT :**Computer-Based Training tends to refer to programs used for corporate training with narrow and short-term instructional goals but may refer more generally to any kind of training. The term is not often used in the language-learning context except where it refers to the teaching of some discrete language learning skills, such as listening training.

- **CD-ROM :**Compact Disk-Read Only Memory is a disk storage format that can hold approximately 600 megabytes of information.
- **chat room :**a designation for a private space used in Internet Chat Relay programs that allow for discussion on individual topics. Two or more participants wishing to discuss an issue may construct the virtual rooms at any time.
- **CMC :**Computer-Mediated Communication refers to a situation in which computer-based discussion may take place but without necessarily involving learning.
- **CMI :**Computer-Mediated Instruction refers to instruction that takes place through the use of a computer and may, for example, include learning that occurs when a learner communicates with a distant tutor through email or simply uses some form of computer hardware and software. The term instruction shows a teacher-centred approach.
- **cognitive overhead :**refers to the learning that needs to be done before using a software program.
- **cognitive overload :**refers to a computer software presentation which distracts the learner from the purpose.
- **Colossus :**Colossus was the first British mainframe computer, used to assist in deciphering German Enigma cryptograms.
- **computer literacy :**vaguely refers to a set of skills and a base of knowledge required of learners. Because of continuous advances in technology, it is difficult to define such standards.
- **computer-adaptive testing :**computer-adaptive testing is a program in which the learner is directed along easier or more difficult tasks or links depending on answers to questions at key points of the program.
- **cookie :**data sent to a computer to record your actions on a certain web-site, either for commercial purposes or to speed up navigation.
- **Cybercrime :**criminal activity using computers and the Internet.
- **Cyberspace :**author William Gibson created the metaphor cyberspace in his 1984 science fiction novel Neuromancer. Cyberspace retains its original (although poetic) definition as 'a consensual hallucination' and 'a graphic representation of data' (Gibson, 1984: 51).
- **Database :**a corpus of information which is accessible for selection and reorganization by predetermined criteria, as simple as alphanumeric ordering or by more complicated searches, such as by semantic field.
- **DDL :**Data Driven Learning, a term used in corpus linguistics to describe learner activities using corpora.
- **DEC :**Digital Equipment Corporation.
- **Digg :**One of several services for marking Internet content such as news stories, videos, music and images, to bring it to the attention of others through an accumulation of votes. (www.digg.com)
- **digital signature :**a unique code that verifies a person's identity which can be attached to computer documents.
- **DVD :**Digital Video Disks have approximately ten times the storage capacity of CD-ROMs.
- **EAP :**English for Academic Purposes.

- **EFL :**English as a Foreign Language.
- **Emoticon :**a small graphic, often made from punctuation symbols, that helps to express emotion in an email message
- **ENIAC :**Electronic Numerical Integrator and Calculator, an American computer intended for cryptography, but built too late to be of use in the Second World War (completed in 1945).
- **ESL :**English as a Second Language.
- **EUD :**End User Development refers to software that includes features that can be easily programmed by non-professionals, such as macros in Microsoft Office.
- **EUROCALL :**European Association of Computer-Assisted Language Learning.
- **Facebook :**a social networking website on which users create personal multimedia profiles and exchange information with other members, called friends who can sometimes be allowed access in terms of a geographical area, such as a college campus. One feature is a wall on which messages open to all friends can be written.
- **fidelity :**refers to the degree of realism in a computer simulation.
- **folksonomy :**a slang expression for a taxonomy created by a group of amateur contributors to a wiki or other web application.
- **GPS :**Global Positioning System
- **GUI :**Graphical User Interface: icons used on the computer screen to auto-mate some functions.
- **HCI :**Human Computer Interface, a term found in early publications in CALL, but now usually abbreviated to interface.
- **Homepage :**the first page or starting point of a website with navigation tools to access the rest of the website.
- **hotsync :**refers to one device sharing data automatically with another, for example, a PDA with a desktop computer.
- **HTML :**Hyper Text Markup Language, text files that contain formatting instructions so that certain design and typographical conventions can be shared across computers.
- **HTTP :**Hyper Text Transfer Protocol, the method used to make hypertext documents available and readable on the World Wide Web.
- **HyperCard :**a software program developed by Apple Computer which creates a set of virtual index cards that can be extensively cross-referenced. On these cards, text, images, audio, animations and video can be added, along with questions and buttons to take users to other cards that might feature further questions, information and /or answers.
- **hyperlink :**refers to the hypertext link usually indicated by blue underline beneath text or a thin blue line around an image. Clicking on the hyper-link takes one to a new page or a pop-up page with further information.
- **IBM :**International Business Machines.
- **ICALL :**Intelligent Computer-Assisted Language Learning refers to a program or system that adapts to the learner and assesses his or her mistakes and provides tailored feedback recommending.
- **ICQ :**I seek you, an Internet Relay Chat (IRC) program which allows users to be alerted to other designated users when they are both using the WWW.

- **interface :**the appearance of the computer screen that, in some way, offers a metaphorical experience for the user to interact with data. The most prevalent interface is the desktop.
- **IRC :**Internet Relay Chat, a form of WWW-based email that allows multiple computer users to engage in an online discussion.
- **ISP :**Internet Service Provider, a company that supplies Internet access to individuals and businesses.
- **IT :**Information Technology, a general term referring to computers as well as services such as the WWW.
- **KWIK :**Key Word In Context, a process used in concordancing.
- **LAN :**Local Area Network, a system of connecting a series of computers so as to allow them to share resources and communicate with each other.
- **locus of control :**refers to the continuum between the program's and the learner's responsibility for decisions about the outcomes, sequence of learning, learner interactions and even the content.
- **Memex :**a desk-sized (MEMory EXtension) system which would access and organize large amounts of information (Bush, 1945).
- **MIT :**Massachusetts Institute of Technology, home of the Media Lab, site of many innovations in computing.
- **MMOG :**Massively Multiplayer Online Games MOO MUD Object Oriented.
- **Moodle :**Modular Object-Oriented Dynamic Learning Environment, an open source course management system for web-based e-learning; see Moodle.org
- **MUD :**Multi-User Dungeon /Domain.
- **multimedia :**offer two or more communication channels such as video and text. Early CALL programs primarily displayed text-only, either as teletype printouts or on video display screens. As the capabilities of the technology have increased, most programs increasingly offering multi-media, particularly pictures with text, but increasingly, sound and video as well.
- **netiquette :**net etiquette refers to etiquette on the Internet in terms of issues such as privacy, politeness and appropriate language, emailing and so on.
- **newbie :**someone using software or interacting on a website for the first time, sometimes with inappropriate behaviour.
- **newsgroup :**an Internet-based discussion on a particular topic.
- **open source :**refers to software for which the original code is available to developers to create further refinements and variations. Java is an example of an open source programming language.
- **PDA :**Personal Digital Assistant, a mobile palmtop computer.
- **PLATO :**Programmed Logic/Learning for Automated Teaching Operations, an early computer platform for teaching and learning.
- **podcast :**a computer-based broadcast, intended to be downloaded onto an iPod music player through iTunes, an Apple—based music system. Anyone with a computer and a microphone can create a podcast episode and dis-tribute it via the web.

- **remote access/remote desktop :**a technology that allows one to see and operate one computer from another computer; it is often used by a professional troubleshooter to deal with a user's computer problem.
- **RSS :**Resource Description Framework Site Summary has a more popular and descriptive folk etymology: Really Simple Syndication. It is a way for a user to identify a topic or website of interest and new information automatically streamed. Typical RSS feeds include news stories.
- **scaffolding :**is the process by which one learner helps another grasp words and ideas by providing and building upon partial information.
- **schema theory :**'A theory of language processing which suggests that discourse is interpreted with reference to the background knowledge of the reader or listener' (Nunan, 1993: 124).
- **social networking :**refers to ways of connecting with others through blogs based on web services. Some are aimed at connecting profes-sionals, such as LinkedIn (http://www.linkedin.com), and some are more for entertainment.
- **Synchronous :**refers to communication that takes place at the same time, such as through chatlines.
- **TELL :**Technology Enhanced Language Learning usually includes CALL but also refers to any other technology that might be used in the classroom. For example, video, tape-recorders or even entire listening labs. These distinctions are becoming blurred as computers incorporate and become incorporated in other technologies. For example, modern CALL software often includes video and audio tape-recording facilities and language labs are increasingly computerized.
- **Twitter :**an online communications service that allows people to connect in short messages, called Tweets, of 140 characters or less.
- **UNIX :**UNiversal Interactive eXecutive or UNiversal Inter-eXchange or UNIversity eXchange; the etymology is so far only anecdotal.
- **Virtual classroom :**Derycke et al. (1995) credit Roxanne Hiltz as coining the term and explain its qualities: 'the electronic classroom becomes virtual because it can relax the spatial constraints (users at different locations no matter how far apart) and the temporal constraints (users interacting over time via asynchronous communications). In fact the classroom is a virtual place where the learner can find not only pedagogical resources but also human (social) resources to support him /her in the distance learning process'
- **virtual reality :**an illusion of a reality created by a computer system, either through multimedia and peripheral immersive devices such as headphones and screen goggles, or an environment in which characters on-screen interact with and model human behaviours.
- **VRML :**Virtual Reality Modelling Language, a computer language for documents that present 3-D worlds and objects.
- **Web 2.0 :**a collective term for a series of new Internet innovations such as blogs, social networking sites and wikis.
- **Wiki :**a website to which content can be added and edited by anyone with access to the Internet. The term wiki comes from the Hawaiian phrase wiki wiki, meaning super fast.**Wikipedia :**an online encyclopaedia in continuous development by thousands of volunteer contributors who add and edit articles, sometimes maliciously

- **wizard :**a program used to automate choices in a software program.
- **WWW :**World Wide Web is a protocol that enables Internet users to share information with other Internet users.
- **ZPD :**Zone of Proximal Development, associated with Lev Vygotsky, refers to the idea that the potential for cognitive development is limited to a certain time span.

ENG518 Glossary

- ✓ **Action research :**Action research refers to a wide variety of evaluative, investigative, and analytical research methods designed to diagnose problems or weaknesses—whether organizational, academic, or instructional—and help educators develop practical solutions to address them quickly and efficiently.
- ✓ **APA Style :**APA Style is a writing style and format for academic documents such as scholarly journal articles and books. ... It is described in the style guide of the American Psychological Association (APA), which is titled the Publication Manual of the American Psychological Association.
- ✓ **Bibliography :**An bibliography is a list of resources with citations related to a particular topic or arranged thematically that include a brief descriptive or evaluative summary.
- ✓ **Case Study :**The term case study refers to both a method of analysis and a specific research design for examining a problem, both of which are used in most circumstances to generalize across populations.
- ✓ **Data analysis :**Data Analysis is the process of systematically applying statistical and/or logical techniques to describe and illustrate, condense and recap, and evaluate data.
- ✓ **Data collection :**Data collection is the process of gathering and measuring information on variables of interest, in an established systematic fashion that enables one to answer stated research questions, test hypotheses, and evaluate outcomes.
- ✓ **Dependent Variable :**The variable that depends on other factors that are measured. These variables are expected to change as a result of an experimental manipulation of the independent variable or variables. It is the presumed effect.
- ✓ **Historical research :**One type of qualitative research is historical research, which involves examining past events to draw conclusions and make predictions about the future.
- ✓ **Hypothesis :**A hypothesis is a tentative statement about the relationship between two or more variables. It is a specific, testable prediction about what you expect to happen in a study.
- ✓ **Independent Variable :**The variable that is stable and unaffected by the other variables you are trying to measure. It refers to the condition of an experiment that is systematically manipulated by the investigator. It is the presumed cause.
- ✓ **Instrument and Instrumentation :**Instrument is the general term that researchers use for a measurement device (survey, test, questionnaire, etc.). To help distinguish between instrument and instrumentation, consider that the instrument is the device and instrumentation is the course of action (the process of developing, testing, and using the device).

- ✓ **Interpretation of data :**Interpretation of data refers to the task of drawing inferences from the collected facts after an analytical and/or experimental study.
- ✓ **Interviewing :**An interview is a conversation for gathering information. A research interview involves an interviewer, who coordinates the process of the conversation and asks questions, and an interviewee, who responds to those questions. Interviews are an appropriate method when there is a need to collect in-depth information on people's opinions, thoughts, experiences, and feelings.
- ✓ **Observation :**Observation is a systematic data collection approach. Researchers use all of their senses to examine people in natural settings or naturally occurring situations.
- ✓ **Problem statement :**A problem statement is the description of an issue currently existing which needs to be addressed. It provides the context for the research study and generates the questions which the research aims to answer.
- ✓ **Qualitative methods :**The word qualitative implies an emphasis on the qualities of entities and on processes and meanings that are not experimentally examined or measured [if measured at all] in terms of quantity, amount, intensity, or frequency. Qualitative researchers stress the socially constructed nature of reality, the intimate relationship between the researcher and what is studied, and the situational constraints that shape inquiry.
- ✓ **Quantitative methods :**Quantitative methods emphasize objective measurements and the statistical, mathematical, or numerical analysis of data collected through polls, questionnaires, and surveys, or by manipulating pre-existing statistical data using computational techniques. Quantitative research focuses on gathering numerical data and generalizing it across groups of people or to explain a particular phenomenon.
- ✓ **Questionnaire :**A questionnaire is a research instrument consisting of a series of questions (or other types of prompts) for the purpose of gathering information from respondents.
- ✓ **Reliability :**Reliability can be thought of as consistency. Does the instrument consistently measure what it is intended to measure?
- ✓ **Research :**The systematic investigation into and study of materials and sources in order to establish facts and reach new conclusions.
- ✓ **Research design :**The research design refers to the overall strategy that you choose to integrate the different components of the study in a coherent and logical way, thereby, ensuring you will effectively address the research problem; it constitutes the blueprint for the collection, measurement, and analysis of data.
- ✓ **Research methodology :**The process used to collect information and data for the purpose of making business decisions. The methodology may include publication research, interviews, surveys and other research techniques, and could include both present and historical information.
- ✓ **Research paper :**A substantial piece of academic writing, usually done as a requirement for a class, in which the author does independent research into a topic and writes a description of the findings of that research.
- ✓ **Research population :**A research population is generally a large collection of individuals or objects that is the main focus of a scientific query.

- ✓ **Research Proposal/Synopsis :**The goal of a research proposal is to present and justify the need to study a research problem and to present the practical ways in which the proposed study should be conducted. The design elements and procedures for conducting the research are governed by standards within the predominant discipline in which the problem resides, so guidelines for research proposals are more exacting and less formal than a general project proposal.
- ✓ **Research question :**A research question is the fundamental core of a research project, study, or review of literature. It focuses the study, determines the methodology, and guides all stages of inquiry, analysis, and reporting.
- ✓ **Sampling :**The action or process of taking samples of something for analysis.
- ✓ **Simple random sampling :**Simple random sampling is the basic sampling technique where we select a group of subjects (a sample) for study from a larger group (a population). Each individual is chosen entirely by chance and each member of the population has an equal chance of being included in the sample.
- ✓ **Stratified Sampling :**Stratified sampling refers to a type of sampling method . With stratified sampling, the researcher divides the population into separate groups, called strata. Then, a probability sample (often a simple random sample) is drawn from each group.
- ✓ **Survey research :**Survey research is the collection of data attained by asking individuals questions either in person, on paper, by phone or online. Conducting surveys is one form of primary research, which is the gathering data first-hand from its source.
- ✓ **Systematic sampling :**Systematic sampling is a type of probability sampling method in which sample members from a larger population are selected according to a random starting point and a fixed, periodic interval. This interval, called the sampling interval, is calculated by dividing the population size by the desired sample size.
- ✓ **The Abstract :**An abstract summarizes, usually in one paragraph of 300 words or less, the major aspects of the entire paper in a prescribed sequence that includes: 1) the overall purpose of the study and the research problem(s) you investigated; 2) the basic design of the study; 3) major findings or trends found as a result of your analysis; and, 4) a brief summary of your interpretations and conclusions.
- ✓ **The Conclusion :**The conclusion is intended to help the reader understand why your research should matter to them after they have finished reading the paper. A conclusion is not merely a summary of the main topics covered or a re-statement of your research problem, but a synthesis of key points and, if applicable, where you recommend new areas for future research.
- ✓ **The Discussion :**The purpose of the discussion is to interpret and describe the significance of your findings in light of what was already known about the research problem being investigated and to explain any new understanding or insights that emerged as a result of your study of the problem.
- ✓ **The Introduction :**The introduction leads the reader from a general subject area to a particular topic of inquiry. It establishes the scope, context, and significance of the research being conducted by summarizing current understanding and background information about the topic, stating the purpose of the work in the form of the research problem supported by a hypothesis

or a set of questions, explaining briefly the methodological approach used to examine the research problem, highlighting the potential outcomes your study can reveal, and outlining the remaining structure and organization of the paper.

- ✓ **The Literature Review :**A literature review surveys books, scholarly articles, and any other sources relevant to a particular issue, area of research, or theory, and by so doing, provides a description, summary, and critical evaluation of these works in relation to the research problem being investigated. Literature reviews are designed to provide an overview of sources you have explored while researching a particular topic and to demonstrate to your readers how your research fits within a larger field of study.
- ✓ **The theoretical framework :**The theoretical framework is the structure that can hold or support a theory of a research study. The theoretical framework introduces and describes the theory that explains why the research problem under study exists.
- ✓ **Thesis :**A thesis is a long piece of writing based on your own ideas and research that you do as part of a university degree, especially a higher degree.
- ✓ **Validity :**Validity is the extent to which an instrument measures what it is supposed to measure and performs as it is designed to perform.
- ✓ **Variable :**A variable is defined as anything that has a quantity or quality that varies.
